What's in this month's issue

- **Latest UCEM News** incl. - CIOB and UCEM team up to deliver an apprenticeship route to chartered status.
- **Things you need to know this week** – Industry responds to levelling up Secretary Michael Gove's call to commit to remediating fire safety failings in medium rise residential buildings.
- **Latest Research** from Savills, The Smith Institute, RICS, CBRE, Joseph Rowntree Foundation, and more.

Happy reading!

Issue 6 - June 2022

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness, and share good practice, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

"The mission of librarians is to improve society through facilitating knowledge creation in their communities"

(R. David Lankes)

The initial aim of this UCEM Library current awareness service was to help keep students and staff informed of the education sector and industry specific news, share current and best practice, highlight the latest research, and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [**email us**](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM News

CIOB and UCEM team up to deliver an apprenticeship with a route to chartered status

- The Chartered Institute of Building (CIOB) and UCEM have teamed up to offer a degree apprenticeship programme which is also a route to chartered status.

© UCEM 2021

CIOB and UCEM have teamed up to offer a degree apprenticeship programme which is also a route to chartered status as a construction professional.

Apprentices already on the Construction Site Management programme who are due to complete their end-point assessment in September 2022 will be part of the first cohort who can claim their apprenticeship certificate, degree and chartered member status with CIOB.

UCEM launched the Construction Site Management degree apprenticeship in 2020 and the timing of CIOB's acceptance onto the register of end-point assessment organisations in England means all apprentices on the programme will now be able to complete their end-point assessment with CIOB.

The level 6 Apprenticeship standards with CIOB can now deliver end-point assessments for are:

- Construction Site Management
- Construction Quantity Surveyor
- Design and Construction Management

The partnership between UCEM and CIOB will support the first cohort of Level 6 Construction Site Management degree apprentices in 2022. As part of this partnership, CIOB is offering the option of becoming a chartered member, able to use the post-nominal of MCIOB, for all apprentices. The process has been designed to be relatively simple, focusing on mapping evidence of the on-programme journey towards membership requirement.

For more on the apprenticeship, and details of how to apply, head to [UCEM's 'apprenticeship programmes' webpage](#).

UCEM programme leader shares research at prestigious international historic building conference

Policymakers from across Europe were in attendance for a presentation delivered by a UCEM programme leader on the carbon value of heritage.

Dr James Ritson, who leads on UCEM's MSc Building Surveying programme, shared his research at the 4th International Conference on Energy Efficiency in Historic Buildings (EEHB) in Germany last week (see publication date). More than 100 people attended in person with a further 50 tuning in online as building heritage experts presented their thoughts on applying sustainable solutions to existing building stock.

Access the article, '[UCEM programme leader shares research at prestigious international historic building conference](#)', in full.

UCEM's built environment sustainability revolution gathers momentum with short course reaching 1,000 registrations

The short course – launched in November 2021 – offers an insight into how the built environment professionals can be more sustainable in the workplace, exploring how net zero carbon can be achieved through optimised building design, sustainable material selections, and efficient construction.

The course comprises an introduction and five topics, namely:

(1) carbon in buildings, (2) passive design, (3) active design, (4) sequestration and offsetting, and (5) energy and carbon assessments.

[Back to top](#)

For more about the course, and to sign up, head to the '[Energy and Carbon in the Built Environment](#)' [webpage](#).

Our thoughts and prayers are with the people of Ukraine at this difficult time.

The All-Party Parliamentary Group for Libraries, Information and Knowledge (APPG) noted the '[Statement of Solidarity with librarians, archivists and information professionals in Ukraine](#)', produced by the Chartered Institute of Library and Information Professionals (CILIP) with signatures from more than 800 leading national institutions, including the British Library, the National Library, Wales, National Library Scotland and UCEM e-Library.

Both UCEM and CILIP, the Library and Information Association, and the professional body that I am a member of, have raised targeted resources to where they are most needed, i.e., via the British Red Cross DEC Ukraine Humanitarian Appeal, and International Rescue Committee DEC Ukraine Humanitarian Appeal.

In addition to the above statement CILIP have set up -

Support for Ukrainian information professionals &

The Ukraine Crisis Hub

- Ukrainian librarians and information professionals displaced by the invasion who find themselves in the UK are able to join CILIP free of charge and to access professional support including:

- Advice on finding work;
- Access to job listings;
- A one-to-one conversation with a specialist recruiter;
- Support from Specialist Interest Groups, and
- Free access to professional registration and continuing professional development.

Other News

Things you need to know this week: Call for rethink on housing association right to buy

- Media reports that government is considering allowing housing association tenants right to buy their homes at a discount prompt response from affordable housing bodies.

Affordable housing bodies have urged government to think again about bringing forward a right to buy initiative enabling housing association tenants to buy their homes at a discount, following media reports that it is set to revive the longstanding idea. National Housing Federation chief executive Kate Henderson pointed out that the principle of replacing every home sold has already been established as a 'red line' for housing associations and pilots "have demonstrated how difficult this is to achieve, as there is not enough money from sales to build new social homes." The Chartered Institute of Housing said in a statement, "At a time of rising living costs and increasing pressure on the housing system we need to be focused on building more social homes, not selling off existing stock". Polly Neate, chief executive of housing and homelessness charity Shelter slammed the idea, saying, "Right to buy has already torn a massive hole in our social housing stock as less than 5 per cent of the homes sold have ever been replaced."

Also, this month,

- Investor/developer Oxford Properties and developer Reef Estates have been named preferred development partner to deliver a planned life sciences hub close to Guy's Hospital at London Bridge, south east London. The site is adjacent to the Guy's campus in SE1, which is home to medical research institutions including King's College London and Guy's and St Thomas' NHS Trust. These, together with the foundation and local authority partners, form part of an emerging partnership, SC1, which aims to create a new health innovation cluster in the capital.

- Student accommodation provider Urbanest has signed a £148m green loan with LaSalle Investment Management to deliver an 852-bed development in Battersea, west London. As well as purpose built student accommodation, the scheme design by architect AHMM provides 65,000sq ft of office space, a business incubator, café, pub and community spaces, together with landscaped public realm. The green loan will be used to target a BREEAM sustainability rating of Outstanding for the student development and Urbanest is also designing the scheme to the low-energy Passivhaus Classic standard.

- Fund manager Moorfield Group has signed a development agreement with Melberry Developments, on behalf of Moorfield Real Estate Fund IV, for a 282-room student housing development

[Back to top](#)

in Colchester, serving University of Essex students. The nine-storey purpose-built student accommodation scheme is designed by architect HNW and engineer Campbell Reith and is targeting a BREEAM sustainability rating of Excellent. Alongside 282 cluster and studio rooms, the development will have social, study and gaming space, and indoor and outdoor fitness suites.

- Housing association Wandle has appointed construction company Higgins as development partner to deliver 93 affordable homes in Summerstown, in south west London. The development will provide 39 London Living Rent and 54 shared ownership homes and is expected to reach completion in 2025.

Case Study: Boosting biodiversity alongside housebuilding

- Provision of a country park at the new Trumpington Meadows neighbourhood in Cambridge has been good for biodiversity, residents and developers. The author of this article finds out how the park deliver.

After a decade of development activity, the Trumpington Meadows neighbourhood in Cambridge is now a thriving community. The development on the city's southern fringe now has more than 1,000 of its planned 1,200 homes in place – all delivered by Barratt Homes – as well as a primary school and local centre with essential shops. Alongside the new homes and amenities, development has enhanced the natural environment, being accompanied by a new country park that extends to almost 60 hectares.

Master developer Grosvenor and investor Universities Superannuation Scheme (USS) secured outline planning consent for the scheme from Cambridge City Council and South Cambridgeshire District Council in 2009, long before the principle of biodiversity net gain (BNG) entered policy debate. But the approach adopted here serves as a demonstration of the new BNG requirement, now enshrined in the Environment Act, and its potential impacts.

Challenges

Trumpington Meadows' homes and accompanying country park have been constructed on the 154-hectare former site of an agricultural research facility, once containing offices, greenhouses

[Back to top](#)

and areas of planting. Although brownfield, the site was located in the green belt and had to be removed from it to enable redevelopment. One section of the site, straddling the M11 motorway and following the River Cam, was set aside for green space through the local plan process, because of its environmental characteristics and potential to extend the river's green corridor, connecting to Grantchester Meadows. In all, 80% of consultant Terence O'Rourke's overall masterplan area is open space.

Solution

While Grosvenor was in the early stages of designing the park, it chose to appoint a partner to inform its design and to manage the end result. "Selecting the right partner was key", says Sharpe. "As well as creating the part, under the Section 106 agreement we have a 125-year obligation to maintain it, so we had to set it up in the right way." Its partner is the Wildlife Trust for Beds, Cambs & Northants (BCA), which is part of the national movement of wildlife trusts.

Having the trust on board early enabled Grosvenor and Terence O'Rourke to tap into its knowledge in areas like plant selection, provision of dog-free zones and long-term stewardship.

The final design for the country part comprises a series of green areas, extending from the north of the overall site, where the new homes are located, to the south, on the other side of the M11, which is accessed via a footbridge. Allotments and a kickabout area for children have been created between the country park and the housing.

The country park includes:

- Wet meadows and wetlands, which are home to a balancing pond, fed by a network of swales. The balancing pond discharges to the River Cam.
- Areas directly flanking the River Cam, where interventions have been kept to a minimum to preserve sensitive habitats. These areas extend further away from the homes and are expected to be less well used by the public.
- Grass meadows, which have been enhanced with wildflower planting. These have a network of paths and are expected to be more extensively used by the public, with one meadow area directly adjoining the homes.
- Woodlands and orchards.

The park also features several public artworks inspired by Saxon finds on the site. **Outcomes and learning** are also covered in this article.

Analysis: Impacts of government's drive for design quality

- An analysis of planning appeals has found the policy push for good design is making a difference, the author of this article reports.

Government's focus on design and beauty in planning policy is resulting in more local authorities being successfully advocated by the Place Alliance. The group looked at planning appeals before and after policy change was implemented last year, and found a notable reduction in the number of local authority refusals overturned by the Planning Inspectorate.

The study, [Appealing design](#), looked at the impact of the updated National Planning Policy Framework (NPPF) introduced last July (2021), which stated that "Development that is not well designed should be refused". "This means the test is now the achievement of good design and not just the avoidance of bad design", said Matthew Carmona, chair of the Place Alliance, professor at The Bartlett School of Planning at University College London and co-author of the report with Valentina Giordano, a lecturer also at The Bartlett.

Carmona and Giordano scrutinised 32 planning appeals for major housing-led proposals in England over 2021 where design had been the grounds for the original refusal, comparing and contrasting 12 appeals pre-dating the introduction of the updated NPPF with 20 that followed it.

"It was immediately apparent that a marked shift in the likelihood of local authorities successfully defending design-based appeals had occurred," Carmona said. The study found the odds of local planning authority success on design grounds improved from 5:7 against to 13:7 in favour, Carmona noted, "The shift was particularly apparent in the arguments used by Inspectors who, on the face of it, seemed to have been liberated to consider design on equal terms with other factors. In doing so, they regularly referenced the changed NPPF, as well as guidance in both the National Design Guide and National Model Design Code."

These findings, said Carmona, put paid to some of the common perceptions that have underpinned reluctance to refuse poor and mediocre housing design and indicate that "Design quality seems no longer to be set aside as a sacrificial lamb for other factors, whether that's housing numbers or viability concern."

At the report's launch, Joanna Averley, chief planner at the Department for Levelling Up, Housing and Communities (DLUHC), said the findings showed positive planning in action. "When we

[Back to top](#)

make national policy and when we strengthen that at a local level and apply good and solid decision-making to it, we get to really good outcomes,” she explained. That view was echoed by David Morgan, professional lead for planning appeals at the Planning Inspectorate, who called the study “a good shout-out effective policy” and said the Planning Inspectorate would look to build on it with its own research. RTPI president Timothy Crawshaw said the report’s findings were, “almost a eureka moment” and argued, “We now need to double down and ask for more.”

Developers already investing in design quality stand to be among the biggest beneficiaries of this shift, argued Justin Webber, senior building conservation officer at Leicester City Council, as poorer quality submissions should not be clogging up the planning system. “This report gives us some surprising answers and should give us hope that design is up on the agenda,” said Katja Stille, chair of the Urban Design Group, which along with Civic Voice, the RTPI, and Urban Design Learning supported the research.

Advice: Promoting use of electric vehicles

- With a growing number of electric vehicles being sold, councils need to expand charging infrastructure using their own sites and on streets, finds the author of this article.

Even during the Covid pandemic, when the overall sale of new vehicles dropped dramatically, purchases of electric vehicles (EVs) continued to increase at a rapid rate. Recent fuel price rises have made electric vehicles even more attractive to the customer.

Here are four points to consider to ensure a comprehensive charging infrastructure:

1. Promote a network of on-street chargers,
2. Include EV charging provision as part of local air quality action plans,
3. Minimise pavement obstructions, and
4. Council need to look at their land holdings for charging hubs.

Gain access to more detail information on each of these points, and read the article, ‘Promoting use of electric vehicles’ in full.

Education Latest

Criminalisation of Essay Mills

The passing of the **Post-16 Education Act 2022** into law on 28 April 2022 has criminalised the practice of essay mills in England, making 'cheat sites' and their promotion illegal in England. Sites offering assignments in exchange for money can be exploitative of students, with increasing reports of extortion, blackmail, and the sale of personal data.

Using such sites has always been a breach of UCEM's Academic Misconduct rules, punishable by penalties outlined in the [UCEM Academic Misconduct Procedure](#), but it is a great step forward that the unethical practice of providing and promoting these services is now illegal. That said, the sites still exist and are still contacting students so please continue to be vigilant and continue to promote academic integrity in the interests of our students.

The evolution of building surveying education during COVID-19

- In January and February 2020, as the pandemic was starting to gain momentum and spreading around the globe, universities in the UK were beginning to consider how to react. As a sector, UK higher education is relatively familiar with web-based methods of communication, teaching, and learning.

In fact, the University College of Estate Management (formerly the College of Estate Management) and the traditional home of RICS correspondence courses, operates their business totally online.

A lot of universities operate a Virtual Learning Environment (VLE) which allows them to communicate with their students and provides the opportunity to interact with them in terms of online courses and assessments, and as a depository for learning materials.

This is allowing the students to revisit the materials to embed or reinforce their learning or to catch up if a session was missed. Common VLE’s include Blackboard, WebCT, and Moodle. Their functionality and features are all relatively similar.

Although the physical libraries were closed, universities operate electronic libraries which offer access to a large number of electronic databases, and a growing number of books and journals, ensuring that the students and staff, can continue to access the majority of relevant information for their studies and research.

Latest News: Global Construction Review (GCR)
[May 2022]**Vinci awarded \$580m deal to build flood defences for Calgary**

- French contractor Vinci has been awarded a US\$580m contract to build a dam and contingency reservoir in the Canadian province of Alberta.

The Springbank dry-reservoir is intended to prevent the kind of disastrous flooding that struck the city of Calgary in 2013. **The event**, the worst in Canadian history, killed five people and caused around US\$4bn in damage.

The plan is to build a dam to divert water from the Elbow River away from Calgary and other populated areas of southern Alberta. A channel will be excavated to divert up to 600 cubic metres per second of floodwaters from the Elbow River. It has been estimated that the dry reservoir would take 72 hours to fill and 40 days to empty.

The Pathway to Lifelong Education: Reforming the UK's Skills System

- The UK has a longstanding skills problems which is impacting on economic growth. Adult participation in learning has declined, particularly among part-time students, while fewer people in work are taking up training to reskill or upskill. More

[Back to top](#)

generally, there is a shortfall in vocation and higher technical qualifications.

In this first report, with Ashley Wheaton, Principal, University College of Estate Management acknowledged as one of the contributing experts, the Lifelong Education Commission seeks to recommend how the barriers to adult learning can be removed; what future investment is needed to support this; and what change is needed to ensure the maximum flexibility that will benefit learners and deliver on the promise of a whole system change for lifelong education.

The Report makes a series of recommendations for reform, including:

- A single source of careers advice, to 'professionalise' and regulate careers information, advice and guidance
- Means-tested Maintenance Grants for learners over and above the Lifelong Loan Entitlement, in order to subsidise costs and encourage uptake, particularly among those for whom debt is a barrier
- The abolition of the Equivalent or Lower Qualification (ELQ) rules, to support retraining at higher levels
- Extending the Apprenticeship Levy to cover a wide range of high- quality training, including short modular courses, in order to provide additional flexibility and incentivise employer investment in skills training
- Stronger HE-FE partnerships to provide integrated pathways to higher-level skills; and alignment with industry and online providers to enable better coordination between schools, colleges, universities, and employers.
- Reform of the regulatory framework to simplify the jurisdiction between multiple qualification bodies;
- Learning lessons from Scotland, where 'articulation agreements' offer clear routes between FE and HE allowing students with Higher National Certificates and Diplomas to access the second or third years of degree programmes.

New guidance from CIRIA - Construction Industry Research and Information Association

CIRIA is pleased to announce [May 2022] new [free CIRIA practice guidance](#) and publications that include:

[*Code of practice for property flood resilience \(C790\)*](#) –

This guidance provides confidence on the use of the standards within the code of practice that provides a benchmark for those procuring and delivering property flood resilience (PFR).

[*The Management of advanced numerical modelling in geotechnical modelling \(C791\)*](#) -

This guide provides a framework for those who oversee the process, provide the information needed for this task and use the results of the numerical modelling.

[*Methodology for quantifying the benefits of offsite construction \(C792\)*](#) -

This guidance proposes a framework for comparing construction approaches, making it possible to keep consistent records across projects and identify all the possible benefits available.

Other guides include:

[*Retrofitting ground gas protection measure \(C795\)*](#) [*Grouted anchors and soil nails \(C794\)*](#)

Grenfell Tower Inquiry – latest developments

- The Grenfell Tower Inquiry was created to examine the circumstances leading up to and surrounding the fire at Grenfell Tower on the night of 14 June 2017.

[Latest update](#) [May 2022]

[Phase 2 hearings](#) – Inquiry hearings will resume on Monday 9th May at 10:00.

A timetable of the week is available via the [Grenfell Tower Inquiry website](#).

Drop-in sessions – The next monthly drop-in sessions for BSRs and members of the public will be on Thursday 26th May from 16:30-17:30 at the Inquiry Building

Phase 1 Report – The Inquiry has published its report on Phase 1 of its investigations.

Related Links:**Cladding: Panels failed fire tests 13 years before Grenfell -**

Leaked test results suggest the government and construction industry had early evidence of the dangers posed by cladding, 13 years before the Grenfell Tower fire.

Panels, commonly used on buildings in the UK, failed fire tests carried out in 2004. The Inquiry venue at 13 Bishop’s Bridge Road, London, W2 6BU. The results, marked “Commercial in confidence”, were circulated within an industry advisory group.

They were recently passed to the BBC (see publication date) and, until now, never made public.

Hundreds of thousands of flat owners are now threatened with large bills because of construction materials which pose a risk in fires.

The 2004 results were among the first from a British test of full-scale building systems, developed in the late 1990s when there were growing concerns in Parliament about the risks of cladding.

The tests were part of research commissioned the then Labour government to determine what standards building systems should have to meet.

Government details fire safety-related changes to planning system

- The government has released details of new requirements in the planning system to bolster fire safety in high-rise residential buildings, in response to the Grenfell Tower Fire.

The changes come in the Ministry for Housing, Communities and Local Government's (MHCLG) plans to introduce '[planning gateway one](#)', which it said would deliver on one of Dame Judith Hackitt's recommendations following her independent review of Building Regulations and fire safety.

The new requirements aim to ensure fire safety matters as they relate to land use planning are incorporated at the planning stage for schemes that involve high-rise residential buildings.

The changes, which come into effect from **1 August 2021** will:

- involve the Health and Safety Executive (HSE) becoming a statutory consultee before permission is granted for development which involves or is likely to involve a high-rise residential building.
- require relevant applications for planning permission to include a fire statement to ensure applicants have considered fire safety issues as they relate to land use planning matters such as layout and access.
- help inform effective decision-making by local planning authorities or the secretary of state so that those decisions reflect and respond to the needs of the local community.

The new requirements will be introduced by making amendments to the Town and Country Planning (Development Management Procedure) (England) Order 2015.

As announced in the Queen's Speech (11 May), the Building Safety Bill is also expected to be introduced this year, which will establish a new building safety regime in England.

GOV.UK, National Statistics - UK House Price Index [Last updated August 2021]

- The UK House Price Index is a National Statistic that shows changes in the value of residential properties in England, Scotland, Wales, and Northern Ireland.

The UK House Price Index (UK HPI) captures changes in the value of residential properties.

The UK HPI uses sales data collected on residential housing transactions, whether for cash or with a mortgage.

Properties have been included:

- In England and Wales since January 1995
- In Scotland since January 2004
- In Northern Ireland since January 2005

Data is available at a national and regional level, as well as counties, local authorities, and London boroughs.

The summary report contains:

- Headline statistics
- The economic statement
- Price changes
- Sales volumes
- The property status
- The buyer status for Great Britain (excludes Northern Ireland)
- The funding status for Great Britain (excludes Northern Ireland)
- Housing transactions distributions

Tackling mental health and wellbeing within the construction industry

The construction industry reports some of the highest levels of workplace mental ill health.

Over the last three years (see publication date) Mental Health First Aid (MHFA) England has been working with Building Mental Health, the Construction Industry Training Board (CITB) and the Lighthouse Club Construction Industry Charity to create a freely available, industry-wide framework and charter to tackle the mental health crisis in the construction industry.

Find out more about the social value of the programme

UCEM launches mental health strategy

UCEM published its first mental health strategy on 10 May 2021.

The strategy is designed to benefit both UCEM students and staff, having been written with input from both stakeholder groups.

At the core of the document is the vision which states: 'UCEM will take a whole institution approach to develop one community that enables students of all levels along with staff to prioritise mental health and wellbeing.'

'The UCEM community will be an open, supportive, healthy, and well-informed environment. It will work to tackle stigma, promote positive mental health, and provide appropriate, timely and easily accessible support to those who need it.'

There are five strategic aims supporting this vision which are:

1. to create a supportive whole university community that promotes positive mental health, and ensures mental health is a key strategic priority.
2. to ensure the UCEM community is informed and aware of the importance of good mental health and works to tackle the stigma surrounding mental health.
3. to ensure appropriate and timely support is provided to those who need it.

[Back to top](#)

4. to develop links with external support services and stakeholders
5. to use data to evaluate and monitor the effectiveness of mental health interventions and inform future strategic development.

For more details, take a look at [UCEM's mental health strategy document](#).

Access the article '[UCEM launches mental health strategy](#)' in full.

Understanding Mental Health in the Built Environment

In May 2020, the CIOB published their report on Understanding Mental Health in the Built Environment. The report, which surveyed people across the globe, presented harrowing statistics of high numbers of workers experiencing extreme levels of stress over a prolonged period, with many people reporting that they had considered taking their own life in 2019.

The report calls on professional bodies to do more to encourage mental health and wellbeing awareness among members, to develop globally applicable mental health resources that will increase understanding and reduce stigma within the construction industry.

Access the CIOB's latest report *Understanding Mental Health in the Built Environment*, including the results from the CIOB survey of over 2,000 professionals. [Access CIOB online Policy Portal](#), & '[CIOB surveys the sector to gather data on mental health & stress](#)'

How can buildings have positive impact on wellbeing?

Sustainable outcomes for buildings

The Royal Institute of British Architects (RIBA) has published

[Back to top](#)

guidance on targeting, designing, and evaluating sustainable outcomes for buildings, defining concise measurable set of eight sustainable outcomes that correspond to key UN Sustainable Development Goals and can be delivered on building projects of all scales.

Access the RIBA Sustainable Outcomes Guide**National Trust planning principles**

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone.

The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages, and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport, and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

Access the National Trust website**National Trust (NT) – “Our planning principles”**

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

Seeking to influence – The NT seek to influence the Planning system at local, regional, and national levels,

Supporting spatial planning – The NT support spatial planning which takes a holistic approach to its environment and its resources,

Sensible management – The NT promotes the wise management of the natural environment and built and cultural heritage,

Protecting our environment – The NT will seek to protect wild and remote landscapes from built development or urbanisation.

Using property management plans – In managing its land through management plans, the NT will support and help to achieve objectives,

Objecting to proposals, where appropriate – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include:

- Minimising resource use and generation of waste,
- Being energy efficient,

[Back to top](#)

- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape, and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and
- Encouraging community involvement and access.

[Read the National Trust Planning Principles](#)

The National Trusts' planning procedure

The National Trust have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

Case studies are provided.

New RIBA Plan of work 2020

RIBA Plan of Work 2020. This blog takes a look at the new RIBA Plan of Work 2020.

What is the RIBA Plan of Work? The RIBA Plan of Work was first published by the Royal Institute of British Architects (RIBA)

[Back to top](#)

in 1963. It originally provided a matrix to show the roles of participants in the design and construction processes.

It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

What changed in 2020? In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement.

This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly in use

- Digital technologies are now an integral part of our built environment. The choice is not when or if built assets will use technology, but rather how much will be used.

Building Information Modelling (BIM)

[UK BIM Framework – BIM Standards, Guides and Resources](#) - the overarching approach to implementing BIM in the UK, brought together by UK BIM Alliance, BSI and CDBB. The guidance is structured as indicated below:

Guidance Part 1 and **Guidance Parts A-F** support the implementation of the overall published ISO 19650 series. **Guidance Part 2 and 3** pick up on content specific to ISO 19650-2 and ISO 19650-3 respectively. Additional **guidance** is also available as part of the **UK BIM Framework** to support the transition to ISO 19650 and Government Soft Landings

[Access UK BIM Framework - Resources](#)

[Latest BIM+ News and Projects](#)

[May 2022] –

- **Projects – [BIM crucial to redevelopment of Bristol's historic print works](#), 29 April 2022.**

- The £35m mixed-use redevelopment of the iconic Everard's Printing Works in the historic quarter of Bristol into a four-star, 255-bedroom hotel, alongside new apartments and commercial premises, came with many conditions and considerations. BIM was the only option for the scheme's architect, Edinburgh-based AMA Studio.

Everard's Printing Works – project team

Client: Artisan Real Estate UK; **Architect:** AMA Studio; **Main contractor:** McAleer & Rushe.

About the project

Located a short walk from Bristol city centre, the site compared a mix of listed buildings and more modern structures, including the Everard's Printing Works building, with its art nouveau

[Back to top](#)

listed façade to be preserved and become the grand entrance of the new hotel.

Through careful and considered design, the majority of the building was redeveloped to create the four-star, 255-bed Clayton hotel, with single-storey extensions to five blocks providing additional hotel rooms and kitchen facilities.

Meanwhile, an enclosure for the courtyard was redeveloped to create a glazed atrium as the main focal public space in the hotel. Two further blocks were converted to create 24 residential apartments for sale while part of the basement car park was transformed into five commercial units for lease.

AMA was engaged by McAleer & Rushe, on behalf of Artisan Real Estate UK, to develop the design for the scheme, based on a previous planning scheme prepared by Alec French Architects. AMA's brief was to retain the listed façade and the sizeable concrete frame that made up the existing office buildings. In this way, the practice could retain the elements of historical significance and design a scheme with significantly lower embodied carbon than a new build.

Using Archicad, AMA had previous experience of working with McAleer & Rushe on a large BIM Level 2 office project. As such, the continued collaborative relationship between McAleer & Rushe's team and the practice's use of BIM allowed AMA to produce the necessary detailed design information for such a complex site, responding to unexpected site conditions as they arose.

[Back to top](#)**BIM in action: 2020's top five projects**

22 December 2020

- Hospitals, housing, hotels: BIM+ covered case studies of BIM in action in all sorts of construction projects across the world. Given what happened in 2020, it's not surprising that three of the most read case studies focus on hospitals.

2020's top five projects (and all covered within this and previous issues of *Knowledge Foundations*) incl.

1. [Sisk reap rewards of high-tech approach at Wembley](#)
2. [Finland's Hospital Nova uses VR to involve staff in building](#)
3. [NHS Nightingale Hospital, East London – how BIM played its part](#)
4. [Mace uses AI tech on Mayfair project to meet covid-19 safety challenges.](#)
5. [AI tracks work quality at Norway's Stavenger Hospital.](#)

[Access BIM+ that include project entitled, 'BIM in action: 2020's top five projects' available in full.](#)

Related BIM+ Projects

- **(1) Project:** [John Sisk relies on BIM best practice to deliver Malmo data centre](#), 2nd November 2020.

- John Sisk & Son is nearing completion on a data centre project in Malmo, Sweden. Adopting BIM best practice has been crucial to keep construction on programme given a fast-tracked programme amid the Covid-19 pandemic.

The John Sisk & Son team has nearly 40 years of experience in data centre construction and has brought a digital project delivery approach to the Malmo project.

Sisk highlights some significant outcomes:

- The Sisk team-built dashboards that stored live clash trend reports to track progress weekly, resulting in a 50% efficiency increase in the BIM management process compared to traditional, manual methods of construction coordination without the automating power of the cloud.
- The tight integration between BIM 360 Docs, Microsoft Power BI, and Sisk's own "Design Changes Control" dashboards provided the commercial teams with a faster way to visualise the cost and/or schedule impacts, reducing the overall take-off by a potential 40%
- By using BIM 360, the project continued uninterrupted as construction continued in Sweden during the Covid-19 pandemic.

[Back to top](#)

- **(2) Project: Finland's Hospital Nova uses VR to involve staff in building, 28th April 2020.**

Lead Contractor: The Central Finland Health Care District
BIM Tools: Tridify

- Innovative processes have been used in the co-design of Finland's new Hospital Nova using BIM models and involving more than 350 staff.

- **(3) Project: NHS Nightingale Hospital, East London – how BIM played its part, 5th May 2020.**

Client: Barts Health NHS Trust, Royal Free London NHS Foundation Trust

Lead Contractor: Lead Designer: BDF

BIM Tools: Autodesk Revit

- The UK's newest (see publication date) and largest hospital, based at the ExCel conference centre in London's Docklands, is designed to care for up to 4,000 people affected by Covid-19. The hospital is now in standby mode and will be used should cases in the London area rise again.

- **(4) Project: Mace use AI tech on Mayfair project to meet Covid-19 safety challenges, 1st October 2020**

- Work was already underway on Lodha's No 1 Grosvenor Square flagship project when the lockdown and then social distancing added to the normal construction challenges.

Client: Lodha; Main contractor: Mace

Balancing the many requirements of a building project – cash flow, cost, quality, and timelines – is always a significant challenge for project leadership. The Covid-19 pandemic made the balancing act even more intense, costing projects valuable time at the start of lockdown and requiring adjustments to ensure the health and safety of all personnel on site as production restarted.

- **(5) Project: AI tracks work quality at Norway's Stavanger Hospital, 21st June 2020.**

Client: Stavanger University Hospital

BIM Tools: 100% International open standards, compatible with Revit, ArchiCAD, Solibri and others

- Oslo-based BIM developer Imerso has been given responsibility to monitor work progress in one of the biggest public construction projects in Scandinavia.

Latest BIM news – 10th annual BIM report 2020 available

NBS 10th National BIM Report 2020 - The 2020 annual BIM report marks the 10th year of recording over 1,000 industry professional's view about BIM. It illustrates how usage and perceptions of BIM have changed since 2011, progress made as an industry, and anticipated changes in the next decade.

Construction Information Service (CIS) Insights

The latest edition [**May 2022**] of NBS CIS *Insights* focuses on – **Retrofitting and sustainability**, and covers:

- What is sustainable construction?
- Retrofitting and reuse: proactive, adaptive and expansive, and
- Things to consider.

Back to top

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

- Input from RICS Professionals ensure RICS surveys are leading indicators in the real estate industry.

Latest: Market Surveys - RICS [May 2022]**UK Economy and Property Market Update, February 2022**

- More interest rates increases on the way, but market sentiment remains upbeat for the time being.

Summary: Inflation pressures continue to grow leading to a shift in stance from the Bank of England. Despite the hikes in interest rates seen to date and the prospect of more to come, for now it is anticipated that the economy will remain relatively resilient. Consumers are expected to draw heavily on the built-up savings during the pandemic and business investment is seen picking-up on the back of the tax incentive introduced last year (2021). This is reflected in the feedback provided to recent RICS surveys of the construction sector as well as the commercial and residential markets which generally remain positive.

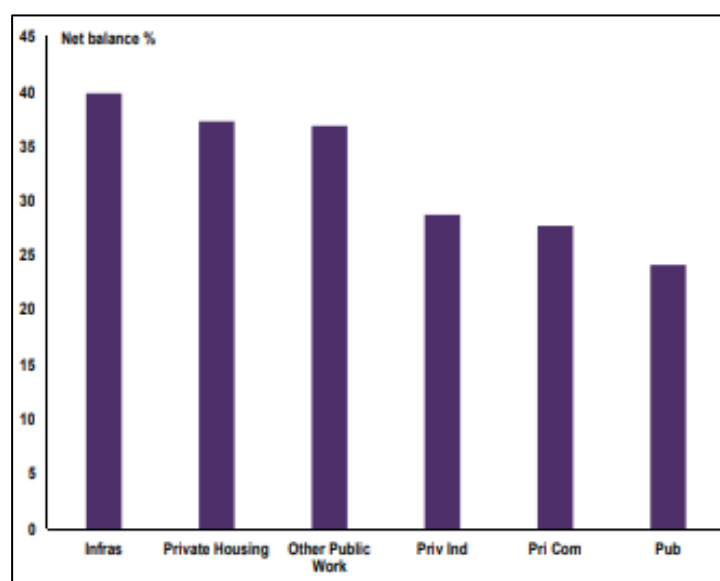

Construction Sector – If the feedback to the latest (see publication date) RICS Construction Monitor is anything to go by, sentiment generally remains positive across the sector with workloads rising particularly strongly in infrastructure and private residential. Chart 10 shows the workloads readings by sector and demonstrates the upbeat trend across all parts of the industry. A broadly similar message is evident in the January (2022) IHS Markit/CIPS Construction PMI which recorded its twelfth consecutive positive reading, as the commercial component

[Back to top](#)

climbed to a six-month high.

Forward looking indicators covered by the RICS survey paint an encouraging picture of the outlook, despite some of the ongoing macro challenges. New business enquiries remain strong while the one year out workload expectations numbers are firmly in positive territory in net balance terms. This broadly chimes with the latest forecasts from the Construction Products Association, which envisages industry output rising by a further 4.3% this year (2022) (following the 13% increase in 2021).

Chart 10: The RICS Q4 Construction Monitor shows a broad-based growth in workloads.

- Agreed sales rise over the month with expectations modestly positive regarding the near-term outlook

UK Residential Market Survey: [March 2022](#)

- Housing market activity remains resilient in the face of macro headwinds for the time being.

- Buyer demand and sales continue to rise at a modest pace in March,
- New instructions indicator turns positive for the first time in twelve months,
- House price growth remains firm at the headline level.

The March 2022 *RICS UK Residential Survey* results point to a continued moderate rise in housing market activity over the month, with respondents anticipating this picture will remain in place over

[Back to top](#)

the near-term. That said notwithstanding the general resilience in the latest survey statistics, contributors do appear cautious about the potential impact of macro headwinds on the market, with concerns on issues such as the rising cost of living and higher interest rates highlighted in the comments submitted.

At the national level, a net balance of +9% of respondents noted an increase in new buyer enquiries during March (2022). This marks the seventh consecutive positive monthly reading for this indicator, although the latest reading is a little softer than the figure of +16% returned in the previous iteration of the survey.

Alongside this, respondents cited a rise in the volume of fresh listings coming onto the sales market for the first time since March 2021. As such, while only marginally positive, the current net balance for new instructions of +8% brings the survey's metrics tracking changes in demand and supply more closely into line. Furthermore, contributors have now reported a flat to slightly positive year on year trend in the number of appraisals being undertaken in each of the past three months. That said, despite there being some more encouraging signs on the supply front of late, resulting in a small rise in the average number of properties on estate agents' books, the current level of inventory remains close to historic lows.

Meanwhile, agreed sales rose in March according to a net balance of +9% of contributors. This reading is unchanged from February and remains indicative of a steady upward trend in transaction numbers. Looking ahead, near-term sales expectations remain modestly positive, with the latest net balance coming in at +16% (compared to +11% previously). Further ahead, the twelve-month expectations indicator now points to a broadly stable outlook for residential sales volumes at the national level.

Going forward, respondents across all areas foresee further growth in house prices at both the three- and twelve-month time horizons, posting headlines net balances of +30% and +65% respectively. Over the next five years, contributors to the survey envisage house prices rising by just over 4% per annum, at the national level.

RICS - SPACIOUS 千居 Hong Kong Residential Monitor / Market Survey: [March 2022](#)

- Conditions appear to be stabilising with forward looking activity metrics now slightly positive.

- Headline Confidence Index largely recovers from the steep drop seen over the previous two reports,
- Price continues to slip over the month although expectations point to a stable trend twelve-months ahead, and
- Near-term sales expectations turn positive.

[Back to top](#)

Chart 1: Confidence Index*:

© RICS 2022

Source: RICS Economics Research: *RICS Hong Kong Residential Monitor – February 2022*, London: RICS, p1 - Chart 1.

* The Confidence Index is a composite measure capturing overall market momentum, encompassing variables on short-term price and sales expectations. The Home Price Perceptions Index measures the perceived monthly change in home prices as reported by survey participants, where March 2015=100. The Rent Perceptions Index measures the perceived monthly change in rents as reported by survey respondents, where March 2019=100.

The March 2022 *RICS-Spacious Hong Kong Residential Property Monitor* results point to much of the negativity seen in recent months diminishing, helped by a gradual easing in Covid related restrictions. Significantly, the headline Confidence Index (chart 1) retraced a lot of the ground lost in recent months, rising from -69 in February to record a reading of -7 in March. Although still slightly negative, this latest figure (see publication date) is consistent with a much more stable backdrop emerging.

Global Commercial Property Monitors, Q1 2022

- Real estate sentiment continues to improve in most markets.

- Headline Global Property Sentiment Index (CPSI) strengthens to best level since Q4 2019,
- Occupier metrics gain momentum after a period of lagging the recovery in investor sentiment,
- Industrials, data centres and multifamily remain popular but

[Back to top](#)

some appetite for offices and retail returning.

Chart 6: Perceptions on Phase of the Cycle:

© RICS 2022

Source: RICS Economics Research: *RICS Global Commercial Property Monitor*, Q1 2022, London: RICS, p3 - Chart 6

The results from the Q1 2022 RICS Global Commercial Property Monitor (GCPM) suggest that, on balance, sentiment amongst professionals working in the real estate sector continued to improve through the early part of this year (2022). This generally positive read comes in the face of ongoing challenges around Covid, albeit these have eased in some parts of the world, and emerging macro threats posed by an upsurge in inflation and the related response from central banks. In addition, war in Ukraine has provided an added layer of uncertainty and not just because of the impact on energy supply.

Monetary tightening not seen as posing immediate risk

There is no sense that credit conditions for commercial real estate have shifted materially. In response to the question on credit conditions included in the GCPM, less than a quarter of respondents suggested the picture was worsening at the current time. And it is noteworthy that responses from the US, where there has been much discussion about the turnaround in Federal Reserve policy, are broadly similar. The other series that can shed a light on this issue is the question around respondents' perception as to where their market is in the real estate cycle. The global results for this are captured in Chart 6 (shown above) and show the proportion of contributors seeing real estate in an upturn phase was little changed from the previous quarters at just over 40%.

Latest Statistics from the Office for National Statistics (ONS)

UK economy latest – A roundup of the latest data and analysis on the UK economy, business and jobs following Brexit and during the coronavirus (COVID-19) pandemic.

Construction Industry highlights include – Construction output in Great Britain: February 2022.

- Short-term measures of output by the construction industry, contracts awarded for new construction work in Great Britain.

What's covered in the latest bulletin?

- Monthly construction output decreased by 0.1% in volume terms in February 2022, which was the first monthly decrease since October 2021; this follows an upwardly revised 1.6% increase in January 2022.
- Anecdotal evidence from returns received for the Monthly Business Survey for Construction and Allied Trades suggested the storms experienced between 16 and 21 February 2022 resulted in projects being delayed, as more working days were lost on sites and premises than normal for this time of the year.
- The decrease in monthly construction output in February 2022 came from a decrease in repair and maintenance (0.5%) as new work saw a slight increase of 0.1% on the month.

Read the full statistical bulletin, 'Construction output in Great Britain: February 2022.'

Also: Construction statistics, Great Britain: 2020

- A wide range of statistics that are current available on the construction industry including the value of output, new orders by sector, number of firms and total employment, insolvencies and construction output price indices.

Latest Statistics from HSE – Health and Safety Executive

Latest Key figures for Great Britain (2020/21)

In 2020/21 an estimated 1.7 million workers were suffering from an illness they believed was caused or made worse by their work and 441,000 workers sustained a non-fatal injury at work. [Source: Self-reports from the Labour Force Survey]. However, the risk of injury and work-related ill health varies across industry, being more likely in some industries than others.

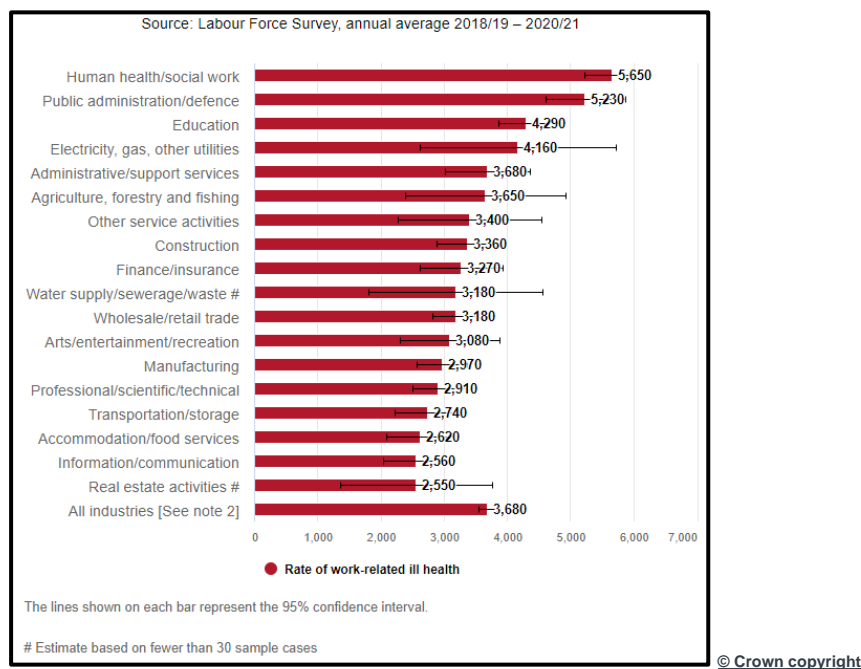

The chart below shows how the overall rates of self-reported work-related ill health and workplace injury vary between industry groups.

- While the chart shows the overall picture for each industry group, this may be masking differences at more detailed levels (for example, illness type or more detailed industry sub-groups).

Built Environment Research

Latest Policy and Research from:

1) Savills *Impacts – Real estate investment in 2022: global outlook*

- Market Trends: Savills.com, January 2022

Savills examine the global trends and in-demand assets for 2022

Sector investment outlook for 2022

- 2022 will be a turning point for retail, with repricing of recent years making the sector more competitive, at a time when retailers have better adapted to new ways of shopping. In much of Asia and in emerging markets, retail remains very much a core opportunity.

Back to top

- There is a potential in logistics in places where onshoring brings supply chains closer to home. Niches such as last mile have further to run.
- In the liquid and established office sector, the flight to quality will continue. Competition will be focused on assets that meet emerging environmental standards, while there is potential to redevelop or repurpose those that do not.
- Residential's rise will endure, a shortage of suitable stock driving forward funding strategies. There is potential in secondary cities as occupiers seek more affordable, liveable places.
- Ageing populations and an emphasis on health and wellbeing will support expansion in healthcare and senior housing, benefitting from long-term income potential.
- Data centres offer opportunity for portfolio diversification and there remains room for growth. Investors will be increasingly mindful of this sector's substantial environmental footprint, however.
- Life sciences offers significant potential for those with the know-how, with halo benefits for surrounding uses in knowledge hubs.

Decarbonising the real estate sector is an urgent and pressing need, a challenge that COP26 brought to attention. Consequently, Environmental, Social and Governance (ESG) considerations will increasingly define the investor agenda in 2022, and this year's COP27, held in Egypt, will only focus further on the issue.

More than ever before, cross-border investors in Europe are focusing on meeting ESG targets, with 'social', and 'governance' considerations driving investment decisions. This approach will only become more mainstream in 2022. In Europe, ESG is already actively shaping the assets and geographies in demand, a trend set to spread globally.

The looming challenge of bringing office stock up to new environmental standards is only one way we'll see this play out. Driven by both investors and occupiers, there will be opportunity to redevelop, reconfigure and repurpose stock that doesn't meet requirements.

Investment volumes

Real estate investment has shown resilience in the face of the pandemic. Global real estate investment volumes bounced back in 2021. Attractive among investors seeking diversified income streams, funds targeting real estate reached new highs last year, with more than 1,250 funds targeting \$365bn in capital between them, according to Preqin.

In the 12 months to November (2021), total real estate investment volumes were up by 38% on the same period the previous year. While office investment remains below pre-pandemic levels,

[Back to top](#)

volumes in the highly sought-after industrial sector are up 54%. We expect to see the strong performance of industrial to continue in 2022.

The big story for global real estate investment last year (2021) was that residential (namely multifamily, but also encompassing student and senior housing) became the largest sector for investment globally, overtaking offices for the first time (see chart, below – Share of total global real estate investment, by year).

Share of total global real estate investment, by year

Source: Savills (2022) *Market Trends: Real estate investment in 2022: global outlook* [online]. Available at: www.savills.com/impacts/market-trends/real-estate-investment-in-2022-global-outlook.html [accessed 25 February 2022]

Investors are attracted to its secure, income generating qualities, underlying demand and resilience against technological disintermediation. Strong demand is likely to continue in 2022, but a dearth of standing stock means that development will be the entry point for many.

2) Joseph Rowntree Foundation (JRF) -

- Inspiring Social Change: The Joseph Rowntree Foundation is an independent social change organisation working to solve UK poverty.

UK Poverty 2022: The essential guide to understanding poverty in the UK

Related topics – Housing; Work; Income and benefits

- This is the first issue of the JRF's new-style *UK Poverty* report, which looks comprehensively at trends in poverty across all its characteristics and impacts.

What is the picture of poverty at the start of 2022, coming up to two years after a global pandemic struck? To an extent the picture is unclear: we don't yet have official poverty data covering the pandemic period, and we know that the quality of the very surveys we rely on for this information were affected by the onset of the pandemic.

But many sources make it clear that while some groups have been well supported and face better prospects as we enter 2022 (see publication date), others face deep and persistent poverty. In a way this is much better than might be expected given the economic and social shock the country has been through.

We know poverty at any stage in life can lead to negative impacts and so it is critical to scrutinise the data thoroughly to work out who is worst affected, determine how trends are changing over time and see what future prospects are.

This report gives a clear statement, agreed by JRF's Grassroots Poverty Action Group (GPAC), that we need coordinated commitment, effort and action on the intersecting issues and challenges identified in this report. This can turn back the tide of poverty, and offer security for the many people experiencing hardship across the UK.

3) The Smith Institute

- The Smith Institute is a leading independent 'think tank' which promotes progressive policies for a fairer society. They provide a high-level forum for new thinking and debate on public policy and politics. Through research, reports, briefings, monographs, events, lecturers, education, and their website, the Institute offers a platform for thought leadership on a wide range of topics.

A Just Transition: Ensuring responsible investment for a just transition to net zero.

The Smith Institute (2021)

The Smith Institute supported the All-Party Parliamentary Group for Local Authority Pension Funds inquiry into 'Responsible investment for a just transition'.

This report is based on evidence sessions and written submissions to that inquiry from investors, industry, academics, community groups, trade unions, and other non-government organisations. The inquiry report seeks to inform politicians, policymakers, stakeholders and the public on the roles and responsibilities that investors can play, with the support of their members and government, in enabling a just transition to net zero carbon emissions.

What is just transition?

A just transition is broadly interpreted as a policy approach to climate action which seeks to ensure that the benefits

The following components of a just transition to a net zero carbon economy were described to the inquiry:

- It is about moving to a net zero carbon economy in a just way for society – and thus combines environmental and social considerations.

[Back to top](#)

- It is about the fair distribution of climate 'goods' (such as new jobs and cleaner air) and climate 'bads' (such as higher costs associated with decarbonisation and job losses in certain sectors and places).
- It is about maximising the opportunities of a green economy and mitigating the risks.
- The social dimension is about workers, consumers, supply chains and communities.
- It is about both the process and the outcome: engaging and involving stakeholders to ensure that all social groups have support and opportunities in transitioning to a net zero carbon economy.
- It involves a planned and orderly transition.
- It is a global issue, affecting UK and international communities and supply chains.

Also covered in this research:

- The financial materiality of a just transition
- What can investors do? and
- What can government do?

[Read the full piece of research, 'A Just Transition: Ensuring responsible investment for a just transition to net zero'.](#)

The Living Wage Dividend: maximising the local economic benefits of paying a living wage.

Hunter P (2021)

The economic fall-out from Covid has been substantial. However, it has not been evenly felt. This is especially true for the labour market with low paid workers more likely to see their hours and pay fall and more likely to be made unemployed or furloughed. Indeed, the pandemic has placed the spotlight on low pay and in-work poverty. Recent polling for the TUC, for example, showed how low-income workers have borne the brunt of the pandemic.

This report seeks to take forward the work of the Foundation's 'Living Wage Places' initiative, focusing on how to maximise the benefits of the Living Wage in towns, cities and city-regions across the UK. Using evidence-based assumptions, the report examines and quantifies how much individuals gain, how that wage uplift is paid for and what the local economic impact is likely to be based on moving 25% of low paid workers up to the Living Wage.

[Read the full piece of research, 'The Living Wage Dividend: maximising the local economic benefits of paying a living wage'.](#)

Planning for the recovery and the shift towards homeworking: implications for poverty in outer London

Hunter P (2021)

[Back to top](#)

This report, supported by Trust for London, examines the short and long-term implications of Covid on poverty and inequality in outer London, with a particular focus on employment, low pay, housing, and the shift towards homeworking.

The report acknowledges the devastating impact that the pandemic has had on the lives of outer London's five million residents – not least on people's health and well-being – but seeks mainly to understand the after-effects and explore the options for change.

[Read the full piece of research, 'Planning for the recovery and the shift towards homeworking: implications for poverty in outer London'.](#)

A National Housing Conversion Fund: buying properties to boost affordable housing supply

September 2020

The Smith Institute's Affordable Housing Commission published a report into the national housing conversion fund.

The report examines two main ways a ring-fenced National Housing Conversion Fund could be achieved. The first is targeting funds to purchase homes on the secondary (existing) market. It examines which housing markets – in broad terms – the investment might be best aimed at, factoring in how it could help improve housing condition and support jobs and growth.

[Read the full piece of research, 'A National Housing Conversion Fund: buying properties to boost affordable housing supply'.](#)

Falling behind: The impact of Universal Credit (UC) on rent arrears for council tenants in London

July 2020

This report was commissioned by Southwark Council, with the support of eleven other London local authority landlords and coordinated by London Councils. The research and report focus on two main questions:

- How has the roll-out of Universal Credit (UC) affected rent payment behaviours among residents in local authority-owned housing across London?
- How are identified changes in behaviour – or the absence of behaviour change – affecting the tenancies of those tenants who are receiving housing cost support under the new arrangements?

The report tells this story of financial stress through analysis of tenant rent accounts. The scale of the costs to social landlords is also apparent in escalating arrears after tenants make an effective UC claim.

[Read the full piece of research, 'Falling behind: The impact of Universal Credit on rent arrears for council tenants in London'.](#)

[Back to top](#)**Consumer Rights in the Private Rented Sector**

July 2020

This report sets out a new perspective on how we can improve the private rented market: by recognising the consumer gifts we're used to having in other markets, from utilities to financial services, and looking at how we might apply those lessons to the private rented sector.

[Read the full piece of research, 'Consumer Rights in the Private Rented Sector'.](#)

Making Housing Affordable after Covid-19: A follow up report from the Affordable Housing Commission

5) CABE – Chartered Institute of Building Engineers

Two new publications have been launched from the Competence Steering Group (CSG) in 2020 with the view to improving competence and driving culture change throughout the industry.

Setting the Bar – a blueprint to improve competence for those working on higher risk buildings and drive culture change has been set out by a cross-industry group representing more than 150 organisations, including CABE, in the fire and built environment industries.

Setting the Bar is the second and final report of the CSG and is an update of its Interim Report, *Raising the Bar* published in August 2019. The work was initiated by the recommendations in Dame Judith Hackitt's review *Building a Safe Future*.

Access *Setting the Bar* – Final Report

Competence Requirements for new role of Building Safety Managers

The competence requirements for the proposed new role of the Building Safety manager have been set out in a new 2020 report ***Safer people, safer homes: Building Safety Management***.

Under new legislation being introduced in the *Draft Building Safety Bill* published in July 2020, those deemed responsible in law for the safety of higher-risk building, such as the landlord, will be required to appoint a Building Safety Manager.

The role of the Building Safety Manager will be to look after the day-to-day management of fire and structural safety in higher-risk buildings and establish a clear point of contact for residents for fire and safety related issues.

Access *Safer people, safer homes: Building Safety Management*

Access the Chartered Association of Building Engineers for further information.

[House of Commons Library search](#) on '**construction industry**' identifies 18 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, Dec. 2019**' -

Abstract: Construction industry – employment, new orders, output. [Construction 2025](#), [The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more construction jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

MODUS

MODUS - the RICS magazine that brings you the latest news and views, expert advice and in-depth features spanning the breadth of the surveying profession around the world.

In the latest digital *MODUS* (**May 2022**), 'Net zero demands a generational shift in thinking' – RICS President Clement Lau discusses the importance of collaboration with a network of global professionals who can all learn from one another.

Subject Terms/Keywords: Learning and development; Projects and people; and RICS standards and guidance.

Latest articles within *Modus*:

- **Unreal estate: buying property in the metaverse** – Is digital land and property in the metaverse a viable alternative to investing in physical real estate? And what role do surveyors have to play in assessing and valuing virtual assets?

Subject Terms/Keywords: Commercial property; Commercial valuation; Residential valuation; Technology; Valuation; and Valuation of business and intangible assets.

- **Building the future: North America's pandemic recovery** – Experts give their strengths on how the pandemic has shaped the types of building projects taking off in North America.

[Back to top](#)

Subject Terms/Keywords: Commercial property; Economics; Facilities management; Running your business; Valuation; and Wellbeing.

- **Smarter ways to pass on property wealth** – It's crucial to keep on top of inheritance tax regulation to make sure no-one is hit with an unexpected bill when you die.

Subject Terms/Keywords: Finance and lending; Housing; Legal; personal property; and Residential.

- **Can the commercial property sector hit net zero** – Sustainability is high on the corporate agenda but companies must make tangible changes to drastically cut their carbon emissions.

Subject Terms/Keywords: Building control; Commercial property; Commercial valuation; Data management; Sustainability.

- **Are remote workers changing small communities?** - In North America, more than half of workers expect to be partly remote this year (see publication date) and beyond. Many of them are leaving the city behind for a house in the country.

Subject Terms/Keywords: Cities and placemaking; Personal property; Residential; Rural; Rural economy; and Wellbeing.

- **Dirty cash: tackling money laundering in real estate** – Property is a prime target for the proceeds of crime or corruption, but surveyors can be the first line of defence if they know what to look out for.

Subject Terms/Keywords: Finance and lending; Legal; Property finance and investment; RICS standards and guidance; Residential; and Valuation.

- **The rise of the chief sustainability officer** – The role of sustainability officer is now a key position for any company with serious ESG goals. Modus find out what part the built environment plays in their work.

Subject Terms/Keywords: Corporate real estate; Environmental management; Environmental surveying; Land and resources; Projects and people; and Sustainability.

- **Can Africa's new cities ease the strain on the old ones?** – Egypt's New Administrative Capital is part of a wave of new cities being built across the continent that hope to relieve the pressure on existing urban centres.

Subject Terms/Keywords: Building surveying; Cities and placemaking; Commercial valuation; Housing; Infrastructure; and Valuation.

- **How will self-build homes change the work of surveyors?** – Self-build homes could help ease the housing shortage but there are significant challenges and housing regulations may bamboozle

[Back to top](#)

Non-professionals.

Subject Terms/Keywords: Building surveying; Housing; Infrastructure and services; Land and resources; Residential; and Residential valuation.

- **‘Women are not equally represented in our sector’** – RICS President Clement Lau reflects on this year’s (2022) Women’s History Month and also welcomes the return of in-person events where industry professionals can meet and connect.

Subject Terms/Keywords: Learning and development; Projects and people; and RICS standards and guidance.

- **Buildings that elevated cities: V&A Waterfront** – Cape Town’s mixed-use harbourside development is hugely popular with locals and tourists alike. But it wasn’t always plain sailing for the maritime port.

Subject Terms/Keywords: Cities and placemaking; Commercial property; Marine environments; and Planning and development.

Please note: In addition to *MODUS*, RICS publishes other journals that are free to view online incl.

1. **Construction Journal** - The journal helps **quantity surveyors** and project managers with the technical and professional aspects of their day jobs and keep up to date with developments and practical matters in the profession. It covers topics including contracts, cost management, procurement, construction law and regulations, communications, and project management skills.
2. **Built Environment Journal** (Incl. Building Surveying, Building Conservation, and Building Control) - Coverage keeps practitioners in the disciplines of building surveying, building control, and building conservation up to date on the latest developments, products, standards, and guidance.
3. **Land Journal** - The journal emphasises the crossovers in these practice areas and their global nature, with articles contributed by experts from all over the ..
4. **Property Journal** - The journal contains high-quality technical material in clearly defined sections, as well as some material that crosses professional groups to reach a wider audience.

- *Journal of Urban Regeneration & Renewal*, and
- ***Corporate Real Estate***.

Corporate Real Estate Journal is the essential peer-reviewed, professional journal for corporate real estate executives.

Each quarterly 100-page issue publishes high quality articles and real case studies on new thinking, strategies, and techniques in corporate real estate. It cuts through the deluge of information facing corporate real estate professionals to deliver content, which is authoritative, practical, and relevant by providing a blend of genuine thought-leadership – which expands what can be achieved with corporate real estate – with detailed, actionable advice and 'lessons learned' from industry peers.

[Back to top](#)

In-depth articles and case studies scheduled for the new volume, **Vol 11 (2021-2022)** of ***Corporate Real Estate Journal*** incl.

Editorial: Safeguarding social wellbeing in the foreseen future of hybrid working.

Editorial thought pieces

1. The end of corporate real estate - revisited
2. The workplace post-COVID-19: Embrace the new normal or back to the future?
3. Diversity, inclusion, and effective business transactions

Practice papers

4. Workforce segmentation: Connecting workplace supply and demand,
5. Corporate headquarters leasing: Key considerations for a post-pandemic workplace,
6. New data sources in the age of hybrid work
7. Real estate-as-a-service: The servitisation-led transformation of corporate real estate
8. Change from crisis: CRE and smart building technology – the power duo supporting the hybrid work model
9. The innovation deficit: The importance of the physical office post-COVID-19.

Book review:

10. Elemental Change: Making stuff happen when nothing stands still by Neil User.

HSTalks

© Henry Stewart Talks Ltd 2022

HSTalks is a member of the Henry Stewart Group which has been a leader in providing graduate and continuing professional education in science, business, and management for over 40 years through peer reviewed vocational journals (such as the *Corporate Real Estate Journal*), conferences and online education for medical schools, business schools, universities, government, and commercial enterprises in over 60 countries around the world.

Henry Stewart Talks Ltd (HSTalks) provides specially prepared, animated, online, audio-visual lectures, seminar-style talks and case studies that accompany the 'Business & Management Collection' of e-Journals that the UCEM e-Library subscribes to.

Educational Journal titles and Open Educational Resources (OERs) reviewed by UCEM e-Library

Open Praxis – peer-reviewed open access scholarly journal focusing on research and innovation in open, distance and flexible education.

This work is licensed under a **[Creative Commons Attribution 3.0 Unported License \(CC BY 3.0\)](#)**.

[Back to top](#)

This latest *Open Praxis* issue includes eight articles: seven research papers and one book review, authored by 21 researchers from six different countries: Brazil, South Africa, Austria, USA, Turkey, and Malaysia. Keywords: open education; distance education; OER, MOOC, e-learning; online education.

Vol 13(3), that includes 7 research papers –

The first two papers present two qualitative studies developed in courses or modules taught at distance education universities. The next two papers are related to MOOCs, and then two research papers are tied to the COVID-19 pandemic and its impact on education.

Finally, the latest contribution is a book review undertaken by NorHafizah Ashar and M. Khalid M. Nasir (*Book Review of Evaluating Online Teaching: Implementing Best Practices*). The book was published in 2015 but gains relevance now that online education has become widespread.

Research articles include:

1. 'Assessment, Interaction and Technology in Distance Education: A Netnographic Study at a Brazilian Virtual University,
2. 'Fostering Symbiosis Between e-tutors and Lecturers of an English Studies Module at an Open Distance Learning University in South Africa,
3. 'OER Certification of Individuals and Organisation in Higher Education: Implementations Worldwide',
4. 'Systemic Tensions in the MOOC Design Cycle: An Activity Systems Analysis upon Implementing edX for Latin America and the Caribbean',
5. 'Surfing on Three Waves of MOOCs: An Examination and Snapshot of Research in Massive Open Online Courses',
6. 'A Classification Approach with Machine Learning Methods for Technical Problems of Distance Education: Turkey Example',
7. 'Faculty Support in Higher Education Provided by University Administration during Emergency Remote Teaching: A Case Study'.

European Journal of Open, Distance and E-Learning

(EURODL), an electronic, multi-media, open access journal. It publishes the accounts of research and presents scholarly work and solid information about open, distance, online and e-learning in technology-enhanced education and training in its most inclusive definition.

Published in the **Latest Issue of EURODL**, **Vol. 23 (2021): Issue 2 (Jan 2021)**, article titles include:

- 'Building Digital Capacity for Higher Education Teachers: Recognising Professional Development Through a National Peer Triad Digital Badge Ecosystem',
- 'Cultivating Self-Regulated Learning in Flipped EFL Courses: A Model for Course Design',

[Back to top](#)

- **'Transcript and Accessibility: Student Views from Using Webinars in Built Environment Education', by UCEM's Tharindu R. Liyanagunawardena**
- 'Vector AR3-APP – A Good-Practice Example of Learning with Augmented Reality',
- 'Educators' Digital Competence in Swedish Rural Schools',
- 'Proposition for the Introduction of the Concept Telemathesis in Videoconferencing in Distance Education',
- 'Developing E-Authentication for E-Assessment'
- 'Diversity of Students Testing the System in Higher Education'.

Online Learning Journal (OLJ), the official journal of the Online Learning Consortium (OLC)

The **Online Learning Consortium's** premier journal dedicated to the development and dissemination of new knowledge at the intersection of pedagogy, emerging technology, policy, and practice in online environments.

The OLC **Online Learning Journal**, latest edition, **OLJ 2022 Vol 26(1)**. This special issue is the first in OLC's 26th volume and contains a selection of papers advancing understanding of the Community of Inquiry (Col) model. Specifically, this special issue includes seven papers that develop new perspectives on conceptualizations and processes related to *cognitive presence*.

The first paper, by the pioneer of the Col framework, Dr. Randy Garrison, is a theoretical analysis on shared metacognition and its function within the community of inquiry theoretical framework. The next five papers in the issue are focused on empirical research that identify strategies to facilitate or analyse cognitive presence. These strategies include

1. self-regulation and co-regulation reflection strategies (Villanueva et al.),
2. case-based discussions and project-based collaborative learning (Ozogul et al.),
3. machine learning models and learning analytics (Lee et al.),
4. learning analytic-based elaboration feedback (Alwafi), and
5. a structured online peer evaluation system (Wilkinson).

The seventh and final paper in the special issue is focused on a systematic review that synthesized empirical research on ways to develop cognitive presence in online courses (Moore & Miller).

In addition to the special issue section, this issue of *Online Learning* also contains a series of articles accepted through our regular submission process. These articles examine MOOCs, blended learning, online instruction, remote education, and include additional research on other facets of Community of Inquiry framework.

Some of the articles include:

- 'Advances in Cognitive Presence: Introduction to OLJ Special Issue',
- 'Perceived and Actual Cognitive Presence: A Case Study of an Intentionally-Designed Asynchronous Online Course',
- 'Designing an Online Discussion Strategy with Learning Analytics Feedback on the Level of Cognitive Presence and Student Interaction in an Online Learning Community',
- "Simplicity is Key": Literacy Graduate Students' Perceptions of Online Learning.
- 'Fostering Cognitive Presence in Online Courses: A Systematic Review (2008-2020).

e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Research shows that high-performing organisations focus on diversity and inclusion (D&I). In any workplace, it is important to both understand and recognise the benefits that having a D&I workforce provides. It is integral to developing people within an organisation, serving clients as best we can, and playing an important leadership role in communities.

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success.

This book is essential reading for all property leaders and professionals working in the real estate and construction sectors. Readers will gain especially from personal reflections on all aspects of diversity by a broad range of people working in the property industry.

Real Estate: The Basics

Forsyth, J. and Wilcox, J. (2022) *Real Estate: The Basics*, Oxon: Routledge. ISBN-13: 9780367725433

Real Estate: The Basics provides an easy-to-read introduction to the core concepts of the industry to students new to the subject or professionals changing direction within the sector. Note: This book would not have been written if it were not for some students on UCEM's 'Property Transactions' module –some of them are anonymously quoted in the Introduction.

The book encapsulates the key 'need to know' aspects of Real Estate including the 'language' of real estate; its value and contribution to countries' GDP; its primary purpose, whether as an asset or as a resource; valuation concepts; asset classes; basic concepts of land law, and of landlord and tenant law; the increased role and importance of sustainability and technology; and an overview of the wide range of professionals involved in the industry.

Note: Introductory offer 25% off *Real Estate The Basics* for a limited period. Go to [Routledge.com](https://www.routledge.com) and use the code **REB25**.

Studying at a Distance

Talbot C (2010) *Studying at a Distance* [e-book]. Maidenhead: Open University Press, e-ISBN-13: 9780335238057

This essential guide provides practical help and support for those who have not previously studied at a distance and is ideal for students returning to study after a break. It covers fundamental issues such as motivation, goal setting, time management and coping strategies. Additional coverage in this edition includes specific information on the use of new technologies in distance learning; detailed coverage of referencing, citation, and plagiarism; description of using mind maps and other techniques for planning and writing essays or reports; support for disabled students, particularly those with dyslexia; and a further resources section.

UCEM e-Library Portrait

The aim of the e-Library

The aim of the e-Library is to:

- disseminate information, share good practices, and promote current awareness to assist in underpinning written work,
- add value and depth to our students' study experience, and
- support the continuing professional development of all those working and aspiring to work in the built environment.

© UCEM 2022

Source: UCEM (2022) *Getting started with the e-Library* [video], YouTube. Available at: www.youtube.com/watch?v=iEg8DFUFIfY&t=5s [accessed 31 March 2022].

At UCEM, we recognise that in an information-rich age and when everyone is pressed for time, it can be a challenge to find good-quality information when you need it.

Whether you are obtaining a qualification, undertaking CPD or researching a particular field, having access to a well-equipped library is essential.

The UCEM e-Library (accessed through the Virtual Learning Environment - VLE) is a comprehensive and valuable online resource, enabling students to access a wealth of subject-specific and credible information to support them throughout their studies and career development.

What resources are available in the UCEM e-Library?

The e-Library is made up of 11 sections and provides students with around the clock access to online searchable databases from key industry and educational sources, thousands of journals, books, and resources, UCEM's entire collection of study materials and published work and UCEM's dissertation library.

[Back to top](#)

The sections that make up the UCEM e-Library:

© UCEM 2017

Resources available within the UCEM e-Library include Up-to-date information and online searchable databases from –

Key educational sources that include- Taylor and Francis Online, Ingenta Connect, Henry Stewart Publications and HS Talks, vLex | Justis, Westlaw EDGE UK, EBSCO Business Source Premier, Emerald Insight - access to around 2600 e-Book titles and their entire 'Property Management and the Built Environment' collection of journals, and

Industry-specific sources that include- IHS's Construction Information Service, *Estates Gazette* (EG) digital journal and EG Radius, *Property Week*, RICS's BCIS – Building Cost Information Service and ISURV online information service, NEC - New Engineering Contract Academia, BSRIA – Building Services Research and Information Association, and more.

Where to find help - Overwhelmed by the sheer amount of information out there?

Not only do libraries provide us with books to read, but they are valuable tools and resources. The UCEM e-Library is continually striving for improvement and changing to meet the demands of today's technology and ever-expanding volumes of knowledge creation.

The e-Library is here to help make finding up-to-date, credible, and relevant information easier. Access the [2022 e-Library interactive brochure](#) for further information.

Building Better Property Professionals

© 2022 — Property Elite LLP

Property Elite's sole aim is to build better property professionals – supporting your career every step of the way, whether you are completing a RICS accredited degree course, your RICS Assessment of Professional Competence (APC) or simply seeking engaging Continuing Professional Development (CPD).

[Property Elite](#) provides training and CPD services for property professionals, including students, APC candidates and corporate clients.

Their Hot Topic Highlight blog posts will arm you with the information on the hottest topics – ready to tackle an important client meeting or begin revising for your RICS APC final assessment.

[Back to top](#)**This month [May 2022] the Hot Top Highlight – RICS Consumer Guide to Compulsory Purchase**

In this latest blog article, Property Elite takes a look at the [RICS Consumer Guide to Compulsory Purchase](#). Note: This is essential reading for all RICS APC and AssocRICS candidates involved with compulsory purchase.

What is compulsory purchase? Compulsory purchase is a legal process whereby part or all of a property can be acquired in the public interest, even if this is against the wishes of the property owner. Compensation is paid to the property owner in respect of the property or rights acquired.

What can compulsory purchased be used for? Compulsory purchase can be used to acquire privately owned land for new infrastructure, e.g., roads, railways or utilities, or for regeneration projects.

How are compulsory purchase rights created? Compulsory purchase rights are created by three types of Order, which must be authorised by the Secretary of State:

- Compulsory Purchase Orders (CPO)
- Development Consent Orders (DCO)
- Transport and Works Act Orders (TWAO)

These Orders create powers authorising the use of compulsory purchase for a specific projects (e.g., HS2) or more widely by a public body.

What are the stages of compulsory purchase?

- Consultation and engagement
- Land referencing
- Order application
- Objections and inquiry
- Authorisation
- Acquisition of land.

Building People

[Enabling connections for a competent, diverse, and valued built environment workforce](#)

© UCEM 2021

The aim of 'Building People' was to create a technology platform and collaborative network, that enables connections and seeks to reduce the skills shortages across the Built Environment. 'Building People', a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with employers seeking to plug the skills gap via an online platform.

[Back to top](#)

People Wiki:

What are you looking for?

© Building People 2021

The UK needs to build, but there is a shortage of competent and experienced workers, and the workforce we have lacks diversity. Building People joins the dots to help people find employers, opportunities, and resources, and to help employers engage with a more diverse range of talent.

People Wiki (a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.) is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities, and needs focused on diversity and inclusion, skills and careers, and social value.

Related Link:

UCEM incubate social enterprise, Building People, becomes a fully-fledged success story

Building People, whose mission is to improve equality, diversity, and inclusion in the built environment, is now an independent entity.

Since its inception in 2018, UCEM has provided the enterprise with office space, founder job security and donations totalling £150,000. This gave Building People the perfect platform to deliver its collaborative 'dot-joining' activity, connecting people to opportunities across the built environment and enabling employers to engage with a more diverse range of talent.

With strong levels of support coming in from across the sector, both parties are in agreement that now is the time for Building People to fledge the nest and become a separate entity.

It is an exciting time for the social enterprise as it announces its three-year plan, which focuses on five key areas:

1. **Profile:** Positioning Building People as the go-to source for equality, diversity and inclusion best practice and activities, and though leadership in the built environment,
2. **Partnerships:** Delivering maximum joined-up impact through the growth and development of Building People's supply and demand networks,
3. **People:** Enabling equality of opportunity through the provision of a simpler and more supported user experience in a fragmented careers landscape,
4. **Policy:** Aligning with and supporting the achievement and enhancement of relevant national sector policy and activity, and
5. **Planning:** Establishing a secure future of Building People as a sector-backed movement for collaborative change across the built environment.

Access the article '[**UCEM incubated social enterprise, Building People, becomes a fully-fledged success story**](#)' in full.

The Green Agenda

Within the Savills Market Trends – ‘Real estate investment in 2021: global outlook’ (mentioned earlier within this issue of *Knowledge Foundations*) they covered ‘The Green Agenda’ Despite the challenges of 2020, the rising importance of environmental, social and governance (ESG) credentials for investors has continued to grow.

Across the globe, governments are making ‘climate emergency’ declaration and commitments to meeting net zero carbon in certain timeframes. To honour these commitments, new investment into green technology, energy and much more has been announced but also an increasing amount of regulation.

Real estate is under the spotlight as the built environment accounts for 40% of carbon emissions across the world. This will present challenges but it’s also an opportunity for real estate investors to make a significant difference.

[Read the Market Trends – ‘Real estate investment in 2021: global outlook’, in full.](#)

UCEM signs up to CIC’s new ‘carbon zero’ climate action plan

UCEM is one of the institutions which has signed up to the Construction Industry Council’s (CIC) new climate action plan.

CIC’s Climate Change Panel, chaired by its deputy chairman, Stephen Hodder MBE, led on the initiative, with signatories to the plan agreeing that:

Carbon Zero: the professional institutions' climate action plan

The signatories to this Action Plan agree that:

- the actions listed are necessary for dealing with the challenge of climate change;
- they will implement those actions appropriate to them as an institution/organisation; and
- they will support the other signatory institutions and organisations in delivering the remaining actions

© CIC 2021

[Back to top](#)

The document, entitled 'Carbon Zero: the professional institutions' climate action plan', was released last week and coordinates the efforts of built environment institutions in meeting the UK government's 2050 net zero emissions target.

To read the plan, head to the [CIC news story – 'CIC launches a Carbon Zero climate action plan for Professional Institutions'](#).

UK sets 'most ambitious' climate target to cut emissions by 78% by 2035

[Image: courtesy Ed Hawkins]

(Climate stripes as shown in this image are sometimes referred to as warming stripes, or climate timelines and are data visualization graphics that use a series of coloured stripes chronologically ordered to visually portray long-term temperature trends.)

The UK government has set the 'world's most ambitious' climate change target into law to slash emissions by 78% by 2035 compared to 1990 levels. In line with the recommendation from the independent [Climate Change Committee](#), this sixth Carbon Budget limits the volume of greenhouse gases emitted over a 5-year period from 2033 to 2037, taking the UK more than three-quarters of the way to reaching [net zero by 2050](#). For the first time, this Carbon Budget will incorporate the UK's share of international aviation and shipping emissions.

On **Earth Day (22 April 2021)** Prime minister Boris Johnson urged countries to raise ambition on [tackling climate change](#) and join the UK in setting stretching targets for reducing emissions by 2030 to align with net zero.

The government is already working towards its commitment to reduce emissions in 2030 by at least 68% through the UK's latest Nationally Determined Contribution. The latest announcement builds on this goal to achieve a 78% reduction by 2035. The new target will become enshrined in law by the end of June 2021.

- **Raising the bar on tackling climate change**
- **Government must clearly map out how it plans to tackle the carbon emissions'**

QSAND and the Sustainability Goals

The UN Sustainable Development Agenda, adopted by world leaders in 2015, maps out a 15-year plan to fight inequality, end poverty and tackle climate change challenges.

Quantifying Sustainability in the Aftermath of Natural Disasters (QSAND) is a self-assessment tool to promote sustainable approaches and contributing to aid the achievement of several of these 17 goals in disaster affected global communities:

Libraries' contribution to SDGs

Agenda Vision: Universal literacy

Goal 3: Good health and wellbeing

Goal 4: Contribution to quality education

Goal 5: Culture

Goals 5, 9, 7: ICT skills and access

Goals 8 & 10: Decent work, economic growth, reducing inequality

Goal 16: Access to information

Note: Information plays a vital role in just about everything we do.

(UN.org 2022)

[Back to top](#)

Note: Use of Wikis as a reference site – Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source. It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

- 1) Remember that an encyclopaedia (which includes Wikipedia and any other Wiki) can be a good starting point for research and not an ending point.
- 2) An encyclopaedia can be good for getting a general understanding of a subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

(Connors State College 2022)

Book Review:

Climate Adaptation: accounts of resilience, self-sufficiency and systems change

Thakore, Dr. R., Barinaga E [et al.] *Climate Adaptation: accounts of resilience, self-sufficiency and systems change* [print book], Arkbound Foundation, ISBN: 9781912092123

- Where is the world really heading, and what can we do about it?

This book takes an unflinching look at climate change, drawing upon the latest data to analyse what the next decades hold in store. With atmospheric CO₂ at unprecedented levels and insufficient action being taken to prevent a rise in temperatures above 2 degrees centigrade, we are not just looking at significant disruption but the possibility of societal collapse. For the first time ever, the magnitude of this challenge is faced head on, with avenues to truly address it presented. Case studies and models from 16 authors around the world show ways that we can build adaptation and resilience, as well as what 'zero emissions' really mean. The book also provides a platform for those from a range of diverse backgrounds, whose unique experience and knowledge brings vital new perspectives.

Please note: Further information is also available later in *Knowledge Foundations* and can be found within the **UCEM e-Library Sustainability Hub**.

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice, and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers, and visual artists. By 'copying' the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party.

Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors. **Note:** UCEM holds a **CLA 'Higher Education Photocopying and Scanning Licence'**

[Access the Copyright Licensing Agency website for further information](#)

CLA Title Search tool

The [CLA Title Search tool](#) is an online search tool that lets you quickly find out what you can copy under your organisation's CLA licence. Whether you'd like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance.

- Copyright Licensing Agency (2018) **[CITE Magazine - A biannual magazine for the CITE Community, Winter 2018, No. 1](#)** [online].

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security.**

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's National Copyright Conference 2021

This national conference was held on 10th May and in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance. This conference provided an opportunity to delve deeper into copyright issues and gain a better.

[Back to top](#)

understanding of how policy impacts on libraries and the information sector and covered the following:

- The impact of Brexit on the copyright law in the UK.
- Responses to Covid in the provision of access and use of copyright resources.
- The crucial role of the copyright exceptions.
- Familiarised with key issues on the horizon such as Plan S.
- Current legislative, licensing and publishing related landscape and the latest copyright research and how these might impact your day-to-day work.

Sessions covered broad copyright impact for the profession incl.

- **Keynote: Who's afraid of the copyright wolf: research, access, and respect**

Much of the digitisation landscape is dictated by copyright, particularly for 20th century content. For researchers, this can create complex barriers to access to either individual collections item, or aggregated collections data, that are often confusing to navigate. For researchers working in the Digital Humanities, access to materials can dictate project direction, or the questions that can be asked via digital methods. In this talk, *Professor Melissa Terras*: Professor of Digital Cultural Heritage, University of Edinburgh reflected on how copyright has shaped her research projects - and also, how the perceived boundaries of copyright affect the research environment. The fear of copyright affects both researchers and institutions: Terras asks if the framing of forceful copyright restrictions can also be replaced with stressing the contribution institutions make to safeguarding and stewarding collections for ongoing research access.

- **Brexit, orphan works, and your next steps**

Naomi Korn: Naomi Korn Associates analyses the UK Government response to leaving the EU and its position on orphan works. Based on key questions Naomi is answering as part of her part-time PhD research at the University of Edinburgh, Naomi will outline next steps and suggest what you might want to think about doing next.

- **Exceptions to Copyright**

In this talk, *Dr Jane Secker*: Senior Lecturer in Educational Development, City, University of London, and *Chris Morrison*: Copyright and Licensing Manager, University of Kent spoke about the ways in which educational establishments have addressed copyright issues associated with the shift to online learning. They discussed the importance of educational exceptions as a vital supplement to the use of licensed resources to enable the use of images, printed materials, and audio-visual content to teach online.

[Back to top](#)

- **Open Access and Plan S**

The open access debate of the past two decades has raised issues around long-standing assumptions regarding copyright in scholarly journal articles. This has intensified as funders have looked to using rights as a way to promote greater open access. This talk by **David Prosser** *Executive Director, RLUK* looked at the current state of the debate through the lens of recent policy from cOAlition S.

- **Bumps in the road: copyright responses to COVID in Higher Education**

Many aspects of our daily lives have been disrupted in some way over the course of the pandemic and copyright services are no exception. For those of us working in higher education institutions the sudden shift to online resource provision has meant that we need to work to adapt and enhance our provision in response to the lack of access to physical materials. At the same time, we need to manage expectations in terms of the availability of online materials and educate both users and staff in a constantly changing environment.

This talk by **Claire Sewell**: *Research Support Librarian for Physical Sciences, Cambridge University*, and **Kate Faulkner**: *Law Faculty Librarian, Cambridge University*, looked at the copyright journey taken by Cambridge University Libraries over the course of the last year. It will highlight how the initial response to the emergency was developed into a successful service, the challenges we faced as a university library with legal deposit responsibilities and the potential legacy of these changes for our copyright service. It will conclude with some of the lessons learnt and planned next steps to ensure that we build a copyright service useful to all.

- **Share Copies Not COVID: Update on CLA Developments**

James Bennett: *Head of Rights and Licensing, Copyright Licensing Agency* provided an overview of CLA's latest initiatives in response to the pandemic, looking at developments since the 2020 CILIP Copyright Conference, including licence enhancements to help with online teaching in schools and universities, and CLA and PLS's support for the process of REF submission by HEIs.

- **Europeana's licensing framework: a standardised approach to deal with unharmonised copyright frameworks**

Europeana aggregates and displays digital cultural heritage from across Europe and beyond, and as such, is in touch with the diverse copyright challenges faced at the national level by cultural heritage institutions. During this session, **Ariadna Matas**: *Policy*

[Back to top](#)

Advisor, Europeana Foundation. will briefly introduce how Europeana showcases and uses digital cultural heritage, its central licensing system, the standardised tools that Europeana relies on, what the coming changes such as the CDSM Directive might bring to challenges that are left to be solved.

- **Brexit and Copyright - what does the future hold?**

In 2020, the UK was in a holding pattern with respect to Brexit. Although it had left the EU, the transition period meant that EU law continued to apply. With the expiry of the transition period on 31 December 2020, copyright stakeholders and policymakers are now experiencing the full implications of Brexit, both in terms of day-to-day practices and the longer-term vision for copyright law in this country. This presentation by *Dr Emily Hudson: Reader in Law, King's College London* does not seek to reventilate questions about whether Brexit was desirable. Rather, it asks what the future of copyright might look like. To answer this, it starts by explaining the current legal position in relation to the status of EU instruments and case law in the UK. It then identifies areas where EU harmonisation has been particularly significant and makes some predictions about the likely direction of UK copyright law over the coming years. Finally, it offers some views about the sort of copyright reforms that the UK should consider.

- **The Open University - challenges and opportunities with copyright and licensing**

In this talk *Priya Haria: Content, Licencing, and Intellectual Property Assistant, The Open University* will talk about the opportunities and challenges to The Open University in relation copyright and licencing. The effect of Covid19 has led other organisations to consider delivering courses online. Priya will be able to provide a unique perspective in this area because, The Open University is a worldwide leader in teaching and delivering courses online for a number of years. Priya will also discuss how copyright and licencing opportunities allow an organisation like The Open University to expand their reach in delivering courses.

Note: [CILIP National Copyright Conference 2022 – 18th May 2022](#)

The Challenges of Remote Working at Present

For those who work remotely all or part of the time already, you or your employer [depending on whether you are self-employed / freelancer or an employee] will have safeguards in place that enable you to operate securely when handling commercially sensitive or others' third-party data. The difference, in March 2020, is that at very short notice, organisations are having to move staff to homeworking often with literally hours' notice as the Government COVID-19 instructions are issued.

[Back to top](#)

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know](#).

The challenges of remote working at present and point to consider from a data privacy perspective.

Provided within this article are points to consider from a data privacy perspective that include:

1. **Have a clear statement to all staff** stressing that "The protection of personal data that we hold, and use is important to us and must be handled at all times in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we must adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instructions that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted." (Tullo 2020)
2. **Set out what use of data**, contact lists, customer documents are being allowed.
3. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using**.
4. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seems sensible at present] in line with experience and how staff report it is working.
5. **Reissue and emphasise your usual security arrangements –** Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household.
6. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed.
7. For the **weekly reviews** – have your Senior Leadership Team note the number of staff using personal devices, any queries, or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
8. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
9. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
10. This is where a nominated Data Protection Officer (DPO) or Data Officer can support the senior team in the messaging to colleagues.

Regarding UCEM we have followed these pointers:

(i) A clear statement went to staff, and UCEM has a designated area within their central SharePoint site for Business Continuity Planning (BCP) that has the following folders containing

- Official Communications [Internal and External]
- Human Resources (HR) guidance and support
- Information Technology (IT) technical support, guidance, and documents

Data Protection guidance (incl. a new guidance note entitled, 'Processing Personal data when remote working'.

- The [UCEM Data Protection and Privacy Policies](#) have been updated and should be read in conjunction with IT Policies).
- & Hints and tips for working from home.

(ii) A retention and destruction schedule is in place that collates lists of data used within respective teams and departments; (iii) A register is kept of where staff are working from and equipment used; (iv) Regular online meetings and weekly All-staff keep everyone updated and ensuring regular communication; (v) IT provide regular updates and guidance; (vi) GDPR 2020 training has been launched to re-enforce the importance of knowing how data is used and where it is being stored, even if temporary so that risk is managed and assessed; (vii and viii) online equipment and collaboration tools are well established at UCEM as an online education provider, but are regularly monitored; (ix) As mentioned above, hints and tips for working from home are provided, & (x) UCEM has a designated Data Protection Officer (DPO).

Please note: There are regular updates -

- (i) On the [UCEM Website](#),
- (ii) **VLE Help Page** (for students), and
- (iii) within the **[UCEM Website Home > Supported Online Learning > e-Library](#)** current awareness services, incl. Information blog and ***Knowledge Foundations*** (for all).

#BE Informed

(iv) A short **[UCEM e-Library video](#)** (used within UCEM Marketing, **[Social Media business channels i.e. LinkedIn](#)** to promote the e-Library, *Knowledge Foundations*, regular information blogs, and more)

C

Campaign to Protect Rural England (CPRE) campaign for a beautiful and living countryside. They work to protect, promote, and enhance our towns and countryside to make them better places to live, work and enjoy, and to ensure the countryside is protected for now and future generations. CPRE [online]. Available at: www.cpre.org.uk [accessed 26 May 2022]

CBRE Research and Resources - CBRE sets the standard for global real estate research by providing clients with accurate and insightful market knowledge. CBRE [online]. Available at: www.cbre.com/research-and-reports [accessed 26 May 2022]

CPRE Resources provides the latest news articles, policy guidance notes, published reports and research surrounding the following - Countryside, Farming and food, Housing and planning, Energy and Waste, and Transport. CPRE Resources [online]. Available at: www.cpre.org.uk/resources [accessed 26 May 2022]

Centre for Architecture and Built Environment Research (CABER) seeks to develop innovative approaches, procedures, technologies, and techniques that support the design, management, reconfiguration, maintenance and operation of buildings, their fabric, and the environments they create. Note: CABER incorporates the previous Centre for Construction and Property Research (CPRC). CABER [online] and available at: www1.uwe.ac.uk/et/research/caber.aspx [accessed 26 May 2022]

The Center for Construction Research and Training (CPWR) is dedicated to reducing occupational injuries, illnesses, and fatalities in the construction industry through research, training, and service programs. CPWR [online] and available at: www.cpwr.com [accessed 26 May 2022]

Centre for Digital Built Britain (CDBB) is a partnership between the Department of Business, Energy & Industrial Strategy, and the University of Cambridge to deliver a smart digital economy for infrastructure and construction for the future and transform the UK construction industry's approach to the way we plan, build, maintain, and use our social and economic infrastructure. CDBB [online]. Available at: www.cdbb.cam.ac.uk/AboutDBB [accessed 26 May 2022]

Centre for Sustainable Energy (CSE) is an independent national charity that shares our knowledge and experience to help people change the way they think and act on energy.

CSE Resources [online] include - Reports & publications, Toolkits, Advice leaflets, Websites, *Energise* newsletter, Videos on The fundamentals, Improving your community building, Community-wide energy saving projects, Neighbourhood and low carbon planning, Renewable energy projects, and further Resources for schools and educators. Available at: www.cse.org.uk/local-energy/resources [accessed 26 May 2022]

Chartered Association of Building Engineers (CABE) is a member-focused non-profit organisation. CABE shares knowledge, raises standards, and develops professionals, enabling a professional construction sector that works to create better, safer, and more sustainable buildings that enhance people's lives. CABE [online]. Available at: <https://cbuilde.com/> [accessed 26 May 2022]

Chartered Institute of Building (CIOB) [online]. The Chartered Institute of Building is the international voice of the building professional, representing an unequalled body of knowledge concerning the management of the total building process. Available at: www.ciob.org [accessed 26 May 2022]

Chartered Institution of Building Services Engineers (CIBSE) – the prime source of expertise in the Building Services Industry. CIBSE [online]. Available at: www.cibse.org [accessed 26 May 2022]. N.B. Within the CIBSE website you can '**CIBSE - Search the Knowledge Portal**' covering themes such as BIM, Building Regulations, FM, Facades, Fire Safety, Lighting and Heating, Management, and project management, Residential, Sustainability, and more.

China Dialogue [online] – China and the world discuss the environment. Available at: www.chinadialogue.net [accessed 26 May 2022]

CIBSE Journal [online]. Available at: www.cibsejournal.com [accessed 26 May 2022].

CIOB Library Incl. Library and Information Services [online]. Available at: www.ciob.org/library [accessed 26 May 2022]

CIOB BIM+ online newsletter [online]. Available at: www.bimplus.co.uk [accessed 26 May 2022]

CIOB's Construction Management journal (formerly *Construction Manager*) [online]. Available at: <https://constructionmanagement.co.uk/> [accessed 26 May 2022]

CIOB's Global Construction Review journal [online]. Available at: www.globalconstructionreview.com/ [accessed 26 May 2022]

CIOB's Policy and Public Affairs portal [online]. Available at: www.ciob.org/industry/policy-research [accessed 26 May 2022]

The CIT-eA Project Creating Innovative Technology – Enhanced Assessments – a research project that explored ways to increase the number of assessments in Further and Higher Education using technology. The CIT-eA Project [online]. Available at: <http://citea.digitalinsite.co.uk> [accessed 26 May 2022]

Cities / buildings images database [online]. Available at: www.washington.edu/ark2 [accessed 26 May 2022] is a collection of images of buildings and cities from around the world aimed at students, researchers, and educators.

C-Link is a procurement software company who also provide resources (incl. guides, eBooks, and other materials) created to help you make more money on your construction project. C-Link [online]. Available at: www.C-Link.com [accessed 26 May 2022]

Commercial Real Estate Services (CBRE) is the world's largest real estate services provider, with a preeminent leadership position in virtually all key business centers globally. CBRE [online]. Available at: www.cbre.co.uk [accessed 26 May 2022]

Community-Led Housing (CLH) Toolkit: a resource for local authority and housing professionals' [online]. Available at: <https://clhtoolkit.org/> [accessed 26 May 2022]. This Toolkit provides a wealth of technical and non-technical information on a broad range of issues relevant to CLH. There are five Toolboxes, covering (i) Housing (ii) Communities (iii) Legal (iv) Planning and (v) Finance.

Confederation of British Industry (CBI) is the UK's premier business lobbying organisation, providing a voice for employers at a national and international level. CBI [online]. Available at: www.cbi.org.uk [accessed 26 May 2022]

Conference on Training in Architectural Conservation (COTAC) was formed in 1959 to improve the standard of education of everyone involved in building conservation, including craftsmen, professionals, and homeowners. COTAC [online]. Available at: <http://ihbconline.co.uk/cotac2> [accessed 26 May 2022]

COTAC Digital Bibliography [online]. Available at: http://cotac.global/digital_bib/ [accessed 26 May 2022]

Constructing Excellence (delivered with **bre**) is a platform for industry improvement to deliver excellence through clients, industry, and users through collaborative working. Resources include publications, tools, and newsletter. Constructing Excellence [online]. Available at: <http://constructingexcellence.org.uk/> [accessed 26 May 2022]

Construction Enquirer is a news website in construction. Construction Enquirer [online]. Available at: www.constructionenquirer.com [accessed 26 May 2022]

The **Construction Index** [online] provides a wide range of information services for the UK construction industry, that include a search engine of construction companies, daily construction news, market data, email newspaper letter, and Case Law analysis and legal commentary. Further information is available at: www.theconstructionindex.co.uk [accessed 26 May 2022].

Construction Industry Council (CIC) – The representative forum for the professional bodies, research organisations and specialist business association in the construction industry. CIC [online] and available at: <http://cic.org.uk> [accessed 26 May 2022]

The **Construction Industry Research and Information Association** (CIRIA) [online]. Further information and resources are available at: www.ciria.org/default.aspx [accessed 26 May 2022]

Construction Industry Training Board (CITB) is the training board for the construction industry and partner in Construction Skills, the Sector Skills Council. CITB [online]. Available at: www.citb.co.uk [accessed 26 May 2022]

Construction Manager is the magazine of the Chartered Institute of Building (CIOB) [online] and available at: www.constructionmanagemagazine.com/ [accessed 26 May 2022]

Construction News [online]. Available at: www.constructionnews.co.uk [accessed 26 May 2022]

Construction Products Association (CPA) represents the UK's manufacturers and distributors of construction products and materials. Construction Products Association [online]. Further information is available at: www.constructionproducts.org.uk [accessed 26 May 2022]

Construction Project Information Committee (CPIC), responsible for providing best practice guidance on the content, form, and preparation of construction production information, and making sure this best practice is disseminated throughout the UK construction industry. CPIC [online]. Available at: www.cpic.org.uk [accessed 26 May 2022]

Construction and Property Research Centre (CPRC), University of the West of England (UWE) – the CPRC's research activity is focused around the three inter-related stages of the built environment lifecycle, namely design, construction, and maintenance. Note: The UWE **Centre for Architecture and Built Environment Research** (CABER) now incorporates the CPRC.

Contractors World magazines (incl. *Contractors World International* and *Contractors World UK & Ireland*) are the leading international digital publications. Delivering site reports, equipment

reviews and comments of interest on the construction, mining, quarrying and related industries. Contractors World [online]. Available at: <http://cwmags.com/> [accessed 26 May 2022].

COPAC* exposes rare and unique research material by bringing together the catalogues of c.90 major UK and Irish Libraries. In a single search you can discover the holdings of the UK's national libraries (including the British Library), many University libraries, and specialist libraries. Note: From August 2019 Copac was replaced by [Jisc's Library Hub Discover](#).

Copyright Licensing Agency (CLA) [online]. The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]. The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners. Available at: www.cla.co.uk [accessed 26 May 2022]

Council for British Archaeology (CBA) is an independent charity bringing together members, supporters, and partners to give archaeology a voice and safeguard it for future generations. Archaeology for all [online]. Available at: <http://new.archaeologyuk.org> [accessed 26 May 2022]

[\[Back to A to Z\]](#)

D

Delta T [online] is the Building Services Research and Information Association's quarterly journal.

Designing Buildings Wiki [online] and available at: www.designingbuildings.co.uk/wiki/Home [accessed 26 May 2022] is an industry-wide, cross-discipline forum for finding and sharing information.

Designing Buildings Wiki – Student resources [online] and available at: www.designingbuildings.co.uk/wiki/Student_resources [accessed 26 May 2022] has a wide range of resources aimed at students of the built environment, as shown here.

Designing Buildings Wiki – Construction industry acronyms [online] and available at: www.designingbuildings.co.uk/wiki/Construction_industry_acronyms [accessed 26 May 2022] providing a list of commonly used construction industry acronyms.

The **Design Council** [online] champions great design that improves lives and makes things better and available: www.designcouncil.org.uk [accessed 26 May 2022]. See also [Inclusive Design Hub for the Built Environment](#) (a project of The Design Council).

Directory of Open Access Books (DOAB) is a service which harvests details of academic and mainly peer-reviewed books published on open access. DOAB [online]. Available at: www.doabooks.org/doab [accessed 26 May 2022]

Directory of Open Access Journals (DOAJ) covers all open access scientific and scholarly journals, using a quality control system to guarantee the content. DOAJ [online]. Available at: <https://doaj.org> [accessed 26 May 2022]
