What's in this month's issue

- **Latest UCEM News** incl. - UCEM presents top 2022 Property Awards prize to the leader of The Crown Estate.
- **Things you need to know this week** – London mayor issues warning to housing associations. GLA could withdraw funding from affordable housing providers failing to maintain homes.
- **Latest Research** from Savills, The Smith Institute, RICS, CBRE, Joseph Rowntree Foundation, and more.

Happy reading!

Issue 12 – December 2022

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness, and share good practice, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

“The mission of librarians is to improve society through facilitating knowledge creation in their communities”

(R. David Lankes)

The initial aim of this UCEM Library current awareness service was to help keep students and staff informed of the education sector and industry specific news, share current and best practice, highlight the latest research, and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [email us](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM presents top 2022 Property Awards prize to the leader of The Crown Estate

Sustainability, innovation and equality were the themes recognised at UCEM's 35th property Awards on Thursday 13 October 2022.

Held at the Institute of Directors in London, the event saw the prestigious 'Property Awards' presented to Dan Labbad, Chief Executive of The Crown Estate in recognition of his outstanding contribution to the property industry.

Before presenting his award, Amanda Clack, Executive Director CBRE and UCEM Chair of the Board of Trustees shared how Dan has been an active and passionate advocate for sustainability from early on in his career and is widely recognised for being a champion of change with his work around diversity, equity and inclusion. Amanda also expressed how Dan aims to use his role at The Crown Estate to give back.

In his speech, Dan reflected on where his passion came from and what his key drivers are. He also spoke of the UCEM's work, saying, "I want to recognise the wonderful work UCEM is going to educate the young people of this country because ultimately it's them that will help shape – and save – our collective future."

Access the article '[**UCEM presents top 2022 Property Awards prize to the leader of The Crown Estate**](#)' in full.

UCEM sails through third sustainability accreditation audit

UCEM achieved its best-ever score on its third successful SOS-UK Responsible Futures accreditation.

The accreditation evidence UCEM's commitment to embedding sustainability and social responsibility across the institution through a student-led audit. UCEM first [**applied for, and attained, the accreditation in 2018**](#) and followed this up [**with an improved score and reaccreditation in 2020**](#).

[Back to top](#)

The points threshold for accreditation is 200 out of 330 across 45 criteria. Having gained 227 in 2018 and 247 in 2020, UCEM's upward trajectory continued with a score of 272 awarded by the seven student auditors.

Jessica Gordon-Calvert, UCEM's Sustainability Engagement and Education Officer who led on the reaccreditation effort, commented: "It has been an incredible experience to work on UCEM's Responsible Futures submission this year (2022). The accreditation wouldn't be possible without the hard work and dedication of our staff and students.

Latest UCEM Article: 5 practical tips for saving energy costs

- We are in the midst of a cost-of-living crisis which has spread across the globe. Significant increases to the cost of food and energy have outstripped worker's salaries, and spiralling inflation has plunged countless into poverty. While the tenth days (see publication date) of COP27 focusses on the decarbonising our energy systems, we look at practical ways to save energy that can be actioned without spending too much money.

1. Avoid leaving appliances on standby
2. Draught-proofing windows and doors
3. User your thermostat effectively
4. Monitor your water usage
5. Invest in energy saving appliances, like an air fryer.

Further information on COP27 and access to the article in full is available within the 'Sustainability Hub' later in this publication.

UCEM gains indefinite degree awarding powers

UCEM's journey as an independent institution has gathered another significant milestone.

The institute has been successful in applying to the Office for Students (OfS) for permanent degree awarding powers – referred to as 'indefinite degree awarding powers' which is an authorisation

[Back to top](#)

given to higher education providers to grant awards without a time limit.

The indefinite degree awarding powers follows a decade of UCEM being awarded taught degree awarding powers which were renewable on a six-yearly basis.

The latest milestone paves the way for UCEM to apply for full university title.

UCEM **first gained taught degree awarding powers in 2012** when operating as The College of Estate Management. This was **renewed by The Privy Council in 2018**. Prior to 2012, UCEM had its programmes validated by the University of Reading and the Open University.

Access the article '**UCEM gains indefinite degree awarding powers**' in full.

UCEM Tutor shares research advocating greater adoption of renewable energy in Egypt

A UCEM Tutor engage with a captive audience of university, industry and government stakeholders on a trip to Egypt, sharing his research on renewable energy usage in the country.

Dr Muhammad Rana visited The British University in Egypt (BUE), based in Cairo, earlier this month (see publication date) to share insights from his British Council-funded research titled 'Investigating the barriers in the uptake of renewable energy in Egypt'. Both the UK and Egypt were represented in the 25-strong party of key stakeholders who attended the research event.

To learn more about the project, head to **the research website**.

Access the article '**UCEM Tutor shares research advocating greater adoption of renewable energy in Egypt**' in full.

Education Department implements successful anonymous forum post trial

Anonymous assignment forum posts could be here to stay after an encouraging pilot scheme led by two members of UCEM's Education Department.

UCEM Real Estate and Management Tutor, Hazel Lobo, enlisted the support of Learning Designer, Sharvari Balagatte Ramesh, after students on the Level 4 'Law for the Built Environment' module fed back that fear of appearing silly or not being sure whether to ask certain questions or not was stopping them from posting on the assignment discussion forum.

Access the article '**Education Department implements successful anonymous forum post trial**' in full.

Other News

Things you need to know this week: London mayor issues warning to housing associations

- Greater London Authority (GLA) could withdraw funding from affordable housing providers failing to maintain homes to high standards.

Mayor of London, Sadiq Khan, has warned London's affordable housing providers that they could lose access to funding if they fail to maintain their homes to high standards. The mayor's intervention follows a letter to City Hall's housing investment partners from the deputy mayor for housing and residential development, Tom Copley, sent in late September. In his letter Copley set out the actions City Hall will take if the government's Regulator of Social Housing issues either a non-compliant grade or a Regularity Notice against a housing provider. Both notices indicate that a provider has breached a consumer or economic regulatory standard. In extreme circumstances the Greater London Authority may limit access to funding to a specific set of projects, including those already under way, and in the most severe cases, withdraw all funding and revoke investment partner status.

Also, this month,

- Commercial property investment manager Orchard Street has announced the launch and first close of a £400 million impact fund focused on decarbonisation, community investment and wellness. Just under £90 million was committed to the Orchard Street Social and Environmental Impact Partnership (SEIP) at first close, with UK local government pension scheme pool, Brunel Pension Partnership, acting as the fund's cornerstone investor. The capital also includes co-investment committed by Orchard Street's partners and members of its senior team. The fund will focus on three areas: decarbonising existing buildings through an accelerated programme of refurbishment, investing in local communities using a proprietary place-based needs model and making buildings healthier for those who live and work in them by improving air quality, access to green space, wellness amenities, etc.

- Plans for a £5.3 billion inward investment project in Havering, east London, are set to be reviewed by Havering council's cabinet next week (see publication date). Under the proposal, 300 acres of the site would become a publicly accessible ecology park. It is estimated that the data centre would create 2,370 jobs, as well as generating a skills legacy and wider economic benefits.

- Oaktree Capital Management backed development lender Silbury Finance has provided a £22 million senior debt facility to developer Stonegate Homes, to enable delivery of a 100-home residential scheme in Hove, East Sussex. The 17-month facility, funded at 70

[Back to top](#)

per cent loan to gross development value (LTGDV), will support the developer's conversion of a vacant office block to provide 100 apartments for sale.

- Relentless Developments, the hospitality development company owned by former Manchester United and England footballer Gary Neville, has appointed consultant MAPP to advise on the commercial element of its Manchester mixed use scheme, No1 St Michael's. The commercial element will provide 200,000 sq. ft of workspace across nine storeys, alongside amenity spaces, dedicated tenant roof space and private terraces. A new public square will also be developed as part of the scheme.

Case Study: Creating a park on a city site

- The new park at the heart of Manchester's emerging Mayfield regeneration scheme has been created to respond to the aspirations of local people and delivered sustainably, finds the author of this article.

There's a new park in Manchester and it's the first to be created in the city centre for more than a century. The park is located in the emerging district of Mayfield, a new mixed use quarter being delivered next to Piccadilly station by Mayfield Partnership, a public-private joint venture of London and Continental Railways (LCR), Manchester City Council, Transport for Greater Manchester and developer U+I, part of Landsec.

Over the course of a decade or more, the 24-acre site – which through its history has been home to a historic textile print and dye works, a station with a parcel depot – is being redeveloped with 1,500 homes, 1.6 million sq ft of commercial space, 300,000 sq ft of retail and leisure space and around 14 acres of public realm. Industrial heritage is being retained and re-used, while the River Medlock crossing the site but concealed by buildings and partially culverted some 50 years ago, has been uncovered, restored and now meanders through the new 6.5 acre park.

Challenges

Creation of the park was enshrined in the strategic regeneration framework (SRF) established by Mayfield's public sector partners, with the private sector partner later joining the team and "supporting, embracing and delivering" on the objective, says Mike Harrison, delivery director at U+I. He continues, "The 6.5 acres of

[Back to top](#)

the part create a central place, around which to draw and grow development, with Mayfield being the catalyst.”

Rather than provide lead landscape architect and park designer Studio Egret West with their own ideas of what the part should be, the partnership went out to extensive public consultation and developed a brief around the public’s responses. “People said they wanted somewhere to throw a frisbee or kick a ball and where kids could play. They also wanted somewhere where they could see and experience wildlife,” says Harrison. The park needed to fulfil other functions, serving as a thoroughfare for walkers and cyclists, enhancing urban biodiversity and providing flood attenuation for the River Medlock.

Delivering the project brought its own challenges, particularly as it was happening through the pandemic, which added to the complications of sourcing materials and ultimately resulted in a two-and-a-half-year build programme being reduced to 18 months. While trees were sourced from Europe, orders for plants were placed with local nursery Lanes Landscapes before the contractor was on board, to allow adequate growing time.

Construction, nature and heritage were also a recipe for complexity. “A key challenge was the relationship between the physical works, the environmental consents to work in and around the river, which is a controlled waterway, and dealing with the things that we found, as we had to do a full archaeological dig.” recalls Harrison. “There was significant archaeological interest in the Victorian heritage as the site is a birthplace of the Industrial Revolution, and we had to make sure that was suitably recorded before being covered up.”

Solutions

The park, which opened in September, comprises a series of zones, including a children’s play area, a riverside walkway and a biodiverse ‘wildscape’. The play area incorporates such features as crawl tunnels and wheelchair accessible play equipment and is formed around six chimney-shaped towers, designed and built by a local company and inspired by Manchester’s industrial heritage.

Outcomes

The park is now well used and enjoyed by local residents and visitors and is reducing the risk of downstream flooding from the River Medlock.

Recycling and reuse of materials during construction has saved more than 240 tonnes of CO₂ and delivery has provided learning in how collaborative responses to challenges can help unlock opportunities for reuse and efficiency and ultimately generate sustainable value.

Analysis: Driving regeneration through investment zones

- The government has opened bidding for its new investment zones, although the proposal still presents questions, the author of this article finds.

In last month's (see publication date) mini-budget chancellor Kwasi Kwarteng set out plans to establish a string of new investment zones to drive growth and unlock housing across the UK. The means to driving those ends within the zones are, as the Treasury states, "lowering taxes and liberalising planning frameworks".

The government has officially launched the initiative, inviting host areas to register expressions of interest. It has also opened early discussions with 38 upper tier local authorities and mayoral combined authorities in England, from Cornwall Council to North of Tyne Combined Authority, which are keen to establish investment zones in their area. Specific projects and sites already being targeted in these early discussions include the High Speed 2 Interchange site near Birmingham Airport and the planned Gigafactory site near Coventry Airport. "These zones will build upon and reflect our £15bn Investment Prospectus published earlier in the year (see publication date)," explains Cllr Mike Bird, West Midlands Combined Authority portfolio holder for land and housing and leader of Walsall Council.

In Somerset, one area of focus is the former Royal Ordnance Factory site, near Bridgwater, now called Gravity, which is already designated as an enterprise zone and has potential to accommodate renewable energy generation, a rail terminal and up to 750 homes. Further west, Plymouth City Council is looking to zoning to help revive its city centre.

The government's proposal so far

Information issued so far by the government includes a **fact sheet, guidance** and the **expression of interest form**.

For host areas, the government's proposal includes:

- Greater control over local growth funding with, for example, a single local growth settlement for mayoral combined authorities in the next spending review period
- Strategic direction over the affordable housing fund
- Prioritised access to infrastructure funding

[Back to top](#)

For businesses, the government's proposal includes:

- Stamp Duty Land Tax relief on land and buildings bought for commercial/residential development
- 100% business rates relief on newly occupied and certain expanded premises for 25 years
- Zero-rate for Employer National Insurance contributions on new employee earnings up to £50,270 a year.

On planning, the government has yet to clarify measures, but has pledged to:

- Remove EU requirements that "create paperwork and stall development but do not necessarily protect the environment"
- Focus developer contributions on essential infrastructure
- Reduce consultation with statutory bodies
- Relax national and local policy requirements, but it says national policy on design, the green belt, heritage protection, public safety and building regulations will continue to apply.

This leaves a number of questions to be resolved and there is also debate about the likely success of the approach.

Further information and read the article, 'Analysis: Driving regeneration through investment zones' in full.

(Please note that you will need to register to access these stories in full, although you can 'Register free for limited access.' Visit the website, scroll to the base of the homepage, and note access route within 'Subscription and Registration').

Advice: Achieving low carbon new homes

- Building to Passivhaus standards can ensure energy consumption of new homes is much reduced, but initial plans and designs need to reflect the high environmental performance, finds the author of this article.

Councils and housing associations are increasingly concerned to tackle climate change and reduce the heating costs of their tenants. The Passivhaus standard aims to radically reduce the energy consumption of homes, making them very low carbon in operation. "The standard, developed in Germany in the 1990s is now increasingly being applied in the UK," says Alan Budden, architect and director at EcoDesign Consultants. "To achieve it, heat loss needs to be minimised and the use of solar gain maximised," he says. The homes also need to be airtight with a mechanical ventilation and heat recovery unit to create a comfortable internal environment. "For new homes to achieve the standard most efficiently, the energy performance when the occupiers move in needs to be considered from when the scheme is first planned," says Budden.

Here are the four key points to consider in achieving low carbon homes to meet the Passivhaus standard.

[Back to top](#)

1. Plan for Passivhaus

Some authorities now encourage the application of Passivhaus in new housing development. The South Downs National Park local plan recommends that 10 per cent of homes on larger developments are built to the standard. A private members bill before the Scottish Parliament would require all new homes to achieve Passivhaus standards.

The Passivhaus standard relies on high levels of insulation to reduce heat loss.

2 Maximise solar gain but also manage it.

One key principle of Passivhaus is to maximise the use of solar gain to minimise the need for additional heating in the home. “If possible, homes should be orientated north-south across a site so that they can benefit from the free heat,” says Alex Clifford, founder director of low energy design consultancy, Clifford Design.

With high levels of insulation and solar gain, the dangers of overheating in the summer are real, particularly with climate change and global warming.

3. Create a simple, compact housing form

Passivhaus standards can be achieved with most kinds of homes but if the building is compact it will be easier to get there. “A key consideration when designing a building to Passivhaus standard is the ratio of the façade to floor areas,” says Clifford. “If the building is long and narrow, more insulation will be required because of the larger surface area of the façade.”

A simple shape will also make it easier for the building to achieve the Passivhaus standard.

4 Integrate modelling and monitoring into the design and construction process

“As key part of the Passivhaus standard is modelling and monitoring to ensure that the heat loss is minimised and the airtightness is achieved,” says EcoDesign Consultants’ Budden. “The final tests confirm that the standard has really been achieved,” he says. “That will mean that the Passivhaus Trust can then certify that the scheme conforms to the standard.”

The evolution of building surveying education during COVID-19

- In January and February 2020, as the pandemic was starting to gain momentum and spreading around the globe, universities in the UK were beginning to consider how to react. As a sector, UK higher education is relatively familiar with web-based methods of communication, teaching, and learning.

In fact, the University College of Estate Management (formerly the College of Estate Management) and the traditional home of RICS correspondence courses, operates their business totally online.

A lot of universities operate a Virtual Learning Environment (VLE) which allows them to communicate with their students and provides the opportunity to interact with them in terms of online courses and assessments, and as a depository for learning materials.

This is allowing the students to revisit the materials to embed or reinforce their learning or to catch up if a session was missed. Common VLE’s include Blackboard, WebCT, and Moodle. Their functionality and features are all relatively similar.

Although the physical libraries were closed, universities operate electronic libraries which offer access to a large number of electronic databases, and a growing number of books and journals, ensuring that the students and staff, can continue to access the majority of relevant information for their studies and research.

Latest News: Construction Management (CM) (formerly *Construction Manager*) [November 2022] **Contractors call for ban on use of PIR board on internal ductwork**

- A group of contractors has called for a ban on the use of polyisocyanurate (PIR) -based insulation for internal applications.

Rigid PIT insulation boards are often used on external ductwork.

The [Thermal Insulation Contractors Association \(TICA\)](#) said it could offer a "cost effective and aesthetically pleasing finish" when used with external weatherproofing/cladding products.

Cost cutting

TICA said it suspected that some contractors are using PIR insulation on ductwork inside buildings to reduce costs. Phenolic duct insulation, which is a safer alternative, is also more expensive.

In addition to demanding a ban, the association also called for companies awarding contracts to "take more responsibility". It urged them to check the credentials of insulation materials inside their buildings.

[Back to top](#)

Chris Ridge, TICA's technical policy manager, said: "Are contractors who continue to use PIR boards on internal duct systems wilfully turning a blind eye, or are they ignorant of the facts concerning the products they are installing? Either way, the use of PIR board on internal ductwork systems needs to end.

Access and read the article in full, CM staff (2022) '[Contractors call for ban on use of PIR board on internal ductwork](#)', *Construction Management* [online], 2 November. How developers can prepare now for the Building Safety Act series:

How developers can prepare now for the Building Safety Act: Part 1 of 3

The Building Safety Act received Royal Assent on 28 April 2022. With aspect of the new regime unclear, this series of articles looks at what steps developers can take now.

How developers can prepare now for the Building Safety Act: Part 2 of 3

In Part 2, Shoosmiths discuss the dutyholder regime and look at the steps developers can take now to prepare.

How developers can prepare now for the Building Safety Act: Part 3 of 3

In this final part of this series, Shoosmiths take a look at the new gateway regime for higher risk buildings.

Keywords – Real estate, ESG, New How Perspectives, New How,

The future of build-to-rent market Real Estate Podcast series Podcast – Government policy BTR (Build to Rent)

The future of the BTR market from Shoosmiths' Living team:

Podcast series #1 – The future of BTR (Build to Rent)

Issues discussed in this podcast include: Performance of the sector; Rent collection rates; Challenges of lockdown restrictions; How buildings and amenity space will change as a result of the pandemic; and where the market is going.

Podcast series #2 – The future of BTR (Build to Rent)

Issues discussed in this podcast include: Ongoing attractiveness of the sector; Top three things to look for in a BTR scheme; Future challenges for BTR; The role of technology, and BTR housing.

Podcast series #3 – The future of BTR (Build-to-Rent)

In this podcast, the last in this series, issues discussed include: Planning reforms; Permitted development rights; Rise of residential in the high street; Fire Safety; and Rent controls / regulations.

The Pathway to Lifelong Education: Reforming the UK's Skills System

- The UK has a longstanding skills problems which is impacting on economic growth. Adult participation in learning has declined, particularly among part-time students, while fewer people in work are taking up training to reskill or upskill. More

[Back to top](#)

generally, there is a shortfall in vocation and higher technical qualifications.

In this first report, with Ashley Wheaton, Principal, University College of Estate Management acknowledged as one of the contributing experts, the Lifelong Education Commission seeks to recommend how the barriers to adult learning can be removed; what future investment is needed to support this; and what change is needed to ensure the maximum flexibility that will benefit learners and deliver on the promise of a whole system change for lifelong education.

The Report makes a series of recommendations for reform, including:

- A single source of careers advice, to 'professionalise' and regulate careers information, advice and guidance
- Means-tested Maintenance Grants for learners over and above the Lifelong Loan Entitlement, in order to subsidise costs and encourage uptake, particularly among those for whom debt is a barrier
- The abolition of the Equivalent or Lower Qualification (ELQ) rules, to support retraining at higher levels
- Extending the Apprenticeship Levy to cover a wide range of high- quality training, including short modular courses, in order to provide additional flexibility and incentivise employer investment in skills training
- Stronger HE-FE partnerships to provide integrated pathways to higher-level skills; and alignment with industry and online providers to enable better coordination between schools, colleges, universities, and employers.
- Reform of the regulatory framework to simplify the jurisdiction between multiple qualification bodies;
- Learning lessons from Scotland, where 'articulation agreements' offer clear routes between FE and HE allowing students with Higher National Certificates and Diplomas to access the second or third years of degree programmes.

Related Links:**Cladding: Panels failed fire tests 13 years before Grenfell -**

Leaked test results suggest the government and construction industry had early evidence of the dangers posed by cladding, 13 years before the Grenfell Tower fire.

Panels, commonly used on buildings in the UK, failed fire tests carried out in 2004. The Inquiry venue at 13 Bishop’s Bridge Road, London, W2 6BU. The results marked “Commercial in confidence,” were circulated within an industry advisory group.

They were recently passed to the BBC (see publication date) and, until now, never made public.

Hundreds of thousands of flat owners are now threatened with large bills because of construction materials which pose a risk in fires.

The 2004 results were among the first from a British test of full-scale building systems, developed in the late 1990s when there were growing concerns in Parliament about the risks of cladding.

The tests were part of research commissioned the then Labour government to determine what standards building systems should have to meet.

Government details fire safety-related changes to planning system

- The government has released details of new requirements in the planning system to bolster fire safety in high-rise residential buildings, in response to the Grenfell Tower Fire.

The changes come in the Ministry for Housing, Communities and Local Government's (MHCLG) plans to introduce '[planning gateway one](#)', which it said would deliver on one of Dame Judith Hackitt's recommendations following her independent review of Building Regulations and fire safety.

The new requirements aim to ensure fire safety matters as they relate to land use planning are incorporated at the planning stage for schemes that involve high-rise residential buildings.

The changes, which come into effect from **1 August 2021** will:

- involve the Health and Safety Executive (HSE) becoming a statutory consultee before permission is granted for development which involves or is likely to involve a high-rise residential building.
- require relevant applications for planning permission to include a fire statement to ensure applicants have considered fire safety issues as they relate to land use planning matters such as layout and access.
- help inform effective decision-making by local planning authorities or the secretary of state so that those decisions reflect and respond to the needs of the local community.

The new requirements will be introduced by making amendments to the Town and Country Planning (Development Management Procedure) (England) Order 2015.

As announced in the Queen's Speech (11 May), the Building Safety Bill is also expected to be introduced this year, which will establish a new building safety regime in England.

GOV.UK, National Statistics - UK House Price Index [Last updated August 2022]

- The UK House Price Index is a National Statistic that shows changes in the value of residential properties in England, Scotland, Wales, and Northern Ireland.

The UK House Price Index (UK HPI) captures changes in the value of residential properties. The UK HPI uses sales data collected on residential housing transactions, whether for cash or with a mortgage.

Properties have been included:

- In England and Wales since January 1995
- In Scotland since January 2004
- In Northern Ireland since January 2005

Data is available at a national and regional level, as well as counties, local authorities, and London boroughs.

The summary report contains:

- Headline statistics
- The economic statement
- Price changes
- Sales volumes
- The property status
- The buyer status for Great Britain (excludes Northern Ireland)
- The funding status for Great Britain (excludes Northern Ireland)
- Housing transactions distributions

Tackling mental health and wellbeing within the construction industry

© MHFA England

The construction industry reports some of the highest levels of workplace mental ill health.

Over the last three years (see publication date) Mental Health First Aid (MHFA) England has been working with Building Mental Health, the Construction Industry Training Board (CITB) and the Lighthouse Club Construction Industry Charity to create a freely available, industry-wide framework and charter to tackle the mental health crisis in the construction industry.

[Find out more about the social value of the programme](#)

UCEM launches mental health strategy

UCEM published its first mental health strategy on 10 May 2021.

The strategy is designed to benefit both UCEM students and staff, having been written with input from both stakeholder groups.

At the core of the document is the vision which states: 'UCEM will take a whole institution approach to develop one community that enables students of all levels along with staff to prioritise mental health and wellbeing.'

'The UCEM community will be an open, supportive, healthy, and well-informed environment. It will work to tackle stigma, promote positive mental health, and provide appropriate, timely and easily accessible support to those who need it.'

There are five strategic aims supporting this vision which are:

1. to create a supportive whole university community that promotes positive mental health, and ensures mental health is a key strategic priority.
2. to ensure the UCEM community is informed and aware of the importance of good mental health and works to tackle the stigma surrounding mental health.
3. to ensure appropriate and timely support is provided to those who need it.

[Back to top](#)

4. to develop links with external support services and stakeholders
5. to use data to evaluate and monitor the effectiveness of mental health interventions and inform future strategic development.

For more details, take a look at [UCEM's mental health strategy document](#).

Access the article '[UCEM launches mental health strategy](#)' in full.

Understanding Mental Health in the Built Environment

In May 2020, the CIOB published their report on Understanding Mental Health in the Built Environment. The report, which surveyed people across the globe, presented harrowing statistics of high numbers of workers experiencing extreme levels of stress over a prolonged period, with many people reporting that they had considered taking their own life in 2019.

The report calls on professional bodies to do more to encourage mental health and wellbeing awareness among members, to develop globally applicable mental health resources that will increase understanding and reduce stigma within the construction industry.

Access the CIOB's latest report *Understanding Mental Health in the Built Environment*, including the results from the CIOB survey of over 2,000 professionals. [Access CIOB online Policy Portal, & 'CIOB surveys the sector to gather data on mental health & stress'](#)

How can buildings have positive impact on wellbeing?

BSRIA's Henry Lawson discusses the importance of designing buildings that promote 'Wellbeing.' The theory sounds compelling but in practice, creating such building is complex.

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone.

The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages, and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport, and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

Access the National Trust website

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

Seeking to influence – The NT seek to influence the Planning system at local, regional, and national levels,

Supporting spatial planning – The NT support spatial planning which takes a holistic approach to its environment and its resources,

Sensible management – The NT promotes the wise management of the natural environment and built and cultural heritage,

Protecting our environment – The NT will seek to protect wild and remote landscapes from built development or urbanisation.

Using property management plans – In managing its land through management plans, the NT will support and help to achieve objectives,

Objecting to proposals, where appropriate – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include:

- Minimising resource use and generation of waste,
- Being energy efficient,

[Back to top](#)

- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape, and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and - Encouraging community involvement and access.

[Read the National Trust Planning Principles](#)

The National Trusts' planning procedure

The National Trust have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

Case studies are provided.

[Read how the National Trust engage in planning: The NTs' role as a developer.](#)

Foster + Partners Projects

Foster + Partners Projects – one of the most innovative architecture and integrated design practices in the world. Over the past four decades the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civil and cultural buildings, offices and workplaces to private houses and product design. By visiting their website, you can gain further information about their current and past work, upcoming projects, and gain access to their-

- Image gallery,
- Sketches and drawings,

New RIBA Plan of work 2020

RIBA Plan of Work 2020. This blog takes a look at the new RIBA Plan of Work 2020.

What is the RIBA Plan of Work? The Royal Institute of British Architects (RIBA) first published the RIBA Plan of Work.

[Back to top](#)

in 1963. It originally provided a matrix to show the roles of participants in the design and construction processes.

It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

What changed in 2020? In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement.

This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly in use

Autodesk and CIOB map the digital construction journey

Autodesk and the Chartered Institute of Building (CIOB) have prepared an infographic to help construction businesses visualise their position on the digital journey.

[Access more information, view the infographic and read the article, entitled 'Autodesk and CIOB map the digital construction journey' in full.](#)

[Access further information from CIOB 'Digital Construction'](#)

- Digital technologies are now an integral part of our built environment. The choice is not when or if built assets will use technology, but rather how much will be used.

Building Information Modelling (BIM)

[UK BIM Framework – BIM Standards, Guides and Resources](#) - the overarching approach to implementing BIM in the UK, brought together by UK BIM Alliance, BSI and CDBB. The guidance is structured as indicated below:

Guidance Part 1 and **Guidance Parts A-F** support the implementation of the overall published ISO 19650 series. **Guidance Part 2 and 3** pick up on content specific to ISO 19650-2 and ISO 19650-3 respectively. Additional **guidance** is also available as part of the **UK BIM Framework** to support the transition to ISO 19650 and Government Soft Landings

[Access UK BIM Framework - Resources](#)

[Latest BIMPlus News and Projects](#)

[November 2022] –

- **Projects – Digital's role in Seismic's modular school building success**, 19 September 2022.

- Completed earlier this year (2022), the Seismic school building at the BRE Innovation Park in Watford is a successful demonstration of the benefits of modular construction. But digital had a role to play too.

It was manufactured and constructed in just 10 weeks, using a set of standardised components including steel frame, connector block, and wall, floor, ceiling and roof cassettes.

Part of the Transforming Construction Challenge, the building was delivered by the Seismic consortium of seven companies. These were: offsite manufacturers McAvoy and Algeco; Tata Steel; project management consultancy Blacc; the Manufacturing Technology Centre; the National Composites Centre; and Specific (part of Swansea University).

[Back to top](#)

The consortium was created to develop design standardisation for schools to drive down costs, reduce lead times and radically improved productivity in offside manufacturing processes.

Even against typical modular construction methods, Seismic's results are impressive. Projects can be delivered up to 33% faster, with a 32% reduction in carbon and 47% better value.

Finding the right digital tools – With Seismic's programme divided into multiple work packages, McAvoy took on the responsibility of finding the best digital tools to help speed up the design and production process, and Archicad was chosen.

Working collaboratively – One of the challenges was finding the best way to work collaboratively, with each of the seven partners located in different parts of the UK. With most of the project taking place during the covid-19 pandemic, meeting in person was not an option. McAvoy needed an easy way of sharing the designs with the wider project team during Zoom calls. "Sharing models of IFC format, federation of the models for clash detection along with BIMx to present the models were essential for the project. It allowed us to easily communicate the design with all the consortium partners," Martin Harvey, head of design and technical service at McAvoy says.

Also covered in this article:

- Seamless use and Collaboration - the importance of having a tool that can integrate seamlessly with other technology.
- Dealing with change – e.g., when changes were made to the balcony, it was very easy to bring in the new solutions and render different cladding options.
- Speeding up design – The ambition for the digital work section within the Seismic project was to get a digital version of the building that was as good as the physical construction at the end.

Gain access to further information and full access to the project case study article, entitled '[Digital's role in Seismic's modular school building success](#)', Stanton, J., (2022) BIMPLUS Projects.

Other BIMPLUS Projects include:

- **Projects – BMW: the ultimate driving machine meets the digital twin**, 25 August 2022.

- Automotive giant BMW plans to have digital scans of all its vehicle plants worldwide completed by early 2023 as part of its digital twin plans.

Gain access to further information and full access to the project case study article, entitled '[BMW: the ultimate driving machine meets the digital twin](#)', BIMPLUS Projects.

BIM in action: 2020's top five projects

22 December 2020

- Hospitals, housing, hotels: **BIMPLUS** covered case studies of BIM in action in all sorts of construction projects across the world. Given what happened in 2020, it's not surprising that three of the most read case studies focus on hospitals.

2020's top five projects (and all covered within this and previous issues of *Knowledge Foundations*) incl.

1. [Sisk reap rewards of high-tech approach at Wembley](#)
2. [Finland's Hospital Nova uses VR to involve staff in building](#)
3. [NHS Nightingale Hospital, East London – how BIM played its part](#)
4. [Mace uses AI tech on Mayfair project to meet covid-19 safety challenges.](#)
5. [AI tracks work quality at Norway's Stavenger Hospital.](#)

[Access BIM+ that include project entitled, 'BIM in action: 2020's top five projects' available in full.](#)

Related BIM+ Projects

- **(1) Project: [John Sisk relies on BIM best practice to deliver Malmo data centre](#), 2nd November 2020.**

- John Sisk & Son is nearing completion on a data centre project in Malmo, Sweden. Adopting BIM best practice has been crucial to keep construction on programme given a fast-tracked programme amid the Covid-19 pandemic.

The John Sisk & Son team has nearly 40 years of experience in data centre construction and has brought a digital project delivery approach to the Malmo project.

Sisk highlights some significant outcomes:

- The Sisk team-built dashboards that stored live clash trend reports to track progress weekly, resulting in a 50% efficiency increase in the BIM management process compared to traditional, manual methods of construction coordination without the automating power of the cloud.
- The tight integration between BIM 360 Docs, Microsoft Power BI, and Sisk's own "Design Changes Control" dashboards provided the commercial teams with a faster way to visualise the cost and/or schedule impacts, reducing the overall take-off by a potential 40%
- By using BIM 360, the project continued uninterrupted as construction continued in Sweden during the Covid-19 pandemic.

[Back to top](#)

- **(2) Project: [Finland's Hospital Nova uses VR to involve staff in building](#), 28th April 2020.**
Lead Contractor: The Central Finland Health Care District
BIM Tools: Tridify

- Innovative processes have been used in the co-design of Finland's new Hospital Nova using BIM models and involving more than 350 staff.
- **(3) Project: [NHS Nightingale Hospital, East London – how BIM played its part](#), 5th May 2020.**

Client: Barts Health NHS Trust, Royal Free London NHS Foundation Trust
Lead Contractor: Lead Designer: BDF
BIM Tools: Autodesk Revit

- The UK's newest (see publication date) and largest hospital, based at the ExCel conference centre in London's Docklands, is designed to care for up to 4,000 people affected by Covid-19. The hospital is now in standby mode and will be used should cases in the London area rise again.
- **(4) Project: [Mace use AI tech on Mayfair project to meet Covid-19 safety challenges](#), 1st October 2020**

- Work was already underway on Lodha's No 1 Grosvenor Square flagship project when the lockdown and then social distancing added to the normal construction challenges.

Client: Lodha; Main contractor: Mace

Balancing the many requirements of a building project – cash flow, cost, quality, and timelines – is always a significant challenge for project leadership. The Covid-19 pandemic made the balancing act even more intense, costing projects valuable time at the start of lockdown and requiring adjustments to ensure the health and safety of all personnel on site as production restarted.

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

- Input from RICS Professionals ensure RICS surveys are leading indicators in the real estate industry.

Latest: Market Surveys - RICS [November 2022]

UK Economy and Property Market Update, August 2022

- Further deterioration in macro-outlook clouds prospects for real estate.

Summary: Interest rates are now being hiked aggressively with more to come to combat accelerating inflation. A likely resulting recession could see the economy shrink by more than two per cent according to the Bank of England. A shift in sentiment is beginning to filter into real estate markets although pricing generally remains resilient for now despite the uplift in borrowing costs. Meanwhile, in the construction sector, the immediate challenge remains the availability and cost of both building materials and labour rather than a drop in demand. That said, growth in workloads could begin to slow towards the back end of the year if projections for economy prove accurate.

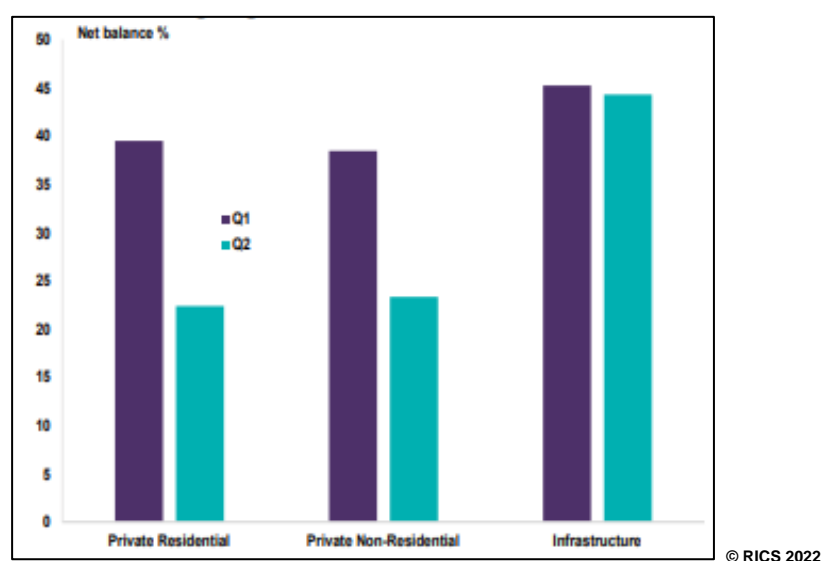

Construction Sector – The most recent official data for the sector (May) shows output some 5% up over the past twelve months and around 3.5% higher than in January 2020 (pre pandemic level). Inevitably, there is considerable volatility on a month-by-month basis particularly at a sector level. Nevertheless, when looked at over the last two and a half years (see publication date), the key drivers of the growth in output have been private housing rm&l (+20%), industrial (+18%), and infrastructure (+13.5%).

[Back to top](#)

By the way of contrast, commercial output has fallen (-21%) over the same period.

In terms of forward-looking indicators, the Q2 RICS Construction Monitor suggests that workloads will continue to grow over the next twelve months albeit at a somewhat lesser pace than currently (chart 10) in response to the more downbeat economic climate. Within this, infrastructure is viewed as likely to see the fastest momentum on the back of a number of significant projects that are currently under way (HS2, Thames Tideway Tunnel and Hinkley Point C).

Chart 10: The RICS Q2 Monitor suggests infrastructure workloads will see the strongest growth over the next 12 months

Source: RICS Economics Research: *RICS UK Economy and Property Market Update* (August 2022), London: RICS, p5 - Chart 10.

- Agreed sales rise over the month with expectations modestly positive regarding the near-term outlook

UK Residential Market Survey: [September 2022](#)

- Sales market continues to lose momentum amid deteriorating macro conditions.

- New buyer enquiries fall for a fifth month in succession,
- Indicators on new instructions and agreed sales also remain negative, and
- Limited supply supporting a modest rise in prices for now, although the pace of growth has faded markedly in the latest results.

The September 2022 *RICS UK Residential Survey* results are point remain indicative of the sales market losing momentum, with the outlook for interest rates and the uncertain macro picture more

[Back to top](#)

broadly taking a toll on activity. Indeed, at least in terms of the initial reaction, the impact from the expected rise in mortgage rates over the coming six months is anticipated to outweigh any potential boost from the recently announced cut to Stamp Duty. For the time being, house prices are still edging higher across the country, underpinned by the lack of stock available. Nevertheless, the pace of growth has moderated noticeably according to the latest survey feedback, while twelve-month expectations have now turned negative.

Looking at new buyer demand, an aggregate net balance of -36% of respondents cited a fall in enquiries during September (compared to a figure of -38% last time). As such, buyer enquiries have now fallen in each of the last five months, with all regions/countries of the UK now seeing a downward trend coming through.

At the same time, new instructions also remain in decline, evidence by a net balance reading of -13% being returned over the latest survey period (little changed from a value of -15% posted last month). As a result, stock levels are still at historic lows at the UK-wide level, with estate agents (on average) holding just 34 residential properties on their books. Moreover, given the fact that the net balance for market appraisals slipped to -20% (down from -3% in the previous iteration of the survey), it suggests that the pipeline for supply has if anything deteriorated over the past month.

For agreed sales, the latest headline net balance of -27% is consistent with a continued pull-back in sales volumes over the month. Furthermore, the September figure represents the softest reading for this series since May 2020, having fallen deeper into negative territory for five months in succession.

With respect to house prices, although the latest national net balance of +32% is indicative of a continued increase in prices over the three months to September, it does represent a noteworthy easing in the pace of growth (down from a read of +51% beforehand).

RICS - SPACIOUS 千居 Hong Kong Residential Monitor / Market Survey: [September 2022](#)

- Sentiment in the sales market turns more negative across the three districts.

- Price expectations drop further in all three districts,
- Lettings market sentiment still pessimistic with both rent performance and expectations turning weaker,
- New buyer enquiries continue to decrease as unsold homes pile up.

[Back to top](#)

Chart 1: Confidence Index*:

© RICS 2022

Source: RICS Economics Research: *RICS Hong Kong Residential Monitor – September 2022*, London: RICS, p1 - Chart 1.

* The Confidence Index is a composite measure capturing overall market momentum, encompassing variables on short-term price and sales expectations. The Home Price Perceptions Index measures the perceived monthly change in home prices as reported by survey participants, where March 2015=100. The Rent Perceptions Index measures the perceived monthly change in rents as reported by survey respondents, where March 2019=100.

The September 2022 *RICS-Spacious Hong Kong Residential Property Monitor* results show market sentiment falling further into the negative zone even with some COVID restrictions lifting. As is illustrated in Chart 1, The headline Confidence Index decreased from -53 to -68, recording the lowest reading since February 2020 when the COVID wave peaked. Facing the headwinds from the rising interest rates and slowing global economy, the headline indices of the three districts shown fell further.

[Read the latest RICS HK Residential Monitor: September 2022 in full.](#)

- *RICS-Spacious HK Residential Monitor* is a monthly guide to the trends in HK's housing market. The report is available from the [RICS website](#) along with other surveys covering global housing, commercial and land markets, as well as construction industry.

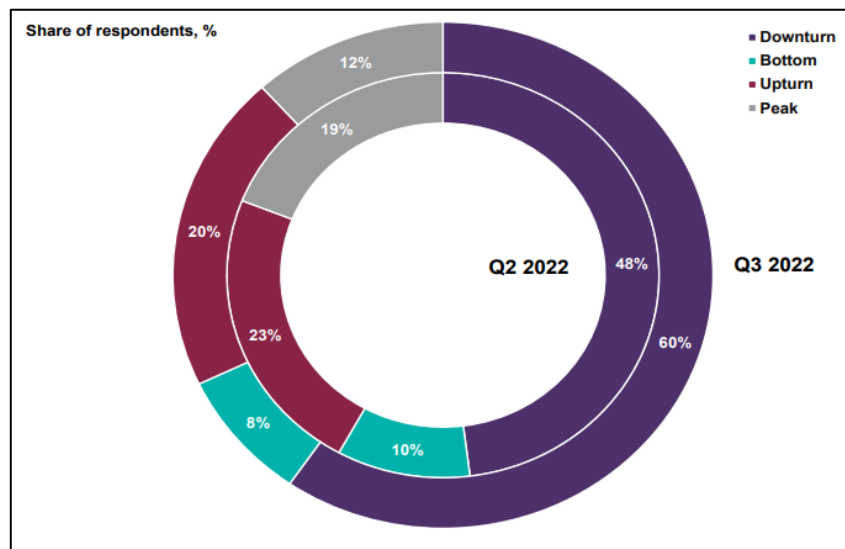

Global Commercial Property Monitors, Q3 2022

- Sentiment towards real estate turns more negative in general but some markets remain resilient

- The headline index capturing sentiment towards real estate at a global level slips a little further into negative territory,
- The size of the office footprint is viewed as likely to be scaled back by around 10% over the next twelve months,

[Back to top](#)

- Worsening credit conditions seen as likely to depress development starts,

Chart 6: Global Perceptions Regarding Point in Cycle

© RICS 2022

Source: RICS Economics Research: *RICS Global Commercial Property Monitor*, Q3 2022, London: RICS, p4 - Chart 6

A shift in tone to the feedback received through the *Q3 Global Commercial Property Monitor* was always likely in the face of the increasing uncertain macro environment. The surprise is that it is not more marked with the headline Global Property Sentiment Index (CPSI) slipping from -6 (in Q2) to -11. To put this in context, it is the most negative reading since the first quarter of 2021 when the pandemic was still raging but remains well above the lows recorded during the height of the Covid period. Interestingly, the slightly more negative feedback to the survey at a global level is evident both on the tenant and investor sides of the market, with the Occupier Sentiment Index (OSI) edging down from -5 to -10 and the Investment Sentiment Index (ISI) dropping from -6 to -12.

Different picture for the US and Canada in terms of expectations for the year ahead - Across Canada, respondents anticipate capital values coming under pressure over the near-term, with three-month expectations turning negative across both the office, and retail segments. There has been continued shift in perceptions around the current phase of the property cycle with 66% of respondents in the US feeling the market is now in the downturn phase (up from 52% in Q2), while 59% of respondents take this view in Canada (Chart 6). For the US, 64% of respondents feel the market is expensive, with an almost identical proportion in Canada, (65%) perceive pricing in the market to be too expensive.

Latest Statistics from the Office for National Statistics (ONS)

UK economy latest – A roundup of the latest data and analysis on the UK economy, business and jobs following Brexit and during the coronavirus (COVID-19) pandemic.

Construction Industry highlights include – Construction output in Great Britain: **August 2022**

- Short-term measures of output by the construction industry.

What's covered in the latest bulletin?

- Monthly construction output increased by 0.4% in volume terms in August 2022, which is the second consecutive monthly growth following the upwardly revised increase to 0.1% in July 2022; August 2022 is the second highest monthly value in level terms since records (£15,011 million), with May 2022 remaining at the highest level since records began in January 2010 (£15,035 million).
- The increase in monthly construction output in August 2022 came solely from an increase in new work (1.9%), as repair and maintenance saw a decrease (2.0%) on the month.
- At the sector level, the main contributors to the increase seen in August 2022 were infrastructure, private industrial and private housing new work, which increased 5.3%, 4.3% and 1.7%, respectively.

Read the full statistical bulletin, 'Construction output in Great Britain: August 2022.'

Built Environment Research

Latest Policy and Research from:

1) Savills Market Trends – Four trends shaping global retail real estate

- Market Trends: Savills.com, May 2022

From creative experiences to emerging markets, the author of this article examines four global trends that will shape the future of prime retail destination cities.

The pandemic undoubtedly created major challenges for prim retail spots in cities all over the world. Grappling with a series of domestic lockdowns and international travel bans, many

[Back to top](#)

destination cities struggled to sustain demand throughout 2020 and 2021. Footfall fell. Retailers took a close look at existing store networks. And rising vacancies led landlords to reconsider rental terms in some markets.

But with 2022 being the year that the world seems to be reopening (see publication date), as restrictions lift and tourists return, how might we see these prime retail destinations recover?

As our retailer attractiveness city ranking illustrates both the pace and shape of how destination cities recover is deeply nuanced. Those destination cities that benefit from a strong domestic market, such as New York and Shanghai, have already demonstrated far higher levels of resilience in the past 18 months, and look set for a far quicker bounce back.

Retailer attractiveness city ranking (selected cities)

Source: Savills (2022) *Market Trends: Four trends shaping global retail real estate* [online]. Available at: www.savills.com/impacts/market-trends/four-trends-shaping-global-retail-real-estate.html [accessed 15 July 2022]

Take New York, where the combination of the scale of its retail market and the affluence of its domestic consumers have pushed it to the top of the ranking, narrowly ahead of Paris and London.

In contrast, those cities dependent on a steady stream of inbound tourism have faced sharper declines, and are likely to face a longer road to recovery. In Hong Kong, for example, where tourism forms a key pillar of the city’s economy, rents fell steeply from Q4 2019 to Q3 2021.

By sparking this mixed recovery among key destination cities, the pandemic has highlighted a number of emerging markets that present exciting opportunities for retailers in the years ahead, primarily across the Middle East and China.

Despite the migration to e-commerce in many markets, the resilience of many of these destination cities serves to illustrate a broader point: that physical retail remains a key tool for both

[Back to top](#)

brands and retailers when it comes to reconnecting with their consumers, enhancing exposure and ultimately driving retail sales.

Yes, Covid-19 created inevitable challenges. But rather than result in a material shift in prime retail areas, it served more to accelerate previous trends – the rationalisation of store footprints by mass-market fashion brands, the emergence of experiential brand spaces, and a refocusing on key streets and city centres – rather than diminish the critical role played by physical retail.

Here are the four global trends that Savills predict will shape the future outlook of key retail destination cities:

- **Trend 1: Prime global cities will retain their status** – Though all major global cities faced challenges as a result of the pandemic, the key fundamentals of a successful prime retail destination don't look set to change.

- **Trend 2: Key emerging markets set to create expansion opportunities for retailers** – For those retailers looking to expand their global footprints, the new normal also looks set to elevate some key emerging markets up the ranking,

- **Trend 3: Retailers that sustained growth during the pandemic will fuel future demand** – While those retail sectors that struggled during the pandemic will likely use the next year to recalibrate and reconsider store expansion strategies, those that sustained or even grew sales during the same period look set to accelerate store expansion, benefiting from a rebasing in rents in some markets, and

- **Trend 4: From transactional to experiential stores** – A trend prior to the pandemic – and one set to continue – is the evolution of physical retail from a transactional space into an experimental, brand-building one.

2) Joseph Rowntree Foundation (JRF) -

- Inspiring Social Change: The Joseph Rowntree Foundation is an independent social change organisation working to solve UK poverty.

UK Poverty 2022: The essential guide to understanding poverty in the UK

Related topics – Housing; Work; Income and benefits

- This is the first issue of the JRF's new-style *UK Poverty* report, which looks comprehensively at trends in poverty across all its characteristics and impacts.

What is the picture of poverty at the start of 2022, coming up to two years after a global pandemic struck? To an extent the picture is unclear: we don't yet have official poverty data covering the pandemic period, and we know that the quality of the very surveys we rely on for this information were affected by the onset of the pandemic.

But many sources make it clear that while some groups have been well supported and face better prospects as we enter 2022 (see publication date), others face deep and persistent poverty. In a way this is much better than might be expected given the economic and social shock the country has been through.

We know poverty at any stage in life can lead to negative impacts and so it is critical to scrutinise the data thoroughly to work out who is worst affected, determine how trends are changing over time and see what future prospects are.

This report gives a clear statement, agreed by JRF's Grassroots Poverty Action Group (GPAC), that we need coordinated commitment, effort and action on the intersecting issues and challenges identified in this report. This can turn back the tide of poverty, and offer security for the many people experiencing hardship across the UK.

3) The Smith Institute

- The Smith Institute is a leading independent 'think tank' which promotes progressive policies for a fairer society. They provide a high-level forum for new thinking and debate on public policy and politics. Through research, reports, briefings, monographs, events, lecturers, education, and their website, the Institute offers a platform for thought leadership on a wide range of topics.

Housing allocations and the vacancy chain: how coordinating chains can better meet housing needs and tenant choice.

The Smith Institute (2022)

- This report is an exploration into the factors influencing vacancy chains in London's social housing, covering general needs stock held by councils, ALMOs and housing associations, with interplays from supported and specialist housing.

The vacancy chain for the purpose of this study refers to the overall sequences of homes made available for social housing as one household vacates an existing social home and subsequently re-lets then rehuses another household (and so on until no new social housing vacancy is formed).

The analysis is focused on how different types of letting do and don't release new social housing bedspaces, and how different stresses in allocations policies and lettings quotas influence the length of chains in social housing lettings and categories of housing need being met.

The report is in five sections, including a set of recommendations.

[Read the full piece of research, 'Housing allocations and the vacancy chain: how coordinating chains can better meet housing needs and tenant choice.'](#)

Pulling at the Roots: A report by the Southwark Council Housing Resident's Working Part on understanding and mitigating the economic and financial impacts of Covid for residents of council housing in Southwark

Southwark Council Housing Residents' Working Party (2021)

The Smith Institute provided support for the Southwark Council Housing Residents' Working Part on understanding and mitigating the economic and financial impacts of Covid for residents of council housing in Southwark.

To get a better understanding the Council helped establish a Council Housing Residents' Working Party (RWP), comprising tenants and homeowners in June 2021. The Working Party was tasked to examine the economic and financial impacts of the COVID pandemic, including paying special attention to who has been worst affected, what support the Borough's council housing residents have had, and what is needed to improve this morning forwards.

The RWP took oral and written evidence from Council officers, housing and debt experts, and representatives from the community and voluntary sector, considered government and Council held data on rent arrears and the impact of Covid; and conducted its own survey of over 1,800 tenants and leaseholders.

[Read the full piece of research, 'Pulling at the roots: A report by the Southwark Council Housing Residents' Working Party on understanding and mitigating the economic and financial impacts of Covid for residents of council housing in Southwark.'](#)

A Just Transition: Ensuring responsible investment for a just transition to net zero.

The Smith Institute (2021)

The Smith Institute supported the All-Party Parliamentary Group for Local Authority Pension Funds inquiry into 'Responsible investment for a just transition.'

This report is based on evidence sessions and written submissions to that inquiry from investors, industry, academics, community groups, trade unions, and other non-government organisations. The inquiry report seeks to inform politicians, policymakers, stakeholders and the public on the roles and responsibilities that investors can play, with the support of their members and government, in enabling a just transition to net zero carbon emissions.

[Read the full piece of research, 'A Just Transition: Ensuring responsible investment for a just transition to net zero.'](#)

The Living Wage Dividend: maximising the local economic benefits of paying a living wage.

Hunter P (2021)

[Back to top](#)

The economic fall-out from Covid has been substantial. However, it has not been evenly felt. This is especially true for the labour market with low paid workers more likely to see their hours and pay fall and more likely to be made unemployed or furloughed. Indeed, the pandemic has placed the spotlight on low pay and in-work poverty. Recent polling for the TUC, for example, showed how low-income workers have borne the brunt of the pandemic.

This report seeks to take forward the work of the Foundation's 'Living Wage Places' initiative, focusing on how to maximise the benefits of the Living Wage in towns, cities and city-regions across the UK. Using evidence-based assumptions, the report examines and quantifies how much individuals gain, how that wage uplift is paid for and what the local economic impact is likely to be based on moving 25% of low paid workers up to the Living Wage.

[Read the full piece of research, 'The Living Wage Dividend: maximising the local economic benefits of paying a living wage.'](#)

Planning for the recovery and the shift towards homeworking: implications for poverty in outer London

Hunter P (2021)

This report, supported by Trust for London, examines the short and long-term implications of Covid on poverty and inequality in outer London, with a particular focus on employment, low pay, housing, and the shift towards homeworking.

The report acknowledges the devastating impact that the pandemic has had on the lives of outer London's five million residents – not least on people's health and well-being – but seeks mainly to understand the after-effects and explore the options for change.

Watch this quick video to find out how the House of Commons Library works

Source: UK Parliament (2020) 'How the House of Commons Library works', YouTube [video]. Available at: youtube.com.

As of **November 2022**, the House of Commons Library has recently updated their website that is now broken down into the following sections or subject areas:

Services that include Research, Resources, Training & Events,

Brexit that covers Legislation, Negotiations, Policy, The EU, and Brexit explainer videos,

Coronavirus – read the latest Coronavirus (COVID-19) research and analysis from UK Parliament.

Economy, Business and Transport that include Business, Economy, Economic Updates, Transport, and Work & Incomes,

Home Affairs incl. Communities, Crime, Family & Civil Law, Justice, Immigration, Security, and Culture, Media & Sport,

Parliament & Elections that include Devolution, Elections, Government, Parliament, and Local Government,

Science, Environment and Technology that include **Energy, Environment, Climate Change**, Sciences, **Local Data**

Social Policy that include **Education**, Families & Social Services, Health, **Housing & Planning**, and Welfare & Pensions,

World Affairs that is broken down into Africa, Americas, Asia Pacific, Defence, Europe, Institutions, and Middle East, and more.

As of **November 2022**, the latest House of Commons Library, **Research publications** incl.

1. UK response to the human rights and economic situation in Sri Lanka,
2. The UK and EU programmes: participation delayed
3. Defence procurement reform: The Defence and Security Public Contract Regulations.

Review House of Commons Library, Research for this week

As of **November 2022** the latest **House of Commons Research**:

[Back to top](#)

Under '**Education**' and within 'Social policy,' the top research briefings incl.

1. Technical education in England: T Levels,
2. Research on the increasing cost of living and inflation,
3. Cost of living support for students,
4. Student support for undergraduates across the UK,
5. Research on the increasing cost of living and inflation,
6. Support for students from Ukraine in UK higher education,
7. Careers guidance in schools, colleges and universities (England), and
8. Higher Education (Freedom of Speech) Bill: Progress of the Bill.

Under '**Housing and Planning**' and within 'Social policy,' the top research briefings incl.

1. Levelling Up Rural Britain,
2. Social Housing (Regulation) Bill [HL] 2022-23,
3. Support for UK Veterans,
4. Housing Market: Key Economic Indicators,
5. General debate on a fairer private rented sector,
6. Private rented housing: the rent control debate,
7. The end of 'no fault' section 21 evictions,
8. Help with paying for historical fire safety work: high-rise blocks (England)

Under '**Energy**,' '**Environment**' and '**Climate change**,' and within 'Science, Environment and Technology' include:

1. Petrol and diesel prices,
2. Public ownership of energy companies,
3. Seasonal Worker visas and UK agriculture,
4. Levelling Up Rural Britain,
5. Government support for a nature and climate declaration,
6. Climate change and human security,
7. Impact of new developments on Green Belt Land, and
8. COP26: Briefings for the 2021 conference

[House of Commons Library search](#) on '**construction industry**' identifies 18 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, Dec. 2019**' -

Abstract: Construction industry – employment, new orders, output. [Construction 2025](#), [The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more construction jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

MODUS

MODUS - the RICS magazine that brings you the latest news and views, expert advice and in-depth features spanning the breadth of the surveying profession around the world.

In the latest digital **MODUS (November 2022)**, 'Share your views on the progress RICS is making' – The latest Survey of the Profession is now open and will help the organisation during this pivotal period of change, says RICS President Clement Lau.

Subject Terms/Keywords: Commercial property; Corporate real estate; Learning and development; Projects and people; RICS standards and guidance; and Residential.

Latest articles within *Modus*:

- **Buildings that elevated cities: The Wainwright, St Louis** – An office block deep in the US Midwest might not look as if it started an architectural revolution, but its influence has spread to every corner of the world.

Subject Terms/Keywords: Building conservation; Cities and placemaking; Commercial property; heritage and conservation; Planning and development; and Public sector.

- **Absorbing ideas for making cities flood resilient** – As climate change continues to exacerbate extreme rainfall, our urban centres must find ways to absorb or redistribute large volumes of water to avoid flooding.

[Back to top](#)

Subject Terms/Keywords: Cities and placemaking; Infrastructure; Land and resources; Natural disasters; and Water management.

- **Eye on the storm: reducing disaster risk with geomatics** – Rohini Sampooram Swaminathan harnesses geomatics for the UK World Food Programme to predict where earthquakes and floods are most likely to occur.

Subject Terms/Keywords: Environmental surveying; Geomatics; Land and resources; Natural disasters; Projects and people; and Technology.

- **Three experts on the best ways to retrofit housing** – Making the UK's homes more sustainable will reduce carbon emissions and save money on energy bills. But some solutions, such as wall insulation, aren't right for every building.

Subject Terms/Keywords: Building control; Energy; Facilities management; Housing; Residential; and Sustainability.

- **'Diversity in the workplace is integral to success'** – Talented people are out there, says specialist property recruiter Oyster, but you need to be willing to break away from the status quo and devote the time to find them.

Subject Terms/Keywords: Commercial property; Corporate real estate; Diversity and inclusion; Ethical practice; Residential; and Running your business.

- **Is a shortage of scaffolding affecting construction?** – Volatile materials costs and staggering shortages, along with inflation and supply chain issues, are creating a unique mix of challenges for the UK's scaffolding industry.

Subject Terms/Keywords: Building control; Economics; Machinery and business assets; Materials and resources; Quantity surveying and construction; and Running your business.

- **High Voltage: building a gigafactory** – A huge £3.8bn gigafactory producing lithium batteries will help to power the UK's automotive industry but building on such a scale brings challenges.

Subject Terms/Keywords: Commercial property; Energy; Land and resources; Project management; Projects and people; and Technology.

- **A dream deferred: millennials and the property ladder** – The gap between wages and house prices is widening all over the world, taking away the choice between renting and buying for many young people.

Subject Terms/Keywords: Economics; Finance and lending; and Housing.

[Back to top](#)

- **The power and beauty of bridges** – Judith Dupré has written about the lifechanging impact bridges can have on a community, from a remote rural village to a densely populated city.

Subject Terms/Keywords: Economics; Environmental surveying; Heritage and conservation; Infrastructure; Infrastructure and services; and Rural.

- **Targeted AI is making building projects more sustainable** – *Modus* highlights two projects at the forefront of AI and machine learning: one designing self-sufficient communities and the other reducing the impact of new infrastructure on rare species.

Subject Terms/Keywords: Environmental management; Environmental surveying; Geomatics; Land and resources; Sustainability; and Technology.

- **RICS has two new senior leadership positions**

Subject Terms/Keywords: RICS Standards and guidance.

Please note: In addition to *MODUS*, RICS publishes other journals that are free to view online incl.

1. **Construction Journal** - The journal helps **quantity surveyors** and project managers with the technical and professional aspects of their day jobs and keep up to date with developments and practical matters in the profession. It covers topics including contracts, cost management, procurement, construction law and regulations, communications, and project management skills.
2. **Built Environment Journal** (Incl. Building Surveying, Building Conservation, and Building Control) - Coverage keeps practitioners in the disciplines of building surveying, building control, and building conservation up to date on the latest developments, products, standards, and guidance.
3. **Land Journal** - The journal emphasises the crossovers in these practice areas and their global nature, with articles contributed by experts from all over the ..
4. **Property Journal** - The journal contains high-quality technical material in clearly defined sections, as well as some material that crosses professional groups to reach a wider audience.

Further information can be accessed via the RICS Website, Home > News & Insights > **RICS Publications** [online].

The Heritage Alliance's (HA) **Heritage Update**, the latest edition, **November 2022 - Issue 480** focusing on – New DCMS Ministers; Upcoming Budget and Priorities for Heritage; ACE Delays NPO Announcement; What will 2042 Hold for Heritage?; Heritage Debate 2022 Topic: Future for Heritage! Institute of Workplace and Facilities Management (IWFM)

Facilitate, the latest **September/October 2022** edition focus is on 'Take the initiative' – Peek behind the curtain of our FM sector's acute labour and skills shortage and you will find it's the cumulative effect of short-term challenges and long-standing issues. Some of these factors are directly without our spheres of influence while others we can only affect to limited degrees.

Read more related articles on the [IWFM Insight webpage](#).

Contractors World International,

Construction Management (formerly *Construction Manager*) is the magazine of the Chartered Institute of Building (CIOB) who also publish the **Global Construction Review** (GCR). Note: Latest articles from both journals are covered earlier within this issue of *Knowledge Foundations*.

Subscriptions available via the VLE e-Library include:

Construction Information Service (CIS) Insight 2022. The Latest Edition [**November 2022**] focuses on – **Sustainable buildings: the importance of soft landings**, and covers -

- **The benefits of having a soft-landing strategy**,
- **Post occupancy evaluations (POEs)**, and
- **Things to think about when specifying**.

Taylor and Francis Online and include the following e-Journals:

- *Construction Management and Economics*,
- *Building Research and Information*, and
- *Journal of Property Research*

Henry Stewart Publications and include the following e-Journals:

- *Building Survey, Appraisal and Valuation*,
- *Journal of Urban Regeneration & Renewal*, and
- ***Corporate Real Estate***.

Corporate Real Estate Journal is the essential peer-reviewed, professional journal for corporate real estate executives.

Each quarterly 100-page issue publishes high quality articles and real case studies on new thinking, strategies, and techniques in corporate real estate. It cuts through the deluge of information facing corporate real estate professionals to deliver content, which is authoritative, practical, and relevant by providing a blend of genuine thought-leadership – which expands what can be achieved with corporate real estate – with detailed, actionable advice and 'lessons learned' from industry peers.

[Back to top](#)

In-depth articles and case studies scheduled for the new volume, **Vol 11, Number 3 (2022-2023)** of ***Corporate Real Estate Journal*** incl.

Editorial.**Practice papers**

1. Unlocking the next wave of value in corporate real estate
2. Modern lease monetisations: How to capitalise on market arbitrages to significantly reduce occupancy costs
3. How technology is advancing capital planning
4. Aligning experience data to return-to-office investments
5. The return on investment of tenant engagement
6. Leveraging technology for strategic workplace decisions
7. Places to below: Practical considerations for creating inclusive and impactful places of work
8. Communities of work: Creating place in the workplace

Other articles from *Corporate Real Estate Journal* (2021-22), Volume 11, Number 3:

9. Turning disruption into opportunity: Leading corporate real estate in a post-COVID-19 world,
10. Trust, flexibility and technology: The keys to creating a more mature workplace,
11. How to turn uncertainty into a corporate real estate opportunity,
12. How companies can create a winning site selection process,
13. New journeys in change: A 'hybrid' primer – Part 2
14. The great office evolution: Reimagining the workplace,
15. Indian real estate in the post-COVID-19 era,
16. Work experience from home: hybrid work and the future of distributed work locations: A comparative empirical analysis between the US and Germany

Book review:

Elemental Change: Making stuff happen when nothing stands still by Neil User.

Other articles from *Corporate Real Estate Journal* (2021-22), Volume 11, Number 2:**Practice papers**

17. Why a hybrid office needs to understand and support employee commutes with transportation information
18. Data analytics and change management are transforming the future of the workplace: The opportunity to create value driven harmony between people, place and technology
19. The great workplace reset: Pivoting to the human experience in the war for talent

HSTalks

© Henry Stewart Talks Ltd 2022

HSTalks is a member of the Henry Stewart Group which has been a leader in providing graduate and continuing professional education in science, business, and management for over 40 years through peer reviewed vocational journals (such as the *Corporate Real Estate Journal*), conferences and online education for medical schools, business schools, universities, government, and commercial enterprises in over sixty countries around the world.

Henry Stewart Talks Ltd (HSTalks) provides specially prepared, animated, online, audio-visual lectures, seminar-style talks and case studies that accompany the 'Business & Management Collection' of e-Journals that the UCEM e-Library subscribes to.

Educational Journal titles and Open Educational Resources (OERs) reviewed by UCEM e-Library

Open Praxis – peer-reviewed open access scholarly journal focusing on research and innovation in open, distance and flexible education. It is published by the **International Council for Open and Distance Education – ICDE**.

This work is licensed under a **Creative Commons Attribution 3.0 Unported License (CC BY 3.0)**.

[Back to top](#)

This latest *Open Praxis* special issue **Vol 13(4)** compiles six selected papers derived from contributions presented at the 2021 ICDE Virtual global Conference Week that took place online in October, including two articles that received the Best Paper Awards in the two conference tracks: innovation and open education, respectively. The issue includes three more research papers and one innovative practice article from the conference. Finally, the issue includes one book review.

Keywords: open education, innovation, higher education, distance learning, OER, assessment, teacher education, international education.

Editorial:

1. Upskilling and Upscaling for Quality Open, Flexible and Distance Learning. Introduction to Selected Contributions from the 2021 ICDE Virtual Global Conference week

Research articles include:

1. 'Innovative Application & Enrolment Processes for More Informed Students: Reflections on the Benefits of this innovative Process through the Analytical Lens of Behavioural Science',
2. 'How to Promote the Use of Open Educational Resources (OER) in Higher Education. A Parley with OER Experienced Teachers,'
3. 'Towards Digital Thinking and Practices: Experiences of Sri Lankan Teachers and Students',
4. 'Developing Student Behaviours that Support Academic Integrity in Distance Learning',
5. 'A Formative Assessment Design Suitable for Online Learning Environments and its Impact on Students' Learning',

Innovative practice articles:

1. 'Integrating Metaliteracy into the Design of a Collaborative Online International Learning (COIL) Course in Digital Storytelling',

Book review(s):

1. 'Book Review of *Reimagining Digital Learning for Sustainable Development*'.

European Journal of Open, Distance and E-Learning

(EURODL), an electronic, multi-media, open access journal. It publishes the accounts of research and presents scholarly work and solid information about open, distance, online and e-learning in technology-enhanced education and training in its most inclusive definition.

Published in the **Latest Issue of EURODL**, **Vol. 23 (2021): Issue 2 (Jan 2021)**, article titles include:

- 'Building Digital Capacity for Higher Education Teachers: Recognising Professional Development Through a National Peer Triad Digital Badge Ecosystem,'
- 'Cultivating Self-Regulated Learning in Flipped EFL Courses: A Model for Course Design,'

e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Research shows that high-performing organisations focus on diversity and inclusion (D&I). In any workplace, it is important to both understand and recognise the benefits that having a D&I workforce provides. It is integral to developing people within an organisation, serving clients as best we can, and playing an important leadership role in communities.

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success.

This book is essential reading for all property leaders and professionals working in the real estate and construction sectors. Readers will gain especially from personal reflections on all aspects of diversity by a broad range of people working in the property industry.

[Back to top](#)

Real Estate: The Basics

Forsyth, J. and Wilcox, J. (2022) *Real Estate: The Basics*, Oxon: Routledge. ISBN-13: 9780367725433

Real Estate: The Basics provides an easy-to-read introduction to the core concepts of the industry to students new to the subject or professionals changing direction within the sector. Note: This book would not have been written if it were not for some students on UCEM's 'Property Transactions' module –some of them are anonymously quoted in the Introduction.

The book encapsulates the key 'need to know' aspects of Real Estate including the 'language' of real estate; its value and contribution to countries' GDP; its primary purpose, whether as an asset or as a resource; valuation concepts; asset classes; basic concepts of land law, and of landlord and tenant law; the increased role and importance of sustainability and technology; and an overview of the wide range of professionals involved in the industry.

Note: Introductory offer 25% off *Real Estate The Basics* for a limited period. Go to [Routledge.com](https://www.routledge.com) and use the code **REB25**.

Studying at a Distance

Talbot C (2010) *Studying at a Distance* [e-book]. Maidenhead: Open University Press, e-ISBN-13: 9780335238057

This essential guide provides practical help and support for those who have not previously studied at a distance and is ideal for students returning to study after a break. It covers fundamental issues such as motivation, goal setting, time management and coping strategies. Additional coverage in this edition includes specific information on the use of new technologies in distance learning; detailed coverage of referencing, citation, and plagiarism; description of using mind maps and other techniques for planning and writing essays or reports; support for disabled students, particularly those with dyslexia; and a further resources section.

UCEM e-Library Portrait

The aim of the e-Library

The aim of the e-Library is to:

- disseminate information, share good practices, and promote current awareness to assist in underpinning written work,
- add value and depth to our students' study experience, and
- support the continuing professional development of all those working and aspiring to work in the built environment.

Source: UCEM (2022) *Getting started with the e-Library* [video], YouTube. Available at: www.youtube.com/watch?v=iEg8DFUFifY&t=5s [accessed 15 July 2022].

At UCEM, we recognise that in an information-rich age and when everyone is pressed for time, it can be a challenge to find good-quality information when you need it.

Whether you are obtaining a qualification, undertaking CPD or researching a particular field, having access to a well-equipped library is essential.

The UCEM e-Library (accessed through the Virtual Learning Environment - VLE) is a comprehensive and valuable online resource, enabling students to access a wealth of subject-specific and credible information to support them throughout their studies and career development.

What resources are available in the UCEM e-Library?

The e-Library is made up of eleven sections and provides students with around the clock access to online searchable databases from key industry and educational sources, thousands of journals, books, and resources, UCEM's entire collection of study materials and published work and UCEM's dissertation library.

[Back to top](#)

The sections that make up the UCEM e-Library:

© UCEM 2017

Resources available within the UCEM e-Library include Up-to-date information and online searchable databases from –

Key educational sources that include- Taylor and Francis Online, Ingenta Connect, Henry Stewart Publications and HS Talks, vLex | Justis, Westlaw EDGE UK, EBSCO Business Source Premier, Emerald Insight - access to around 2600 e-Book titles and their entire ‘Property Management and the Built Environment’ collection of journals, and

Industry-specific sources that include- IHS’s Construction Information Service, *Estates Gazette* (EG) digital journal and EG Radius, *Property Week*, RICS’s BCIS – Building Cost Information Service and ISURV online information service, NEC - New Engineering Contract Academia, BSRIA – Building Services Research and Information Association, and more.

Where to find help - Overwhelmed by the sheer amount of information out there?

Not only do libraries provide us with books to read, but they are valuable tools and resources. The UCEM e-Library is continually striving for improvement and changing to meet the demands of today’s technology and ever-expanding volumes of knowledge creation.

The e-Library is here to help make finding up-to-date, credible, and relevant information easier. Access the [2022 e-Library interactive brochure](#) for further information.

Building Better Property Professionals

© 2022 — Property Elite LLP

Property Elite's sole aim is to build better property professionals – supporting your career every step of the way, whether you are completing a RICS accredited degree course, your RICS Assessment of Professional Competence (APC) or simply seeking engaging Continuing Professional Development (CPD).

[Property Elite](#) provides training and CPD services for property professionals, including students, APC candidates and corporate clients.

Their Hot Topic Highlight blog posts will arm you with the information on the hottest topics – ready to tackle an important client meeting or begin revising for your RICS APC final assessment.

[Back to top](#)**This month [November 2022] the Hot Top Highlight – Dampness in Buildings – Part 1**

In this latest blog article, Brian Robinson MRICS, Building Surveying consultant at Property Elite, discusses dampness in buildings. This is essential reading for any candidates with Building Pathology or Inspection as technical competencies. This is Part 1 of a three-part blog series.

What is dampness in buildings?

Simply put, dampness in buildings is moisture that should not be there. This affects all types of property and is the most frequently reported problem that surveyors become involved with.

Why is dampness a problem?

Dampness is a problem because:

- Moisture expands and contracts as temperatures fluctuate, causing cracks and the degradation of materials over time,
- It enables mould to grow and is, therefore, detrimental to health,
- Its presence is linked to attack from boring insects,
- Damp timber can be subject to wet and dry rot attack leading to significant problems in the property,
- It results in visible wetting of walls, ceilings and floors, blistering paint, bulging plaster and sulphate attack,

and more.

Also, this blog covers:

- What are the legal implications of dampness?
- What are the types of dampness?
- What are the reasons for the misdiagnosis of dampness?
- What will be in Part 2 of this three-part blog series?

Further details and access to the Property Elite Hot Topic Highlight blog: Dampness in Buildings – Part 1

Building People

[Enabling connections for a competent, diverse, and valued built environment workforce](#)

© UCEM 2021

The aim of 'Building People' was to create a technology platform and collaborative network, which enables connections and seeks to reduce the skills shortages across the Built Environment. 'Building People,' a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with employers seeking to plug the skills gap via an online platform.

[Back to top](#)

People Wiki:

What are you looking for?

© Building People 2021

The UK needs to build, but there is a shortage of competent and experienced workers, and the workforce we have lacks diversity. Building People joins the dots to help people find employers, opportunities, and resources, and to help employers engage with a more diverse range of talent.

People Wiki (a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.) is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities, and needs focused on diversity and inclusion, skills and careers, and social value.

Related Link:

UCEM incubate social enterprise, Building People, becomes a fully-fledged success story

Building People, whose mission is to improve equality, diversity, and inclusion in the built environment, is now an independent entity.

Since its inception in 2018, UCEM has provided the enterprise with office space, founder job security and donations totalling £150,000. This gave Building People the perfect platform to deliver its collaborative 'dot-joining' activity, connecting people to opportunities across the built environment and enabling employers to engage with a more diverse range of talent.

With strong levels of support coming in from across the sector, both parties are in agreement that now is the time for Building People to fledge the nest and become a separate entity.

It is an exciting time for the social enterprise as it announces its three-year plan, which focuses on five key areas:

1. **Profile:** Positioning Building People as the go-to source for equality, diversity and inclusion best practice and activities, and thought leadership in the built environment,
2. **Partnerships:** Delivering maximum joined-up impact through the growth and development of Building People's supply and demand networks,
3. **People:** Enabling equality of opportunity through the provision of a simpler and more supported user experience in a fragmented careers landscape,
4. **Policy:** Aligning with and supporting the achievement and enhancement of relevant national sector policy and activity, and
5. **Planning:** Establishing a secure future of Building People as a sector-backed movement for collaborative change across the built environment.

5 practical tips for saving energy costs

Posted on 15 November 2022

- We are in the midst of a cost-of-living crisis which has spread across the globe. Significant increases to the cost of food and energy have outstripped worker's salaries, and spiralling inflation has plunged countless into poverty. While the tenth day of COP27 focusses on the decarbonising our energy systems, we look at practical ways to save energy that can be actioned without spending too much money.

1. Avoid leaving appliances on standby - The average UK household spends around £65 a year on appliances that are left on standby. This is the energy consumed by an appliance when it is not in use and not switched off at the socket. You may not think about the devices that have low-level usage when not in use, such as broadband, smart speakers and telephones, but these are the ones that are usually turned on for 24 hours a day and the amount of electricity they consume adds up.. By remembering to switch off devices more often or buying a standby saver, you could be saving yourself electricity you didn't even know you were consuming.

2. Draught-proofing windows and doors - Draught-proofing is one of the most affordable and effective ways to save energy costs. It allows you to keep the warm air in your home by blocking out unwanted gaps that let cold air in – ultimately requiring less energy to heat up your home. By draught-proofing your windows and doors, you could save around £60 a year in a semi-detached house. Similarly, you could also save around £90 a year by draught-proofing an open chimney when not in use. A lot of draught-proofing can be done through simple DIY tasks at home, or professional draught-proofing can cost a bit more but last you longer.

3. Use your thermostat effectively – A large portion of your heating bills are absorbed by heating and hot water costs. By doing something as simple as turning down your central heating by just one degree, you could be saving up to £80 a year. You could also invest in a smart thermometer, which will heat your home more efficiently by only warming the room in use. They can be controlled by your phone and adapt to how long it takes to warm a certain temperature, so it can be set at exactly the right time.

4. Monitor your water usage - Water waste is something we may

[Back to top](#)

not realise is happening in our homes, but they add up and result in a large amount of total energy and water use. A dripping tap can waste more than 5,300 litres of water a year, so it's important to keep an eye on even the smallest amounts of water waster in the homes. By spending one minute less in the shower each day, a family of four could save up to £75 a year on energy and water bills. Similarly, turning off a running tap while you brush your teeth or wash your face can save more than 6 litres of water a minute!

5. Invest in energy saving appliances, like an air fryer – While it's good to buy home appliances based on their energy ratings, it's also good to research alternative types of appliances you can buy. One big change you can make is switching to an air fryer for day-to-day cooking rather than using a gas or electric cooker. Research by Utilita showed that on average they run at £55.91 a year, as opposed to a gas cooker on £121.06 per year and electric cooker on £335.57 per year.

UCEM signs up to CIC's new 'carbon zero' climate action plan

UCEM is one of the institutions which has signed up to the Construction Industry Council's (CIC) new climate action plan.

CIC's Climate Change Panel, chaired by its deputy chairman, Stephen Hodder MBE, led on the initiative, with signatories to the plan agreeing that:

CIC BUILT ENVIRONMENT PROFESSIONS TOGETHER

Carbon Zero: the professional institutions' climate action plan

The signatories to this Action Plan agree that:

- the actions listed are necessary for dealing with the challenge of climate change;
- they will implement those actions appropriate to them as an institution/organisation; and
- they will support the other signatory institutions and organisations in delivering the remaining actions

© CIC 2021

The document, entitled 'Carbon Zero: the professional institutions' climate action plan,' was released last week and coordinates the efforts of built environment institutions in meeting the UK government's 2050 net zero emissions target.

To read the plan, head to the **[CIC news story – 'CIC launches a Carbon Zero climate action plan for Professional Institutions'](#)**.

QSAND and the Sustainability Goals

The UN Sustainable Development Agenda, adopted by world leaders in 2015, maps out a 15-year plan to fight inequality, end poverty and tackle climate change challenges.

Quantifying Sustainability in the Aftermath of Natural Disasters (QSAND) is a self-assessment tool to promote sustainable approaches and contributing to aid the achievement of several of these 17 goals in disaster affected global communities:

Libraries’ contribution to SDGs

Agenda Vision: Universal literacy
Goal 3: Good health and wellbeing
Goal 4: Contribution to quality education
Goal 5: Culture
Goals 5, 9, 7: ICT skills and access
Goals 8 & 10: Decent work, economic growth, reducing inequality
Goal 16: Access to information

Note: Information plays a vital role in just about everything we do.

(UN.org 2022)

[Back to top](#)

Note: Use of Wikis as a reference site

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source. It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

1) Remember that an encyclopaedia (which includes Wikipedia and any other Wiki) can be a good starting point for research and not an ending point.

2) An encyclopaedia can be good for getting a general understanding of a subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

(Connors State College 2022)

Book Review:

Climate Adaptation: accounts of resilience, self-sufficiency and systems change

- Where is the world really heading, and what can we do about it?

This book takes an unflinching look at climate change, drawing upon the latest data to analyse what the next decades hold in store. With atmospheric CO₂ at unprecedented levels and insufficient action being taken to prevent a rise in temperatures above 2 degrees centigrade, we are not just looking at significant disruption but the possibility of societal collapse. For the first time ever, the magnitude of this challenge is faced head on, with avenues to truly address it presented. Case studies and models from sixteen authors around the world show ways that we can build adaptation and resilience, as well as what 'zero emissions' really mean. The book also provides a platform for those from a range of diverse backgrounds, whose unique experience and knowledge brings vital new perspectives.

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice, and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers, and visual artists. By 'copying' the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party.

Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors. **Note:** UCEM holds a **CLA 'Higher Education Photocopying and Scanning Licence'**

[Access the Copyright Licensing Agency website for further information](#)

CLA Title Search tool

The [CLA Title Search tool](#) is an online search tool that lets you quickly find out what you can copy under your organisation's CLA licence. Whether you'd like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance.

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security.**

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's National Copyright Conference 2022

This national conference was held on 18th May and in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance.

[Back to top](#)

The Annual CILIP Copyright Conference provided a unique and important chance to update knowledge about the crucial copyright and licensing related issues and developments. It also provides an invaluable forum for in-depth presentations by UK experts, informed debate and opportunities to ask questions.

This conference provided an opportunity to delve deeper into copyright issues and gain a better understanding of how policy impacts on libraries and the information sector and covered the following:

- Intellectual Property in AI and Information Management
- Government Copyright Policy following Brexit
- eBooks and copyright
- Copyright Licensing Agency update
- Controlled digital lending and the UK legislative framework
- Use of the Quotation Exception.

Sessions covered broad copyright impact for the profession incl.

- **Keynote: NFTs and its Implications for Copyright Law, Libraries and Information Organisations**

Non-fungible tokens (NFTs) captured the imagination of creators and information organisation in March 2020, when an artwork titled 'First Thousand Days' sold for \$69 million. It has since been seen as an effective means selling digital assets, particularly those which form part of a limited edition or collection.

It has the potential to transform libraries and information organisations and this talk questions how NFTs can be useful and beneficial for these organisations? Based on research conducted by *Professor Dinusha Mendis*: Professor of Intellectual Property & Innovation Law, Bournemouth University, the paper takes a leap forward into the future in presenting the various opportunities NFTs offer for libraries and information organisations.

At the same time, NFTs are not without challenges. There have been many questions raised in relation to intellectual property (IP) and ownership. A string of recent IP cases has shone a light on just how challenging NFTs can be for the IP framework, which we have at present.

- **Exceptions to Copyright**

In this talk *Margaret Haig*: Head of Copyright Operations, The Intellectual Property Office (IPO) raises the question – How can the existing copyright framework help or hinder cultural heritage organisations in their work? This presentation highlighted some of the copyright issues and update on the latest relevant developments.

[Back to top](#)

- **The question of #ebookSIS: is copyright reform the answer?**

The Covid-19 pandemic highlighted the tensions and dysfunction of the academic publishing industry as never before, issues that had been bubbling under the surface for years were brought to a head by the sudden closure of universities and libraries and resulting pivot to entirely digital learning provision. The unavailability of many ebooks, the high prices, restrictive licences and building practice of many publishers meant that librarians were hamstrung by the impossibility of providing all the required resources for our users digitally.

The #ebookSOS campaign was born out of this situation and has been campaigning on several fronts for an investigation into the practice of academic publishers, wider awareness for staff and students on the impact of these issues, Open Access alternatives, and for copyright reform that will prioritise educational and research uses over corporate profit margins, via controlled digital lending, the reduction of restrictive licences to control use, and moves to allow libraries to own content, rather than merely licence access. These issues are not unique to the UK or indeed unique to academic libraries.

The #ebookSOS campaign has partnered with LibraryFutures (USA) and Knowledge21 (Europe) to raise awareness and coordinate international pressure to force change and make libraries more equal partners in our relationship with publishers.

Caroline Ball: Academic Librarian, University of Derby

- **An Act for the Encouragement of Lending? UK Copyright Law and Access to Digitised Collections in Libraries**

The ongoing pandemic has brought into sharp focus the difficulties faced by libraries in trying to meet the needs of their users through online provision of library resources. The cost of commercially available ebooks is one difficulty and gaps in availability of electronic versions of vital resources is another. One possible solution to the latter issue is Controlled Digital Lending, this is lending digitised copies of items in library collections under controlled conditions.

The aim is to provide access to items already owned by libraries without compromising the right to control use and income for rights holders. Lending of copyright works is a restricted act under UK copyright law. While copyright law provides for library lending, the legal bases for controlled digital lending are uncertain and current licensing schemes do not fully meet CDL needs. **Dr Adrienne Muir:** Senior Consultant, Naomi Korn Associates explored these issues and possible solutions further.

[Back to top](#)

- **The quotation exception in education and scholarly contexts**

In this presentation, **Professor Tanya Aplin**: Professor of Intellectual Property Law, King's College London, will consider the ways in which the quotation exception in s.30(1ZA) of the CPDA 1988 can allow for various uses of copyright works for educational and scholarly purposes.

- **CLA Licensing and Product Innovation**

James Bennett: Head of Rights and Licensing, Copyright Licensing Agency provided an update on new developments in CLA licensing and technology solutions for the education, corporate and public sectors.

Other talks included:

- **License to View: Copyright & Films in the Age of Covid at a Canadian University – Amy Lorenz**: Metadata and Copyright Librarian, Saint Mary's University – Halifax, Canada
- **The Trouble with TDM – Matthew Lamber**: Head of Copyright, Policy & Assurances
- **Towards Better Sharing of Cultural Heritage – Creative Commons' Agenda for Copyright Reform – Brigitte Vézina**: Director of Policy, Open Culture and GLAM, Creative Commons

Lightning talks included

- **Copyright and Research Data - Dr Hina Zahid**: Senior Research Data Services Officer, University of Essex
- **Going Ape! NFTS and ownership issues in Web3 – Eilish McLaughlin**: Sales and Marketing Consultant, PRFS Europe
- **The Modernist Archives Publishing Project (MAPP) and Copyright – Helena Clarkson**: Project Archivist, University of Reading

The Challenges of Remote Working at Present

For those who work remotely all or part of the time already, you or your employer [depending on whether you are self-employed / freelancer or an employee] will have safeguards in place that enable you to operate securely when handling commercially sensitive or others' third-party data. The difference, in March 2020, is that at very short notice, organisations are having to move staff to homeworking often with literally hours' notice as the Government COVID-19 instructions are issued.

[Back to top](#)

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know](#).

The challenges of remote working at present and point to consider from a data privacy perspective.

Provided within this article are points to consider from a data privacy perspective that include:

1. **Have a clear statement to all staff** stressing that "The protection of personal data that we hold, and use is important to us and must be always handled in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we must adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instructions that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted." (Tullo 2020)
2. **Set out what use of data**, contact lists, customer documents are being allowed.
3. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using**.
4. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seems sensible at present] in line with experience and how staff report it is working.
5. **Reissue and emphasize your usual security arrangements –** Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household.
6. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed.
7. For the **weekly reviews –** have your Senior Leadership Team note the number of staff using personal devices, any queries, or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
8. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
9. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
10. This is where a nominated Data Protection Officer (DPO) or Data Officer can support the senior team in the messaging to colleagues.

Regarding UCEM we have followed these pointers:

(i) A clear statement went to staff, and UCEM has a designated area within their central SharePoint site for Business Continuity Planning (BCP) that has the following folders containing

- Official Communications [Internal and External]
- Human Resources (HR) guidance and support
- Information Technology (IT) technical support, guidance, and documents

Data Protection guidance (incl. a new guidance note entitled, 'Processing Personal data when remote working.')

- The [UCEM Data Protection and Privacy Policies](#) have been updated and should be read in conjunction with IT Policies).
- & Hints and tips for working from home.

(ii) A retention and destruction schedule is in place that collates lists of data used within respective teams and departments; (iii) A register is kept of where staff are working from and equipment used; (iv) Regular online meetings and weekly All-staff keep everyone updated and ensuring regular communication; (v) IT provide regular updates and guidance; (vi) GDPR 2020 training has been launched to re-enforce the importance of knowing how data is used and where it is being stored, even if temporary so that risk is managed and assessed; (vii and viii) online equipment and collaboration tools are well established at UCEM as an online education provider, but are regularly monitored; (ix) As mentioned above, hints and tips for working from home are provided, & (x) UCEM has a designated Data Protection Officer (DPO).

Please note: There are regular updates -

- (i) On the [UCEM Website](#),
- (ii) [VLE Help Page](#) (for students), and
- (iii) within the [UCEM Website Home > Supported Online Learning > e-Library](#) current awareness services, incl. Information blog and *Knowledge Foundations* (for all).

#BE Informed

(iv) A short [UCEM e-Library video](#) (used within UCEM Marketing, [Social Media business channels i.e. LinkedIn](#) to promote the e-Library, *Knowledge Foundations*, regular information blogs, and more)

“Perseverance will get you anywhere.”

CIOB's Construction Management journal (formerly *Construction Manager*) [online]. Available at: <https://constructionmanagement.co.uk/> [accessed 28 November 2022]

CIOB's Global Construction Review journal [online]. Available at: www.globalconstructionreview.com/ [accessed 28 November 2022]

CIOB's Policy and Public Affairs portal [online]. Available at: www.ciob.org/industry/policy-research [accessed 28 November 2022]

The CIT-eA Project Creating Innovative Technology – Enhanced Assessments – a research project that explored ways to increase the number of assessments in Further and Higher Education using technology. The CIT-eA Project [online]. Available at: <http://citea.digitalinsite.co.uk> [accessed 28 November 2022]

Cities / buildings images database [online]. Available at: www.washington.edu/ark2 [accessed 28 November 2022] is a collection of images of buildings and cities from around the world aimed at students, researchers, and educators.

C-Link is a procurement software company who also provide resources (incl. guides, eBooks, and other materials) created to help you make more money on your construction project. C-Link [online]. Available at: www.C-Link.com [accessed 28 November 2022]

Commercial Real Estate Services (CBRE) is the world's largest real estate services provider, with a preeminent leadership position in virtually all key business centers globally. CBRE [online]. Available at: www.cbre.co.uk [accessed 28 November 2022]

Community-Led Housing (CLH) Toolkit: a resource for local authority and housing professionals' [online]. Available at: <https://clhtoolkit.org/> [accessed 28 June 2022]. This Toolkit provides a wealth of technical and non-technical information on a broad range of issues relevant to CLH. There are five Toolboxes, covering (i) Housing (ii) Communities (iii) Legal (iv) Planning and (v) Finance.

Confederation of British Industry (CBI) is the UK's premier business lobbying organisation, providing a voice for employers at a national and international level. CBI [online]. Available at: www.cbi.org.uk [accessed 28 November 2022]

Conference on Training in Architectural Conservation (COTAC) was formed in 1959 to improve the standard of education of everyone involved in building conservation, including craftsmen, professionals, and homeowners. COTAC [online]. Available at: <http://ihbconline.co.uk/cotac2> [accessed 28 November 2022]

COTAC Digital Bibliography [online]. Available at: http://cotac.global/digital_bib/ [accessed 28 November 2022]

Constructing Excellence (delivered with **bre**) is a platform for industry improvement to deliver excellence through clients, industry, and users through collaborative working. Resources include publications, tools, and newsletter. Constructing Excellence [online]. Available at: <http://constructingexcellence.org.uk/> [accessed 28 November 2022]

Construction Enquirer is a news website in construction. Construction Enquirer [online]. Available at: www.constructionenquirer.com [accessed 28 November 2022]

The **Construction Index** [online] provides a wide range of information services for the UK construction industry, that include a search engine of construction companies, daily construction news, market data, email newspaper letter, and Case Law analysis and legal commentary. Further information is available at: www.theconstructionindex.co.uk [accessed 28 November 2022].

Construction Industry Council (CIC) – The representative forum for the professional bodies, research organisations and specialist business association in the construction industry. CIC [online] and available at: <http://cic.org.uk> [accessed 28 November 2022]

The **Construction Industry Research and Information Association** (CIRIA) [online]. Further information and resources are available at: www.ciria.org/default.aspx [accessed 28 November 2022]

Construction Industry Training Board (CITB) is the training board for the construction industry and partner in Construction Skills, the Sector Skills Council. CITB [online]. Available at: www.citb.co.uk [accessed 28 November 2022]

Construction Manager is the magazine of the Chartered Institute of Building (CIOB) [online] and available at: www.constructionmanagemagazine.com/ [accessed 28 November 2022]

Construction News [online]. Available at: www.constructionnews.co.uk [accessed 28 November 2022]

Construction Products Association (CPA) represents the UK's manufacturers and distributors of construction products and materials. Construction Products Association [online]. Further information is available at: www.constructionproducts.org.uk [accessed 28 November 2022]

Construction Project Information Committee (CPIC), responsible for providing best practice guidance on the content, form, and preparation of construction production information, and making sure this best practice is disseminated throughout the UK construction industry. CPIC [online]. Available at: www.cpic.org.uk [accessed 28 November 2022]

Construction and Property Research Centre (CPRC), University of the West of England (UWE) – the CPRC's research activity is focused around the three inter-related stages of the built environment lifecycle, namely design, construction, and maintenance. Note: The UWE **Centre for Architecture and Built Environment Research** (CABER) now incorporates the CPRC.

Contractors World magazines (incl. *Contractors World International* and *Contractors World UK & Ireland*) are the leading international digital publications. Delivering site reports, equipment reviews and comments of interest on the construction, mining, quarrying and related industries.

Contractors World [online]. Available at: <http://cwmags.com/> [accessed 28 November 2022].

COPAC* exposes rare and unique research material by bringing together the catalogues of c.90 major UK and Irish Libraries. In a single search you can discover the holdings of the UK's national libraries (including the British Library), many University libraries, and specialist libraries. Note: From August 2019 Copac was replaced by **Jisc's Library Hub Discover**.

Copyright Licensing Agency (CLA) [online]. The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]. The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners. Available at: www.cla.co.uk [accessed 28 November 2022]

Council for British Archaeology (CBA) is an independent charity bringing together members, supporters, and partners to give archaeology a voice and safeguard it for future generations. Archaeology for all [online]. Available at: <http://new.archaeologyuk.org> [accessed 28 November 2022]
