What's in this month's issue

- **Latest UCEM News** incl. First bespoke CPD training modules for service Veterans launched by UCEM and BuildForce.
- **Things you need to know this week** – Resi partner named for South Shields Transformation. South Tyneside Council appoints development partner to deliver 365 homes as part of mixed-use partnership.
- **Latest Research** from JRF, RICS, CBRE, and more.

Happy reading!

Issue 6 - June 2020

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the Library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness and share good practice, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

"The mission of librarians is to improve society through facilitating knowledge creation in their communities"

(R. David Lankes)

The initial aim of this UCEM Library current awareness service was to help keep students and staff informed of the education sector and industry specific news, share current and best practice, highlight the latest research and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [email us](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM News

First bespoke CPD training modules for service Veterans launched by UCEM and BuildForce

- The first in a series of bespoke construction training modules for Veterans have been launched by UCEM and BuildForce.

UCEM's 'Introduction to the Construction Industry' learning module, which provides a greater understanding of the industry, and a mini module outlining a career road map in construction site management are now live on its Online Academy.

Three further career road map outlines for construction project management, quantity surveying (commercial management) and building surveying in construction will follow next.

The modules have been designed in response to research carried out by UCEM which found that Veterans would like to learn about roles within the industry, how a construction site works, salaries and career progressions, and self-employment.

This work has been carried out as part of the Construction Industry Training Board – CITB's Pathways into Construction programme with BuildForce, focusing on the Veteran cohort.

[Access further information and the article 'First bespoke CPD training modules for service Veterans launched by UCEM and BuildForce' in full.](#)

Recognise outstanding UCEM staff through the Teaching Excellence Awards 2020!

Has one of our team at UCEM made your learning experience that bit more enjoyable? Have you noticed a colleague who has gone above and beyond in supporting our students?

If someone or some members of staff spring to mind to one of the questions above, then now is your chance to recognise them!

Nominations are open to UCEM students and staff to highlight individuals' outstanding contributions through the Teaching Excellence Awards (TEAs) 2020. As with last year's awards, there are five categories available to vote in:

1. Innovation in Teaching and Learning;
2. Recognition of Excellence;
3. Outstanding Contribution to Feedback;
4. Outstanding Contribution to Academic Support; and
5. Outstanding Contribution to Pastoral Support.

[Back to top](#)

Nominations close on Thursday, 28 May, 2020, with **the winners to be announced on Wednesday, 10 June, 2020.**

[Access further information and the article 'Recognise outstanding UCEM staff through the Teaching Excellence Awards 2020!' in full.](#)

COVID-19: University College of Estate Management (UCEM) response to COVID-19 [18th March 2020]

As a responsible employer and educator, UCEM's commitment is to protect the health of all students, staff, clients and suppliers by adhering strictly to advice offered by Public Health England, The World Health Organisation, Office for Students, local and central government, whilst remaining committed to maintaining our usual excellent standard of student experience.

Please find below the steps we've taken to adhere to current and ongoing advice. As the situation is ever-changing, we fully review the guidelines and our actions daily and will quickly adapt if necessary (**Note** the publication date of this article).

- All staff who are able to work from home are doing so. We have been anticipating this situation and had prepared for it full. We have an advanced IT infrastructure in place to enable remote working, so we continue to operate as usual.
- As an online pedagogical institution, we are experts at online teaching and our deliver model will continue as normal
- The small number of staff remaining in Horizons head Office have been allocated seating at above the recommended distance away from each other.
- We are operating a policy of no external meetings and no visitors to Horizons Head Office
- All managers and department heads have been briefed with respect to our self-confinement policy and our treatment of any staff member displaying symptoms that may be linked to COVID-19
- All staff are continually reminded of the importance of following the 20-second guideline for hand-washing.

If you have any further questions, please contact:

- Student enquiries – Student Central on our VLE
- Employer enquiries – businessdevelopment@ucem.ac.uk
- Other enquiries – reception@ucem.ac.uk , Tel: +44(0)118 467 2100

Our sincere thoughts are with those affected by COVID-19 and its impact around the world.

Other News

Things you need to know this week: Resi partner named for South Shields regeneration

- South Tyneside Council appoints development partner to deliver 365 homes as part of mixed use transformation.

South Tyneside Council has appointed housebuilder Keepmoat, working with Cussins Homes, as development partner to deliver 365 homes for a regeneration scheme in South Shields. The homes are one element of a masterplan to transform disused docks and brownfield land at Holborn into a mixed-use riverside quarter, which also includes office space, a hotel and a cultural offer. The scheme has secured £4.2 million of grant fund from government agency Home England's Local Authority Accelerated Construction Fund.

Other developments include – Birmingham City Council has agreed a deal with Homes England to release a site as part of plans to develop 1,000 homes close to the High Speed 2 Curzon Street Station; Housebuilder Countryside Properties has been chosen as Home England's preferred development partner for sites in Kent and Hertfordshire, which have the potential to deliver nearly 900 homes in all; The government is

[Back to top](#)

committing more than £6 million to help Business Improvement Districts (BIDs) in England, in response to the coronavirus outbreak; Cardiff Council has bought a former gasworks sites in the city, with a view to delivery 500 homes there; Green initiative Northern Roots has named University of Salford as its strategic partner on a project aiming to deliver the UK's largest urban farm and eco-park in north Manchester.

(Please note you will need to register to access these stories in full, although registration is free).

Case Study: Creating a pedestrian link between city buildings

- A new walkway in Melbourne, Australia, improves access and provides a more engaging and flexible form of urban infrastructure, as the author of this article finds.

The functional pathways, steps and streets of urban infrastructure generally provide the connections between buildings in towns and cities. But a project in a suburb of Melbourne, Australia, designed by Make Architects, creates a route that is intended to be more accessible, engaging and flexible, while trying together a fragmented site that combines retail and leisure uses.

The newly created Chadstone Link runs between the Chadstone shopping centre, which is the largest in the southern hemisphere, and a new five star hotel. This pedestrian route includes travellers and stairs and is enclosed in a curved glued laminated timber, or glulam, structure with a tensile, semi-translucent PTFE fabric stretched over it.

Challenges – The shopping centre and hotel were separated by another piece of urban infrastructure.

Solution – The walkway, with its complex diagrid structure of Italian Larch timber, spans 110 metres and extends up to 15 metres. Its form was inspired by the arched glass roof of the shopping centre, but its design and materials allowed for a rapid building.

The PTFE fabric cover protects customers, guests and visitors, but is open at the sides to allow cross ventilation, ruling out the need for air conditioning, which is a key factor given the local climate. Artificial lighting is minimal, being used primarily to illuminate the feature at night.

The project includes landscaping, stairs and travellers, all of which are located to create areas where the public can relax, as well as spaces for a restaurant and pop-up uses. The walkway

[Back to top](#)

is a key addition to a retail, leisure and office district that is used by more than 24 million a year. The solution has met a need in Melbourne, but could be applied elsewhere.

Client: Vicinity Centre

Design architect: Make Architects

Delivery architect: Cera Stribley Architects

Analysis: Innovating to keep planning moving

- How local authorities across Essex are responding to the call to use technology to keep discussions and consultations going.

Restrictions introduced as a result of coronavirus have seen the development industry closing construction sites and furloughing staff, including land and planning teams. It is becoming clear that the lockdown will last for weeks, leaving much of the industry on hold (see publication date).

The Ministry of Housing, Communities and Local Government (MHCLG) has instructed councils to use delegated powers and digital innovation to keep the planning system going.

Although not in the original Coronavirus Act, the government included a late amendment to lift certain restrictions on councils. The Regulations for Local Government removed the requirement for a quorate meeting to have a certain number of council members physically present at the meeting. This has opened the way for councils to resurrect all business including planning, and begin to respond to Steve Aurtermain's (the outgoing MHCLG Chief Planner) to "explore every opportunity to use technology (i.e. Virtual Meetings) to ensure that discussions and consultations can go ahead.

Essex County Council (ECC) in its strategic planning role is looking at how its own planning and other committee meetings can continue to take place. It is liaising with planning officers across Essex to understand the steps that district and borough councils are taking to ensure that capacity within departments is maintained so that, when developers start to come forward with sites, there are as few delays as possible.

Coronavirus – latest developments [May 2020]

Coronavirus information: What should I do now?

- Prime Minister Boris Johnson has announced new lockdown rules to help tackle the coronavirus emergency in England.

Scotland, Wales and Northern Ireland have their own powers over the lockdown and while some advice is common across the board, they have not lifted measures to the same extent.

How can I help to slow the spread of the virus?

- Stay home wherever possible
- Work from home if you can
- If you can't work from home, go back to work as long as safety measures are in place
- Avoid public transport if possible
- You can take unlimited exercise outside
- You can meet one person outside your household, as long as you stay 2m apart
- Enjoy parks and public spaces without exercising
- But always keep your 2m distance in public
- Police will be able to fine you if you don't follow the rules
- Wear face covering in enclosed spaces, like shops or public transport
- If unwell, isolate yourself and your family
- Keep in touch with one another
- Wash hands for about 20 seconds with soap and hot water or use a sanitiser gel
- Use a tissue for coughs and sneezes
- If you don't have a tissue use your sleeve
- Avoid touching your eyes, nose and mouth with unwashed hands
- If you have a high temperature or a new, continuous cough, use the NHS 111 online coronavirus service to seek advice
- If your symptoms are mild, you'll be advised to stay indoors for seven days
- Anyone you live with should stay at home for 14 days, in case symptoms develop
- You may be eligible for a test

Will COVID-19 accelerate construction's digital transformation?

- With many industry professionals forced to work remotely, is now the perfect time for construction to get up to speed with all things BIM and digital? *Construction Manager* magazine finds out if the coronavirus will change the way we work forever.

David Philp – Global BIM/MIC consultancy director, AECOM says, **“It's an opportunity to rethink how we can use technology and innovate.” (Philp 2020)**

The coronavirus pandemic is forcing us to strive for more innovative and rapid solutions. From increased home working needs, maximising performance of our healthcare estates and ultimately how we can recover from the looming economic challenges, we need to usher in new ways of working.

This crisis will be an opportunity for us to rethink construction priorities, how we can better use technology and innovate in the use of joined-up data to support immediate societal needs and the creation of a more resilient built environment.

Mark Boyle – Global design direct, Robert Bird says, **‘Our digital processes lend themselves to remote working.’ (Boyle 2020)**, and

Gary Fannon – Technology director, Turner and Townsend says, **‘Early digital adopters will be reaping the rewards.’ (Fannon 2020)**

T&T's technology team have all been set up to work from home for some time and the early adopters will reap the rewards from the coronavirus lockdown. Design teams are able to continue working – creating a fully designed digital model that can be constructed to an excellent quality standard when work is able to begin on site.

There are also security questions about home working – we need to educate people and show them how to make home routers more secure. But overall, the enforced lockdown could show the industry how we can use digital technology to be more efficient and productive.

Andrew Gamblen – Digital manager, Willmott Dixon says, **‘People will become more comfortable collaborating remotely.’ (Gamblen 2020)**

The effect of Covid-19 and social distancing is going to have a long-lasting effect on both the construction sector and the UK as a whole. There has been a huge increase in the use of technology and software that allows individuals and teams to

Back to top

to communicate and collaborate remotely.

While this technology has been around for a while, and because we are in a position where we have to use it to keep working, people are starting to become a lot more comfortable with it and this is building up simple routines that will have a lasting effect.

Richard Saxon – CBE Chairman of JCT, client adviser at Deplo BIM Strategies says, **“Wartime scenarios” will push the digital agenda.’ (Saxon 2020)**

The Covid-19 crisis is looking very like a war scenario. Organisations are sending out messages saying they will play their part through staff working from home. It's Keep Calm and Carry on again.

Technology has always developed rapidly in wartime. The Second World War saw the birth of computing radar, jet aircraft and nuclear power. Now we have a design and construction industry in lockdown, starting to rely on tools which only a few firms have used to far.

- Now cloud-based teamwork applications allow staff to work from home or on the move with full access to their firm's common data environment
- The pressure to roll out superfast broadband and 5G will be immense
- Social media apps allow for virtual co-working
- Online meetings are well supported now and soon we will use Virtual Site Visit technology as normal
- Site work will be aided by augmented reality headsets and BIM caves

By the time a vaccine is available (see publication date), a year or more of forced advance in technology use is likely to have passed.

Things will not go back to where they were before: productivity will have improved; flexible working will have become normal; whole life thinking will have advanced.

Coronavirus to weigh on Q1 construction activity, despite recent pick-up

International construction activity picked-up in the last quarter of 2019, according to the latest findings of RICS' series of international Infrastructure and Construction Surveys. However, rising costs remain a drag on the sector, and the impact of the Coronavirus could hamper short-term output.

Free content related to Coronavirus, the management of epidemics and the wider impact on society

- Emerald Publishing, one of the UCEM e-Library subscription services, have brought together a number of research resources related to the Coronavirus group of viruses, and epidemics more broadly.

Emerald collated research and the management of epidemics and made it freely available to assist practitioners and researchers who are working to tackle the current situation and likely consequences. Whilst these materials do not only relate to the current clinical challenges of Novel Coronavirus, they may provide relevant context to how the world reacted to other previous Coronavirus outbreaks (notably SARS) and epidemics.

Cambridge University: All lectures to be online-only until summer of 2021 [19 May 2020]

- There will be no face-to-face lectures at the University of Cambridge over the course of the next academic year due to coronavirus, it has been announced.

However, lectures will be available to students online and "it may be possible to host smaller teaching groups in person" if they meet social distancing requirements, the university said.

University campuses have been closed this term (see publication date) by the Covid-19 outbreak. Cambridge will review the decision if advice on social distancing changes.

All teaching at the university was moved online in March 2020, while exams are being carried out virtually.

- **[Students 'must be warned if courses taught online'](#)**
- **[Online students would still face full tuition fees](#)**
- **[Students 'being ignored' over fee-refund claim](#)**

[Back to top](#)

It follows a similar move by the University of Manchester, which said its lectures would be online-only for the next term.

The university watchdog said students applying for university places in England must be told with “absolute clarity” how courses will be taught - before they make choices for the autumn.

Universities can charge full fees even if courses are taught online.

But Nicola Dandridge of the Office for Students warned against misleading promises about a “campus experience” if courses are to be taught online.

[Read the article, ‘Cambridge University: All lectures to be online-only until summer of 2021’ in full and related item via the BBC website](#)

New CIRIA guidance: *Methodology for quantifying the benefits of offsite construction* (C792)

- CIRIA is pleased to announce the launch of new guidance, *Methodology for quantifying the benefits of offsite construction* (C792) in association with the Laing O’Rourke Centre for Construction Engineering and Technology, University of Cambridge.

This new guidance proposes a framework for comparing construction approaches, making it possible to keep consistent records across projects and identify all the possible benefits available. This guide also highlights the challenges that can be expected when assessing the performance of construction projects and developing robust benchmarks for comparison. It provides a framework for evaluating project performance that can be used by clients, construction management teams and designers to assess the value and benefits achieved on projects. The guidance is set to support decision making and facilitate wide industry collaboration across different sectors in the construction industry.

Skills Agenda: Concerns for Skills Shortages in the 21st Century: A Review into the Construction Industry, Australia

The Australian Construction Industry is now facing skills shortages in all trades. As an industry focused on the skills of its workforce, there is now concern the Australian standard in quality, workmanship, and productivity will inhibit both national and international level.

This research paper addresses the underlying, influential factors concerning skills shortages in the Australian construction industry. The influential factors addressed include funding, training statistics, employer expectations, financial limitations, Industrial Relations and immigration.

Given the reference to skills shortages within the industry, and documented in related literature if skills shortages are to continue to exist their effect will impact upon the overall performance of construction companies through Australia.

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone. The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

[Access the National Trust website](#)

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

Seeking to influence – The NT seek to influence the Planning system at local, regional and national levels,

[Back to top](#)

Supporting spatial planning – The NT support spatial planning which takes a holistic approach to its environment and its resources,

Sensible management – The NT promotes the wise management of the natural environment and built and cultural heritage,

Protecting our environment – The NT will seek to protect wild and remote landscapes from built development or urbanisation.

Using property management plans – In managing its land through management plans, the NT will support and help to achieve objectives,

Objecting to proposals, where appropriate – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include:

- Minimising resource use and generation of waste,
- Being energy efficient,
- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and - Encouraging community involvement and access.

[Read the National Trust Planning Principles](#)

The National Trusts' planning procedure

The National Trust have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

Case studies are provided.

BIM+ Projects – Case Study: Finland's Hospital Nova uses VR to involve staff in building design

- Lead Contractor: The Central Finland Health care District
- BIM Tools: Tridify

Innovative processes have been in the co-design of Finland's new Hospital Nova using BIM models and involving more than 350 staff.

[Back to top](#)

Access BIM+ Projects Case Study, entitled, ‘Finland’s Hospital Nova uses VR to involve staff in building design’ in full.

Other BIM+ Projects [May 2020] include:

- **‘NHS Nightingale hospital, East London – how BIM played its part’**, 5 May 2020.

The UK’s newest and largest hospital (see publication date), based at the ExCel conference centre in London’s Docklands, is designed to care for up to 4,000 people affected by Covid-19. The hospital is now in standby mode and will be used should cases in the London area rise again.

The conversion of the centre into a hospital – a process rolled out in other building around the country – has provided lessons more generally for how the industry might operate.

- **‘Ten coronavirus questions for construction firms’**, 28 April 2020. - The annual BIM and digital construction survey from *Construction Manager* magazine and *BIM+* is now into its sixth year.

- **‘Case study: How the University of Birmingham digitised its estate’**

26 April 2020. - The University of Birmingham is digitising its entire estate to streamline capital project delivery and control vast amounts of asset information spanning the university’s premises.

With a history extending over 100 years, the University of Birmingham is one of the UK’s foremost and prestigious research-led institutions, delivering superb experiences for its staff, students and visitors. To continue delivering excellent services, the university is undergoing a £1bn development programme designed to create the Edgbaston campus in Birmingham and the university’s international base in Dubai.

To improve decision-making and ensure its assets are fully reflective of its world-class status, the University of Birmingham has deployed a Common Data Environment (CDE) to enhance management and control of digital information and drive bottom-line improvements across every stage of a project’s delivery and an asset’s lifecycle.

- **‘Case study: Derelict granary transformed into high-tech learning centre’**

15 April 2020. – The AgriSTEM Academy is South Staffordshire College’s centre for training in the Advanced

Manufacturing and Engineering (AME) and Agricultural Engineering and Technology (AgriTech) sectors.

Following investment from the Stoke and Staffordshire Local Enterprise Partnership, development of the new academy included a complete renovation of historic granary building in addition to extensive new buildings in addition to extensive new buildings providing 1,000m² of teaching and workshop space.

The academy features a range of facilities, including an advanced mechatronics lab, agricultural and construction vehicle simulators and renewable energies workshops.

The impact of Covid-19 on real estate, [May 2020](#)

- From residential to retail offices to logistics, the long-term impact of Covid-19.

When Savills decided on the theme 'tipping points' for their 2020 *Impacts* programme at the end of 2019, various topics were discussed: climate change, demographics, technology and many more. What wasn't known at the time is that we were about to be faced with a pandemic. Covid-19 changed the way we work and live almost overnight and is likely to have a long-term impact on real estate.

As countries come out of their strict lockdowns but social distancing is still encouraged, the long-term impact of Covid-19 is yet to be seen. Many believe the world will emerge as a different place.

Here, Savills discuss the potential changes that may be seen across the different sectors. If you prefer to read a specific sector, then select the relevant sections title to go straight there and include: **[Office sector](#)**, **[Logistics sector](#)**, **[Retail sector](#)**, **[Hotels sector](#)**, **[Institutional residential sector](#)**, **[Senior housing and healthcare sectors](#)**, **[End-use residential sector](#)**, and **[Conclusion](#)**.

Latest Research from Joseph Rowntree Foundation (JRF) -

- Inspiring Social Change: The Joseph Rowntree Foundation is an independent social change organisation working to solve UK poverty.

UK Poverty 2019/20: Housing (Part of UK Poverty 2019/20)

- It's not right that high private rents are pulling low-income households into poverty.

We all need somewhere to live, so it's unacceptable that many of us are shut out of having a secure, affordable home.

Increasing numbers of families with children are being caught in poverty's grip because of high private rents, as well as a raft of changes to social security policy, which have made housing less affordable.

Latest Research from The Smith Institute

- The Smith Institute is a leading independent 'think tank' which promotes progressive policies for a fairer society. They provide a high-level forum for new thinking and debate on public policy and politics. Through research, reports, briefings, monographs, events, lectures, education, and their website, the Institute offers a platform for thought leadership on a wide range of topics.

All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission (EPIC) January 2020

- This report presents the findings and recommendations of the Enfield Poverty and Inequality Commission. The Commission, chaired by Baroness Tyler of Enfield, was made up of a mix

[Back to top](#)

local and national stakeholders and experts and was supported by the Smith Institute.

To undertake a review of poverty and inequality in Enfield and set out recommendations, the Commission:

- Initiated a 'call for evidence' to understand the views of local people and organisations. A feedback account was set up and promoted and comment boxes were placed in Enfield's four hub libraries for member of the public to submit evidence.
- Considered relevant existing datasets across a range of available evidence bases.
- Engaged directly with local people, service providers, community organisations and businesses, through public meetings, focus groups, and one-to-one interviews.
- Considered best practice that has successfully been taken forward in Enfield and elsewhere that may be replicated or adapted for wider use.
- Held four Commission meetings to hear evidence on the three threads with follow up discussions.
- A deliberative 'solutions workshop' at Green Hall Community Centre in Edmonton, inviting organisations and members of the public who had engaged with the Commission to come together and formulate recommendations.

The Commission's work focussed on three inter-connecting themes. These were:

- Living: To what extent does who we are and where we live affect our life chances and the services we can access?
- Learning: What barriers prevent local people from accessing opportunities through education and training?
- Earning: How can people on low incomes be better supported to secure long-term economic prosperity?

Safe as Houses 3: Have government reforms to Universal Credit reduced the rent arrears of Southwark's tenants?

- This report was commissioned by the London Borough of Southwark. The aim of the report is to better understand the impact that Universal Credit (UC) has had on the rent payment behaviour of the borough's own social housing or "council" tenants.

The report focuses on two main questions: first, whether there has been an improvement in rent payment behaviour since reforms to UC were introduced in 2018; and second, to see

[Back to top](#)

what the impact of UC has been long after tenants have transitioned onto the new benefit.

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

RICS UK Economy and Property Market Chart Book, Q2 2020

- Rising unemployment likely to inhibit the economy's recovery

Economic Outlook – Initial optimism that an easing of lockdown measures would allow the UK economy to fully recover from a sharp, pandemic related, contraction appears to be fading. The Office for Budget Responsibility (OBR) estimates that a three-month lockdown may have led to 35% drop in real GDP in Q2 of this year (see publication date), and although they feel output could rise by a significant 27% in Q3 as restrictions ease, this would still leave a substantial shortfall.

RICS surveys point to a sharp deterioration in market sentiment – Feedback from the latest round of RICS Surveys unsurprisingly points to a sharp deterioration in sentiment. The results from the Q1 2020 UK Commercial Property show the crisis has accelerated the downturn in retail. CBRE data shows capital values posted monthly declines of 3% and 2% in March and April respectively at the all-sector level. Within this, although the retail sector suffered the steepest declines, values also slipped across the office and industrial sectors.

Construction Sector – ONS's preliminary estimates show that after rising in 2019, construction output declined by 3% on a year on year basis in the first quarter of 2020 owing to government restrictions imposed in March.

In the RICS Q1 2020 UK Construction Market survey, the headline workloads indicator slipped into negative territory for the first time in eight years with activity reported to have fallen in all market segments. Interestingly, we noted that sentiment turned progressively weaker towards the end of the survey period as stricter lockdown measures came into force.

[Back to top](#)

Profit margins are expected to contract:

Source: RICS Economics Research: *RICS UK Economy and Property Market Chart Book* (Q2 2020), London: RICS, p8 - Chart 7.

In addition, feedback points to a drop in market confidence with contributors anticipating workloads, employment and profit margins to decline in the coming year (see above chart). On the back of this, participants expressed the intention to decrease investment on fixed assets, equipment and software.

[Read the full piece of research 'RICS UK Property and Market Chart Book, Q2 2020'](#)

RICS UK Residential Market Survey, April 2020

- Near term expectations remain deeply negativity:

- Prices, rents and sales expected to fall sharply in the coming three months,
- 80% of contributions say that they have seen buyers or sellers pulling out of transactions,
- Majority believe prices will be lower when the market reopens.

The RICS April 2020 Residential Market Survey results suggest that the government's ongoing lockdown measures to prevent the spread of the coronavirus are continuing to stifle activity across the housing market. With estate agents still closed in April (see publication date), key activity indicators remain entrenched in negative territory. Furthermore, near term expectations suggest that the subdued set of conditions are likely to persist in the coming three months though sentiment over the twelve-month horizons is somewhat less negative.

[Read the latest RICS UK Residential Market Survey: April 2020 in full.](#)

[Back to top](#)

Latest Statistics from the Office for National Statistics (ONS)

Construction Industry highlights include – Construction output in Great Britain: [March 2020 and new orders January to March 2020](#)

What's covered in the latest bulletin?

- Construction output fell by 5.9% in the month-on-month all work series in March 2020; this was driven by a 6.2% decrease in new work and a 5.1% decrease in repair and maintenance; all of these decreases were the largest monthly falls on record since the monthly records began in January 2010.

- Anecdotal evidence received from across the industry suggested the coronavirus (COVID-19) pandemic was a significant factor to these large falls as construction activity ceased or reduced significantly in March 2020; the Office for National Statistics (ONS) has released a public statement on the coronavirus and the production of statistics.

- The decrease in new work (6.2%) in March 2020 was because of falls in all new work sectors; private new housing and private commercial were the largest contributors, falling by 6.4% & 7.1% respectively.

[Read the full statistical bulletin, 'Construction output in Great Britain: March 2020 and new orders January to March 2020.'](#)

Latest Statistics from HSE – Health and Safety Executive

In 2018/19 an estimated 1.4 million workers were suffering from an illness they believed was caused or made worse by their work and 581,000 workers sustained a non-fatal injury at work. However, the risk of injury and work-related illness varies across industry, being more likely in some industries than others. The chart that follows shows how the overall **rates** of self-reported work-related illness and workplace injury vary between industry groups.

- The industries for which the rate is statistically significantly higher than the average is generally not the same for work-related ill health and workplace injury;

- While the chart shows the overall picture for each industry group (that includes 'construction'), this may be masking differences at more detailed levels (for example illness type or more detailed industry sub-groups).

1. Co-operative and Community Benefit Societies (Environmentally Sustainable Investment) Bill 2019 - 20
2. Coronavirus: Support for household finances
3. Support for low carbon power
4. Coronavirus: The challenge for critical national infrastructure
5. Brexit and Chemicals regulation (REACH)

House of Commons Library - A search on '**construction industry**' identifies 17 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, December 2019**' -

Abstract: Construction industry – employment, new orders, output. [Construction 2025](#), [The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more constructions jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

e-Journal Review

Built Environment Industry Journal titles reviewed by UCEM e-Library

This edition ([April 2020](#)) of RICS's [MODUS](#) Digital Magazine, and indeed the forthcoming May edition – were commissioned and put together just before we started to fully understand the true impact of the global spread of Covid-19 pandemic.

Back to top

In the months that follow, RICS will be exploring the impacts of the pandemic on the built and natural environment professions, but for the most up to date information and guidance from RICS in the meantime, please keep checking the **Coronavirus Hub**.

In this issue's cover feature RICS investigate why, nearly three years after the tragedy of the Grenfell Tower fire, many householders are still trapped in unsafe homes, and what RICS has been doing to ease uncertainty for leaseholders and surveyors around the valuation process for properties in buildings clad in unsafe materials.

The Heritage Alliance's **Heritage Update**, the latest edition focusing on COVID-19 Update and Support, and the impact it has on the heritage sector.

Institute of Workplace and Facilities Management (IWFM) **Facilitate**, the latest edition focusing on 'FM's response to the pandemic and anxiety about returning to work post-lockdown'.

Contractors World International,

Construction Information Service (CIS) Insight 2020. The Latest Edition focuses on 'Remote working and digital solutions – the time to start embracing the future of work is now'

- Adopt cloud-based working,
- Staying connected in a remote working situation, and
- Optimising onsite presence.

Taylor and Francis Online incl.

- *Construction Management and Economics*,
- *Building Research and Information*, and
- *Journal of Property Research*

Henry Stewart Publications incl.

- *Building Survey, Appraisal and Valuation*,
- *Journal of Urban Regeneration & Renewal*, and
- *Corporate Real Estate*,

The in-depth articles and case studies published in the latest issue of ***Corporate Real Estate Journal*** incl.

1. Editorial: Reflections on a corporate real estate sector,

2. Comment: How far behind the curve is the commercial real estate industry? The growth of 'flex' space and its implications for CRE,

3. Papers: How commercial real estate can attract and retain the most innovative, high-growth tenants and monetise new revenue opportunities,

4. The response to noise distraction by different personality types: An extended psychoacoustics study,

5. The Tax Cuts and Jobs Act of 2017: Implications for the US real estate market,

[Back to top](#)

6. The best bidding method for your CRE sourcing initiative: A comparative analysis of popular competitive methods,
7. How coworking is fuelling the evolution of innovation centres and districts.

Educational Journal titles and Open Educational Resources (OERs) reviewed by UCEM e-Library

OpenPraxis – peer-reviewed open access scholarly journal focusing on research and innovation in open, distance and flexible education. The latest edition, **Vol 11(4)** includes selected papers from the Open Education Consortium Global 2019 Conference.

European Journal of Open, Distance and E-Learning

(EURODL), an electronic, multi-media, open access journal. It publishes the accounts of research and presents scholarly work and solid information about open, distance, online and e-learning in technology-enhanced education and training in its most inclusive definition.

As of **May 2020**, the most popular/cited article titles include:

- 'Predicting Dropout Student: An Application of Data Mining Methods in an Online Education Program',
- 'The Effects of Social Networking Sites in Distance Learning on Learners' Academic Achievements',
- 'Enhancing Understanding Flow and Self-Efficacy in Learners with Developmental and Attentions Difficulties through ICT-Based Interventions',
- ICT Capacity Building: A Critical Discourse Analysis of Rwandan Policies from Higher Education Perspective,
- Open and Distance Learning Cultural Practices in Nepal.

The Online Learning Consortium (OLC) **Online Learning Journal**, latest edition, **Vol 24(1)**. The OLC first quarterly issue of 2020 contains 13 original articles in three sections spanning 281 pages. The first section includes four papers on faculty, professional development and online teaching. The next section of the issue contains five papers broadly related to students, community, and online learning. The final section contains four additional empirical studies on a variety of topics related to online learning tools, pedagogy, and environments.

Henry Stewart Publications, Management e-Journal collection incl. *Journal of Education Advancement & Marketing*.

UCEM e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Research shows that high-performing organisations focus on diversity and inclusion (D&I). In any workplace, it is important to both understand and recognise the benefits that having a D&I workforce provides. It is integral to developing people within an organisation, serving clients as best we can, and playing an important leadership role in communities.

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success. It presents a practical and easy-to-read guide that can help organisations and their leaders engage with and apply this agenda to win the war for talent in real estate and construction.

This book is essential reading for all property leaders and professionals working in the real estate and construction sectors. Readers will gain especially from personal reflections on all aspects of diversity by a broad range of people working in the property industry.

Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online

Bonk C J, and Khoo E R (2014) *Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online* [e-book]. CreateSpace Independent Publishing Platform, e-ISBN-13: 9781496162724

As this book states, “Motivation is central to all things human” and Online teaching and learning are no different.

The authors of this free online book propose the TEC-VARIETY framework as a solution to the lack of meaningful engagement.

It can shift learners from nearly comatose states to actively engaged ones. *Adding Some TEC-VARIETY* helps instructors focus on how to motivate online learners and renew their own passion for teaching. Using 10 theoretically driven and proven motivational principles, TEC-VARIETY offers over 100 practical

[Back to top](#)

yet innovative ideas based on decades of author experience teaching in a variety of educational settings.

UCEM e-Library Portrait

Whether you are obtaining qualifications, undertaking Continuing Professional Development or researching a particular field, gaining access to a wealth of useful and credible information resources is essential!

UCEM e-Library:

© UCEM 2020

The UCEM e-Library (accessed through the Virtual Learning Environment - VLE) is a comprehensive and valuable online resource, enabling staff and students to access a wealth of

[Back to top](#)

up-to-date, credible and subject-specific information to supplement teaching and learning materials, and support students throughout their studies.

At UCEM we recognise that in an information-rich age, everyone is pressed for time and it can be a challenge to keep up-to-speed with the latest research and find good-quality information when you need it.

The UCEM e-Library can:

- provide access to online resources around the clock,
- a first point of call for staff and students to access digital resources
- add value and depth to work
- contribute to personal and professional development

What resources are available in the UCEM e-Library?

- Up-to-date information and online searchable databases from key educational and industry-specific sources incl. IHS's Construction Information Service, Estates Gazette Interactive, RICS's BCIS and ISURV, BSRIA, EBSCO Business Source Premier, Emerald Insight and access to their entire 'Property Management and the Built Environment' collection of journals, JustisOne, Westlaw UK, and more;
- useful weblinks; e-books and e-journals,
- Research and reference material to assist and underpin written work,
- Current awareness on existing issues and trends surrounding the Built Environment, Property, Construction, and Real Estate.

Overwhelmed by the sheer amount of information out there?

The e-Library is here to help make finding up-to-date, credible and relevant information easier. Remember: "A Librarian is a powerful search engine with a heart, that listens and understands the library and information requirements of others and provides a response in a format that suits their needs"

Note: Use of Wikis as a reference site

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source.

It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

- Remember that an encyclopaedia (which include Wikipedia and any other Wiki) can be a good starting point for research, and not an ending point.
- An encyclopaedia can be good for getting a general understanding of subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary

you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

[Access the Information Commissioner's Office website](#)

Latest Data Protection News

GDPR – What's new?

The Information Commissioner's Office (ICO) website has a 'What's new' section that is updated on a regular basis to highlight and link to any changes as they occur, for example:

January 2020 – The Danish Data Protection Agency has adopted Standard Contractual Clauses (SCCs) which have been approved by the European Data Protection Board (EDPB). The ICO have updated their detailed guidance on contracts and liabilities between controllers and processors to reflect this.

[Access the Information Commissioner's Office 'What's new?' section of their website](#)

Google's announced timeline for new privacy rules

- Google has announced its new privacy policy, which limits the use of cookies, will be rolled out over the next two years (see publication date).

Companies use cookies – a digital tracking tool – to discern information about individual's online activity so they can serve up targeted advertisements.

The policy called, 'privacy sandbox' means third parties will have to go through Google to access user data.

Critics believe limiting third-party access to cookies this way diminishes market fairness safety.

Case Study: EasyJet admits data of nine million hacked

- EasyJet has admitted the "highly sophisticated cyber-attack" has affected approximately nine million customers

It said email addresses and travel details had been stolen and that 2,208 customers had also had their credit and debit card details "accessed".

The firm has informed the UK's Information Commissioner's Office (ICO) while it investigates the breach.

EasyJet first became aware of the attack in January. It told the BBC that it was only able to notify customers whose credit card details were stolen in early April 2020. Stolen credit card data included the three digital security code – known as the CVV number – on the back of the card itself.

EasyJet added that it had gone public now in order to warn the nine million customers whose email addresses had been stolen to be wary of phishing attacks. It said it would notify everyone affected by 26 May 2020.

Copyright

"It is important to remember that Copyright material in digital form is protected in exactly the same way as Copyright material in any other format. For example, text and images on a website are protected by copyright in the same way as printed material.

Please note: if there is something you really want to use for learning materials and someone else owns the copyright ... [permission must be sought!](#)

The copyright owner may wish to charge you, but often they just appreciate you asking them if they are happy for you to acknowledge their work and inform them of how the information will be used and who it will be circulated to".

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers and visual artists. By 'copying' the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party. Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors.

Note: UCEM holds a CLA 'Higher Education Photocopying and Scanning Licence'

[Access the Copyright Licensing Agency website for further information](#)

CLA Title Search tool

The [CLA Title Search tool](#) is an online search tool that lets you quickly find out what you can copy under your organisation's CLA licence. Whether you'd like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance

Latest Copyright News

Article 13: UK will not implement EU copyright law

- Universities and Science Minister Chris Skidmore has said that the UK will not implement the EU Copyright Directive after the country leaves the EU.

Several companies have criticised the law, which would hold them accountable for not removing copyrighted content uploaded by users, if it is passed.

EU member states have until 7 June 2021 to implement the new reforms, but the UK will have left the EU by then.

Copyright is the legal right that allows an artist to protect how their original work is used.

Keeping abreast of the latest developments in Information Governance

© CLA 2020

As UCEM Information Governance Manager I regularly attend the Copyright Licensing Agency (CLA) Copyright & Information Technologies in Education (CITE) Forum.

The CITE Forum is a place to discuss the CLA's technology and licence offerings (such as the Digital Content Store) but also an opportunity for Higher Education Institute's to network, share and disseminate relevant copyright information. The Forum meets twice a year and publishes a biannual magazine for the CITE community containing the latest developments.

Copyright Licensing Agency (2019) '[CITE – 2020 Vision](#)', [CITE Magazine, Winter 2019, No. 3](#) [online].

Copyright Licensing Agency (2019) '[A CITE to behold](#)', [CITE Magazine, Summer 2019, No. 2](#) [online].

Copyright Licensing Agency (2018) [CITE Magazine, Winter 2018, No. 1](#) [online].

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security**.

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of

[Back to top](#)

others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's Annual Copyright Conference in association with Naomi Korn Associates

On 30th April 2020, the annual CILIP Copyright Conference took place. Despite the current lockdown due to COVID-19, CILIP in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance, made it happen albeit online this year.

This year's conference provided an opportunity to delve deeper into copyright issues and gain a better understanding of how policy impacts on libraries and the information sector.

Sessions covered broad copyright impact for the profession incl.

- **Taking Rights Away? - Reconsidering obstacles to copyright reform.**

In policy debates in copyright, it is often argued that changes to the copyright legislation which may be favourable to librarians, information professionals and the users of their services, would deprive rights holders of established property rights. Such arguments were used to prevent the resolution of the '2039 problem' in unpublished works. In this keynote paper, Jonathan Griffiths, Professor of Intellectual Property Law, Queen Mary University of London argues that, when scrutinised carefully, these claims are often less convincing than they initially appear.

- **The EU Directive: Ground-breaking, Clarifying or Pointless**

The EU Copyright Directive: What does this mean for libraries and the cultural heritage sector? Positioning new directive in the context of existing EU legislation and case law Dr Andrea Wallace, Lecturer in IP, Exeter University, and Anthony Misquitta, General Counsel V&A discussed how the new Directive will affect libraries and cultural heritage organisations.

- **Copyright Risk Assessment Framework**

The National Libraries of Wales and Scotland have jointly developed and adopted a copyright risk acceptance framework. The framework is a pragmatic risk assessment and decision-making tool to aid the digitisation of collection material (Original Objects) and the making available of digitisations (Digital Surrogates). Fred Saunderson, Rights and Information Manager, National Library of Scotland.

[Back to top](#)

- **Plan S from a Publishers Perspective: The benefits for Librarians and Academics**

The push to Open Access has created a huge change within the industry, as well as opportunities, for academics, publishers and librarians. Sarah Greaves, PhD, will discuss Plan S from an Open Access publisher's perspective.

- **Copyright in the Courts**

The session will consider a selection of recent, and not so recent judgements on copyright from UK courts, the Court of Justice of the EU and elsewhere as they affect librarians, archivists and other information professionals. Tim Padfield, Author, *Copyright for Archivists and Records Managers*

- **Ensuring every pound and every licence advances Open Access: Transformative agreements,**

Libraries entering into transformative agreements with publishers changes the business model underlying scholarly journal publishing, enabling more open access. In this session Lorraine Estelle, Director, Information Power Limited (IPL) shared a free transformative agreement toolkit, and insight into how these can be implemented by a wide array of libraries.

- **CLA Licensing Update for Librarians and Information Professionals**

James Bennett, Head of Rights and Licensing, Copyright Licensing Agency updated attendees on the latest enhancements to the licences (esp. over this COVID-19 pandemic period and extending limits for licence holders) and workflow tools offered by the CLA and CLIA Licence Plus.

During the day we were also updated about pertinent copyright issues incl. Unlocking sound heritage; Exploiting your library and information assets; Copyright Life Hacks for Librarians, in 'quick fire' five- minute lightening talks.

The Challenges of Remote Working at Present

For those who work remotely all or part of the time already, you or your employer [depending on whether you are self-employed / freelancer or an employee] will have safeguards in place that enable you to operate securely when handling commercially sensitive or others' third party data. The difference, in March 2020, is that at very short notice, organisations are having to move staff to homeworking often with literally hours' notice as the Government COVID-19 instructions are issued.

[Back to top](#)

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know](#).

The challenges of remote working at present and point to consider from a data privacy perspective

Provided within this article are points to consider from a data privacy perspective that include:

1. **Have a clear statement to all staff** stressing that "The protection of personal data that we hold, and use is important to us and must be handled at all time in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we have to adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instructions that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted." (Tullo 2020)
2. **Set out what use of data**, contact lists, customer documents are being allowed.
3. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using**.
4. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seem sensible at present] in line with experience and how staff report it is working.
5. **Reissue and emphasis your usual security arrangements –** Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household
6. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed. For the **weekly reviews** – have your Senior Leadership Team note the number of staff using personal devices, any queries or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
7. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
8. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
9. This is where a nominated Data Protection Officer [DPO] or Data Officer can support the senior team in the messaging to colleagues.

[Back to top](#)

Regarding UCEM we have followed these pointers:

(i) A clear statement went to staff, and UCEM has a designated area within their central SharePoint site for Business Continuity Planning (BCP) that has the following folders containing

- Official Communications [Internal and External]
- Human Resources (HR) guidance and support
- Information Technology (IT) technical support, guidance and documents
- Data Protection guidance (incl. a new guidance note entitled, 'Processing Personal data when remote working'.
- The [UCEM Data Protection and Privacy Policies](#) have been updated and should be read in conjunction with IT Policies).
- & Hints and tips for working from home.

(ii) A retention and destruction schedule is in place that collates lists of data used within respective teams and departments; (iii) A register is kept of where staff are working from and equipment used; (iv) Regular online meetings and weekly All-staff keep everyone updated and ensuring regular communication; (v) IT provide regular updates and guidance; (vi) GDPR 2020 training has been launched to re-enforce the importance of knowing how data is used and where it is being stored, even if temporary so that risk is managed and assessed; (vii and viii) online equipment and collaboration tools are well established at UCEM as an online education provider, but are regularly monitored; (ix) As mentioned above, hints and tips for working from home are provided, & (x) UCEM has a designated Data Protection Officer (DPO).

Please note:

There are regular updates on

- the [UCEM Website](#),
- VLE Help Page (for students),

and for all

- within the [e-Library](#) current awareness services, incl.
 - Information blog and
 - *Knowledge Foundations*.

#BE Informed

- A short **UCEM e-Library video** (used within UCEM Marketing, [Social Media business channels i.e. LinkedIn](#) to promote the e-Library, *Knowledge Foundations*, regular information blogs, and more).
