Happy Reading!

Issue 8 - August 2020

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the Library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness and share good practice, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

“The mission of librarians is to improve society through facilitating knowledge creation in their communities”

(R. David Lankes)

The initial aim of this UCEM Library current awareness service was to help keep students and staff informed of the education sector and industry specific news, share current and best practice, highlight the latest research and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [email us](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM News

UCEM receives excellent students satisfaction rates in the National Student Survey

UCEM achieved an 83% overall student satisfaction rate in this year's National Student Survey (NSS).

The highest scores UCEM received in the survey, which was published on 15th July 2020, related to how students' individual programmes top bring information together from different topics, the quality of resources available online and its ability to contact staff when needed.

UCEM Deputy Principal, Jane Fawkes, commented: "I am delighted with our overall student satisfaction rate. We work incredibly hard to ensure our students have an enjoyable learning experience and these results validate that work."

"All our staff and everyone who supports what we do should be incredibly proud of this achievement."

"An online higher education institution, we have placed an ever-increasing emphasis on delivering an outstanding student experience and will continue to work hard towards this."

[Access full details of the NSS results.](#)

HRH The Prince of Wales extends Patronage with UCEM

UCEM is honoured that The Prince of Wales has agreed to extend his Patronage for a further term. HRH first became Patron of UCEM in 1998. UCEM has worked with HRH's Prince's Foundation on a number of Built Environment-related projects.

UCEM's ambition opportunities for people of all backgrounds to develop a successful career in property and construction. Ashley Wheaton, Principal of UCEM, comments: "I am delighted that The Prince of Wales has accepted our invitation to extend his Patronage. Our core purpose is to provide accessible education for students worldwide, from the widest range of diverse backgrounds. We are deeply appreciative of his ongoing support, as we strive to fulfil our vision to become the Centre of Excellence for Built Environment Education."

The Prince of Wales [visited the University's headquarters in Reading during its centenary year](#) in March 2019, where he heard how UCEM has adapted its teaching over the last decade to meet the changing needs of its global student population, by providing supported online education through its global online education through its Virtual Learning Environment (VLE).

[Back to top](#)

He viewed a display of historic artefacts charting UCEM's one-hundred-year history, including the provision of learning to Irene Barclay, who went on to become the first female Chartered Surveyor, and a variety of historical learning resources dating back to the Second World War.

Before leaving, The Prince of Wales attended a reception of trustees, alumni, students and staff, before unveiling a plaque to commemorate his visit.

UCEM launches full-time online Built Environment BSc programmes

Students can now complete UCEM's online BSc programmes in three years thanks to the institution's newly launched full-time offer.

The new offer, available from autumn 2020, will mean students can study three modules at one time as opposed to two and get ahead with their studies if they are not in full-time employment.

There is also the flexibility to return to two modules per semester should a student's personal circumstances change, requiring them to revert to UCEM's existing part-time offer.

The next BSc start date is 5 October 2020, with an application deadline of **24 August 2020**. To find out more, visit UCEM website.

[Access further information and the article 'UCEM launches full-time online Built Environment BSc programmes' in full.](#)

UCEM's Building Control programmes gain accreditation from CABE

UCEM's Building Control programmes have been accredited by the Chartered Associates of Building Engineers (CABE).

The successful accreditation of our BSc (Hons) Building Control programme and Building Control Surveyor Degree apprenticeship follows on from a detailed submission, presentation and meeting with CABE.

Among the commendations from CABE in support of the accreditation were:

- The student handbooks are excellent with a clear layout. They are very informative, easy to follow, clear induction unit, highlighting excellent student support with links to online study resources;
- The University's selection of modules, assessment and use of project-based modules are excellent;
- A range of award outcomes that reflects student achievements;

[Back to top](#)

- The apprenticeship process, delivery, learner and employer support mechanism are impressive;
- The quality and timely submission of the accreditation documentation was exemplary.

As part of the accreditation, apprentices who complete the Building Control Degree will receive advanced standing to become a Chartered Member of CABE.

All Building Control students can apply for free student membership of CABE which can be upgraded to Associate Membership after completion of their qualification and two years' relevant experience in the workplace.

[Access further information and the article 'UCEM's Building Control programmes gain accreditation from CABE' in full.](#)

COVID-19: University College of Estate Management (UCEM) response to COVID-19 [18th March 2020]

As a responsible employer and educator, UCEM's commitment is to protect the health of all students, staff, clients and suppliers by adhering strictly to advice offered by Public Health England, The World Health Organisation, Office for Students, local and central government, whilst remaining committed to maintaining our usual excellent standard of student experience.

Please find below the steps we've taken to adhere to current and ongoing advice. As the situation is ever-changing, we fully review the guidelines and our actions daily and will quickly adapt if necessary (**Note** the publication date of this article).

- All staff who are able to work from home are doing so. We have been anticipating this situation and had prepared for it full. We have an advanced IT infrastructure in place to enable remote working, so we continue to operate as usual.
- As an online pedagogical institution, we are experts at online teaching and our deliver model will continue as normal
- The small number of staff remaining in Horizons head Office have been allocated seating at above the recommended distance away from each other.
- We are operating a policy of no external meetings and no visitors to Horizons Head Office
- All managers and department heads have been briefed with respect to our self-confinement policy and our treatment of any staff member displaying symptoms that may be linked to COVID-19
- All staff are continually reminded of the importance of following the 20-second guideline for hand-washing.

Other News

Things you need to know this week: Prime Minister looks to construction to drive recovery.

- Boris Johnson pledges to “build, build, build” targeting schools, hospitals, homes and roads, as economy struggles to recover from coronavirus.

Prime minister Boris Johnson has announced £1 billion of support for a ten-year school rebuilding programme, as part of the government's pandemic recovery plan. This year will see £560 million made available for repairs and upgrades to schools with £200 million going to further education colleges.

[Back to top](#)

The investment is part of the government's plan to fast-track construction activity in infrastructure, including roads and housing, to drive economic recovery in the wake of the pandemic. It has allocated £400 million from its Brownfield Land Fund to the West Midlands, Greater Manchester, West Yorkshire, Liverpool and Sheffield city regions and North of Tyne and Tees Valley to support the building of around 24,000 homes. It has also announced a £450 million boost for the Home Builders Fund, to help smaller developers access finance and facilitate the delivery around 7,200 homes.

Other developments include –

- Owners of newly vacant shop units will be able to convert them to housing more easily under planning reforms announced by prime minister Boris Johnson. The reforms are intended to facilitate housebuilding and high street revival and are expected to come into effect by September 2020. They include greater flexibility for repurposing of commercial premises through reform of the Use Classes Order and removal of the requirement for a planning application to demolish and rebuild vacant and redundant residential and commercial buildings which are rebuilt as housing. The prime minister also announced plans to look at how government-owned land could be managed and released more effectively.

Also – A public sector partnership has begun the search for a private sector partner to invest in and help realise plans to expand its life-sciences estate in Edinburgh with a health innovation district; Mayor of London Sadiq Khan has announced a consultation on moving the Greater London Authority (GLA) headquarters from the current City Hall, near London Bridge, to The Crystal Building in the Royal Docks; New priorities for the design of future rail stations have been set out in a report commissioned by Network Rail and published by the Design Council; and Lead figures from politics and the housebuilding industry paid tribute to Tony Pidgley, founder and chairman of developer Berkeley Group, following his sudden death last month.

(Please note you will need to register to access these stories in full, although registration is free).

[Read the full 'Need to Know: Prime Minister looks to construction to drive recovery' article](#)**Case Study: Developing homes in a conservation area**

- Storey Homes' De Montfort Place provides new homes that are sympathetic to their Bedford setting and reinstate the streetscape, as the author of this article finds out..

Bedford is a town with a rich heritage, as a look around its conservation area confirms. In safeguarding and enhancing that heritage, Bedford Town Council looks to development to deliver,

[Back to top](#)

“high quality design that takes account among other things, of local character and local distinctiveness.”

Housebuilder Storey Homes has demonstrated what can be achieved with its De Montford Place scheme. This development of 152 red and yellow brick homes not only predominantly promotes a sympathetic Victorian aesthetic, but also enhances its setting, restoring character and harmony to a streetscape that had been marred by twentieth century development and subsequent dereliction.

Challenges – Prior to redevelopment, the site had been in the ownership of De Montford University, as was occupied by teaching and sports facilities dating from the 1950s, as well as a community theatre. The buildings were derelict for some time before redevelopment began in 2016 and as a result the site had become a target for anti-social behaviour.

Milton Keynes based Storey Homes took on the challenge of redeveloping this site sympathetically. The site itself was in effect a patchwork of parcels of land, the main parcel extending along one side of Warwick Avenue. This came with the added complication of a number of existing Victorian villas, which would have to be retained under the redevelopment.

The housebuilder refurbished the villas, which were sold as private family homes, before carrying out the new build development.

Solution – The development, designed by David Coles Architects, provides a mix of housetypes, with 89 one and two bedroom apartments, 38 three, four and five bedroom houses and 25 affordable apartments.

The design for the new build scheme gives significant consideration to the conservation area, reflecting surrounding buildings in the volume, elevational style and materials. Homes have Flemish bond brickwork with brushed and flushed joints, timber sliding sash windows and front doors, and natural slate and clay roof tiles.

The site is being developed in four phases, two of which are now complete. The third phase comprises two three-bedroom semi-detached houses and 10 five-bedroom houses. The upcoming final phase will comprise a block of 19 apartments on the former theatre site.

Analysis: Industry makes case for housing retrofit in green recovery

- Upgrading the energy efficiency of existing homes could benefit the economy, environment and residents, but there are barriers to overcome, finds the author of this article.

The coronavirus lockdown caused the UK economy to shrink by more than 20 per cent in April 2020, according to the Office for National Statistics, and economic forecasts are predicting a continuing impact. This is focusing attention on economic recovery, and a string of recent reports and high profile letters from business leaders have called for government to make that recovery green.

One area for environmental action being highlighted is the retrofit of existing homes to upgrade their energy efficiency, an intervention that has the potential to generate jobs and boost the economy, while benefitting the environment and residents, particularly those afflicted by fuel poverty, a number of studies argue.

Industry body the Energy Efficiency Infrastructure Group (EEIG) has estimated that retrofit measures could support more than 150,000 green jobs to 2030 and cut overall household energy expenditure by £7.5 billion a year. A report by environmental consultant Eculty Consulting for local government body, the Local Government Association (LGA) estimates that nearly 700,000 green jobs could be created in the broader low-carbon and renewable energy sectors in England in a decade. The study estimates more than 1.1 million jobs could be created by 2050, the target date legally adopted by the UK government to reduce overall carbon emission levels to net zero.

The Coalition for the Energy Efficiency of Buildings (CEEB), an expert group established by the government-backed Green Finance Institute, says the government's National Infrastructure Strategy, Spending Review and Heat Strategy present opportunities for it to drive housing retrofit. "These can shape stimulus responses to the pandemic into a longer-term strategy, providing certainty of the path ahead, and allowing the leverage of further private capital for housing infrastructure projects," it says in its [report on retrofit](#), published in May 2020. The CEEB has looked at financial barriers to retrofit and potential solutions and has put forward proposals for 21 demonstrator projects, ranging from green equity release for older homeowners and an energy saving ISA to green leases for landlords.

Coronavirus – latest developments [July 2020]

Visiting people at home banned in parts of northern England

- Millions of people in parts of northern England are now facing new restrictions banning separate households from meeting each other at home after a spike in Covid-19 cases.

Other related news:

- Pubs and restaurants to reopen in Leicester
- Luxembourg taken off UK travel exemption list
- What are the latest social distancing rules?
- How many confirmed cases were there in your areas?

and

- **Coronavirus: Why some people want to keep working from home**

- When lockdown started in March 2020, workers across the UK packed up their office equipment and set up work stations in their own homes.

Bedrooms, kitchen counter-tops and dining tables became the new way of working for millions of people.

According to the ONS, 30% of adults in the UK were exclusively working from home at the start of July 2020. From 1st August, employers in England can allow staff back into offices at their own discretion when they feel it's safe to do so.

But now it's time to return to those communal workplaces, research from Eskenzi suggests that 91% of the UK's office workers would like work from home at least part of the time. So why are so many office staff keen to keep working from home?

Some of the reasons and case studies are provided in this article and include

- 'It's like getting a pay rise' due to making savings on the commute
- 'We're spending more time together as a family', and
- 'I've seen an improvement in my mental health'

The evolution of building surveying education during COVID-19

- In January and February 2020, as the pandemic was starting to gain momentum and spreading around the globe, universities in the UK were beginning to consider how to react.

As a sector, UK higher education is relatively familiar with web-based methods of communication, teaching and learning.

In fact, the University College of Estate Management (formerly the College of Estate Management) and the traditional home of RICS correspondence courses, operates their business totally online.

A lot of universities operate a Virtual Learning Environment (VLE) which allows them to communicate with their students and provides the opportunity to interact with them in terms of online courses and assessments, and as a depository for learning materials.

This is allowing the students to revisit the materials to embed or reinforce their learning or to catch up if a session was missed. Common VLE's include Blackboard, WebCT, and Moodle. Their functionality and features are all relatively similar.

Although the physical libraries have closed, universities operate electronic libraries which offer access to a large number of electronic databases, and a growing number of books and journals, ensuring that the students and staff, can continue to access the majority of relevant information for their studies and research.

[Further information and access to the article 'The evolution of building surveying education during COVID-19', in full.](#)

The Pandemic Has Taken Cars Off Urban Streets. Will It Last?

- With a sharp drop in auto traffic due to Coronavirus, cities around the globe have closed streets to cars and expanded pedestrian thoroughfares and bikes lanes.

But as life edges back to normal (see publication date), will these initiatives survive, especially if virus-wary citizens shun mass transit?

[Back to top](#)

[Access this article entitled, 'The Pandemic Has Taken Cars Off Urban Streets. Will It Last' in full.](#)

Will COVID-19 accelerate construction's digital transformation?

- With many industry professionals forced to work remotely, is now the perfect time for construction to get up to speed with all things BIM and digital? *Construction Manager* magazine finds out if the coronavirus will change the way we work forever.

David Philp – Global BIM/MIC consultancy director, AECOM says, **“It’s an opportunity to rethink how we can use technology and innovate.” (Philp 2020)**

The coronavirus pandemic is forcing us to strive for more innovative and rapid solutions. From increased home working needs, maximising performance of our healthcare estates and ultimately how we can recover from the looming economic challenges, we need to usher in new ways of working.

This crisis will be an opportunity for us to rethink construction priorities, how we can better use technology and innovate in the use of joined-up data to support immediate societal needs and the creation of a more resilient built environment.

Mark Boyle – Global design direct, Robert Bird says, **‘Our digital processes lend themselves to remote working.’ (Boyle 2020),** and

Gary Fannon – Technology director, Turner and Townsend says, **‘Early digital adopters will be reaping the rewards.’ (Fannon 2020)**

T&T's technology team have all been set up to work from home for some time and the early adopters will reap the rewards from the coronavirus lockdown. Design teams are able to continue working – creating a fully designed digital model that can be constructed to an excellent quality standard when work is able to begin on site.

There are also security questions about home working – we need to educate people and show them how to make home routers more secure. But overall, the enforced lockdown could show the industry how we can use digital technology to be more efficient and productive.

Andrew Gamblen – Digital manager, Willmott Dixon says, **‘People will become more comfortable collaborating remotely.’ (Gamblen 2020)**

The effect of Covid-19 and social distancing is going to have a long-lasting effect on both the construction sector and the UK as a whole. There has been a huge increase in the use of technology and software that allows individuals and teams to communicate and collaborate remotely.

[Back to top](#)

While this technology has been around for a while, and because we are in a position where we have to use it to keep working, people are starting to become a lot more comfortable with it and this is building up simple routines that will have a lasting effect.

Richard Saxon – CBE Chairman of JCT, client adviser at Deploi BIM Strategies says, **“Wartime scenarios” will push the digital agenda.’ (Saxon 2020)**

The Covid-19 crisis is looking very like a war scenario. Organisations are sending out messages saying they will play their part through staff working from home. It’s Keep Calm and Carry on again.

Technology has always developed rapidly in wartime. The Second World War saw the birth of computing radar, jet aircraft and nuclear power. Now we have a design and construction industry in lockdown, starting to rely on tools which only a few firms have used to far.

- Now cloud-based teamwork applications allow staff to work from home or on the move with full access to their firm’s common data environment
- The pressure to roll out superfast broadband and 5G will be immense
- Social media apps allow for virtual co-working
- Online meetings are well supported now and soon we will use Virtual Site Visit technology as normal
- Site work will be aided by augmented reality headsets and BIM caves

By the time a vaccine is available (see publication date), a year or more of forced advance in technology use is likely to have passed.

Things will not go back to where they were before: productivity will have improved; flexible working will have become normal; whole life thinking will have advanced.

[Read the *Construction Manager* article ‘Will Covid-19 accelerate construction’s digital transformation’, in full.](#)

Coronavirus to weigh on Q1 construction activity, despite recent pick-up

International construction activity picked-up in the last quarter of 2019, according to the latest findings of RICS’ series of international Infrastructure and Construction Surveys. However, rising costs remain a drag on the sector, and the impact of the Coronavirus could hamper short-term output.

Free content related to Coronavirus, the management of epidemics and the wider impact on society

- Emerald Publishing, one of the UCEM e-Library subscription services, have brought together a number of research resources related to the Coronavirus group of viruses, and epidemics more broadly.

Emerald collated research and the management of epidemics and made it freely available to assist practitioners and researchers who are working to tackle the current situation and likely consequences. Whilst these materials do not only relate to the current clinical challenges of Novel Coronavirus, they may provide relevant context to how the world reacted to other previous Coronavirus outbreaks (notably SARS) and epidemics.

Cambridge University: All lectures to be online-only until summer of 2021 [19 May 2020]

- There will be no face-to-face lectures at the University of Cambridge over the course of the next academic year due to coronavirus, it has been announced.

However, lectures will be available to students online and "it may be possible to host smaller teaching groups in person" if they meet social distancing requirements, the university said.

University campuses have been closed this term (see publication date) by the Covid-19 outbreak. Cambridge will review the decision if advice on social distancing changes.

All teaching at the university was moved online in March 2020, while exams are being carried out virtually.

- **Students 'must be warned if courses taught online'**
- **Online students would still face full tuition fees**
- **Students 'being ignored' over fee-refund claim**

It follows a similar move by the University of Manchester, which said its lectures would be online-only for the next term.

The university watchdog said students applying for university places in England must be told with "absolute clarity" how courses will be taught - before they make choices for the autumn.

Universities can charge full fees even if courses are taught online.

[Back to top](#)

But Nicola Dandridge of the Office for Students warned against misleading promises about a “campus experience” if courses are to be taught online.

[Read the article, ‘Cambridge University: All lectures to be online-only until summer of 2021’ in full and related item via the BBC website](#)

New CIRIA guidance: *Methodology for quantifying the benefits of offsite construction* (C792)

- CIRIA is pleased to announce the launch of new guidance, *Methodology for quantifying the benefits of offsite construction* (C792) in association with the Laing O’Rourke Centre for Construction Engineering and Technology, University of Cambridge.

This new guidance proposes a framework for comparing construction approaches, making it possible to keep consistent records across projects and identify all the possible benefits available. This guide also highlights the challenges that can be expected when assessing the performance of construction projects and developing robust benchmarks for comparison. It provides a framework for evaluating project performance that can be used by clients, construction management teams and designers to assess the value and benefits achieved on projects. The guidance is set to support decision making and facilitate wide industry collaboration across different sectors in the construction industry.

Skills Agenda: Concerns for Skills Shortages in the 21st Century: A Review into the Construction Industry, Australia

The Australian Construction Industry is now facing skills shortages in all trades. As an industry focused on the skills of its workforce, there is now concern the Australian standard in quality, workmanship, and productivity will inhibit both national and international level.

This research paper addresses the underlying, influential factors concerning skills shortages in the Australian construction industry. The influential factors addressed include funding, training statistics, employer expectations, financial limitations, Industrial Relations and immigration.

Given the reference to skills shortages within the industry, and documented in related literature if skills shortages are to continue to exist their effect will impact upon the overall performance of construction companies through Australia.

RICS – The Future of Surveying

- We know the challenges facing the built environment and the surveying profession – now it's time to act. We know the challenges facing the built environment and the surveying profession – now it's time to tackle them.

For over 150 years, RICS has led our profession through change, enabling our members to take advantage of the opportunities and manage the risks it presents. This change is now happening faster than ever, requiring us to think strategically about how we deploy our expertise and resource. To continue to provide leadership, we are constantly assessing our role as a standard setter, regulator, educator and global professional body – to deliver confidence to governments, markets and the public.

RICS Futures Report 2020 is our action agenda to keep up in a changing world.

Access and download the Futures report to read RICS' full agenda for effecting change and responding to the biggest issues facing the natural and built environment, in full.

Read the article, 'Future of Surveying' and gain access to the Futures report in full.

GOV.UK, National Statistics - UK House Price Index: June 2020

- The UK House Price Index is a National Statistic that shows changes in the value of residential properties in England, Scotland, Wales and Northern Ireland.

The UK House Price Index (UK HPI) captures changes in the value of residential properties.

The UK HPI uses sales data collected on residential housing transactions, whether for cash or with a mortgage.

Properties have been included:

- In England and Wales since January 1995
- In Scotland since January 2004

[Back to top](#)

- In Northern Ireland since January 2005

Data is available at a national and regional level, as well as counties, local authorities and London boroughs.

Sustainable outcomes for buildings

The Royal Institute of British Architects (RIBA) has published guidance on targeting, designing and evaluating sustainable outcomes for buildings, defining concise measurable set of eight sustainable outcomes that correspond to key UN Sustainable Development Goals and can be delivered on building projects of all scales.

[Access the RIBA Sustainable Outcomes Guide](#)

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone. The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

[Access the National Trust website](#)

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

Seeking to influence – The NT seek to influence the Planning system at local, regional and national levels,

Supporting spatial planning – The NT support spatial planning which takes a holistic approach to its environment and its resources,

Sensible management – The NT promotes the wise management of the natural environment and built and cultural heritage,

Protecting our environment – The NT will seek to protect wild and remote landscapes from built development or urbanisation.

Using property management plans – In managing its land through management plans, the NT will support and help to achieve objectives,

Objecting to proposals, where appropriate – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include:

- Minimising resource use and generation of waste,

[Back to top](#)

- Being energy efficient,
- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and - Encouraging community involvement and access.

[Read the National Trust Planning Principles](#)

The National Trusts' planning procedure

The National Trust have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

Case studies are provided.

[Read how the National Trust engage in planning: The NTs' role as a developer.](#)

Foster + Partners Projects

Foster + Partners Projects – one of the most innovative architecture and integrated design practices in the world. Over the past four decades the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civil and cultural buildings, offices and workplaces to private houses and product design. By visiting their website, you can gain further information about their current and past work, upcoming projects and gain access to their-

Building Information Modelling (BIM)

Step-by-step guide to using BIM on projects

Source: PCSG (2019) '[Step-by-step guide to using BIM on projects](#)', Designing Buildings Wiki [online] Last edited 5 April.

This step-by-step guide explains how level 2 building information modelling (BIM) can be used for the development of a built asset such as a new building.

Access the Step-by-step guide to using BIM on projects

BIM+ Projects – Case Study: Steelwork fabricator adopts digital workflow management, 3 July 2020.

Lancashire-based steelwork fabricator Wareing Buildings has been digitising its business with investment in a central information management system to help control, track and deliver jobs more efficiently.

Despite already employing digital technology and BIM within the company at the design stage of a project, including Tekla Structures, Tekla Structural Designer and the cloud-based Trimble Connect, the way Wareing Buildings actually managed its everyday activity, including the processing, tracking and delivery of steel fabrication jobs, remained a largely manual process.

Access BIM+ Projects Case Study, entitled, 'Steelwork fabricator adopts digital workflow management' in full.

Other BIM+ Projects [July 2020] include:

- Case Study: '[AI tracks work quality at Norway's Stavanger Hospital](#)', 21 June 2020.
The new Stavanger University Hospital is being built in Stavanger, 300km from Oslo.
The first stage of the construction, which should be ready in 2023, cover 130,000 sq. m, the equivalent of more than 14 football pitches. It has been designed by COWI, the Norwegian-based international consulting group, and the Nordic Office of Architecture. In November 2018, the project was named BIM World Champion in the large project category in the annual Auto desk Awards.
At peak times, up to 1,000 people will be working on the project. The new hospital has a planned capacity for 640 patients and specialised world-class laboratories for day care, radiology and emergency departments. The total budget of the project is approximately £800m.

[Back to top](#)

- **NHS Nightingale hospital, East London – how BIM played its part**
5 May 2020 - The UK's newest and largest hospital (see publication date), based at the ExCel conference centre in London's Docklands, is designed to care for up to 4,000 people affected by Covid-19. The hospital is now in standby mode and will be used should cases in the London area rise again.

The conversion of the centre into a hospital – a process rolled out in other building around the country – has provided lessons more generally for how the industry might operate.
- **Ten coronavirus questions for construction firms,**
28 April 2020 - The annual BIM and digital construction survey from *Construction Manager* magazine and *BIM+* is now into its sixth year.
- **Case Study: Finland's Hospital Nova uses VR to involve staff in building design,**
28 April 2020 - Innovative processes have been in the co-design of Finland's new Hospital Nova using BIM models and involving more than 350 staff.
- **Case study: How the University of Birmingham digitised its estate,**
26 April 2020 - The University of Birmingham is digitising its entire estate to streamline capital project delivery and control vast amounts of asset information spanning the university's premises.

With a history extending over 100 years, the University of Birmingham is one of the UK's foremost and prestigious research-led institutions, delivering superb experiences for its staff, students and visitors. To continue delivering excellent services, the university is undergoing a £1bn development programme designed to create the Edgbaston campus in Birmingham and the university's international base in Dubai.

To improve decision-making and ensure its assets are fully reflective of its world-class status, the University of Birmingham has deployed a Common Data Environment (CDE) to enhance management and control of digital information and drive bottom-line improvements across every stage of a project's delivery and an asset's lifecycle.
- **Case study: Derelict granary transformed into high-tech learning centre,**
15 April 2020. – The AgriSTEM Academy is South Staffordshire College's centre for training in the Advanced Manufacturing and Engineering (AME) and Agricultural Engineering and Technology (AgriTech) sectors.

Following investment from the Stoke and Staffordshire Local Enterprise Partnership, development of the new academy

[Back to top](#)

included a complete renovation of historic granary building in addition to extensive new buildings in addition to extensive new buildings providing 1,000m² of teaching and workshop space.

The academy features a range of facilities, including an advanced mechatronics lab, agricultural and construction vehicle simulators and renewable energies workshops.

Built Environment Research

Latest from Savills *Impacts* – *The Future of Global Real Estate*

- Market Trends: Savills.com

In-depth research and analysis into property market trends, forecasts from specialist research teams, and market leading commentary to help you make the right property decisions

The impact of Covid-19 on real estate, June 2020

- From residential to retail offices to logistics, the long-term impact of Covid-19.

When Savills decided on the theme 'tipping points' for their 2020 *Impacts* programme at the end of 2019, various topics were discussed: climate change, demographics, technology and many more. What wasn't known at the time is that we were about to be faced with a pandemic. Covid-19 changed the way we work and live almost overnight and is likely to have a long-term impact on real estate.

As countries come out of their strict lockdowns but social distancing is still encouraged, the long-term impact of Covid-19 is yet to be seen. Many believe the world will emerge as a different place.

[Back to top](#)

Here, Savills discuss the potential changes that may be seen across the different sectors. If you prefer to read a specific sector, then select the relevant sections title to go straight there and include: [Office sector](#), [Logistics sector](#), [Retail sector](#), [Hotels sector](#), [Institutional residential sector](#), [Senior housing and healthcare sectors](#), [End-use residential sector](#), and [Conclusion](#).

All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission (EPIC)

January 2020

- This report presents the findings and recommendations of the Enfield Poverty and Inequality Commission. The Commission, chaired by Baroness Tyler of Enfield, was made up of a mix local and national stakeholders and experts and was supported by the Smith Institute.

To undertake a review of poverty and inequality in Enfield and set out recommendations, the Commission:

- Initiated a 'call for evidence' to understand the views of local people and organisations. A feedback account was set up and promoted and comment boxes were placed in Enfield's four hub libraries for member of the public to submit evidence.
- Considered relevant existing datasets across a range of available evidence bases.
- Engaged directly with local people, service providers, community organisations and businesses, through public meetings, focus groups, and one-to-one interviews.
- Considered best practice that has successfully been taken forward in Enfield and elsewhere that may be replicated or adapted for wider use.
- Held four Commission meetings to hear evidence on the three threads with follow up discussions.
- A deliberative 'solutions workshop' at Green Hall Community Centre in Edmonton, inviting organisations and members of the public who had engaged with the Commission to come together and formulate recommendations.

The Commission's work focussed on three inter-connecting themes. These were:

- Living: To what extent does who we are and where we live affect our life chances and the services we can access?
- Learning: What barriers prevent local people from accessing opportunities through education and training?
- Earning: How can people on low incomes be better supported to secure long-term economic prosperity?

[Read the full piece of research, 'All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission'.](#)

Safe as Houses 3: Have government reforms to Universal Credit reduced the rent arrears of Southwark's tenants?

- This report was commissioned by the London Borough of Southwark. The aim of the report is to better understand the impact that Universal Credit (UC) has had on the rent payment behaviour of the borough's own social housing or "council" tenants.

[Back to top](#)

The report focuses on two main questions: first, whether there has been an improvement in rent payment behaviour since reforms to UC were introduced in 2018; and second, to see what the impact of UC has been long after tenants have transitioned onto the new benefit.

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

RICS UK Economy and Property Market Chart Book, Q2 2020

- Rising unemployment likely to inhibit the economy's recovery

Economic Outlook – Initial optimism that an easing of lockdown measures would allow the UK economy to fully recover from a sharp, pandemic related, contraction appears to be fading. The Office for Budget Responsibility (OBR) estimates that a three-month lockdown may have led to 35% drop in real GDP in Q2 of this year (see publication date), and although they feel output could rise by a significant 27% in Q3 as restrictions ease, this would still leave a substantial shortfall.

RICS surveys point to a sharp deterioration in market sentiment

– Feedback from the latest round of RICS Surveys unsurprisingly points to a sharp deterioration in sentiment. The results from the Q1 2020 UK Commercial Property show the crisis has accelerated the downturn in retail. CBRE data shows capital values posted monthly declines of 3% and 2% in March and April respectively at the all-sector level. Within this, although the retail sector suffered the steepest declines, values also slipped across the office and industrial sectors.

Construction Sector – ONS's preliminary estimates show that after rising in 2019, construction output declined by 3% on a year on year basis in the first quarter of 2020 owing to government restrictions imposed in March.

In the RICS Q1 2020 UK Construction Market survey, the headline workloads indicator slipped into negative territory for the first time in eight years with activity reported to have fallen in all market segments. Interestingly, we noted that sentiment turned progressively weaker towards the end of the survey period as stricter lockdown measures came into force.

[Back to top](#)

Profit margins are expected to contract:

Source: RICS Economics Research: *RICS UK Economy and Property Market Chart Book* (Q2 2020), London: RICS, p8 - Chart 7.

In addition, feedback points to a drop-in market confidence with contributors anticipating workloads, employment and profit margins to decline in the coming year (see above chart). On the back of this, participants expressed the intention to decrease investment on fixed assets, equipment and software.

[Read the full piece of research 'RICS UK Property and Market Chart Book, Q2 2020](#)

RICS UK Residential Market Survey, June 2020

- Recovery in activity now underway but longer-term expectations remain cautious

- Enquiries, agreed sales and instructions all improve noticeably in June
- Prices continue to slip, albeit more moderately than last month,
- Twelve-month sales expectations still subdued due to the challenging economic backdrop.

The June 2020 RICS UK Residential Survey results point to a recovery emerging across the market, with indicators on buyer demand, sales and fresh listings all rallying noticeably following the lockdown related falls beforehand. That said, respondents still appear relatively cautious on the prospect of this improvement being sustained over the longer-term, as twelve-month sales expectations are now marginally negative.

In terms of buyer demand, a headline net balance of +61% of survey participants saw a rise in enquiries over June. This marks a strong rebound compared to readings of -7% and -94% posted in April and May respectively. Furthermore, respondents across virtually all parts of the UK reported a pick-up in buyer enquiries during June.

[Back to top](#)

than that returned last month (net balance -93%). Similarly, despite a net balance -20% of contributors reporting that new instructions coming onto the market continued to fall in May, this is noticeably less negative compared to the reading of -97% last time out. It is important to highlight that current activity metrics did not see any meaningful changes in Scotland, Northern Ireland and Wales, where restrictions on estate agents were not removed in May.

[Read the latest RICS UK Residential Market Survey: June 2020 in full.](#)

Latest Statistics from the Office for National Statistics (ONS)

Construction Industry highlights include – Construction output in Great Britain: [May 2020](#)

What's covered in the latest bulletin?

- Construction output grew by a record 8.2% in the month-on-month all work series in May 2020 following the record decline of 40.2% in April 2020; the level of construction output is now down 38.8% on February 2020 before the impact of the coronavirus (COVID-19) pandemic.

- Construction output fell by a record 29.8% in the three months to May 2020, compared with the previous three-month period, this was driven by record falls of 30.3% in new work and 28.9% in repair and maintenance.

- The decrease in new work (30.3%) in the three months to May 2020 was because of record falls in most of the new work sectors, private new housing and private commercial were the largest contributors, falling by 42.5% & 29.5% respectively.

[Read the full statistical bulletin, 'Construction output in Great Britain: May 2020.](#)

Latest Statistics from HSE – Health and Safety Executive

In 2018/19 an estimated 1.4 million workers were suffering from an illness they believed was caused or made worse by their work and 581,000 workers sustained a non-fatal injury at work. However, the risk of injury and work-related illness varies across industry, being more likely in some industries than others. The chart that follows shows how the overall **rates** of self-reported work-related illness and workplace injury vary between industry groups.

- The industries for which the rate is statistically significantly higher than the average is generally not the same for work-related ill health and workplace injury;

- While the chart shows the overall picture for each industry group (that includes 'construction'), this may be masking differences at

House of Commons Library - A search on '**construction industry**' identifies 17 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, December 2019**' -

Abstract: Construction industry – employment, new orders, output. [Construction 2025, The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more construction jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

e-Journal Review

Built Environment Industry Journal titles reviewed by UCEM e-Library

Modus - the RICS magazine that brings you the latest news and views, expert advice and in-depth features spanning the breadth of the surveying profession around the world.

In the final issue of ***MODUS*** (**July 2020 – How to build a post-Covid World/18**) Magazine before it goes fully digital, RICS takes a look how the built environment of the future might be affected by the global Covid-19 outbreak. RICS explores how cities of the past have been reshaped by disease, from the creation of sewers to the architecture of sanitoriums and ask what changes we can make to modern buildings and infrastructure, for the good of public health.

Elsewhere in this issue

- Smart cities can, potentially, use people's data to improve everything from transport infrastructure to healthcare. Is there any way of harvesting the data without compromising our privacy?

- *MODUS* take a look at the concept of social value, an idea that is gaining traction in the built environment, and ask how we define and measure it

- Timber as a building material is much more sustainable than concrete and glass. *Modus* asks whether, when it comes to building tall, it can ever be safe.

Modus also explore Norway's first emissions-free construction site and asks what we can learn from Asia's response to the coronavirus pandemic. *MODUS* asks what changes we can make to have a positive impact on BAME communities and discover that the future of delivery services could lie underground.

Please note: In addition to *MODUS*, RICS publishes other journals that are free to view online incl.

1. ***Construction Journal*** - The journal helps **quantity surveyors** and project managers with the technical and professional aspects of their day jobs and keep up to date with developments and practical matters in the profession. It covers topics including contracts, cost management, procurement, construction law and regulations, communication and project management skills.
2. ***Built Environment Journal*** (incl. Building Surveying, Building Conservation, and Building Control) - Coverage keeps practitioners in the disciplines of building surveying, building control and building conservation up to date on the latest developments, products, standards and guidance.

[Back to top](#)

3. [Land Journal](#) - The journal emphasises the crossovers in these practice areas and their global nature, with articles contributed by experts from all over the world.
4. [Property Journal](#) - The journal contains high-quality technical material in clearly defined sections, as well as some material that crosses professional groups to reach a wider audience.

The Online Learning Consortium (OLC) *Online Learning Journal*, latest edition, **Vol 24(2)**. This issue of *Online Learning* is the first to be published during the ongoing pandemic, which has had substantial implications for the education sector. The significance of online learning has changed dramatically since the onset of COVID-19. Virtually every institution from primary schools through

graduate schools in the US and around the world has moved instruction from classroom settings to remote/distance settings. It is important to note that institutions undertook this shift under extreme pressure with unrealistic timelines, frequently a matter of days or weeks.

UCEM e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Research shows that high-performing organisations focus on diversity and inclusion (D&I). In any workplace, it is important to both understand and recognise the benefits that having a D&I workforce provides. It is integral to developing people within an organisation, serving clients as best we can, and playing an important leadership role in communities.

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success. It presents a practical and easy-to-read guide that can help organisations and their leaders engage with and apply this agenda to win the war for talent in real estate and construction.

This book is essential reading for all property leaders and professionals working in the real estate and construction sectors. Readers will gain especially from personal reflections on all aspects of diversity by a broad range of people working in the property industry.

Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online

Bonk C J, and Khoo E R (2014) *Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online* [e-book]. CreateSpace Independent Publishing Platform, e-ISBN-13: 9781496162724

[Back to top](#)

As this book states, “Motivation is central to all things human” and Online teaching and learning are no different.

The authors of this free online book propose the TEC-VARIETY framework as a solution to the lack of meaningful engagement.

It can shift learners from nearly comatose states to actively engaged ones. *Adding Some TEC-VARIETY* helps instructors focus on how to motivate online learners and renew their own passion for teaching. Using 10 theoretically driven and proven motivational principles, TEC-VARIETY offers over 100 practical yet innovative ideas based on decades of author experience teaching in a variety of educational settings.

Studying at a Distance

Talbot C (2010) *Studying at a Distance* [e-book]. Maidenhead: Open University Press, e-ISBN-13: 9780335238057

This essential guide provides practical help and support for those who have not previously studied at a distance and is ideal for students returning to study after a break. It covers fundamental issues such as motivation, goal setting, time management and coping strategies. Additional coverage in this third edition includes: specific information on the use of new technologies in distance learning; detailed coverage of referencing, citation and plagiarism; description of using mind maps and other techniques for planning and writing essays or reports; support for disabled students, particularly those with dyslexia; and, an expanded further resources section.

Directory of Open Access Books (DOAB)

UCEM e-Library Portrait

Whether you are obtaining qualifications, undertaking Continuing Professional Development or researching a particular field, gaining access to a wealth of useful and credible information resources is essential!

[Back to top](#)

UCEM e-Library:

© UCEM 2020

The UCEM e-Library (accessed through the Virtual Learning Environment - VLE) is a comprehensive and valuable online resource, enabling staff and students to access a wealth of up-to-date, credible and subject-specific information to supplement teaching and learning materials, and support students throughout their studies.

At UCEM we recognise that in an information-rich age, everyone is pressed for time and it can be a challenge to keep up-to-speed with the latest research and find good-quality information when you need it.

The UCEM e-Library can:

- provide access to online resources around the clock,
- a first point of call for staff and students to access digital resources
- add value and depth to work
- contribute to personal and professional development

What resources are available in the UCEM e-Library?

- Up-to-date information and online searchable databases from key educational and industry-specific sources incl. IHS's Construction Information Service, Estates Gazette Interactive, RICS's BCIS and ISURV, BSRIA, EBSCO Business Source Premier, Emerald Insight and access to their entire 'Property Management and the Built Environment' collection of journals, JustisOne, Westlaw UK, and more;
- useful weblinks; e-books and e-journals,
- Research and reference material to assist and underpin written work,
- Current awareness on existing issues and trends surrounding the Built Environment, Property, Construction, and Real Estate.

Overwhelmed by the sheer amount of information out there?

The e-Library is here to help make finding up-to-date, credible and relevant information easier. Remember: "A Librarian is a powerful search engine with a heart, that listens and understands the library

Building Better Property Professionals

Property Elite's sole aim is to build better property professionals – supporting your career every step of the way, whether you are completing a RICS accredited degree course, your RICS APC or simply seeking engaging CPD.

Property Elite provides training and Continuing Professional Developments (CPD) services for property professionals, including students, APC candidates and corporate clients.

Their Hot Topic Highlight blog posts will arm you with the information on the hottest topics – ready to tackle an important client meeting or begin revising for your RICS APC final assessment.

This month (**July 2020**) the Hot Top Highlight – **RIBA Plan of Work 2020**. This blog takes a look at the new RIBA Plan of Work 2020.

What is the RIBA Plan of Work? The RIBA Plan of Work was first published by the Royal Institute of British Architects (RIBA) in

Back to top

1963. It originally provided a matrix to show the roles of participants in the design and construction processes.

It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

It now provides a shared framework for design and construction, including both a process map and management tool.

What changed in 2020? In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement.

This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly In use

RIBA Plan of Work 2020:

Building People

© UCEM 2020

[Enabling connections for a competent, diverse and valued built environment workforce](#)

The aim of 'Building People' was to create a technology platform and collaborative network, that enables connections and seeks to reduce the skills shortages across the Built Environment.

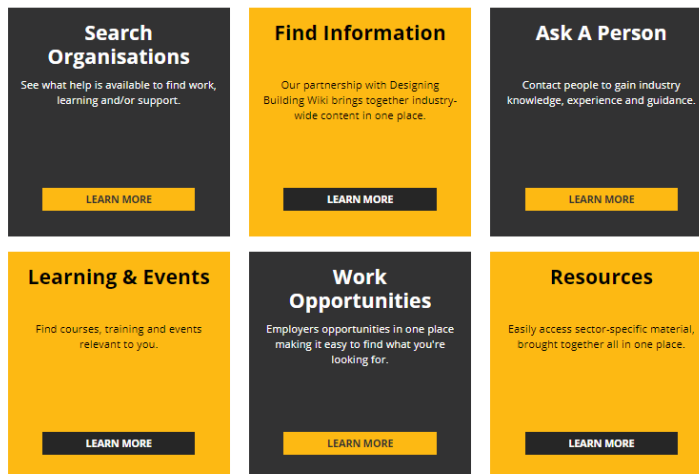

In 2018 UCEM's widening participation ambitions were boosted after acquiring the innovative Built Environment digital network. 'Building People', a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with

[Back to top](#)

employers seeking to plug the skills gap via an online platform, is now a subsidiary of UCEM.

People Wiki

What are you looking for?

© Building People 2020

Building People and Designing Buildings Wiki have launched People Wiki, a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.

The UK needs to build, but there is a shortage of competent and experienced workers, and the workforce we have lacks diversity. Building People joins the dots to help people find employers, opportunities and resources, and to help employers engage with a more diverse range of talent.

The launch of People Wiki is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities and needs focused on diversity and inclusion, skills and careers, and social value. This platform is now live and provides users with options to find organisations that can support them with built environment careers, as well as access to information and resources. In September the platform will expand to include directories that bring together events, courses and work vacancies (with an initial prototype focus on the surveying profession).

People Wiki has been created as part of Designing Buildings Wiki and is fully linked to its 10,000 existing articles and easily accessible by its 7.5 million annual users. This collaboration with an established and respected industry knowledge base will help Building People achieve its vision of a built environment that improves social and economic value by being better connected, more diverse and more inclusive.

Note: Use of Wikis as a reference site

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source.

It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

- Remember that an encyclopaedia (which include Wikipedia and any other Wiki) can be a good starting point for research, and not an ending point.
- An encyclopaedia can be good for getting a general understanding of subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

- [Back to top](#)**Information Governance**

UCEM is committed to advancing information governance and compliance, ensuring that the services provided comply with the General Data Protection Regulation (GDPR), Data Protection,

[Back to top](#)

Freedom of Information, Records management, Copyright, and Information Security.

Information Governance:

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

[Access the Information Commissioner's Office website](#)

Latest Data Protection News

GDPR – What's new?

The Information Commissioner's Office (ICO) website has a 'What's new' section that is updated on a regular basis to highlight and link to any changes as they occur, for example:

Latest: January 2020 – The Danish Data Protection Agency has adopted Standard Contractual Clauses (SCCs) which have been approved by the European Data Protection Board (EDPB). The ICO have updated their detailed guidance on contracts and liabilities between controllers and processors to reflect this.

[Access the Information Commissioner's Office 'What's new?' section of their website](#)

Google's announced timeline for new privacy rules

- Google has announced its new privacy policy, which limits the use of cookies, will be rolled out over the next two years (see publication date).

Companies use cookies – a digital tracking tool – to discern information about individual's online activity so they can serve up targeted advertisements.

The policy called, 'privacy sandbox' means third parties will have to go through Google to access user data.

Critics believe limiting third-party access to cookies this way diminishes market fairness safety.

[Read the article, 'Google's announced timeline for new privacy rules', in full](#)

Case Study: EasyJet admits data of nine million hacked

- EasyJet has admitted the "highly sophisticated cyber-attack" has affected approximately nine million customers

It said email addresses and travel details had been stolen and that 2,208 customers had also had their credit and debit card details "accessed".

The firm has informed the UK's Information Commissioner's Office (ICO) while it investigates the breach.

EasyJet first became aware of the attack in January. It told the BBC that it was only able to notify customers whose credit card details were stolen in early April 2020. Stolen credit card data included the three digital security code – known as the CVV number – on the back of the card itself.

EasyJet added that it had gone public now in order to warn the nine million customers whose email addresses had been stolen to be wary of phishing attacks. It said it would notify everyone affected by 26 May 2020.

The ICO warned people to be on the lookout for phishing attacks and directed them to its [advice on its website](#) on how to spot such scams.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) [“CDPA”]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers and visual artists. By ‘copying’ the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party. Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors.

Note: UCEM holds a CLA ‘Higher Education Photocopying and Scanning Licence’

[Access the Copyright Licensing Agency website for further information](#)

CLA Title Search tool

The [CLA Title Search tool](#) is an online search tool that lets you quickly find out what you can copy under your organisation’s CLA licence. Whether you’d like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance

[Check permission at CLA Higher Education Licence.](#)

[Introducing a new CLA Step-by-Step Guide and Interactive Toolkit for those checking permissions within their licence.](#)

Latest Copyright News

Article 13: UK will not implement EU copyright law

- Universities and Science Minister Chris Skidmore has said that the UK will not implement the EU Copyright Directive after the country leaves the EU.

Several companies have criticised the law, which would hold them accountable for not removing copyrighted content uploaded by users, if it is passed.

EU member states have until 7 June 2021 to implement the new reforms, but the UK will have left the EU by then.

Copyright is the legal right that allows an artist to protect how their original work is used.

Keeping abreast of the latest developments in Information Governance

© CLA 2020

As UCEM Information Governance Manager I regularly attend the Copyright Licensing Agency (CLA) Copyright & Information Technologies in Education (CITE) Forum.

The CITE Forum is a place to discuss the CLA's technology and licence offerings (such as the Digital Content Store) but also an opportunity for Higher Education Institute's to network, share and disseminate relevant copyright information. The Forum meets twice a year and publishes a biannual magazine for the CITE community containing the latest developments.

Copyright Licensing Agency (2019) '[CITE – 2020 Vision](#)', [CITE Magazine, Winter 2019, No. 3](#) [online].

Copyright Licensing Agency (2019) '[A CITE to behold](#)', [CITE Magazine, Summer 2019, No. 2](#) [online].

Copyright Licensing Agency (2018) [CITE Magazine - A biannual magazine for the CITE Community, Winter 2018, No. 1](#) [online].

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security**.

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's National Copyright Conference 2020 in association with Naomi Korn Associates

Despite the current lockdown due to COVID-19, CILIP in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance, made it happen albeit online this year.

This year's national annual Copyright Conference provided an opportunity to delve deeper into copyright issues and gain a better understanding of how policy impacts on libraries and the information sector.

[Back to top](#)

Sessions covered broad copyright impact for the profession incl.

- **Taking Rights Away? - Reconsidering obstacles to copyright reform.**

In policy debates in copyright, it is often argued that changes to the copyright legislation which may be favourable to librarians, information professionals and the users of their services, would deprive rights holders of established property rights. Such arguments were used to prevent the resolution of the '2039 problem' in unpublished works. In this keynote paper, Jonathan Griffiths, Professor of Intellectual Property Law, Queen Mary University of London argues that, when scrutinised carefully, these claims are often less convincing than they initially appear.

- **The EU Directive: Ground-breaking, Clarifying or Pointless**

The EU Copyright Directive: What does this mean for libraries and the cultural heritage sector? Positioning new directive in the context of existing EU legislation and case law Dr Andrea Wallace, Lecturer in IP, Exeter University, and Anthony Misquitta, General Counsel V&A discussed how the new Directive will affect libraries and cultural heritage organisations.

- **Copyright Risk Assessment Framework**

The National Libraries of Wales and Scotland have jointly developed and adopted a copyright risk acceptance framework. The framework is a pragmatic risk assessment and decision-making tool to aid the digitisation of collection material (Original Objects) and the making available of digitisations (Digital Surrogates). Fred Saunderson, Rights and Information Manager, National Library of Scotland.

- **Plan S from a Publishers Perspective: The benefits for Librarians and Academics**

The push to Open Access has created a huge change within the industry, as well as opportunities, for academics, publishers and librarians. Sarah Greaves, PhD, will discuss Plan S from an Open Access publisher's perspective.

- **Copyright in the Courts**

The session will consider a selection of recent, and not so recent judgements on copyright from UK courts, the Court of Justice of the EU and elsewhere as they affect librarians, archivists and other information professionals. Tim Padfield, Author, *Copyright for Archivists and Records Managers*

- **Ensuring every pound and every licence advances Open Access: Transformative agreements,**

Libraries entering into transformative agreements with publishers changes the business model underlying scholarly

[Back to top](#)

journal publishing, enabling more open access. In this session Lorraine Estelle, Director, Information Power Limited (IPL) shared a free transformative agreement toolkit, and insight into how these can be implemented by a wide array of libraries.

- **CLA Licensing Update for Librarians and Information Professionals**

James Bennett, Head of Rights and Licensing, Copyright Licensing Agency updated attendees on the latest enhancements to the licences (esp. over this COVID-19 pandemic period and extending limits for licence holders) and workflow tools offered by the CLA and CLIA Licence Plus.

During the day we were also updated about pertinent copyright issues incl. Unlocking sound heritage; Exploiting your library and information assets; Copyright Life Hacks for Librarians, in 'quick fire' five- minute lightening talks.

[#CILIPCopy20](#) / [#copyright](#)

The Challenges of Remote Working at Present

For those who work remotely all or part of the time already, you or your employer [depending on whether you are self-employed / freelancer or an employee] will have safeguards in place that enable you to operate securely when handling commercially sensitive or others' third party data. The difference, in March 2020, is that at very short notice, organisations are having to move staff to homeworking often with literally hours' notice as the Government COVID-19 instructions are issued.

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know](#).

The challenges of remote working at present and point to consider from a data privacy perspective

Provided within this article are points to consider from a data privacy perspective that include:

Have a clear statement to all staff stressing that "The protection of personal data that we hold, and use is important to us and must be handled at all time in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we have to adapt to comply with the official guidance, we will adjust out working processes to allow us to deliver our services. These are time limited instruction that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted." (Tullo 2020)

[Back to top](#)

The challenges of remote working at present and points to consider from a data privacy perspective cont.

1. **Set out what use of data**, contact lists, customer documents are being allowed.
2. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using.**
3. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seem sensible at present] in line with experience and how staff report it is working.
4. **Reissue and emphasis your usual security arrangements –** Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household
5. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed. For the **weekly reviews** – have your Senior Leadership Team note the number of staff using personal devices, any queries or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
6. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
7. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
8. This is where a nominated Data Protection Officer [DPO] or Data Officer can support the senior team in the messaging to colleagues.

Source: Tullo C, OBE (2020) '[The Challenges of Remote Working at Present](#)'. © [Naomi Korn Associates](#), 2020. Some Rights Reserved. The text is licensed for use under the Creative Commons Attribution Share Alike Licence (CC BY SA).

Regarding UCEM, P.T.O.

[Back to top](#)**Regarding UCEM we have followed these pointers:**

(i) A clear statement went to staff, and UCEM has a designated area within their central SharePoint site for Business Continuity Planning (BCP) that has the following folders containing

- Official Communications [Internal and External]
- Human Resources (HR) guidance and support
- Information Technology (IT) technical support, guidance and documents

Data Protection guidance (incl. a new guidance note entitled, 'Processing Personal data when remote working'.

- The **UCEM Data Protection and Privacy Policies** have been updated and should be read in conjunction with IT Policies).
- & Hints and tips for working from home.

(ii) A retention and destruction schedule is in place that collates lists of data used within respective teams and departments; (iii) A register is kept of where staff are working from and equipment used; (iv) Regular online meetings and weekly All-staff keep everyone updated and ensuring regular communication; (v) IT provide regular updates and guidance; (vi) GDPR 2020 training has been launched to re-enforce the importance of knowing how data is used and where it is being stored, even if temporary so that risk is managed and assessed; (vii and viii) online equipment and collaboration tools are well established at UCEM as an online education provider, but are regularly monitored; (ix) As mentioned above, hints and tips for working from home are provided, & (x) UCEM has a designated Data Protection Officer (DPO).

Please note: There are regular updates -

- On the **UCEM Website**,
- **VLE Help Page** (for students), and for all
- within the **e-Library** current awareness services, incl.
 - Information blog and
 - ***Knowledge Foundations***.

#BE Informed

- A short **UCEM e-Library video** (used within UCEM Marketing, **Social Media business channels i.e. LinkedIn** to promote the e-Library, *Knowledge Foundations*, regular information blogs, and more).

CIOB's Global Construction Review journal [online]. Available at: www.globalconstructionreview.com/ [accessed 25 July 2020]

CIOB's Policy and Public Affairs portal [online]. Available at: <http://policy.ciob.org> [accessed 25 July 2020]

The CIT-eA Project Creating Innovative Technology – Enhanced Assessments – a research project that explored ways to increase the amount of assessments in Further and Higher Education using technology. The CIT-eA Project [online]. Available at: <http://citea.digitalinsite.co.uk> [accessed 25 July 2020]

Cities / buildings images database [online]. Available at: www.washington.edu/ark2 [accessed 25 June 2020] is a collection of images of buildings and cities from around the world aimed at students, researchers and educators.

C-Link is a procurement software company who also provide resources (incl. guides, eBooks and other materials) created to help you make more money on your construction project. C-Link [online]. Available at: www.C-Link.com [accessed 25 July 2020]

College of Estate Management (CEM) – See University College of Estate Management (UCEM)

Commercial Real Estate Services (CBRE) is the world's largest real estate services provider, with a preeminent leadership position in virtually all key business centers globally. CBRE [online]. Available at: www.cbre.co.uk [accessed 25 July 2020]

Community-Led Housing (CLH) Toolkit: a resource for local authority and housing professionals' [online]. Available at: <https://clhtoolkit.org/> [accessed 21 May 2020]. This Toolkit provides a wealth of technical and non-technical information on a broad range of issues relevant to CLH. There are five Toolboxes, covering (i) Housing (ii) Communities (iii) Legal (iv) Planning and (v) Finance.

Confederation of British Industry (CBI) is the UK's premier business lobbying organisation, providing a voice for employers at a national and international level. CBI [online]. Available at: www.cbi.org.uk [accessed 25 July 2020]

Conference on Training in Architectural Conservation (COTAC) was formed in 1959 to improve the standard of education of everyone involved in building conservation, including craftsmen, professionals and homeowners. COTAC [online]. Available at: <http://ihbconline.co.uk/cotac2> [accessed 25 July 2020]

COTAC Digital Bibliography [online]. Available at: http://cotac.global/digital_bib/ [accessed 25 July 2020]

Constructing Excellence (delivered with **bre**) is a platform for industry improvement to deliver excellence through clients, industry and users through collaborative working. Resources include publications, tools and newsletter. Constructing Excellence [online]. Available at: <http://constructingexcellence.org.uk/> [accessed 25 July 2020]

Construction Enquirer is a news website in construction. Construction Enquirer [online]. Available at: www.constructionenquirer.com [accessed 25 July 2020]

The **Construction Index** [online] provides a wide range of information services for the UK construction industry, that include a search engine of construction companies, daily construction news, market data, email newspaper letter, and Case Law analysis and legal commentary. Further information is available at: www.theconstructionindex.co.uk [accessed 25 July 2020].

Construction Industry Council (CIC) – The representative forum for the professional bodies, research organisations and specialist business association in the construction industry. CIC [online] and available at: <http://cic.org.uk> [accessed 25 July 2020]

The **Construction Industry Research and Information Association (CIRIA)** [online]. Further information and resources are available at: www.ciria.org/default.aspx [accessed 25 July 2020]

Construction Industry Training Board (CITB) is the training board for the construction industry and partner in Construction Skills, the Sector Skills Council. CITB [online]. Available at: www.citb.co.uk [accessed 25 July 2020]

Construction Manager is the magazine of the Chartered Institute of Building (CIOB) [online] and available at: www.constructionmanagermagazine.com/ [accessed 25 July 2020]

Construction News [online]. Available at: www.constructionnews.co.uk [accessed 25 July 2020]

Construction Products Association (CPA) represents the UK's manufacturers and distributors of construction products and materials. Construction Products Association [online]. Further information is available at: www.constructionproducts.org.uk [accessed 25 July 2020]

Construction Project Information Committee (CPIC), responsible for providing best practice guidance on the content, form and preparation of construction production information, and making

sure this best practice is disseminated throughout the UK construction industry. CPIC [online]. Available at: www.cpic.org.uk [accessed 25 July 2020]

Construction and Property Research Centre (CPRC), University of the West of England (UWE) – the CPRC’s research activity is focused around the three inter-related stages of the built environment lifecycle, namely design, construction and maintenance. Note: The UWE **Centre for Architecture and Built Environment Research** (CABER) now incorporates the CPRC.

Contractors World magazines (incl. *Contractors World International* and *Contractors World UK & Ireland*) are the leading international digital publications. Delivering site reports, equipment reviews and comments of interest on the construction, mining, quarrying and related industries. Contractors World [online]. Available at: <http://cwmags.com/> [accessed 25 July 2020].

COPAC exposes rare and unique research material by bringing together the catalogues of c.90 major UK and Irish Libraries. In a single search you can discover the holdings of the UK’s national libraries (including the British Library), many University libraries, and specialist libraries. Note: From August 2019 Copac was replaced by **Jisc’s Library Hub Discover**.

Council for British Archaeology (CBA) is an independent charity bringing together members, supporters and partners to give archaeology a voice and safeguard it for future generations. Archaeology for all [online]. Available at: <http://new.archaeologyuk.org> [accessed 25 July 2020]
