What's in this month's issue

- **Latest UCEM News** incl. New research calls Government to improve the apprenticeship system to create a better skilled workforce.
- **Things you need to know this week** – Seven to share £180 million town deal funding. The first locations have been offered funding under the government's town deal programme to drive growth.
- **Latest Research** from JRF, RICS, CBRE, and more.

Happy Reading!

Issue 12 - December 2020

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the Library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness and share good practice, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

"The mission of librarians is to improve society through facilitating knowledge creation in their communities"

(R. David Lankes)

The initial aim of this UCEM Library current awareness service was to help keep students and staff informed of the education sector and industry specific news, share current and best practice, highlight the latest research and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [email us](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM News

As this is the last issue of *Knowledge Foundations* for 2020, can I take this opportunity to wish you all a very

Happy Christmas and a prosperous New Year!

New research calls Government to improve the apprenticeship system to create a better skilled workforce for vital infrastructure projects.

High skills, high tech construction apprenticeships are needed to boost the skills needed in infrastructure projects to drive the UK's economic recovery.

This is what is being called for by the authors of a new research report, released on 19 October 2020, entitled '*Build back better: Improving the apprenticeship system to better support infrastructure*'.

The report, written on behalf of the Construction Industry Council (CIC), UCEM and the Technical Apprenticeship Consortium (TAC), with data used from a CIC survey of employers, recommends that Government works with CIC, employers and the professional bodies to:

- Recognise the value of technical and higher-level apprenticeships leading to a professional registration;
- Increase the flexibility of the apprenticeship levy;
- Join up and improve the apprenticeship systems across the UK
- Celebrate and promote apprenticeships

Aled Williams, who co-authored the report and is CIC Champion on Higher Education and UCEM's Director of Research, Innovation and Partnerships, commented:

"The construction industry is integral to the UK's financial health and can provide the catalyst for an economic recovery accelerated by the COVID-19 pandemic.

"Apprenticeships are hugely important for employers to train workforces with the appropriate skill set to achieve the ambitious infrastructure projects projected across the nation, however, both businesses and education providers need to have more input in how these are run. The research shows that there is a desire throughout the construction industry to get apprenticeships right and, if Government listens and acts upon the recommendations outlined, there could be huge benefits for the UK."

[Back to top](#)

CIC Chief Executive, Graham Watts OBE, added: "CIC would like to thank UCEM and everyone else involved for their time and expertise in pulling together this crucial report. Now is the time for Government to work with our sector to showcase and promote the careers across the full spectrum of employers and occupational roles, showing the opportunity that future talent can have in driving forward innovation and technological solutions that will share their environment for the better."

To read the full report, head to the [**UCEM Latest Publications webpage**](#).

New research calls for unified approach to UK real estate data standards

UK real estate data must be allowed to flow freely beyond the existing silos in order for the industry to flourish and standards have a key role to play in facilitating this.

This is one of the key findings from [**the research report: 'The role of standards in enabling a data driven UK real estate market'**](#), authored by Dan Hughes and released on 30th September 2020 on behalf of the Real Estate Data (RED) Foundation.

The research explores the role of standards in ensuring an effective flow of data across the whole built environment, to set the scene for a sector-wide discussion on what is available, what is needed and the future role of people.

Among the additional insights included in the report, funded by [**UCEM's Harold Samuel Research Prize**](#) are:

- Real estate has a well-established and robust set of standards
- Existing standards need to be more valued and more easily discoverable;
- The value and cost of standards and data needs to be recognised fairly;
- It will become increasingly difficult for professionals to have clarity regarding both data and the standards that influence it.

"The role that standards have to play in enabling a data-driven real industry is substantial, but it is also very complex. There are a number of challenges that must be faced at a sector level and whilst the way forward may not always be clear, it is not something that should be ignored."

[Back to top](#)

Amanda Clack, Executive Director and Head of Strategic Advisory at CBRE and UCEM's Chair Designate added: "This comprehensive and well written research is clear that as we see decisions increasingly based on data from the full lifecycle, and that whilst today (see publication date) have well-established standards, as we see asset types increasingly blur, new factors such as productivity, sustainability and well-being will rise up the agenda and be even more data reliant.

"The next steps are clear: improve discoverability, increase connectivity, understand value and clarify the role of people. Our role now is to work together to put these next steps into action."

To read the report, head to [the research webpage](#).

UCEM reasserts its commitment to organisational excellence with Advance HE membership

- UCEM has renewed its Advance HE membership for 2020-21, ensuring continued access to vital resources and supporting valuable partnership across the Higher Education sector.

© Advance HE 2020

The membership supports UCEM's vision 'to be the Centre of Excellence for Built Environment education'. In particular, the membership relates to the UCEM's strategy to have a positive impact on Higher Education through education policy lobbying, collaborative relationships and widening participations efforts.

UCEM Principal, Ashley Wheaton, commented: "Advance HE is a fantastic organisation with admirable aims to make Higher Education better for all. Advance HE's member institution list is hugely impressive and demonstrates the calibre of organisations it brings together for the good of the sector.

"Membership affords my colleagues and I opportunities to attend events and access resources which will greatly benefits us. I look forward to continuing to be an active participant of Advance HE on behalf of UCEM."

Membership provides UCEM with many benefits including: access to Charters transforming and supportin gender and race equality in HE and research; toolkits to support good governance;

[Back to top](#)

consultancy and enhancement services, and reports, publications and resources available to staff across the institution.”

[Access the article ‘UCEM reasserts its commitment to organisational excellence with Advance HE membership’ in full.](#)

[For more on UCEM’s ambitions, take a look at the institution’s Vision and Strategy brochure.](#)

UCEM continues Building People support with £50,000 donation

- UCEM has pledged support of £50,000 to enable Building People to work towards its aim of a more diverse and better-connected Built Environment. Building People was founded in 2017 and secured initial donations of £50,000 from UCEM. The Chartered Surveyors Training Trust (CSTT) and The Chartered Surveyors Company (TCSC) in 2018. Both UCEM and TCSC have committed to giving a further £50,000 in 2020.

© UCEM 2020

Phase one of the Building People launch has seen the aggregation of 1,000 + organisations and initiatives that provide work, learning or support opportunities across the Built Environment, as well as the bringing together of relevant information and resources from across the surveying profession.

Phase two sees the development of the connecting capabilities of the platform, as Building People provides technology to connect people to people (mentors / advice and guidance); a directory of learning and training opportunities and an events directory; plus work vacancies (from work experience, to apprenticeships, internships, placements and jobs). This model will be white-labelled so that other organisations can benefit from the aggregating and connecting technology at a fraction of the price they would have to pay for independent development, creating a ‘network of networks’ using the same technology and all enabled by Building People. Building People is also bringing together disparate providers that work with diverse audiences through the creation of communities, focused initially on young people, women, LGBTQ+, BAME, ex-military, and ex-offenders.

Ashley Wheaton, UCEM Principal, explains why UCEM is keen to supporting Building People: “UCEM is proud to be founding partner and continued support of Building People. Connecting the multitude of opportunities across the Built Environment is key to widening partnership in industry. If people from all backgrounds

[Back to top](#)

can more easily find work, learning and/or support that is available from existing providers, then our industry will become more diverse and more innovative. It's win-win all round."

Rebecca Lovelace, Founder of Building People share the impact that such support has had: "The visionary leadership and fully collaborative approach of our three founding partners has made the world of difference to Building People. We have a simple aim – to create connections across the Built Environment to address the industry challenges of skills, diversity and social value – and it has been the investment, passion and commitment from UCEM, the CSTT and TCSC that has enabled us to move from vision to reality, and from planning to delivery. We have over 60 industry supporters but Building People would have remained a bright idea without the significant input from these three organisations that have all brought a holistic & inclusive approach to enabling change."

[Access the article 'UCEM continues Building People support with £50,000 donation', in full.](#)

[Find out more about Building People.](#)

Further information on Building People can also be accessed via the **Careers** Section later in this issue of **Knowledge Foundations**.

UCEM strengthens its Hong Kong Team with key appointment

- UCEM's activity in Hong Kong and the wider Asia-Pacific Region has been boosted by the appointment of Tim Bennett.

Tim – who joined the institution as Head of its Construction Faculty in 2014 and has been Dean – School of the Built Environment since 2018 – will lead UCEM APAC (Asia-Pacific) Office which is based in Hong Kong.

In his three-pronged role as Dean – School of the Built Environment (International), Head of APAC Office and Director of UCEM Asia Ltd, Tim will drive UCEM's strategy in the region in growing the numbers of Built Environment professionals and supporting the institution's Hong Kong students.

Since joining UCEM in 2014, Tim has led CPD events in Hong Kong, Singapore and Macau, building relationships with key stakeholders across the region to support UCEM's vision to be the Centre of Excellence for Built Environment education and collaborative effectively to enhance the sector in general.

"Outside of the UK, the highest number of UCEM students in one place is in Hong Kong and I look forward to meeting more of our students there and doing my very best to support them to succeed in their studies. I have always enjoyed my visits to the region and

[Back to top](#)

will be heading over to Hong Kong more frequently to support the office and implement my strategy for Asia-Pacific.”

Tim’s appointment is the latest milestone in UCEM’s 40-year association with Hong Kong. A Chartered Quantity Surveyor, Time has extensive experience in surveying practice, is a Fellow of RICS and CABE and holds a Master’s in Professional Education and Training and a Bachelor of Science in Quantity Surveying.

COVID-19: University College of Estate Management (UCEM) response to COVID-19

As a responsible employer and educator, UCEM’s commitment is to protect the health of all students, staff, clients and suppliers by adhering strictly to advice offered by Public Health England, The World Health Organisation, Office for Students, local and central government, whilst remaining committed to maintaining our usual excellent standard of student experience.

Please find below the steps we’ve taken to adhere to current and ongoing advice. As the situation is ever-changing, we fully review the guidelines and our actions daily and will quickly adapt if necessary (**Note** the publication date of this article).

- All staff who are able to work from home are doing so. We have been anticipating this situation and had prepared for it full. We have an advanced IT infrastructure in place to enable remote working, so we continue to operate as usual.
- As an online pedagogical institution, we are experts at online teaching and our deliver model will continue as normal
- The small number of staff remaining in Horizons head Office have been allocated seating at above the recommended distance away from each other.
- We are operating a policy of no external meetings and no visitors to Horizons Head Office

[Back to top](#)

- All managers and department heads have been briefed with respect to our self-confinement policy and our treatment of any staff member displaying symptoms that may be linked to COVID-19
- All staff are continually reminded of the importance of following the 20-second guideline for handwashing.

If you have any further questions, please contact:

- Student enquiries – Student Central on our VLE
- Employer enquiries – businessdevelopment@ucem.ac.uk
- Other enquiries – reception@ucem.ac.uk / , Tel: +44(0)118 467 2100

Our sincere thoughts are with those affected by COVID-19 and its impact around the world.

Further information and the latest developments can be found via the [UCEM Website](#), & **don't forget** that the UCEM [e-Library](#) can be accessed 24/7 (via the VLE-Virtual Learning Environment) with a wealth of valuable resources to help 😊.

Other News

Things you need to know this week: Seven to share £180 million town deal funding

- The first locations have been offered funding under the government's town deal programme to drive growth.

The government has named the first locations to receive offers of town deal funding, which are Barrow-in-Furness, Blackpool, Darlington, Peterborough, Norwich, Torquay and Warrington.

The seven are set to share in up to £178.7 million of government funding to help drive regeneration and economic growth. The debut deals include a £21.9 million allocation for Torquay to modernise its town centre and improve transport links, with a focus on walking and cycling routes. Peterborough is set to receive £22.9 million to promote low carbon living and enterprise, with planned projects including a skills centre for green technologies. Blackpool is in line to receive £39.5 million to update its illuminations and support development of the Blackpool airport enterprise zone.

Other developments include –

- Barking and Dagenham Council has sealed a deal with medial real estate business Hackman Capital Partners (HCP) to building a film and television production centre in Dagenham, east London

- Master developer St Modwen and landowner Crabhill Developments have completed the sale of a 4 hectare land parcel at their Kingsgrove site in Wantage, Oxfordshire, to housebuilder Taylor Wimpey.

- Liverpool City Region Combined Authority is investing £1.5 million to support the delivery of a new station for Liverpool's Baltic Triangle regeneration.

- Cultural infrastructure operator Really Local Group is to create a new cultural venue as part of a regeneration scheme in Canning Town, east London.

- Government agency Homes England has concluded an innovative funding deal with Lancashire housebuilder Kingswood Homes.

- An international competition has been launched to select the masterplanner for the planned 11,500 home Thamesmead Waterfront development, in south east London.

- Rugby Borough Council is to work with property consultant Avison Yong and masterplanner Allies and Morrison Urban Practitioners to develop a regeneration strategy for the town centre.

Case Study: Adding homes to the fringe of a London estate

- The 1950s-built Frampton Park estate in Hackney is being brought up to date with injections of contemporary urbanism, as the author of this article writes.

The Frampton Arms and Lyttleton House sites in Well Street in Hackney, are separated by a distance of 270 metres along the street and the homes of the Frampton Park Estate, on whose fringe they are located. But both are being redeveloped by Hackney Council under its estate regeneration programme, which aims to deliver nearly 3,000 homes at 18 sites across the east London borough.

The schemes both designed by architect Henley Halebrown and currently under construction, will contribute 45 homes of varied types and tenures towards the total. One, two and three bedroom homes and social rent, shared ownership and private sale tenures are on offer across the two.

Development also offered the opportunity to reinvigorate a 1950s estate characterised by mid-rise apartment blocks and fairly extensive open spaces, as well as the Well Street frontage.

A nicer place to live

The Frampton Arms site is located on the south western edge of the estate and was, as its name suggests, formerly home to a pub. The 0.3 hectare site is being redeveloped with three five storey buildings, two of which are linked by bridges, which create a collection of urban villas, making a visual connection to existing villas on the opposite side of Well Street.

The lower two floors of these contemporary villas contain houses with their own front doors onto the street. The upper storeys house apartments with maisonettes above, their facades punctuated by open galleries and balconies. To the rear, the 20 homes will look onto a newly landscaped courtyard, flanked on either side by existing Frampton Park Estate blocks, where private and communal gardens, play space and parking, will be created.

The Lyttleton House site, which is similar in size to its near neighbour, lies on the north eastern edge of the estate and was previously occupied by a house in multiple occupation. This wedge-shaped island site had been cast adrift from its

[Back to top](#)

neighbourhood so the architect has reinstated former building lines, repairing the relationship between estate and street.

Once again, the 25 homes include diverse property types. The lower three floors of the building have apartments set around a three storey hall, while the top two floors have eight houses arranged around an open courtyard.

Both projects have robust masonry exteriors overlaid with precast concrete arcades,. On the Frampton Arms building the arcade and its balconies face away from the street, suggesting the gardens beyond. On the Lyttleton House site, the building and arcade follow the curve of the street. The projects are set for completion this autumn (2020).

Analysis: How the pandemic could affect housing design

- A number of studies are looking at the pandemic's impact on people's lives and what they now need from their homes and neighbourhoods, finds the author of this article.

The way in which people live in their homes and communities, particularly in urban environments, has been brought into question by the constraints of the pandemic. Now researchers and architects are interrogating people's perceptions and experiences, gathering learning and putting forward ways of improving or re-imagining urban living that could potentially influence the design of future homes and neighbourhoods.

Research is focusing on both the home itself and its surroundings, with the latter forming the subject of early research by Danish urban design consultant Gehl. Its study looking at public space and public life during COVID-19 drew on people's experiences on Denmark's early lockdown in March 2020 and identified the shift away from city centres towards local meeting places and their pocket parks and squares. Since publishing its initial study it has released its initial study it has released a second report covering re-opening, which looks at how city centres and local neighbourhoods have changed.

It is being joined by a number of studies based on the experiences of people living in the UK. The Quality of Life Foundation, the housing research body established by architect Sadie Morgan, published its **[Quality of life at home](#)** study in September 2020. This highlighted the importance of adaptable homes, easy access to open space and local communities and infrastructure.

[Back to top](#)

Following on from this comes the new report from research group Place Alliance, **[Home Comforts during the COVID-19 lockdown](#)**, published this month (see publication date). This study is based on a survey of 2,500 households, representing 7,000 people, and gauges views on homes, neighbourhoods and people's sense of community.

For neighbourhoods, the research points to a need for places to be greener, more mixed use, less trafficked and better connected, with essential shops and services with five to ten minutes' walk.

For homes, the research notes that those surveyed considered internal design and space as key to comfort, with fresh air, daylighting and good sound insulation been seen as fundamental.

Architects are already turning their minds to how the pandemic could influence home design. Post-pandemic living formed the theme of an internal design competition, organised by architect PRP, which built on the practice's work in exploring intergenerational and more universal home layouts, competition winner, Dimple Shah, has created a design for a 76 square metre, two-bedroom four-person apartment, which is showcased alongside other entries in PRP's report, **[Beyond-19](#)**.

The winning design is intended to be adaptable for home working and family living, its flexibility stemming from the use of moving walls that provide daytime spaces for working, study and retreat. At the end of the working or learning day, moving walls can be closed away to allow space for socialising, clearly differentiating work time from leisure time. Such thinking and the wealth of research around living through the pandemic could well be informing the next generation of residential development.

[Further information and read the article, 'Analysis: How the pandemic could affect housing design' in full.](#)

Government Spending Review 2020: Key points

- Chancellor Rishi Sunak has set out what the UK government will spend on health, education, transport and other public services next year (2021).

In a statement in Parliament, he also briefed MPs about the state of the UK economy and the latest forecasts for the UK's public finances, which have been battered by the Covid pandemic.

Here are the main points –

- Millions of public sector workers will see their pay frozen next year

[Back to top](#)

- A million NHS workers and those earning less than £24,000 will still get an increase
- The UK economy is expected to shrink by 11.5% this year (2020)
- Unemployment is expected to reach 7.5% next spring (2021), with 2.6m people out of work
- Overseas aid budget is to be cut by about £5bn
- A new £4bn “levelling up” fund will pay for upgrading local infrastructure.

[Access further information and the BBC News, UK Politics article, ‘Spending Review: Key points from Rishi Sunak’s statement’, in full.](#)

Government launches £7.1bn National Homebuilding fund

- The government will create a £7.1bn National Homebuilding Fund to unlock the development of 860,000 new homes.

The news came as Chancellor Rishi Sunak unveiled his spending review for 2021/22, in which he warned of the largest fall in output in 300 years – a drop of 11.3% - as a result of the Covid-19 pandemic. The economy is set to grow by 5.5% next year and 6.6% in 2022 as restrictions ease.

The new fund sets aside money for land remediation, investment in infrastructure help to deliver the brownfield fund, and loan support for housebuilders across the country.

It was one of a number of spending pledges from the Chancellor to help kickstart the post-Covid economy, which also included a £4bn ‘levelling up’ fund which will allow local authorities across England to compete for investment in a range of schemes up to £20m to improve the local area.

And the government renewed its commitment to build or rebuild 500 schools across the UK over the next five years, as well as to build 40 new hospitals over the next 10 years.

Meanwhile the government has published its delayed **National Infrastructure Strategy**, entitled ‘Fairer, faster, greener’, which aims to deliver improvements to UK infrastructure while putting the UK on the path to net zero emissions by 2050.

Within the document, the government pledged to accelerate and improve delivery of projects through reforms to the planning system, as well as improvements to the way projects are procured, and the greater use of construction technology.

[Access further information and the Construction Manager article, ‘Government launches £7.1bn National Homebuilding fund’, in full.](#)

Coronavirus – latest developments [November 2020]

'Difficult winter' coming despite UK' economy bounce

Summary:

- The UK's economy bounced back from recession with record growth of 15.5% in July to September 2020 – but is still 8.2% smaller than before Covid,
- Chancellor Rishi Sunak says there are grounds for “cautious optimism” but a “difficult winter” still lies ahead,
- There are warnings the economy may shrink again in the last quarter of 2020 because of the impact of lockdowns,
- Figure reveal huge growth in NHS waiting lists since Covid struck – with nearly 140,000 waiting over a year for routine procedures,
- WHO chief warns world not to get complacent about Covid-19 as it's not yet proven how effective vaccines will be,
- Wales has 983 Covid patients in hospitals – more than at any time including during the first wave,
- Scotland temporarily bans alcohol from trains and stations to help social distancing – as nation's R number drops to one.
- The NI circuit-break lockdown will end 24 hours later than previously announced – at midnight on Friday (13/11.20) – after last-minute legal advice.
- Spain's coronavirus death toll has surged to more than 40,000, with infections passing 1.4m
- Germany's health minister says he expects coronavirus restrictions there to continue through the winter
- The US has confirmed its highest 24-hr infection total to date – a world record of more than 144,000 cases.

[Access the BBC News, Latest LIVE Coronavirus news feed](#)

Coronavirus: Why some people want to keep working from home

- When lockdown started in March 2020, workers across the UK packed up their office equipment and set up workstations in their own homes. Bedrooms, kitchen counter-tops and dining tables became the new way of working for millions of people.

But now it's time to return to those communal workplaces, research from Eskenzi suggests that 91% of the UK's office workers would like work from home at least part of the time. So why are so many office staff keen to keep working from home?

Some of the reasons and case studies provided in this article and include -

- 'It's like getting a pay rise' due to making savings on the commute
- 'We're spending more time together as a family', and

The evolution of building surveying education during COVID-19

- In January and February 2020, as the pandemic was starting to gain momentum and spreading around the globe, universities in the UK were beginning to consider how to react. As a sector, UK higher education is relatively familiar with web-based methods of communication, teaching and learning.

In fact, the University College of Estate Management (formerly the College of Estate Management) and the traditional home of RICS correspondence courses, operates their business totally online.

A lot of universities operate a Virtual Learning Environment (VLE) which allows them to communicate with their students and provides the opportunity to interact with them in terms of online courses and assessments, and as a depository for learning materials.

This is allowing the students to revisit the materials to embed or reinforce their learning or to catch up if a session was missed. Common VLE's include Blackboard, WebCT, and Moodle. Their functionality and features are all relatively similar.

[Back to top](#)

Although the physical libraries have closed, universities operate electronic libraries which offer access to a large number of electronic databases, and a growing number of books and journals, ensuring that the students and staff, can continue to access the majority of relevant information for their studies and research.

[Further information and access to the article 'The evolution of building surveying education during COVID-19', in full.](#)

The Pandemic Has Taken Cars Off Urban Streets. Will It Last?

- With a sharp drop in auto traffic due to Coronavirus, cities around the globe have closed streets to cars and expanded pedestrian thoroughfares and bikes lanes.

But as life edges back to normal (see publication date), will these initiatives survive, especially if virus-wary citizens shun mass transit?

[Access this article entitled, 'The Pandemic Has Taken Cars Off Urban Streets. Will It Last' in full.](#)

Will COVID-19 accelerate construction's digital transformation?

- With many industry professionals forced to work remotely, is now the perfect time for construction to get up to speed with all things BIM and digital? *Construction Manager* magazine finds out if the coronavirus will change the way we work forever.

David Philp – Global BIM/MIC consultancy director, AECOM says, **"It's an opportunity to rethink how we can use technology and innovate."** (Philp 2020)

The coronavirus pandemic is forcing us to strive for more innovative and rapid solutions. From increased home working needs, maximising performance of our healthcare estates and ultimately how we can recover from the looming economic challenges, we need to usher in new ways of working.

This crisis will be an opportunity for us to rethink construction priorities, how we can better use technology and innovate in the use of joined-up data to support immediate societal needs and the creation of a more resilient built environment.

Mark Boyle – Global design director, Robert Bird says, **'Our digital processes lend themselves to remote working.'** (Boyle 2020), and

Gary Fannon – Technology director, Turner and Townsend says, **'Early digital adopters will be reaping the rewards.'** (Fannon 2020)

T&T's technology team have all been set up to work from home for some time and the early adopters will reap the rewards from the

[Back to top](#)

coronavirus lockdown. Design teams are able to continue working – creating a fully designed digital model that can be constructed to an excellent quality standard when work is able to begin on site. There are also security questions about home working – we need to educate people and show them how to make home routers more secure. But overall, the enforced lockdown could show the industry how we can use digital technology to be more efficient and productive.

Andrew Gamblen – Digital manager, Willmott Dixon says, **‘People will become more comfortable collaborating remotely.’ (Gamblen 2020)**

The effect of Covid-19 and social distancing is going to have a long-lasting effect on both the construction sector and the UK as a whole. There has been a huge increase in the use of technology and software that allows individuals and teams to communicate and collaborate remotely.

While this technology has been around for a while, and because we are in a position where we have to use it to keep working, people are starting to become a lot more comfortable with it and this is building up simple routines that will have a lasting effect.

Richard Saxon – CBE Chairman of JCT, client adviser at Deplo BIM Strategies says, **‘ “Wartime scenarios” will push the digital agenda.’ (Saxon 2020)**

The Covid-19 crisis is looking very like a war scenario. Organisations are sending out messages saying they will play their part through staff working from home. It’s Keep Calm and Carry on again.

Technology has always developed rapidly in wartime. The Second World War saw the birth of computing radar, jet aircraft and nuclear power. Now we have a design and construction industry in lockdown, starting to rely on tools which only a few firms have used to far.

- Now cloud-based teamwork applications allow staff to work from home or on the move with full access to their firm’s common data environment
- The pressure to roll out superfast broadband and 5G will be immense
- Social media apps allow for virtual co-working
- Online meetings are well supported now and soon we will use Virtual Site Visit technology as normal
- Site work will be aided by augmented reality headsets and BIM caves

By the time a vaccine is available (see publication date), a year or more of forced advance in technology use is likely to have passed.

Things will not go back to where they were before: productivity will have improved; flexible working will have become normal; whole life thinking will have advanced.

The future of build-to-rent podcast series by Shoosmiths UK law firm

In this podcast, the first in the series, real estate partner, Choisanne Man, speak with John German, Managing Director of Residential Investment at Invesco Real Estate, on the impact the COVID-19 pandemic has had on the build-to-rent (BTR) market, from an investor/funder perspective.

Issues discussed in this podcast include:

- Performance of the sector
- Rent collection rates
- Challenges of lockdown restrictions
- How buildings and amenity space will change as a result of the pandemic
- Where the market is going

[Podcast series #1 – The future of BTR \(Build to Rent\)](#)

Issues discussed in this podcast, the second in the series, include:

- Ongoing attractiveness of the sector
- Top three things to look for in a BTR scheme
- Future challenges for BTR
- The role of technology
- BTR housing

[Podcast series #2 – The future of BTR \(Build to Rent\)](#)

[Back to top](#)

In this podcast, the third and last in the current series, issues discussed include:

- Planning reforms
- Permitted development rights
- Rise of residential in the high street
- Fire Safety
- Rent controls / regulations

Podcast series #3 – The future of BTR (Build-to-Rent)

Access Emerald Publishing's 'Coronavirus, the management of epidemics and the wider impact on society'**Cambridge University: All lectures to be online-only until summer of 2021**

- There will be no face-to-face lectures at the University of Cambridge over the course of the next academic year due to coronavirus, it has been announced.

However, lectures will be available to students online and "it may be possible to host smaller teaching groups in person" if they meet social distancing requirements, the university said.

University campuses have been closed this term (see publication date) by the Covid-19 outbreak. Cambridge will review the decision if advice on social distancing changes.

All teaching at the university was moved online in March 2020, while exams are being carried out virtually.

[Back to top](#)

- [Students ‘must be warned if courses taught online’](#)
- [Online students would still face full tuition fees](#)
- [Students ‘being ignored’ over fee-refund claim](#)

It follows a similar move by the University of Manchester, which said its lectures would be online-only for the next term.

The university watchdog said students applying for university places in England must be told with “absolute clarity” how courses will be taught - before they make choices for the autumn. Universities can charge full fees even if courses are taught online. But Nicola Dandridge of the Office for Students warned against misleading promises about a “campus experience” if courses are to be taught online.

Learning and teaching reimagined: a new dawn for higher education?

- Exploring the 2020 experience as well as the changing aspirations of the nature and shape of learning and teaching for the future.

Summary

This report is the result of a five-month higher education initiative to understand the response to COVID-19 and explore the future of digital learning and teaching.

It involved high levels of engagement with more than 1,000 sector leaders, staff and students through webinars, roundtables, consultations, focus groups, surveys, interviews and case studies.

In this report the experience of 2020 and changing aspirations of the nature and shape of learning and teaching for the next academic year, 2021/22, and 2030, are explored.

Recommendations

Based on this research the following recommendations for universities, sector agencies and government are made:

1. Universities to use their strategic and structural planning processes to affect the digital transformation of learning and teaching, ensuring that sponsorship is provided by governing bodies and executive teams

[Back to top](#)

2. Universities to review their strategic investment in digital learning and teaching
3. Universities to make investment plans to mitigate the heightened cyber security risks that arise from greater dependence on digital technologies
4. Universities to think radically about the scale and scope of their learning and teaching activities, prioritising blended learning approaches wherever possible
5. Universities to accelerate the adoption of blended learning, with close involvement of students in all aspects from design to delivery
6. Universities to ensure inclusivity and accessibility are integral considerations in curriculum redesign
7. Universities to ensure their professional development plans include digital training, peer support mechanisms and reward and recognition incentives to encourage upskilling
8. Universities and sector organisations to establish research to remain in step with the changing digital preferences and expectations of prospective in higher education students
9. Universities, government and funders to provide additional funding or means to reduce digital poverty as a barrier to students accessing higher education.

Construction prepares for Brexit with new working group

- Construction is readying itself for the UK's exit from the European Union at the end of the year (2020), with the creation of a dedicated working group on the issue.

The Construction Leadership Council (CLC) has set up the Brexit Working Group in a bid to produce and signpost business guidance and information to help the construction industry get ready and maintain business continuity at the end of the transition period. The group will also aim to identify critical issues facing the construction industry in the event of no agreement that the government should address before the transition period expires, as well as championing opportunities for the construction sector in the numerous ongoing trade deal negotiations with the EU and the rest of the world.

The work of the group will be split into four workstreams covering:

- **Movement of People:** preparing for the new immigration rules, accessing alternative labour supply and reciprocal arrangements on skills and qualifications in new trade deals
- **Movement of Goods and Materials:** preparing for the new customs regime, guidance on WTO rules in the event of no

[Back to top](#)

agreement with the EU and alternative sourcing opportunities in the rest of the world and the domestic market

- **Standards and Alignment:** guidance on the Construction Products Regulation, EU notified bodies, CE marking, UK designated standards, and UKCA marking
- **Data Adequacy:** business awareness of the potential impact and mitigating actions on data flow in the event of no agreement with the EU and no decision by the European Commission on the UK's 'data adequacy'.

In addition, the existing workstreams of the CLC will also take on Brexit – readiness related work, helping to produce guidance on matters including procurement and contracts.

Methodology for quantifying the benefits of offsite construction (C792)

- CIRIA is pleased to announce the launch of new guidance that include, *Methodology for quantifying the benefits of offsite construction (C792)* in association with the Laing O'Rourke Centre for Construction Engineering and Technology, University of Cambridge.

This new guidance proposes a framework for comparing construction approaches, making it possible to keep consistent records across projects and identify all the possible benefits available. This guide also highlights the challenges that can be expected when assessing the performance of construction projects and developing robust benchmarks for comparison. It provides a framework for evaluating project performance that can be used by clients, construction management teams and designers to assess the value and benefits achieved on projects. The guidance is set to support decision making and facilitate wide industry collaboration across different sectors in the construction industry.

Skills Agenda: Concerns for Skills Shortages in the 21st Century: A Review into the Construction Industry, Australia

The Australian Construction Industry is now facing skills shortages in all trades. As an industry focused on the skills of its workforce, there is now concern the Australian standard in quality, workmanship, and productivity will inhibit both national and international level.

This research paper addresses the underlying, influential factors concerning skills shortages in the Australian construction industry. The influential factors addressed include funding, training statistics, employer expectations, financial limitations, Industrial Relations and immigration.

Given the reference to skills shortages within the industry, and documented in related literature if skills shortages are to continue to exist their effect will impact upon the overall performance of construction companies through Australia.

GOV.UK, National Statistics - UK House Price Index [Last updated October 2020]

- The UK House Price Index is a National Statistic that shows changes in the value of residential properties in England, Scotland, Wales and Northern Ireland.

The UK House Price Index (UK HPI) captures changes in the value of residential properties.

The UK HPI uses sales data collected on residential housing transactions, whether for cash or with a mortgage.

Properties have been included:

- In England and Wales since January 1995
- In Scotland since January 2004
- In Northern Ireland since January 2005

Data is available at a national and regional level, as well as counties, local authorities and London boroughs.

The summary report contains:

- Headline statistics
- The economic statement
- Price changes
- Sales volumes
- The property status
- The buyer status for Great Britain (excludes Northern Ireland)
- The funding status for Great Britain (excludes Northern Ireland)
- Housing transactions distributions

Sustainable outcomes for buildings

The Royal Institute of British Architects (RIBA) has published guidance on targeting, designing and evaluating sustainable outcomes for buildings, defining concise measurable set of eight sustainable outcomes that correspond to key UN Sustainable Development Goals and can be delivered on building projects of all scales.

[Access the RIBA Sustainable Outcomes Guide](#)

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone. The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

[Access the National Trust website](#)

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

Seeking to influence – The NT seek to influence the Planning system at local, regional and national levels,

Supporting spatial planning – The NT support spatial planning which takes a holistic approach to its environment and its resources,

Sensible management – The NT promotes the wise management of the natural environment and built and cultural heritage,

Protecting our environment – The NT will seek to protect wild and remote landscapes from built development or urbanisation.

Using property management plans – In managing its land through management plans, the NT will support and help to achieve objectives,

Objecting to proposals, where appropriate – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include:

[Back to top](#)

- Minimising resource use and generation of waste,
- Being energy efficient,
- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and - Encouraging community involvement and access.

[Read the National Trust Planning Principles](#)

The National Trusts' planning procedure

The National Trust have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

Case studies are provided.

[Read how the National Trust engage in planning: The NTs' role as a developer.](#)

Foster + Partners Projects

Foster + Partners Projects – one of the most innovative architecture and integrated design practices in the world. Over the past four decades the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civil and cultural buildings, offices and workplaces to private houses and product design. By visiting their website, you can gain further information about their current and past work, upcoming projects and gain access to their-

New RIBA Plan of work 2020

RIBA Plan of Work 2020. This blog takes a look at the new RIBA Plan of Work 2020.

[Back to top](#)

What is the RIBA Plan of Work? The RIBA Plan of Work was first published by the Royal Institute of British Architects (RIBA) in 1963. It originally provided a matrix to show the roles of participants in the design and construction processes.

It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

It now provides a shared framework for design and construction, including both a process map and management tool.

What changed in 2020? In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement.

This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly in use

- Digital technologies are now an integral part of our built environment. The choice is not when or if built assets will use technology, but rather how much will be used.

Building Information Modelling (BIM)

Step-by-step guide to using BIM on projects

Source: PCSG (2019) '[Step-by-step guide to using BIM on projects](#)', Designing Buildings Wiki [online] Last edited 5 April.

This step-by-step guide explains how level 2 building information modelling (BIM) can be used for the development of a built asset such as a new building.

[Access the Step-by-step guide to using BIM on projects](#)

Latest BIM+ Projects [November 2020] – John Sisk relies on BIM best practice to deliver Malmo data centre, 2nd November 2020.

- John Sisk & Son is nearing completion on a data centre project in Malmo, Sweden. Adopting BIM best practice has been crucial to keep construction on programme given a fast-tracked programme amid the Covid-19 pandemic.

The Multinational Data Center [sic] in Malmo will house and run a vast array of networks and servers for massive data processing and storage. That means state-of-the-art M&E installations and precise attention to the smallest of details for construction and handover are necessary.

[Back to top](#)

The John Sisk & Son team has nearly 40 years of experience in data centre construction and has brought a digital project delivery approach to the Malmo project.

The Sisk team faced the challenge of an aggressive baseline schedule and a fast-tracked construction phase. Complex underground services infrastructure added another layer to the challenge. Meeting all the project demands was one thing: it was quite another when Covid-19 struck, and time collaboration was put to the test.

While completing the site mobilisation, Sisk spearheaded preconstruction coordination for the underground services infrastructure.

The process of aggregating the design team's BIM models was automated by integrated Navisworks clash detection tools with BIM 360. The cloud-based BIM approach helped optimise the design, and resolve all issues, helping to significantly reduce the risk of onsite issues.

With the vast quantity of electrical services, Sisk relied on BIM to reach a new level with DfMA for efficient coordination, prefabrication, and installation.

For example, every single bracket supporting the electrical cable trays – the main services in the building – was tagged with its exact location in the BIM model.

In order to reduce time and waste, a new, systematic approach with BIM brought the M&E contractors together very early in the process. The elements were then fabricated in Ireland for shipment to Sweden.

Sisk highlights some significant outcomes:

- The Sisk team-built dashboards that stored live clash trend reports to track progress weekly, resulting in a 50% efficiency increase in the BIM management process compared to traditional, manual methods of construction coordination without the automating power of the cloud.
- The tight integration between BIM 360 Docs, Microsoft Power BI, and Sisk's own "Design Changes Control" dashboards provided the commercial teams with a faster way to visualise the cost and/or schedule impacts, reducing the overall take-off by a potential 40%
- By using BIM 360, the project continued uninterrupted as construction continued in Sweden during the Covid-19 pandemic.

[Access BIM+ that include project entitled, 'John Sisk relies on BIM best practice to deliver Malmo data centre' available in full.](#)

[Back to top](#)**Other BIM+ Projects include:**

- **Project: Willmott Dixon takes centre stage on film school fit-out**, 12th October 2020.

- Willmott Dixon Interiors' transformation of a former factory in Islington into the London Screen Academy (LSA) film school, completed earlier this year (2020), showcases best practice in the use of BIM on a fit-out project.

The contractor completed the 54-week project for LcatED working in conjunction with the Department for Education. It involved the partial demolition of the central and southern section of the existing four storeys plus basement building, to be replaced by a three-storey plus basement building with an open terrace on the third floor to be used as an amenity space.

One of the customer requirements on this project was to implement a BIM Level 2 process to support the construction plus operation and maintenance stages.

- **Project: Mace use AI tech on Mayfair project to meet Covid-19 safety challenges**, 1st October 2020

Work was already underway on Lodha's No 1 Grosvenor Square flagship project when the lockdown and then social distancing added to the normal construction challenges.

- Client: Lodha
- Main contractor: Mace

Balancing the many requirements of a building project – cash flow, cost, quality, and timelines – is always a significant challenge for project leadership. The Covid-19 pandemic made the balancing act even more intense, costing projects valuable time at the start of lockdown and requiring adjustments to ensure the health and safety of all personnel on site as production restarted.

With guidance from the Construction Leadership Council (CLC), recommending 'one metre plus' distancing on sites, it has been a major logistical challenge to keep projects as functional and on schedule as possible, while maintaining safety prerogatives and priorities for all staff.

- **Project: BAM responds to Southampton NHS BIM Challenge**, 11th September 2020

BAM Construct UK has responded to the BIM challenge issued by its client University Hospital Southampton NHS Foundation Trust on the building of a £21m intense care unit.

BIM is a priority for the trust as it strives to maintain a large and complex estate with multiple projects each year.

BAM Construct UK was challenged by the trust to achieve a level of BIM output that was "probably more comprehensive than any of their recent projects", said Jeff Belk, the trust's head of estates and capital projects.

[Back to top](#)

The scope of asset data and assets labelling was designed to mesh BIM with the client's computer-aided facilities management systems and required significant fine-tuning. BAM was just a couple of months into the job when Covid-19 struck and non-essential visits to the project were suspended; the decision was made to roll out weekly virtual project walkthroughs, showing works as they progressed, using the 3D scanning system Matterport.

- **Project: Hard hat cameras ensure Claridge's project runs smoothly**, 3 September 2020.

Northern Ireland contractor Mastercraft has been using Oculo's hard hat camera site-scanning equipment to monitor progress on its work at Claridge's Hotel in Mayfair, London.

Oculo's 360 degree video camera is mounted on a hard hat to record progress each week during a usual site inspection. The system creates a virtual copy of the site that is navigable via an online platform, allowing users to zoom in on areas of interest and pin notes in the virtual space, meaning they can log RFIs, snags and notify clients or contractors about specific issues. Mastercraft adopted the technology when the Covid-19 travel ban came into force, meaning its project manager was unable to leave Belfast to visit the site.

Social distancing regulations also meant that other professionals on the project, such as the QS and design team, could carry out inspections and valuations remotely.

- **Project : Digital twin helps BDP Edinburgh project progress**, 4 August 2020.

- Work on the flagship Edinburgh St James project has been able to keep moving during the coronavirus lockdown thanks to digital collaboration.

- Client: Nuveen Real Estate

- Lead consultant/technical architect: BDP

- Main contractor: Laing O'Rourke

Despite the lockdown forcing the suspension of onsite activities for 12 weeks, work still continued apace behind the scenes on the £1bn Edinburgh St James project, a key development for the city. Digital collaboration gave designers, engineers and contractors an opportunity to seize something good from the crisis.

This approach meant that it was business as usual for design development and coordination for the project team during lockdown.

As a result of the restrictions on site, designers and engineers have relied more heavily on digital collaboration tools, and the use of Building Information Modelling (BIM). Integrated virtual design and construction solutions are also being developed to be used end to end, from project concept through to commissioning on what is arguably the most complex building project underway in Scotland.

BDP Glasgow Studio is the lead consultant and technical architect for the design of Edinburgh St James, Nuveen Real Estate's developing, and is delivering the master plan as part of the Laing O'Rourke construction team.

Built Environment Research

Latest from Savills *Impacts* – *The Future of Global Real Estate*

- Market Trends: Savills.com

In-depth research and analysis into property market trends, forecasts from specialist research teams, and market leading commentary to help you make the right property decisions

The impact of Covid-19 on real estate

- From residential to retail offices to logistics, the long-term impact of Covid-19.

When Savills decided on the theme 'tipping points' for their 2020 *Impacts* programme at the end of 2019, various topics were discussed: climate change, demographics, technology and many more. What wasn't known at the time is that we were about to be faced with a pandemic. Covid-19 changed the way we work and live almost overnight and is likely to have a long-term impact on real estate.

As countries come out of their strict lockdowns but social distancing is still encouraged, the long-term impact of Covid-19 is yet to be seen. Many believe the world will emerge as a different place.

Here, Savills discuss the potential changes that may be seen across the different sectors. If you prefer to read a specific sector,

UK Poverty 2019/20: Housing (Part of UK Poverty 2019/20)

- It's not right that high private rents are pulling low-income households into poverty.

We all need somewhere to live, so it's unacceptable that many of us are shut out of having a secure, affordable home.

Increasing numbers of families with children are being caught in poverty's grip because of high private rents, as well as a raft of changes to social security policy, which have made housing less affordable.

A National Housing Conversion Fund: buying properties to boost affordable housing supply

September 2020

The Smith Institute's Affordable Housing Commission published a report into the national housing conversion fund.

The report examines two main ways a ring-fenced National Housing Conversion Fund could be achieved. The first is targeting funds to purchase homes on the secondary (existing) market. It examines which housing markets – in broad terms – the investment might be best aimed at, factoring in how it could help improve housing condition and support jobs and growth. This option could be weighted to support weaker housing markets by providing a floor for the market and helping those struggling and desperately needing to sell. Finding could be made contingent on investing in a property to raise standards. By focusing on low demand housing areas, a higher proportion of the investment would target jobs and growth rather than land costs in high demand places, where the economic rationale is weaker.

The second aspect concerns additional funding for social landlords to purchase homes for sale being built by housebuilders and converting them to social and affordable housing. With sites stalled and the prospect of construction workers losing their jobs, this approach would meet the strategic objective of making more housing affordable, as well as the shorter-term goal of supporting the recovery. It would also ensure that capacity and capabilities within the housebuilding industry is not lost due to the downturn but retained for when a recovery materialises.

The overarching case for a National Housing Conversion Fund rests not only on the urgent need to increase social and affordable housing and rebalance the housing system, but also as a quick and cost effective way of supporting the economy as we move forward from – what we hope – is the worst of the pandemic. And, as demonstrated in this report, such a scheme could also improve housing conditions and contribute to the government's strategic ambitions to level up the economy and reduce carbon emissions.

Falling behind: The impact of Universal Credit (UC) on rent arrears for council tenants in London

July 2020

This report was commissioned by Southwark Council, with the support of eleven other London local authority landlords and coordinated by London Councils. The research and report focus on two main questions:

[Back to top](#)

- How has the roll-out of Universal Credit (UC) affected rent payment behaviours among residents in local authority-owned housing across London?
- How are identified changes in behaviour – or the absence of behaviour change – affecting the tenancies of those tenants who are receiving housing cost support under the new arrangements?

This research was commissioned against the backdrop of growing evidence of the impact that UC is having on rent payment behaviour and rent arrears, as well as broader concerns about how it is affecting the financial wellbeing of recipients. Much of the previous research in this field has focused on one or two housing providers. The intention of this research was to understand what the overall impact might be across multiple providers and locations. To achieve that objective the research covered 12 participating London boroughs, who collectively own over 210,000 homes – 13% of council housing in England. 1 Including data from these 12 boroughs also offered a larger sample of cases.

The study examined those making a new claim for the housing element of UC during a three-month period (July-September 2019) in the 12 London boroughs with final rental data running until December 2019. This falls after the roll-out of Universal Credit full service to all parts of London, which was completed by December 2018. It also follows a series of reforms made in 2018, including the abolition of the seven-day waiting period and the introduction of a two-week Housing Benefit (HB) run-on.

The report tells this story of financial stress through analysis of tenant rent accounts. The scale of the costs to social landlords is also apparent in escalating arrears after tenants make an effective UC claim.

By examining this impact and tracing rent behaviour over time, the analysis points towards what kind of reforms might be needed to improve UC to the benefit of both tenants and social landlords which are presented in the report.

Consumer Rights in the Private Rented Sector

July 2020

People who rent from a private landlord are at the sharp end of the housing crisis, but the truth is we have often more rights as consumers when we rent a car, buy a fridge-freezer or take out a loan than we do as private renters.

This has been reinforced during the coronavirus crisis, with people spending more time at home and many realising just how precarious their housing situation is.

This report sets out a new perspective on how we can improve the private rented market: by recognising the consumer rights we're

[Back to top](#)

used to having in other markets, from utilities to financial services, and looking at how we might apply those lessons to the private rented sector.

All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission (EPIC)

January 2020

- This report presents the findings and recommendations of the Enfield Poverty and Inequality Commission. The Commission, chaired by Baroness Tyler of Enfield, was made up of a mix local and national stakeholders and experts and was supported by the Smith Institute.

To undertake a review of poverty and inequality in Enfield and set out recommendations, the Commission:

- Initiated a 'call for evidence' to understand the views of local people and organisations. A feedback account was set up and promoted and comment boxes were placed in Enfield's four hub libraries for member of the public to submit evidence.
- Considered relevant existing datasets across a range of available evidence bases.
- Engaged directly with local people, service providers, community organisations and businesses, through public meetings, focus groups, and one-to-one interviews.
- Considered best practice that has successfully been taken forward in Enfield and elsewhere that may be replicated or adapted for wider use.
- Held four Commission meetings to hear evidence on the three threads with follow up discussions.
- A deliberative 'solutions workshop' at Green Hall Community Centre in Edmonton, inviting organisations and members of the public who had engaged with the Commission to come together and formulate recommendations.

The Commission's work focussed on three inter-connecting themes. These were:

- Living: To what extent does who we are and where we live affect our life chances and the services we can access?
- Learning: What barriers prevent local people from accessing opportunities through education and training?
- Earning: How can people on low incomes be better supported to secure long-term economic prosperity?

Read the full piece of research, 'All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission'.

[Back to top](#)**Safe as Houses 3: Have government reforms to Universal Credit reduced the rent arrears of Southwark's tenants?**

- This report was commissioned by the London Borough of Southwark. The aim of the report is to better understand the impact that Universal Credit (UC) has had on the rent payment behaviour of the borough's own social housing or "council" tenants.

The report focuses on two main questions: first, whether there has been an improvement in rent payment behaviour since reforms to UC were introduced in 2018; and second, to see what the impact of UC has been long after tenants have transitioned onto the new benefit.

Competence Requirements for new role of Building Safety Managers

The competence requirements for the proposed new role of the Building Safety manager was been set out in a new 2020 report ***Safer people, safer homes: Building Safety Management***.

Under new legislation being introduced in the *Draft Building Safety Bill* published in July 2020, those deemed responsible in law for the safety of higher-risk building, such as the landlord, will be required to appoint a Building Safety Manager.

The role of the Building Safety Manager will be to look after the day-to-day management of fire and structural safety in higher-risk buildings and establish a clear point of contact for residents for fire and safety related issues.

House of Commons Library search on '**construction industry**' identifies 18 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, December 2019**' -

Abstract: Construction industry – employment, new orders, output. **Construction 2025**, **The Farmer Review** and the **Construction Sector Deal** (part of the government's **Industrial Strategy**).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more construction jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

UK Economy and Property Market Chart Book, Q3 2020

- A substantial rise in unemployment is likely towards the end of the year.

Economic Outlook – On the face of it, the UK is now in the recovery phase from what can only be put down as pretty much the worst quarter for GDP since records began. Looking closely at the latest labour market indicators however, it seems like challenging times still lie ahead. Flash estimates by HMRC for example suggest that employment through PAYE has already slipped by almost 750,000 in the last five months. What's more, experimental statistics by the ONS suggest that unemployment related universal credit claims have risen by 1.4 million since March. It is almost inevitable that these numbers will increase in the coming months as the government's job retention scheme is withdrawn. Predictably enough, the unemployment rate looks set to climb. It wouldn't come as a total surprise if the jobless rate rises from 3.9% currently to above the 8% mark in the last quarter of 2020.

Also covered in this **Q3, 2020 UK Economy and Property Market Chart Book**

- GDP is set to fall sharply this year
- Government debt levels look set to rise substantially

[Back to top](#)

- However low interest rates could help to keep debt servicing costs manageable
- Housing sales are likely to recover in the coming months
- Infrastructure work could support activity in the construction sector

Construction Sector – With much of the industry required to close amidst the Covid related lockdown, survey data is consistent with a sharp drop in construction output in the first half of this year (2020).

Output looks likely to fall in the coming months:

Source: RICS Economics Research: *RICS UK Economy and Property Market Chart Book* (Q3 2020), London: RICS, p11 - Chart 20.

The Q2 2020 results to RICS UK Construction and Infrastructure Monitor (and reported in the last monthly issue of **Knowledge Foundations**) and consistent with a deterioration in market sentiment with the headline workloads net balance slipping further into negative territory over the quarter (see above chart).

[Read the full piece of research 'RICS UK Property and Market Chart Book, Q3 2020](#)

UK Residential Market Survey: September 2020

- Housing market activity continues to advance at a strong pace.

- Survey metrics on demand, sales and instructions remain firmly positive
- House price growth accelerating right across the UK
- Twelve-month sales expectations still portray a more subdued outlook further ahead.

The September 2020 *RICS UK Residential Survey* results continue to portray strong upturn in activity across the market, as indicators on enquiries, agreed sales and new listings all remain strongly positive. Nevertheless, respondents still foresee sales weakening further ahead amid the challenging macro-economic environment,

[Back to top](#)

evidenced by the twelve-month expectations' series moving deeper into negative territory in the latest returns.

During September, a headline net balance of +52% of survey participants reported an increase new buyer enquiries. This marks the fourth consecutive monthly pick-up in demand, albeit the latest reading represents a slight moderation compared to net balances of +75% and +63% posted in July and August respectively.

House price growth continues to gain momentum, as the survey's headline indicator on prices climbed once again to post a net balance of +61% (up from +44% last time). What's more, all parts of the UK are now seeing prices rise to a greater or lesser degree, albeit the rate of house price inflation appears to be more modest in London compared to all other regions.

In the lettings market, tenant demand reportedly rose for the fourth month in succession (non-seasonally adjusted monthly series). That said, while respondents saw a pick-up in tenant demand across all parts of the UK last month, London now stands out as the only area in which a negative trend in tenant demand was cited in September (2020).

This recent dip in demand has been reflected in short-term rental growth expectations across the capital, with a net balance of -67% of contributors anticipating rents in London will fall over the next three months. By the way of contrast, the national three-month rental expectations indicator returned a positive reading of +19%.

[Read the latest RICS UK Residential Market Survey: September 2020 in full.](#)**RICS - SPACIOUS 千居 Hong Kong Residential Market Survey: [September 2020](#)**

- Demand from buyers and renters continues to deteriorate.

- Confidence Index remains negative for the third consecutive month
- Expectations for New Territories, Kowloon, Hong Kong Island converge
- Rental market under pressure amid rising supply and weak demand

Demand for housing from both buyers and renters continues to decline, according to feedback to the RICS-Spacious Hong Kong Residential Monitor. As can be seen in Chart 1, the Confidence Index* was little changed at -44 in September '20 from -42 in August '20, indicative of a deterioration in housing market sentiment. Chart 1 also shows sentiment amongst Hong Kong's three regions (New Territories, Kowloon, Hong Kong Island) appears to have once again converged in September after diverging in August.

Latest Statistics from the Office for National Statistics (ONS)

Construction Industry highlights include – Construction output in Great Britain: September 2020, new orders and Construction Output Price Indices, July to September 2020

Short-term measures of output by the construction industry and contracts awarded for new construction work in Great Britain.

What's covered in the latest bulletin?

- Construction output grew by 2.9% in the month-on-month all work series in September 2020, driven by increases in both new work (2.7%) and repair and maintenance (3.4%); this is the fifth consecutive month of growth but the lowest rise in that time.

- The level of construction output in September 2020 was 7.3% below that in February 2020, with only infrastructure and private new housing having returned to above their pre-pandemic levels of output; all other types of work in September 2020 have yet to recover, with public new housing the furthest below its February 2020 level at 29.4%.

- Quarterly construction output grew by a record 41.7% in Quarter 3 (July to Sept) 2020 compared with Quarter 2 (April to June) 2020; this was driven by record quarterly growth in both new work (40.8%) and repair and maintenance (43.4%).

e-Journal Review

Built Environment Industry Journal titles reviewed by UCEM e-Library

Modus - the RICS magazine that brings you the latest news and views, expert advice and in-depth features spanning the breadth of the surveying profession around the world.

In the latest digital ***MODUS*** (November 2020), RICS takes a look at 'FM post-pandemic: the crucial role of procurement' – Procurement is a key part of facilities management and in the COVID-19 era its role in keeping businesses functioning while driving value and reducing costs has become vital.

Latest articles:

- **The heat is on: retrofitting homes to save the plant:** Reducing energy usage and carbon emissions in houses is vital in the fight against climate change, and in cooler climates that means getting ourselves off gas. But what's the viable alternative?

- **Investment post-COVID-19: downtime in Europe** – Real estate in Europe has been hit hard by the pandemic, and there's not much sign of a let-up yet. Investors will be playing a defensive game.

- **Following future leaders: the chartered surveyor to be** – Mohamed Saâd Alami, 27, is from Casablanca in Morocco and is about to take his APC (Assessment of Professional Competence) – the final step to becoming a chartered member of RICS. He works at his family – owned real estate company leading its valuations department.

- **Why the Dutch are masters of circularity:** When it comes to circular construction, where nothing is wasted and everything is sustainable, the Netherlands is leading the way.

- **The post-pandemic FMs: bringing it into the boardroom** - COVID-19 has hastened a change in the remit of the facilities manager. The traditional office is in the midst of an existential crisis, and the FM has a big part to play in its future.

- **The circular economy in numbers:** *Modus* crunches the numbers on the challenge the construction industry has to become more circular.

- **Following future leaders: the newly chartered surveyor:** Winnie Che MRICS trained as a chartered surveyor after four years in the property industry. She tells us about becoming chartered during a pandemic, and how her career is all about people.

[Back to top](#)

- **Level up: the core skills of quantity surveying:** Gain core knowledge and get a taste of what the profession is all about on the RICS Quantity Surveying: Foundation Programme.

- **Working from home: how was it for you?** Companies are calling for staff to get back to the office but the data (as shown overleaf) suggests that employees aren't all ready to return to the commute just yet:

Working from home: how was it for you?

Source: RICS (2020) 'The results of the RICS Modus Twitter poll on home working', *Modus*, 1 October, London: RICS.

The latest edition, **Vol 12(2)** and third *Open Praxis* in 2020 includes six research papers and two innovative practice papers:

Research articles include:

1. 'Forty Years of Distance Education: Challenges and Implications at the Open University of Sri Lanka'
2. 'Implementation of Learning Management System: A Way Ahead on the Digital Journey in Distance Learning'
3. 'Examining eLearning system self-efficacy amongst instructors at the University of Dodoma, Tanzania'
4. 'Determining needs and priorities of learners with special needs for support services in an open and distance learning context in Turkey'
5. 'A case study of work-based learning through the design of edX MOOCs for Latin America and the Caribbean'
6. 'Academic Librarians Examination of University students' and Faculty's Perceptions of Open Educational Resources'

Innovative practice articles include:

1. 'Academic e-tandems as a strategy for English language learning in a Mexican university'
2. 'If at First You Don't Succeed, Try Closing Another Assessment Loop: Implementing Online Co-Curricular Assessment.'

[European Journal of Open, Distance and E-Learning](#)

(EURODL), an electronic, multi-media, open access journal. It publishes the accounts of research and presents scholarly work and solid information about open, distance, online and e-learning in technology-enhanced education and training in its most inclusive definition.

Published in the latest issue, **Vol. 23 (2020): Issue 1 (July 2020)**, article titles include:

- 'Virtual International Exchange as a High-Impact Learning Tool for More Inclusive, Equitable and Diverse Classrooms',
- 'Exploring the Problem of Establishing Horizon Emergent Technologies within a Higher Education Institution's Operational Framework',
- 'Five Learning Design Principles to Create Active Learning for Engaging with Research in a MOOC',
- 'Exploring the Relationship Between Interaction and the Structure of Questions in Online Discussions Using Learning Analytics',
- 'International Online Graduate Students' Perceptions of Col',
- 'Integrating Global Online Legal Education with an On-Campus Franchise Course: A Role for MOOCs'.

The Online Learning Consortium (OLC) **[Online Learning Journal](#)**, latest edition, **Vol 24(3)**. The third quarterly issue of *Online Learning* (OLJ) containing two sections, one devoted to the best papers from recent OLC conferences. Section one of this issue was edited by Patsy Moskal of the University of Central Florida, Laurie Dringus of Nova South-eastern University, Paige McDonald

of George Washington University and Karen Swan, University of Illinois Springfield. In addition to the special section on papers presented at recent conferences sponsored by the Online Learning Consortium, this issue of OLJ also contains eight papers, broadly related to faculty and student issues as well as blended learning.

e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Research shows that high-performing organisations focus on diversity and inclusion (D&I). In any workplace, it is important to both understand and recognise the benefits that having a D&I workforce provides. It is integral to developing people within an organisation, serving clients as best we can, and playing an important leadership role in communities.

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success. It presents a practical and easy-to-read guide that can help organisations and their leaders engage with and apply this agenda to win the war for talent in real estate and construction.

This book is essential reading for all property leaders and professionals working in the real estate and construction sectors. Readers will gain especially from personal reflections on all aspects of diversity by a broad range of people working in the property industry.

Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online

Bonk C J, and Khoo E R (2014) *Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online* [e-book]. CreateSpace Independent Publishing Platform, e-ISBN-13: 9781496162724

[Back to top](#)

As this book states, “Motivation is central to all things human” and Online teaching and learning are no different.

The authors of this free online book propose the TEC-VARIETY framework as a solution to the lack of meaningful engagement.

It can shift learners from nearly comatose states to actively engaged ones. *Adding Some TEC-VARIETY* helps instructors focus on how to motivate online learners and renew their own passion for teaching. Using 10 theoretically driven and proven motivational principles, TEC-VARIETY offers over 100 practical yet innovative ideas based on decades of author experience teaching in a variety of educational settings.

Studying at a Distance

Talbot C (2010) *Studying at a Distance* [e-book]. Maidenhead: Open University Press, e-ISBN-13: 9780335238057

This essential guide provides practical help and support for those who have not previously studied at a distance and is ideal for students returning to study after a break. It covers fundamental issues such as motivation, goal setting, time management and coping strategies. Additional coverage in this third edition includes: specific information on the use of new technologies in distance learning; detailed coverage of referencing, citation and plagiarism; description of using mind maps and other techniques for planning and writing essays or reports; support for disabled students, particularly those with dyslexia; and, an expanded further resources section.

Directory of Open Access Books (DOAB)

UCEM e-Library Portrait

Whether you are obtaining qualifications, undertaking Continuing Professional Development or researching a particular field, gaining access to a wealth of useful and credible information resources is essential!

[Back to top](#)

UCEM e-Library:

© UCEM 2020

The UCEM e-Library (accessed through the Virtual Learning Environment - VLE) is a comprehensive and valuable online resource, enabling staff and students to access a wealth of up-to-date, credible and subject-specific information to supplement teaching and learning materials, and support students throughout their studies.

At UCEM we recognise that in an information-rich age, everyone is pressed for time and it can be a challenge to keep up-to-speed with the latest research and find good-quality information when you need it.

The UCEM e-Library can:

- provide access to online resources around the clock,
- a first point of call for staff and students to access digital resources
- add value and depth to work
- contribute to personal and professional development

What resources are available in the UCEM e-Library?

© UCEM 2020

Resources available within the UCEM e-Library include:

- Up-to-date information and online searchable databases from key educational and industry-specific sources incl. IHS's Construction Information Service, Estates Gazette Interactive, RICS's BCIS and ISURV, BSRIA, EBSCO

[Back to top](#)

Business Source Premier, Emerald Insight and access to their 2500 eBook titles and their entire 'Property Management and the Built Environment' collection of journals, JustisOne, Westlaw UK, and more;

- useful weblinks; e-books and e-journals,
- Research and reference material to assist and underpin written work,
- Current awareness on existing issues and trends surrounding the Built Environment, Property, Construction, and Real Estate.

Overwhelmed by the sheer amount of information out there?

The e-Library is here to help make finding up-to-date, credible and relevant information easier. Remember: "A Librarian is a powerful search engine with a heart, that listens and understands the library and information requirements of others and provides a response in a format that suits their needs"

Lucy Roper, UCEM Information Governance Manager and who can be contacted on the library@ucem.ac.uk email address

Building Better Property Professionals

Property Elite's sole aim is to build better property professionals – supporting your career every step of the way, whether you are completing a RICS accredited degree course, your RICS APC or simply seeking engaging CPD.

[Back to top](#)

Property Elite provides training and Continuing Professional Developments (CPD) services for property professionals, including students, APC candidates and corporate clients.

Their Hot Topic Highlight blog posts will arm you with the information on the hottest topics – ready to tackle an important client meeting or begin revising for your RICS APC final assessment.

This month (**October 2020**) the **Hot Top Highlight – Motivation**

- This blog, written by Property Elite consultant, Blumzon, A., outlines motivation theory, and how it can be applied in practice.

This blog is particularly relevant to the 'leading projects, people and teams' competency, as well as 'managing people' in the pre-August 2018 pathways.

It forms useful reading to help understand diversity, inclusion and teamworking, and provides guidance for anyone who wants to improve or hone their leadership skills.

This Blog covers:

This week's blog will explore:

- What is motivation?
- What is motivation theory?
- What is Maslow's Hierarchy of Needs?
- How can I use these theories in practice?

In summary, motivation is the state of mind which pushes humans to perform things with positivity. The role of the leader or manager is to ensure that every individual in the team and the organisation is motivated. The various motivation theories help our understanding of what will motivate people.

Lucy's Top Tip – If you are planning to sit your RICS APC/AssocRICS, make sure you are aware of Property Elite's APC Support services, including submission reviews, question packs, revision quizzes and e-mock interviews.

Note: The author of most of these blogs, Jen Lemen-Hogarth is an Associate Tutor – UCEM and Partner – Property Elite. You can also download this blog **[in audio format](#)** and listen whilst on the move. When you're done, you can request further information and a free CPD certificate.

Building People

© UCEM 2020

Enabling connections for a competent, diverse and valued built environment workforce

The aim of 'Building People' was to create a technology platform and collaborative network, that enables connections and seeks to reduce the skills shortages across the Built Environment.

In 2018 UCEM's widening participation ambitions were boosted after acquiring the innovative Built Environment digital network. 'Building People', a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with employers seeking to plug the skills gap via an online platform, is now a subsidiary of UCEM.

People Wiki

What are you looking for?

© Building People 2020

Building People and Designing Buildings Wiki have launched People Wiki, a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.

The UK needs to build, but there is a shortage of competent and experienced workers, and the workforce we have lacks diversity. Building People joins the dots to help people find employers, opportunities and resources, and to help employers engage with a more diverse range of talent.

The launch of People Wiki is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities and needs focused on diversity and inclusion, skills and careers, and social value. This platform is now live and provides users with options to find organisations that can support them with built environment careers, as well as access to information and resources. In September the platform will expand to include directories that bring together events, courses and work vacancies (with an initial prototype focus on the surveying profession).

People Wiki has been created as part of Designing Buildings Wiki and is fully linked to its 10,000 existing articles and easily accessible by its 7.5 million annual users. This collaboration with an established and respected industry knowledge base will help Building People achieve its vision of a built environment that improves social and economic value by being better connected, more diverse and more inclusive

Note: Use of Wikis as a reference site

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source.

It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

- Remember that an encyclopaedia (which include Wikipedia and any other Wiki) can be a good starting point for research, and not an ending point.
- An encyclopaedia can be good for getting a general understanding of subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

[Access the Information Commissioner's Office website](#)

ICO Latest News [November 2020]

November 2020 - **UK political parties must improve data protection practices**

The ICO has set out how seven of the UK's political parties need to improve the way they handle people's personal data after assessing how they manage data protection.

Key recommendations for the parties include:

- Providing the public with clear information at the outset about how their data will be used;
- Telling individuals when they use intrusive profiling such as combining information about those individuals from several different sources to find out more about their voting characteristics and interests;
- Being transparent when using personal data to profile and then target people with marketing via social media platforms;
- Being able to demonstrate that they are accountable, showing how parties meet their obligations and protect people's rights;
- Carrying out thorough checks on all contracted and potential processors and third-party suppliers to gain assurances that they comply with the key transparency, security and accountability requirements of data protection law;
- Reviewing their lawful bases for the different types of processing of personal data used to ensure the most appropriate bases is used.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers and visual artists. By 'copying' the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party. Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors.

Note: UCEM holds a CLA 'Higher Education Photocopying and Scanning Licence'

Keeping abreast of the latest developments in Information Governance

© CLA 2020

As UCEM Information Governance Manager I regularly attend the Copyright Licensing Agency (CLA) Copyright & Information Technologies in Education (CITE) Forum.

The CITE Forum is a place to discuss the CLA's technology and licence offerings (such as the Digital Content Store) but also an

[Back to top](#)

opportunity for Higher Education Institute's to network, share and disseminate relevant copyright information. The Forum meets twice a year and publishes a biannual magazine for the CITE community containing the latest developments.

Copyright Licensing Agency (2019) '[CITE – 2020 Vision](#)', [CITE Magazine, Winter 2019, No. 3](#) [online].

Copyright Licensing Agency (2019) '[A CITE to behold](#)', [CITE Magazine, Summer 2019, No. 2](#) [online].

Copyright Licensing Agency (2018) [CITE Magazine - A biannual magazine for the CITE Community, Winter 2018, No. 1](#) [online].

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security**.

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's National Copyright Conference 2020 in association with Naomi Korn Associates

Despite the current lockdown due to COVID-19, CILIP in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance, made it happen albeit online this year.

This year's national annual Copyright Conference provided an opportunity to delve deeper into copyright issues and gain a better understanding of how policy impacts on libraries and the information sector.

Sessions covered broad copyright impact for the profession incl.

- **Taking Rights Away? - Reconsidering obstacles to copyright reform.**

In policy debates in copyright, it is often argued that changes to the copyright legislation which may be favourable to librarians, information professionals and the users of their services, would deprive rights holders of established property rights. Such arguments were used to prevent the resolution of the '2039 problem' in unpublished works. In this keynote paper, Jonathan Griffiths, Professor of Intellectual Property Law, Queen Mary University of London argues that, when scrutinised carefully, these claims are often less convincing than they initially appear.

[Back to top](#)

- **The EU Directive: Ground-breaking, Clarifying or Pointless**

The EU Copyright Directive: What does this mean for libraries and the cultural heritage sector? Positioning new directive in the context of existing EU legislation and case law Dr Andrea Wallace, Lecturer in IP, Exeter University, and Anthony Misquitta, General Counsel V&A discussed how the new Directive will affect libraries and cultural heritage organisations.

- **Copyright Risk Assessment Framework**

The National Libraries of Wales and Scotland have jointly developed and adopted a copyright risk acceptance framework. The framework is a pragmatic risk assessment and decision-making tool to aid the digitisation of collection material (Original Objects) and the making available of digitisations (Digital Surrogates). Fred Saunderson, Rights and Information Manager, National Library of Scotland.

- **Plan S from a Publishers Perspective: The benefits for Librarians and Academics**

The push to Open Access has created a huge change within the industry, as well as opportunities, for academics, publishers and librarians. Sarah Greaves, PhD, will discuss Plan S from an Open Access publisher's perspective.

- **Copyright in the Courts**

The session will consider a selection of recent, and not so recent judgements on copyright from UK courts, the Court of Justice of the EU and elsewhere as they affect librarians, archivists and other information professionals. Tim Padfield, Author, *Copyright for Archivists and Records Managers*

- **Ensuring every pound and every licence advances Open Access: Transformative agreements,**

Libraries entering into transformative agreements with publishers changes the business model underlying scholarly journal publishing, enabling more open access. In this session Lorraine Estelle, Director, Information Power Limited (IPL) shared a free transformative agreement toolkit, and insight into how these can be implemented by a wide array of libraries.

- **CLA Licensing Update for Librarians and Information Professionals**

James Bennett, Head of Rights and Licensing, Copyright Licensing Agency updated attendees on the latest enhancements to the licences (esp. over this COVID-19 pandemic period and extending limits for licence holders) and workflow tools offered by the CLA and CLIA Licence Plus.

The Challenges of Remote Working at Present

For those who work remotely all or part of the time already, you or your employer [depending on whether you are self-employed / freelancer or an employee] will have safeguards in place that enable you to operate securely when handling commercially sensitive or others' third party data. The difference, in March 2020, is that at very short notice, organisations are having to move staff to homeworking often with literally hours' notice as the Government COVID-19 instructions are issued.

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know](#).

The challenges of remote working at present and point to consider from a data privacy perspective

Provided within this article are points to consider from a data privacy perspective that include:

Have a clear statement to all staff stressing that "The protection of personal data that we hold, and use is important to us and must be handled at all time in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we have to adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instruction that will be kept under review.

At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted." (Tullo 2020)

The challenges of remote working at present and points to consider from a data privacy perspective cont.

1. **Set out what use of data**, contact lists, customer documents are being allowed.
2. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using**.
3. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seem sensible at present] in line with experience and how staff report it is working.
4. **Reissue and emphasis your usual security arrangements –** Virus and password protection, not leaving data visible to

[Back to top](#)

others, having a PIN code, or not sharing their device with others in their family or household

5. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed. For the **weekly reviews** – have your Senior Leadership Team note the number of staff using personal devices, any queries or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
6. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
7. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
8. This is where a nominated Data Protection Officer [DPO] or Data Officer can support the senior team in the messaging to colleagues.

Source: Tullo C, OBE (2020) '[The Challenges of Remote Working at Present](#)'. © [Naomi Korn Associates](#), 2020. Some Rights Reserved. The text is licensed for use under the Creative Commons Attribution Share Alike Licence (CC BY SA).

Regarding UCEM we have followed these pointers:

(i) A clear statement went to staff, and UCEM has a designated area within their central SharePoint site for Business Continuity Planning (BCP) that has the following folders containing

- Official Communications [Internal and External]
- Human Resources (HR) guidance and support
- Information Technology (IT) technical support, guidance and documents

Data Protection guidance (incl. a new guidance note entitled, 'Processing Personal data when remote working').

- The [UCEM Data Protection and Privacy Policies](#) have been updated and should be read in conjunction with IT Policies).
- & Hints and tips for working from home.

(ii) A retention and destruction schedule is in place that collates lists of data used within respective teams and departments; (iii) A register is kept of where staff are working from and equipment used; (iv) Regular online meetings and weekly All-staff keep everyone updated and ensuring regular communication; (v) IT provide regular updates and guidance; (vi) GDPR 2020 training has been launched to re-enforce the importance of knowing how data is used and where it is being stored, even if temporary so that risk is managed and assessed; (vii and viii) online equipment and collaboration tools are well established at UCEM as an online education provider, but are regularly monitored; (ix) As mentioned

Back to top

above, hints and tips for working from home are provided, & (x) UCEM has a designated Data Protection Officer (DPO).

Please note: There are regular updates -

- On the **UCEM Website**,
- **VLE Help Page** (for students), and for all
- within the **e-Library** current awareness services, incl.
 - Information blog and
 - ***Knowledge Foundations***.

#BE Informed

- A short **UCEM e-Library video** (used within UCEM Marketing, **Social Media business channels i.e. LinkedIn** to promote the e-Library, *Knowledge Foundations*, regular information blogs, and more).

CIOB's Policy and Public Affairs portal [online]. Available at: <http://policy.ciob.org> [accessed 25 November 2020]

The CIT-eA Project Creating Innovative Technology – Enhanced Assessments – a research project that explored ways to increase the amount of assessments in Further and Higher Education using technology. The CIT-eA Project [online]. Available at: <http://citea.digitalinsite.co.uk> [accessed 25 November 2020]

Cities / buildings images database [online]. Available at: www.washington.edu/ark2 [accessed 25 November 2020] is a collection of images of buildings and cities from around the world aimed at students, researchers and educators.

C-Link is a procurement software company who also provide resources (incl. guides, eBooks and other materials) created to help you make more money on your construction project. C-Link [online]. Available at: www.C-Link.com [accessed 25 November 2020]

College of Estate Management (CEM) – See University College of Estate Management (UCEM)

Commercial Real Estate Services (CBRE) is the world's largest real estate services provider, with a preeminent leadership position in virtually all key business centers globally. CBRE [online]. Available at: www.cbre.co.uk [accessed 25 November 2020]

Community-Led Housing (CLH) Toolkit: a resource for local authority and housing professionals' [online]. Available at: <https://clhtoolkit.org/> [accessed 25 October 2020]. This Toolkit provides a wealth of technical and non-technical information on a broad range of issues relevant to CLH. There are five Toolboxes, covering (i) Housing (ii) Communities (iii) Legal (iv) Planning and (v) Finance.

Confederation of British Industry (CBI) is the UK's premier business lobbying organisation, providing a voice for employers at a national and international level. CBI [online]. Available at: www.cbi.org.uk [accessed 25 November 2020]

Conference on Training in Architectural Conservation (COTAC) was formed in 1959 to improve the standard of education of everyone involved in building conservation, including craftsmen, professionals and homeowners. COTAC [online]. Available at: <http://ihbconline.co.uk/cotac2> [accessed 25 November 2020]

COTAC Digital Bibliography [online]. Available at: http://cotac.global/digital_bib/ [accessed 25 November 2020]

Constructing Excellence (delivered with **bre**) is a platform for industry improvement to deliver excellence through clients, industry and users through collaborative working. Resources include publications, tools and newsletter. Constructing Excellence [online]. Available at: <http://constructingexcellence.org.uk/> [accessed 25 November 2020]

Construction Enquirer is a news website in construction. Construction Enquirer [online]. Available at: www.constructionenquirer.com [accessed 25 November 2020]

The **Construction Index** [online] provides a wide range of information services for the UK construction industry, that include a search engine of construction companies, daily construction news, market data, email newspaper letter, and Case Law analysis and legal commentary.

Further information is available at: www.theconstructionindex.co.uk [accessed 25 November 2020].

Construction Industry Council (CIC) – The representative forum for the professional bodies, research organisations and specialist business association in the construction industry. CIC [online] and available at: <http://cic.org.uk> [accessed 25 November 2020]

The **Construction Industry Research and Information Association** (CIRIA) [online]. Further information and resources are available at: www.ciria.org/default.aspx [accessed 25 November 2020]

Construction Industry Training Board (CITB) is the training board for the construction industry and partner in Construction Skills, the Sector Skills Council. CITB [online]. Available at: www.citb.co.uk [accessed 25 November 2020]

Construction Manager is the magazine of the Chartered Institute of Building (CIOB) [online] and available at: www.constructionmanagemagazine.com/ [accessed 25 November 2020]

Construction News [online]. Available at: www.constructionnews.co.uk [accessed 25 November 2020]

Construction Products Association (CPA) represents the UK's manufacturers and distributors of construction products and materials. Construction Products Association [online]. Further information is available at: www.constructionproducts.org.uk [accessed 25 November 2020]

Construction Project Information Committee (CPIC), responsible for providing best practice guidance on the content, form and preparation of construction production information, and making sure this best practice is disseminated throughout the UK construction industry. CPIC [online]. Available at: www.cpic.org.uk [accessed 25 November 2020]

Construction and Property Research Centre (CPRC), University of the West of England (UWE) – the CPRC's research activity is focused around the three inter-related stages of the built environment lifecycle, namely design, construction and maintenance. Note: The UWE **Centre for Architecture and Built Environment Research** (CABER) now incorporates the CPRC.

Contractors World magazines (incl. *Contractors World International* and *Contractors World UK & Ireland*) are the leading international digital publications. Delivering site reports, equipment reviews and comments of interest on the construction, mining, quarrying and related industries. Contractors World [online]. Available at: <http://cwmags.com/> [accessed 25 November 2020].

COPAC exposes rare and unique research material by bringing together the catalogues of c.90 major UK and Irish Libraries. In a single search you can discover the holdings of the UK's national libraries (including the British Library), many University libraries, and specialist libraries. Note: From August 2019 Copac was replaced by **Jisc's Library Hub Discover**.

Council for British Archaeology (CBA) is an independent charity bringing together members, supporters and partners to give archaeology a voice and safeguard it for future generations. Archaeology for all [online]. Available at: <http://new.archaeologyuk.org> [accessed 25 November 2020]

H

Health and Safety Executive (HSE) is the national independent watchdog for work-related health, safety and illness. HSE are an independent regulator and act in the public interest to reduce work-related death and serious injury across Great Britain's workplaces. HSE [online]. Available at: www.hse.gov.uk/index.htm [accessed 25 November 2020]

HSE, Health & Safety in the construction industry [online]. Further information is available at: www.hse.gov.uk/construction [accessed 25 November 2020]

Heritage Alliance - The largest coalition of heritage interests in England, the Heritage Alliance is the umbrella body for national and major regional Heritage NGOs. Heritage Alliance [online]. Available at: www.theheritagealliance.org.uk [accessed 25 November 2020]

Heritage Update: the online edition of the fortnightly Heritage Alliance's *Heritage Update* e-bulletin [online] and available at: www.theheritagealliance.org.uk/update [accessed 25 November 2020]

Heritage Help - Created by the Joint Committee of the National Amenity Societies, Heritage Help offers information and advice on matters related to the management and protection of local historic environments. Heritage Help [online]. Available at: <http://heritagehelp.org.uk> [accessed 25 November 2020]

Higher Education Academy (HEA) – The Higher Education Academy champions excellent learning and teaching in higher education. The HEA are a national and independent organisation, funded by the four UK Higher Education funding bodies and by subscriptions and grants. Note: HEA is now **Advance HE**.

Higher Education Empirical Research (HEER) Database comprises summaries of the latest published research on a range of topics related to higher education. HEER [online]. Available at: <http://heer.qaa.ac.uk/> [accessed 25 November 2020]

Historic England is the public body that looks after England's historic environment. Historic England champion historic places, helping people understand, value and care for them. Further information is available at: www.historicengland.org.uk [accessed 25 November 2020]

Historic Environment Local Management (HELM) - provides accessible information, training and guidance to decision makers in local authorities, regional agencies and national organisations whose actions affect the historic environment. Note: All HELM web content on the Historic England website [online] and available at: <https://historicengland.org.uk/services-skills/training-skills/helmtraining> [accessed 25 November 2020].

Home Builders Federation (HBF) represents and serves its members in a range of ways including; Ensuring senior politicians and government officials are aware of housing issues and the challenges faced by our members; and working with Government officials to ensure housing policies are introduced that facilitate housing supply, in a way that is workable for the industry [online]. Available at: www.hbf.co.uk [accessed 25 November 2020]

House Building Careers (part of HBF). Here you will be able to learn about the home building industry and how it benefits you, your community and the country as a whole [online]. Further information available at: <http://housebuildingcareers.org.uk> [accessed 25 November 2020]

[Back to A to Z]

Inclusive Design Hub for the Built Environment is a collection of the latest guidance and best practice on inclusive design in the built environment and a project of **The Design Council** [online]. Available at: www.designcouncil.org.uk/projects/inclusive-design-hub-built-environment [accessed 25 November 2020]

INFABODE connects its community of users with industry information from the Real Estate sector on one customisable online platform. Infabode reduces the amount of time people spend trying to access key information from the Real Estate industry. **INFABODE** [online]. Available at: www.infabode.com/dashboard [accessed 25 November 2020]

Institution of Civil Engineers (ICE) is a registered charity that strives to promote and progress civil engineering. ICE [online]. Available at: www.ice.org.uk [accessed 25 November 2020]

ICE Virtual Library [online]. Available at: www.icevirtuallibrary.com [accessed 25 November 2020] is a free database that indexes all ICE journals.

International Council for Open and Distance Education (ICDE) is the leading global membership organisation for enhancing the quality of open, distance, flexible and online education, including e-Learning. ICDE [online]. Available at: www.icde.org [accessed 25 November 2020]

Institute of Historic Building Conservation (IHBC) is the principal professional body for building conservation practitioners and historic environment specialists working in England, Northern Ireland, Scotland and Wales, with connections to the Republic of Ireland. IHBC [online]. Available at: www.ihbc.org.uk [accessed 25 November 2020]

Institute of Workplace and Facilities Management (IWFM) – Formerly the British Institute of Facilities Management, BIFM is now the IWFM. The workplace has been incorporated into their new brand so that the status of the professional can help take careers further, regardless of

specialism. IWFM [online]. Further information is available at: www.iwfm.org.uk [accessed 25 November 2020]

IWFM Insight – discover leading research and resources for the workplace and facilities management profession. IWFM Insight [online]. Available at: www.iwfm.org.uk/insight [accessed 25 November 2020]

IWFM News – discover the latest news affecting the profession and gain expert insight and advice. IWFM News [online] Available at: www.iwfm.org.uk/news [accessed 25 November 2020]

IWFM Digital Magazine, *facilitate* - Informing workplace and facilities management professionals. IWFM *facilitate* [online]. Available at: www.facilitatemagazine.com [accessed 25 November 2020]

ITcon – The **Journal of Information Technology in Construction** is a peer-reviewed scholarly journal on the use of IT in architecture, civil engineering and facility management. *ITcon* [online]. Available at: www.itcon.org [accessed 25 November 2020]

[Back to A to Z]

J

JISC Library Hub Discover – Library Hub Discover replaces COPAC* and SUNCAT, offering increased coverage of university libraries along with new facilities and improved response times. Library Hub Discover currently contains 42,397,777 records created from 106,833,532 records contributed by 144 institutions. Jisc Library Hub Discover [online]. Available at: <https://discover.libraryhub.jisc.ac.uk> [accessed 25 November 2020].

JORUM Archive – After 13 years delivering and sharing content across the higher education, further education and skills sectors the Jorum service and website was retired on 30 September 2016. However, many of the open education resources (OER) that were available in Jorum, access to their Jorum Archive can be accessed via the JISC website [online]. Available at: www.jisc.ac.uk/website/legacy/jorum [accessed 25 November 2020] where you can also gain access to JISC's full digital resources offer.

Journal of Online Learning and Teaching (JOLT) - The **MERLOT Journal of Online Learning and Teaching** is a peer-reviewed, open-access, online publication that aims to promote scholarship in the use of the Internet and web-based multimedia resource in higher education.

JournalTOCs is the largest, free collection of scholarly Journal Title of Contents (TOCs) [online]. Available at: www.journaltocs.ac.uk/index.php [accessed 25 November 2020]
