What's in this month's issue

- **Latest UCEM News** incl. UCEM signs up to the CIC - Construction Industry Council's 'carbon zero' climate action plan.
- **Things you need to know this week** – Countryside to deliver London homes and school scheme. Developer seals deal to deliver 1,200-pupil secondary school and 116 homes on a former college site in Ealing.
- **Latest Research** from JRF, CABE, CBRE, CIOB, RICS, Savills, SI, and more.

Happy Reading!

Issue 7 – July 2021

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the Library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness, and share good practice, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

"The mission of librarians is to improve society through facilitating knowledge creation in their communities."

(R. David Lankes)

The initial aim of this UCEM Library current awareness service was to help keep students and staff informed of the education sector and industry specific news, share current and best practice, highlight the latest research, and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [email us](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM News

UCEM signs up to CIC's new 'carbon zero' climate action plan

UCEM is one of the institutions which has signed up to the Construction Industry Council's (CIC) new climate action plan.

The document, entitled 'Carbon Zero: the professional institutions' climate action plan', was released last week and coordinates the efforts of built environment institutions in meeting the UK government's 2050 net zero emissions target.

CIC's Climate Change Panel, chaired by its deputy chairman, Stephen Hodder MBE, led on the initiative, with signatories to the plan agreeing that:

The graphic features the CIC logo (a circular emblem with a gear-like pattern) and the text 'CIC BUILT ENVIRONMENT PROFESSIONS TOGETHER' at the top left. The main title 'Carbon Zero: the professional institutions' climate action plan' is prominently displayed. Below the title, it states 'The signatories to this Action Plan agree that:' followed by a bulleted list of commitments. On the right side, there is a vertical column of colorful icons representing various aspects of the built environment and sustainability, such as a lightbulb, a gear, a leaf, and a person.

© CIC 2021

UCEM launches mental health strategy

UCEM published its first mental health strategy on 10 May 2021.

[Back to top](#)

The strategy is designed to benefit both UCEM students and staff, having been written with input from both stakeholder groups.

At the core of the document is the vision which states: 'UCEM will take a whole institution approach to develop one community that enables students of all levels along with staff to prioritise mental health and wellbeing.

'The UCEM community will be an open, supportive, healthy, and well-informed environment. It will work to tackle stigma, promote positive mental health, and provide appropriate, timely and easily accessible support to those who need it.'

There are five strategic aims supporting this vision which are:

1. to create a supportive whole university community that promotes positive mental health, and ensures mental health is a key strategic priority.
2. to ensure the UCEM community is informed and aware of the importance of good mental health and works to tackle the stigma surrounding mental health.
3. to ensure appropriate and timely support is provided to those who need it.
4. to develop links with external support services and stakeholders
5. to use data to evaluate and monitor the effectiveness of mental health interventions and inform future strategic development.

UCEM's disability and wellbeing adviser, Richard Higgins, is the project lead, and comments: "We have been working on this strategy for a few months and I am very pleased to see it launched to coincide with Mental Health Awareness Week.

"According to [mental health charity] Mind, one in four people will experience some form of mental health difficulty each year in England. That is a huge number of people affected by mental health difficulties which signifies how important it is to proactively take steps to promote positive mental health where possible.

"The strategy document is another step in the right direction, supporting the actions of the disability and wellbeing team and mental health first aiders with words which detail how important mental health is to UCEM as an institution. It cements the work we have been doing to support students and staff, rightly identifying mental health as a whole-institution priority and detailing further steps to ensure it remains this way."

For more details, take a look at **[UCEM's mental health strategy document](#)**.

UCEM launches competition for school students to present their ideas on the future of Reading prison

UCEM is on the lookout for creative secondary school students to suggest solutions for the future of Reading Prison.

Pupils in Years 9-13 across Berkshire are invited to enter UCEM's competition by submitting a video, written piece, or drawing with their ideas on what to do with the local landmark which is currently for sale.

The best four submissions will be paired with a UCEM tutor who will argue on behalf of their partner on a podcast debate, following which there will be a public vote on social media to find the winner!

The winning student will earn their choice of a scooter, iPad, or a gaming voucher worth £300 and earn their school a careers talk by our real estate programme leader, David Hourihan.

UCEM's senior marketing manager, Lisa Marcham, commented: "The future of Reading Prison is a significant talking point in the town. Since its closure as a prison in 2013, it has operated as a culture hub at various points and repeatedly been the subject of proposed housing schemes but nothing permanent has been secured for its future.

"The only way to solve this issue is to hand it over to the brightest minds in Berkshire – our secondary school students – and I look forward to receiving their entries which we will shortlist for the podcast. There are no limits to what can be achieved in the built environment and this is a wonderful opportunity for entrants to exhibit their creativity for a great prize for themselves and their school."

Students had until 12pm on **Wednesday, 30 June, 2021** to send in their submissions to competition@ucem.ac.uk. Visit [our competition webpage](#) for more details.

For information about the Reading Prison site, head to [JLL's Reading Prison webpage](#).

UCEM joins campaign to drive better gender balance at board level

UCEM is now a member of the 30% Club – a global campaign with chairs and CEOs of the world's biggest companies committing to better gender balance.

The 30% Club's mission is to reach at least 30% representation of women on all boards and senior leadership teams globally – an

[Back to top](#)

objective that aligns with UCEM's strategic objective to widen participation.

As an employer with a Board of Trustees with 50% female representation, UCEM is keen to advocate for greater gender balance, as well as increased diversity and inclusion at board level across organisations.

UCEM Principal, Ashley Wheaton, and UCEM Chair, Amanda Clack, are the institution's representatives in the 30% Club.

Ashley commented: "Gender balance is just one of the areas covered in our Widening Participation Strategy. We are fully committed to bringing greater diversity to the built environment by increasing the numbers of diverse students we educate. This is not only part of our plan but is a yardstick by which the entire higher education sector is judged.

"Joining the 30% Club, therefore, allies' actions to words and, whilst the campaign's headline mission is related to gender balance, further down the line, there will be efforts to increase diversity and inclusion in other ways. I look forward to working with the organisation to drive change in boardrooms across the UK."

Amanda added: "Diversity and inclusion is something I am very passionate about. I have worked in a male-dominated industry and worked at the highest level, but it isn't commonplace for boardrooms to have even 30% female representation.

"Now, as Chair of a Board of Trustees where the male-to-female ratio is 50:50, we are keen to support initiatives which level the playing field, and the 30% Club is a great example of an organisation attempting to influence widespread change using a top-down approach."

When the 30% Club launched in 2010, the percentage of women on FTSE 100 boards was 12% and this spawned the initial aim to increase this to 30%.

[Access further information about the 30% Club,](#)

Other UCEM News:

Alumnus named this year's rising star at Government Property Awards

A UCEM alumnus described himself as 'over the moon' after being recognised as the 'rising star' at the Government Property Awards 2021.

[Back to top](#)

Roy Albert, a lead surveyor from the Valuation Office Agency (VOA), won the Rising Star award at last week's online event.

The award goes to someone in the first five years of their property career who has made outstanding contributions to their area of work, while maintaining progress in growing their knowledge, skills, and experience.

Roy, who studied on our Chartered Surveyor apprenticeship (Real Estate Management pathway) commented: "I am absolutely over the moon and totally proud and excited to have been considered [for the award], never mind winning!"

The award criteria also states that the winner should demonstrate how they have made substantial achievements already and the potential to succeed further.

Roy added: "I believe I was selected due to my journey, including being the first apprentice from the Valuation Office Agency to qualify as a chartered surveyor. I was also part of one of the first cohorts to sit APC online.

"I am an RICS APC assessor, a consultant for Property Elite and an admin for Surveyor's Hub via Facebook. I have been actively helping other graduates and new entrants to the Valuation Office Agency. I am also an ambassador for LionHeart."

The Rising Star award is the second Roy has won already during the early part of his career after winning the VOA's Garner Award for personal achievement last year.

Reflecting on the impact of such recognition, Roy said: "This has further enhanced my objective to help others and increase my knowledge and understanding of the built environment beyond my valuation pathway."

[Access the article 'Alumnus named this year's rising star at Government Property Awards' in full.](#)

COVID-19: University College of Estate Management (UCEM) response to COVID-19

As a responsible employer and educator, UCEM's commitment is to protect the health of all students, staff, clients, and suppliers by adhering strictly to advice offered by Public Health England, The World Health Organisation, Office for Students, local and central government, whilst remaining committed to maintaining our usual excellent standard of student experience.

Please find below the steps we've taken to adhere to current and ongoing advice. As the situation is ever-changing, we fully review the guidelines and our actions daily and will quickly adapt if necessary (**Note** the publication date of this article).

- All staff who are able to work from home are doing so. We have been anticipating this situation and had prepared for it

[Back to top](#)

full. We have an advanced IT infrastructure in place to enable remote working, so we continue to operate as usual.

- As an online pedagogical institution, we are experts at online teaching and our deliver model will continue as normal.
- The small number of staff remaining in Horizons Head Office have been allocated seating at above the recommended distance away from each other.
- We are operating a policy of no external meetings and no visitors to Horizons Head Office
- All managers and department heads have been briefed with respect to our self-confinement policy and our treatment of any staff member displaying symptoms that may be linked to COVID-19.
- All staff are continually reminded of the importance of following the 20-second guideline for handwashing.

If you have any further questions, please contact:

- Student enquiries – Student Central on our VLE
- Employer enquiries – businessdevelopment@ucem.ac.uk
- Other enquiries – reception@ucem.ac.uk / Tel: +44(0)118 467 2100

Our sincere thoughts are with those affected by COVID-19 and its impact around the world.

Further information and the latest developments can be found via the [UCEM Website](#), & **don't forget** that the UCEM [e-Library](#) can be accessed 24/7 (via the VLE-Virtual Learning Environment) with a wealth of valuable resources to help 😊.

Other News

Things you need to know this week: Countryside to deliver London homes and school scheme.

- Developer seals deal to deliver 1,200-pupil secondary school and 116 homes on a former college site in Ealing.

Developer Countryside has signed an agreement with the Department for Education (DfE) to deliver a scheme in Ealing, west London, combining a secondary school with 116 homes. The developer was selected by arms-length body to the DfE, LocatED, to deliver the Ark Soane project, following a public procurement process. The 1,200-pupil secondary school, Ark Soane Academy, will occupy the first three floors of the six to 12-storey development, which replaces a former college. Above this, there will be 113 apartments, with three separate townhouses located on the site, with 92 apartments being constructed for the Greater London joint venture between build to rent investor Sigma Capital Group and investor EQT Exeter. Three homes will be made available for market sale by Countryside, with the remaining 21 homes being affordable, managed by housing association Network Homes. The scheme is designed by Pollard Thomas Edwards Architects, with Countryside entering a design and build contract with contractor Jerram Falkus Construction to deliver the project.

Other developments include –

- London mayor Sadiq Khan has launched an innovation partnership for social housing providers, which he says could ultimately help deliver up to £10 billion of energy efficiency retrofits and other green upgrading works for homes.
- Developer London Square Partners and housing association Peabody are partnering to deliver a 457-home scheme, close to the Queen Elizabeth Olympic Park in east London.
- Government agency Homes England has agreed a £100 million loan deal with developer British Land to allow it to deliver infrastructure works to drive development of up to 3,000 homes at its Canada Water scheme, in Southwark, south London.
- A partnership between South Cambridgeshire District Council and housebuilder Hill Group has agreed to acquire land in Cambourne, west of Cambridge, with the aim of delivering around 275 new homes.
- The Department for Transport has committed £401 million investment for rail upgrades, including new stations for Leeds and Exeter.
- The government's new national design code for new communities is being tested in 14 areas across England.

Case Study: Engaging with the community to design a neighbourhood

- The latest phases of a housing development in Nottingham are being shaped through an engagement approach that develops input, understanding and support, writes the author of this article.

Design of the latest phases of an emerging neighbourhood beside the River Trent, in Nottingham, is being shaped by the local community through the use of an innovative digital approach. Developer Blueprint, a public private joint venture between Nottingham City Council and PFP Capital and managed by igloo Regeneration, is bringing forward some 200 homes as part of the City's wider Waterside regeneration area.

Trent Basin is being planned and delivered as a sustainable neighbourhood of around 350 low carbon, energy efficient homes. Two phases of homes have been completed and two more are under construction, while the planning application for the next is in preparation. This upcoming phase is being masterplanned by architect Proctor & Matthews Architects, which has worked with digital agency Deetu to give stakeholders and local people a detailed insight into the proposals via an interactive website.

The digital-first approach has also given local people an opportunity ultimately to influence the design of the planned neighbourhood, through their responses to online consultation surveys. Their views and ideas have fed into a series of design reviews with the project team as well as the pre-application dialogue with stakeholders. The process, described by Deetu associate director Josh Dickerson as "engagement focused design" has informed the planning application, which the project team expects to submit this summer.

Challenges

The pandemic made it essential for Trent Basin's development team to look to digital routes for early engagement in mid-2020. "The lockdown had an impact on engagement but we were promoting this pre-COVID to try to improve the way stakeholder engagement works," says Dickerson.

For both Proctor & Matthews and Deetu, the creation of the platform generated its own challenges in distilling design drawings and a wealth of information and ideas into a coherent and engaging digital narrative. The architect provided the raw material, drawing on its building information modelling (BIM) based designs.

[Back to top](#)

“We had to go further than we ordinarily would in the creation of the digital model and 3D walk-throughs,” says Andrew Matthews, director of Proctor & Matthews. “In order to exploit the technology, you find you’re doing quite a lot to sell the development as a place.” Deetu had the challenge of shaping the raw material, says Dickerson: “We had to create a narrative from a vast array of information, turning three years of work into something that the public could digest in two minutes.”

Solutions

The interactive website allowed stakeholders and the public to explore the location and proposed development through 3D visualisations. Both groups were able to tour an overall digital model of the proposal, guided by Matthews’ audio narration, and take 360° walk-throughs of key areas, including the waterside, basin park, courtyards and an apartment.

“What was interesting to us was that normally you would talk to planners about information that would possibly be more detailed than it would be for the community,” says Matthews. “Here the platform, with its narration and digital systems work, actually used the same material to present to both stakeholders and the public. So the public saw the same narration and storyline as the planners, which isn’t what usually happens.” The only difference between stakeholder and public tools was the language, which was made more accessible for the general public.

A series of surveys allowed the public to give their feedback on the overall proposal, as well as the focus areas of people-friendly space, basin park, and courtyard and waterside living.

“The surveys were less about getting public support and more about influencing the design,” says Dickerson. They presented the opportunity to explore options, gather evidence to inform design evolution and challenge preconceptions. Matthews gives one example: “The planners challenged us on whether the relatively high density proposed would be attractive to families. That was converted to a question for the public survey and 70 per cent of respondents turned out to be in favour.”

Views were also sought on such questions as public willingness to walk from car park to home, as the consultation explored the potential to locate parking in a barn around five minutes’ walk from front doors. This earned the support of around 90 per cent of respondents, providing confidence for the design team that this approach to parking would work, says Matthews. The public’s feedback has also led to the design team going ahead with increasing the size of the pocket park and greening the waterside edge.

Local people were made aware of the consultation via a traditional flyer, distributed to 1,500 households, Facebook groups and

[Back to top](#)

other social media activity and press promotion. A phone number was provided on the flyer for those not wanting or able to engage via the website, which just one person called. The website was visited by more than 1,000 people, a 1,500 per cent increase in participation, compared to the engagement levels on previous development phases. Deetu analysed responses, so that additional marketing could be targeted at under-represented groups, also gathering a snapshot of the proposal's attractiveness to potential markets. The platform has recently been used to engage with younger people, and Matthews says the findings have been revealing. "You realise that their mental map of the city is different because they occupy public space so much more," he says. "We got really good engagement and ideas."

This engagement focused design approach is, says Dickerson, "quite an iterative process of engage, respond, review and update" but he argues that it ultimately increases productivity. Jim Rae, senior principal planning officer at Nottingham City Council confirms this, saying, "It not only saved us time, but gave us a lot more information to determine our views than a typical application".

At Trent Basin, it has helped develop public understanding of and support for the development, says Matthews. "People realise you are interested in the character of a place. They see that a proposal is not being dumped on them but is evolving out of an understanding of place and that you care. People don't think that of a lot of housebuilding."

He says his practice's first use of the approach has been "an eye-opener" and sees its potential to help deliver on the aspirations of the National Planning Policy Framework (NPPF). He explains, "The NPPF is about mobilising communities to engage with development. I was sceptical about that, but this shows it is possible to engage with communities in a different way. This shows that you can empower the application by presenting a scheme in a much better light. There is less Nimbyism and the ability to see community buy-in should help planning committees."

Review: Redevelopment of an industrial site for housing

- The first phase of Port Loop, near Birmingham, takes advantage of its Canalside location, but sustainable lifestyles could have been more actively encouraged, says author, Katie Kershaw, director of urban design, landscape and heritage consultancy, Node. At the time of writing, she was a resident at Port Loop.in this review.

[Back to top](#)

Port Loop Phase 1a is the first step in an ambitious long-term vision to regenerate a 43-acre former industrial site, a couple of miles west of Birmingham city centre, to provide more than 1,000 homes and supporting uses. This first phase comprises 40 homes that were constructed off-site by developer Urban Splash in the company's 'House By US' factory, together with a public park. The wider partnership includes the housing association Places for People, Birmingham City Council and the Canal and River Trust, with designs by architects Glenn Howells, Shed KM and Grant Associates.

Urban Splash set out a bold manifesto, a 'ten commandments' for the Port Loop development. Some are largely inherent to the nature of the site and its location, such as 'live well by accident'. Others are achieved by the design such as 'love thy neighbourhood', which is facilitated by communal rear gardens. This arrangement allows residents a modest private area and a shared garden maintained by a management company. This shared space allows residents to get to know one another organically. Children and pets have safe space to roam – and no-one has to do any gardening.

Galvanised by Front Room, a community-led organisation, residents have brought more of the manifesto's ideas to life. Events including 'Play out 'til tea' and 'Floating front room' have provided a focus that has allowed the community to flourish.

Embracing the water - The 'island' of Port Loop is enclosed by a 1-kilometre length of canal. This is a huge asset, which has been seized upon by the masterplan and in Port Loop's marketing.

Phase 1a has however, somewhat compromised this opportunity through the design of homes with private space extending up to the canal edge. This is disappointing, as an accessible Canalside path would have provided a significant public realm asset. It would have simultaneously enabled a better understanding of the canal's 'loop', which is somewhat lost.

Green credentials - One of the manifesto's commandments is to 'be green without trying'. With its location, with canal access directly into Birmingham city centre, active travel is a realistic possibility for day-to-day living. This is supported by shared-surface streets that already host rollerblading, cycling, skateboarding, and running in the city centre. Somewhat surprisingly, there is no cycle storage or electric vehicle charging in phase 1a, which is a limiting factor in achieving a truly sustainable lifestyle.

At well over 100 per cent, parking provision runs counter to this objective. With phase 2's provision even greater, there is a risk that in spite of its sustainable location, Port Loop could still become car-dominated.

Port Loop's public park is attractive with its gentle slopes, a network of paths, a Canalside plaza and raised planting and

[Back to top](#)

seating. Including a public park within the first phase of development is to be commended. Publicly accessible space is particularly important in the context of regeneration sites. Port Loop's Park provides a place for the new residents and the wider existing community to come together, promoting better integration.

Modular housing - The benefits of modular housing are manifold, including quality assurance and energy and time efficiencies. Port Loop's modular homes are constructed in the factory as fully formed storeys that are transported to site and craned into place, creating a consistent and reliable housing product. The internal layout of the homes can be customised to the needs of the purchasers and have generous floor to ceiling heights, creating quality internal living space.

Opinion is more divided on the external appearance. Criticism could be levelled that their uniform, somewhat stark appearance does not provide a bespoke response to context.

Port Loop is a successful example of contemporary master planning that employs sustainable, community-led principles and strong design concepts.

Further information and read the article, 'Review: Redevelopment of an industrial site for housing' in full.

Budget 2021 - A Summary from the Heritage Alliance

[Budget 2021](#) took place on 3 March 2021. Here the Heritage Alliance summarises some of the key outcomes:

Business Support

- **The Job Retention Scheme** - or furlough - will be extended until the end of September. **From July**, the government will introduce an employer contribution of **10%** towards the cost of unworked hours in July, and **20% in August & September**.
- **Self-Employment Income Support Scheme**
- **Further 100% relief from business rates**
- **VAT rate for tourism and hospitality**
- **Restart Grants**
- **Additional Restrictions Grants**
- **Recovery Loan Scheme**

Coronavirus: Why some people want to keep working from home

When lockdown started in March 2020, workers across the UK packed up their office equipment and set up workstations in their own homes. Bedrooms, kitchen counter-tops and dining tables became the new way of working for millions of people. But now it's time to return to those communal workplaces, research from Eskenzi suggests that 91% of the UK's office workers would like to work from home at least part of the time. So why are so many office staff keen to keep working from home?

Some of the reasons and case studies provided in this article and include -

- 'It's like getting a pay rise' due to making savings on the commute.
- 'We're spending more time together as a family', and
- 'I've seen an improvement in my mental health'.

The evolution of building surveying education during COVID-19

- In January and February 2020, as the pandemic was starting to gain momentum and spreading around the globe, universities in the UK were beginning to consider how to react. As a sector, UK higher education is relatively familiar with web-based methods of communication, teaching, and learning.

In fact, the University College of Estate Management (formerly the College of Estate Management) and the traditional home of RICS correspondence courses, operates their business totally online.

A lot of universities operate a Virtual Learning Environment (VLE) which allows them to communicate with their students and provides the opportunity to interact with them in terms of online courses and assessments, and as a depository for learning materials.

This is allowing the students to revisit the materials to embed or reinforce their learning or to catch up if a session was missed. Common VLE's include Blackboard, WebCT, and Moodle. Their functionality and features are all relatively similar.

Although the physical libraries have closed, universities operate electronic libraries which offer access to a large number of electronic databases, and a growing number of books and journals, ensuring that the students and staff, can continue to access the majority of relevant information for their studies and research.

Will COVID-19 accelerate construction's digital transformation?

- With many industry professionals forced to work remotely, is now the perfect time for construction to get up to speed with all things BIM and digital? *Construction Manager* magazine finds out if the coronavirus will change the way we work forever.

David Philp – Global BIM/MIC consultancy director, AECOM says, **“It's an opportunity to rethink how we can use technology and innovate.” (Philp 2020)**

The coronavirus pandemic is forcing us to strive for more innovative and rapid solutions. From increased home working needs, maximising performance of our healthcare estates and ultimately how we can recover from the looming economic challenges, we need to usher in new ways of working.

This crisis will be an opportunity for us to rethink construction priorities, how we can better use technology and innovate in the use of joined-up data to support immediate societal needs and the creation of a more resilient built environment.

Mark Boyle – Global design direct, Robert Bird says, **‘Our digital processes lend themselves to remote working.’ (Boyle 2020)**, and Gary Fannon – Technology director, Turner and Townsend says, **‘Early digital adopters will be reaping the rewards.’ (Fannon 2020)**

T&T's technology team have all been set up to work from home for some time and the early adopters will reap the rewards from the coronavirus lockdown. Design teams are able to continue working – creating a fully designed digital model that can be constructed to an excellent quality standard when work is able to begin on site. There are also security questions about home working – we need to educate people and show them how to make home routers more secure. But overall, the enforced lockdown could show the industry how we can use digital technology to be more efficient and productive.

Andrew Gamblen – Digital manager, Willmott Dixon says, **‘People will become more comfortable collaborating remotely.’ (Gamblen 2020)**

The effect of Covid-19 and social distancing is going to have a long-lasting effect on both the construction sector and the UK as a whole. There has been a huge increase in the use of technology and software that allows individuals and teams to communicate and collaborate remotely.

[Back to top](#)

While this technology has been around for a while, and because we are in a position where we have to use it to keep working, people are starting to become a lot more comfortable with it and this is building up simple routines that will have a lasting effect.

Richard Saxon – CBE Chairman of JCT, client adviser at Deploi BIM Strategies says, **“‘Wartime scenarios’ will push the digital agenda.’ (Saxon 2020)** The Covid-19 crisis is looking very like a war scenario. Organisations are sending out messages saying they will play their part through staff working from home. It’s Keep Calm and Carry on again.

Technology has always developed rapidly in wartime. The Second World War saw the birth of computing radar, jet aircraft and nuclear power. Now we have a design and construction industry in lockdown, starting to rely on tools which only a few firms have used to far.

- Now cloud-based teamwork applications allow staff to work from home or on the move with full access to their firm’s common data environment
- The pressure to roll out superfast broadband and 5G will be immense
- Social media apps allow for virtual co-working
- Online meetings are well supported now and soon we will use Virtual Site Visit technology as normal
- Site work will be aided by augmented reality headsets and BIM caves

By the time a vaccine is available (see publication date), a year or more of forced advance in technology use is likely to have passed.

Things will not go back to where they were before: productivity will have improved; flexible working will have become normal; whole life thinking will have advanced.

Free content related to Coronavirus, the management of epidemics and the wider impact on society

© Emerald Publishing 2021

Emerald Publishing, one of the UCEM e-Library subscription services, have brought together a number of research resources related to the Coronavirus group of viruses, and epidemics more broadly.

Emerald collated research and the management of epidemics and made it freely available to assist practitioners and researchers who are working to tackle the current situation and likely consequences. Whilst these materials do not only relate to the current clinical challenges of Novel Coronavirus, but they may also provide relevant context to how the world reacted to other previous Coronavirus outbreaks (notably SARS) and epidemics.

The city centre and the road to net zero

- The unexpected happened in 2020. The world shut down. Physical human interaction stopped and we had to go digital.

Queen's speech – what next for planning?

- The Queen's speech has signalled changes to the planning system but is light on detail.

VAT Reverse Charge to apply from 1 March 2021

- The VAT domestic reverse charge is a major change to the way VAT will be collected in the building and construction industry.

[Back to top](#)**What 2020 has taught us about digitisation and data**

- The unexpected happened in 2020. The world shut down. Physical human interaction stopped and we had to go digital.

Councils step up regeneration

- Shoosmiths and *Property Week* assembled a panel of experts from across the real estate industry to discuss the growing role local authorities are playing in fostering regeneration in partnership with private sector partners.

The future of build-to-rent market podcast series**Podcast – Government policy BTR (Build to Rent)**

The future of the BTR market from Shoosmiths' Living team:

Podcast series #1 – The future of BTR (Build to Rent)

Issues discussed in this podcast include:

- Performance of the sector,
- Rent collection rates,
- Challenges of lockdown restrictions,
- How buildings and amenity space will change as a result of the pandemic, and
- Where the market is going.

Podcast series #2 – The future of BTR (Build to Rent)

Issues discussed in this podcast include:

- Ongoing attractiveness of the sector,
- Top three things to look for in a BTR scheme,
- Future challenges for BTR,
- The role of technology, and
- BTR housing.

Podcast series #3 – The future of BTR (Build-to-Rent)

In this podcast, the last in this series, issues discussed include:

- Planning reforms,
- Permitted development rights,
- Rise of residential in the high street,
- Fire Safety, and
- Rent controls / regulations.

Cambridge University: All lectures to be online-only until summer of 2021

- There will be no face-to-face lectures at the University of Cambridge over the course of the next academic year due to coronavirus, it has been announced.

However, lectures will be available to students online and “it may be possible to host smaller teaching groups in person” if they meet social distancing requirements, the university said.

- **Students ‘must be warned if courses taught online’**
- **Online students would still face full tuition fees**

[Back to top](#)

The university watchdog said students applying for university places in England must be told with “absolute clarity” how courses will be taught - before they make choices. Universities can charge full fees even if courses are taught online. But Nicola Dandridge of the Office for Students warned against misleading promises about a “campus experience” if courses are to be taught online.

Learning and teaching reimagined: a new dawn for higher education?

- Exploring the 2020 experience as well as the changing aspirations of the nature and shape of learning and teaching for the future.

Summary - In this report the experience of 2020 and changing aspirations of the nature and shape of learning and teaching for the next academic year, 2021/22, and 2030, are explored.

Recommendations - Based on this research the following recommendations for universities, sector agencies and government are made:

1. Universities to use their strategic and structural planning processes to affect the digital transformation of learning and teaching, ensuring that sponsorship is provided by governing bodies and executive teams
2. Universities to review their strategic investment in digital learning and teaching
3. Universities to make investment plans to mitigate the heightened cyber security risks that arise from greater dependence on digital technologies
4. Universities to think radically about the scale and scope of their learning and teaching activities, prioritising blended learning approaches wherever possible
5. Universities to accelerate the adoption of blended learning, with close involvement of students in all aspects from design to delivery
6. Universities to ensure inclusivity and accessibility are integral considerations in curriculum redesign

[Back to top](#)

7. Universities to ensure their professional development plans include digital training, peer support mechanisms and reward and recognition incentives to encourage upskilling

8. Universities and sector organisations to establish research to remain in step with the changing digital preferences and expectations of prospective in higher education students

9. Universities, government and funders to provide additional funding or means to reduce digital poverty as a barrier to students accessing higher education.

New guidance from CIRIA - Construction Industry Research and Information Association

CIRIA is pleased to announce (June 2020) new [free CIRIA practice guidance](#) that include:

[Code of practice for property flood resilience \(C790\)](#) –

This new guidance provides confidence on the use of the standards within the code of practice that provides a benchmark for those procuring and delivering property flood resilience (PFR).

[Retrofitting ground gas protection measure \(C795\)](#) –

This guide dispels the myth of demolition being the only option for mitigating ground gas ingress into existing UK properties.

[Grouted anchors and soil nails \(C794\)](#) –

This guide addresses intrusive inspections beneath the anchor head, typically the critical section in respect of corrosion, outlines specialist techniques such as destructive de-stress and describes options for remediation and repair.

[The Management of advanced numerical modelling in geotechnical modelling \(C791\)](#) -

Numerical modelling is commonly carried out in engineering. Producing a numerical model is complex and if not used properly can be dangerous. However, if use with skill and care there can be enormous benefits. This guide provides a framework for those who oversee the process, provide the information needed for this task and use the results of the numerical modelling.

[Methodology for quantifying the benefits of offsite construction \(C792\)](#) -

This new guidance proposes a framework for comparing construction approaches, making it possible to keep consistent records across projects and identify all the possible benefits available. This guide also highlights the challenges that can be expected when assessing the performance of construction projects and developing robust benchmarks for comparison.

Grenfell Tower Inquiry – latest developments

- The Grenfell Tower Inquiry was created to examine the circumstances leading up to and surrounding the fire at Grenfell Tower on the night of 14 June 2017.

Phase 2 hearings – Hearings will resume on Tuesday 10 June at 10:00.

Remote Hearings / COVID-19 information – The Inquiry takes health and safety guidance extremely seriously. Following a full risk assessment, it has put in place arrangements to ensure social distancing is maintained in all parts of its venue. Full guidance can be accessed via the [Grenfell Tower Inquiry website](#).

Drop-in sessions – In line with current public health guidance on COVID-19, the Inquiry has postponed its monthly drop-in sessions until further notice.

Phase 1 Report – The Inquiry has published its report on Phase 1 of its investigations.

Latest update from the Inquiry [June 2021] - The Inquiry has published an update on the resumption of hearings. This update provides a digest of:

- **Hearings update** - The Inquiry has published an update on its plans to return to limited attendance hearings, • **May 2021 Newsletter** – The Inquiry has published an update on its work.

[Read further information from the ‘Grenfell Tower Inquiry’ website.](#)

Government details fire safety-related changes to planning system

- The government has released details of new requirements in the planning system to bolster fire safety in high-rise residential buildings, in response to the Grenfell Tower Fire.

The changes come in the Ministry for Housing, Communities and Local Government’s (MHCLG) plans to introduce [‘planning gateway one’](#), which it said would deliver on one of Dame Judith Hackitt’s recommendations following her independent review of Building Regulations and fire safety.

The new requirements aim to ensure fire safety matters as they relate to land use planning are incorporated at the planning stage for schemes that involve high-rise residential buildings.

The changes, which come into effect from **1 August 2021** will:

- involve the Health and Safety Executive (HSE) becoming a statutory consultee before permission is granted for development which involves or is likely to involve a high-rise residential building;

[Back to top](#)

- require relevant applications for planning permission to include a fire statement to ensure applicants have considered fire safety issues as they relate to land use planning matters such as layout and access.
- help inform effective decision-making by local planning authorities or the secretary of state so that those decisions reflect and respond to the needs of the local community.

The new requirements will be introduced by making amendments to the Town and Country Planning (Development Management Procedure) (England) Order 2015.

Planning gateway one is the first of three gateways through which developments and buildings must pass. Gateway two will bolster the current building control deposit of plans with the Building Safety Regulator as the only option of building control body for in-scope buildings. Construction will not be allowed to begin until the Regulator has approved the building control application. Gateway three will provide a 'hard stop' at which the Building Safety Regulator undertakes final inspections and issues a completion certificate. All three gateways apply to multi-occupied residential buildings of 18m or more in height, or seven or more storeys (whichever is reached first).

As announced in the Queen's Speech (11 May), the Building Safety Bill is also expected to be introduced this year, which will establish a new building safety regime in England.

Skills Agenda: Concerns for Skills Shortages in the 21st Century: A Review into the Construction Industry, Australia

The Australian Construction Industry is now facing skills shortages in all trades. As an industry focused on the skills of its workforce, there is now concern the Australian standard in quality, workmanship, and productivity will inhibit both national and international level. Given the reference to skills shortages within the industry, and documented in related literature if skills shortages are to continue to exist their effect will impact upon the overall performance of construction companies through Australia.

This research paper addresses the underlying, influential factors concerning skills shortages in the Australian construction industry. The influential factors addressed include funding, training statistics, employer expectations, financial limitations, Industrial Relations and immigration.

GOV.UK, National Statistics - UK House Price Index [Published April 2021]

- The UK House Price Index is a National Statistic that shows changes in the value of residential properties in England, Scotland, Wales, and Northern Ireland.

The UK House Price Index (UK HPI) captures changes in the value of residential properties.

The UK HPI uses sales data collected on residential housing transactions, whether for cash or with a mortgage.

Properties have been included:

- In England and Wales since January 1995
- In Scotland since January 2004
- In Northern Ireland since January 2005

Data is available at a national and regional level, as well as counties, local authorities, and London boroughs.

The summary report contains:

- Headline statistics
- The economic statement
- Price changes
- Sales volumes

[Back to top](#)

- The property status
- The buyer status for Great Britain (excludes Northern Ireland)
- The funding status for Great Britain (excludes Northern Ireland)
- Housing transactions distributions

Sustainable outcomes for buildings

The Royal Institute of British Architects (RIBA) has published guidance on targeting, designing, and evaluating sustainable outcomes for buildings, defining concise measurable set of eight sustainable outcomes that correspond to key UN Sustainable Development Goals and can be delivered on building projects of all scales.

[Access the RIBA Sustainable Outcomes Guide](#)

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone.

The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages, and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport, and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

[Access the National Trust website](#)

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

Seeking to influence – The NT seek to influence the Planning system at local, regional, and national levels,

Supporting spatial planning – The NT support spatial planning which takes a holistic approach to its environment and its resources,

Sensible management – The NT promotes the wise management of the natural environment and built and cultural heritage,

[Back to top](#)

Protecting our environment – The NT will seek to protect wild and remote landscapes from built development or urbanisation.

Using property management plans – In managing its land through management plans, the NT will support and help to achieve objectives,

Objecting to proposals, where appropriate – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include:

- Minimising resource use and generation of waste,
- Being energy efficient,
- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape, and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and - Encouraging community involvement and access.

[Read the National Trust Planning Principles](#)

The National Trusts' planning procedure

The National Trust have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

Case studies are provided.

[Read how the National Trust engage in planning: The NTs' role as a developer.](#)

Foster + Partners Projects

Foster + Partners Projects – one of the most innovative architecture and integrated design practices in the world. Over the past four decades the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civil and cultural buildings, offices and workplaces to private houses and product design. New RIBA Plan of work 2020

RIBA Plan of Work 2020. This blog takes a look at the new RIBA Plan of Work 2020.

What is the RIBA Plan of Work? The RIBA Plan of Work was first published by the Royal Institute of British Architects (RIBA) in 1963. It originally provided a matrix to show the roles of participants in the design and construction processes.

It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

It now provides a shared framework for design and construction, including both a process map and management tool.

What changed in 2020? In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement.

This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly in use

Autodesk and CIOB map the digital construction journey

Autodesk and the Chartered Institute of Building (CIOB) have prepared an infographic to help construction businesses visualise their position on the digital journey.

[Access more information, view the infographic and read the article, entitled 'Autodesk and CIOB map the digital construction journey' in full.](#)

[Access further information from CIOB 'Digital Construction'](#)

- Digital technologies are now an integral part of our built environment. The choice is not when or if built assets will use technology, but rather how much will be used.

Building Information Modelling (BIM)

[UK BIM Framework – BIM Standards, Guides and Resources -](#)

the overarching approach to implementing BIM in the UK, brought together by UK BIM Alliance, BSI and CDBB. The guidance is structured as indicated below:

Guidance Part 1 and **Guidance Parts A-F** support the implementation of the overall published ISO 19650 series.

Guidance Part 2 and 3 pick up on content specific to ISO 19650-2 and ISO 19650-3 respectively. Additional **guidance** is also available as part of the **UK BIM Framework** to support the transition to ISO 19650 and Government Soft Landings

[Access UK BIM Framework - Resources](#)

Latest BIM+ News and Projects [June 2021] –

- **Project:** [How 4D helped Mott MacDonald Bentley save 20 days on major pipeline project](#), 16th June 2021.

- 4D modelling was crucial on a major civils project for United Utilities in Cumbria, proving and improving upon a challenging construction programme that was 20 days quicker than the original plan.

Client: United Utilities; **Main contractor:** Mott MacDonald Benley; **4D consultant:** 4D Freeform

The Haweswater Aqueduct is one of the large pipes in United Utilities' (UU) water supply network, delivering 570 million litres of water every day to 2.5 million customers in Cumbria, Lancashire, and Greater Manchester. A £1bn resilience programme is overhauling the 65-year-old structure and ensuring its future.

[Back to top](#)

As part of that programme, Mott MacDonald Bentley (MMB) designed and constructed a new 2.5km section for the Hallbank Tunnel in Cumbria, comprising four 1.6m diameter pipes, to replace a section of the existing aqueduct. Each pipe was made up of 200 pieces and each piece was 14m long.

After nearly two years constructing the pipelines, UU allowed a short autumn shutdown of the aqueduct for MMB to connect the new pipes at either end. At its peak, 90 engineers were working around-the-clock on socially distanced shifts. The site was handed back to UU, after just 7 days 22 hours and 46 minutes - 20 days quicker than the original plan.

And that improvement against plan couldn't have happened without the use of 4D models, created by consultant Freeform 4D.

Also covered within this article are the following subject areas:

- **Right time for 4D** – MMB engaged Freeform 4D in December 2019, 10 months before work was due to commence on site in October 2020. The 4D models were to be used to develop the programme and logistics for the two major pipeline connections. According to MMB design lead Declan Mawson and Freeform 4D founder James Bowles, the timing of Freeform's involvement was just about right.
- **Driving engagement with 4D** - In February 2020, Mawson staged a half-day face-to-face workshop with representatives from the project team, including subcontractors and suppliers, in order to secure their engagement with the 4D approach.
- **The future of 4D models and customer interaction** – Bowles states, 'It would be nice to hand more ownership of the modelling tweaking to our customer, and there are new tools coming that will allow that on mobiles or tablets. Rather than needing Synchro on your desktop and someone with 10 years' experience of the software, I think we're getting into a world of handing something over to the customer who can then play Minecraft with it a little bit, move the equipment around for themselves.' (Bowles 2021).
Mawson states, 'I know as a company that we are pushing 4D more and more. In the future, if I was to do any type of critical work or tightly constrained work like this, I would consider 4D a necessity.' (Mawson 2021).

Other BIM+ Projects include:

- **Project: 8 Bishopsgate: BIM and Hololens aid riser safety**, 3rd June 2021.
 - Digital technology and an innovative riser zone product helped make M&E installation safer on the City of London's latest skyscraper. BIMplus reports.

[Back to top](#)

Client: Mitsubishi Estate London; **Main contractor:** Lendlease; **Specialist contractors:** AT. Clarke, MJL, Hall & Kay, Gardener & Co. Keltbray Structure, William Hare; **Architect:** Wilkindon Eyre

- **Project:** [Digital tech fundamental to Luton DART delivery](#), 27th May 2021.

- Designed to provide travellers with a speedier, greener, and more efficient journey to the UK's fifth busiest airport, the Luton DART marks a significant investment in the town's civil infrastructure by Luton Council's airport company London Luton Airport Ltd, with BIM and digital technology at the heart of its delivery.

Client: London Luton Airport; **Main contractor:** VolkerFitzpatrick Kier JV; **Transit system:** Doppelamy; **Structural designer:** Hewson Consulting Engineers
- **Project:** [AI tech key to Mace's £225m City project](#), 14th May 2021.

- Mace had a challenge on its hand build One Crown Place, a large mixed-use scheme in the City of London – and digital tools were the answer.

Client: AlloyMTD; **Development Manager:** CBRE; **Architect:** Kohn Pederson Fox; **Main contractor:** Mace; **Start on site:** April 2018; **Completion:** May 2021
- **Project:** [Modelling key to Boeing's new maintenance hangar at Gatwick](#), 19th April 2021.

- Forming part of Boeing's strategic plans to expand its Global Fleet Care Service, the construction of a new Boeing hangar at Gatwick was a significant project, with digital technology and BIM at the heart of its successful delivery.

Client: Boeing; **Architect:** D5 Architects; **Lead design consultant:** Matt MacDonald; **Structural steelwork contractor:** JD Pierce
- **Project:** [BIM the best solutions for historic chapel relocation](#), 31st March 2021.

- Relocating a Victoria chapel from its current position in a hospital building due for demolition to its position in a new building would be tough enough, but the 50mm tolerances making the challenge tougher, contractor DBR turned to technology.

Client: Brighton and Sussex University Hospitals NHS Trust; **Chapel project contractor:** DBR (London); **Main contractor:** Laing O'Rourke; **Conservation architect:** Cowan Architects; **Conservation engineer:** SFK Consulting; **Principal architect:** BDP; **BIM specialist:** Murphy Geospatial.

[Back to top](#)**BIM in action: 2020's top five projects**

22 December 2020

- Hospitals, housing, hotels: BIM+ covered case studies of BIM in action in all sorts of construction projects across the world. Given what happened in 2020, it's not surprising that three of the most read case studies focus on hospitals.

2020's top five projects (and all covered within this and previous issues of *Knowledge Foundations*) incl.

1. [Sisk reap rewards of high-tech approach at Wembley](#)
2. [Finland's Hospital Nova uses VR to involve staff in building](#)
3. [NHS Nightingale Hospital, East London – how BIM played its part](#)
4. [Mace uses AI tech on Mayfair project to meet covid-19 safety challenges.](#)
5. [AI tracks work quality at Norway's Stavenger Hospital.](#)

[Access BIM+ that include project entitled, 'BIM in action: 2020's top five projects' available in full.](#)

Related BIM+ Projects

- **(1) Project:** [John Sisk relies on BIM best practice to deliver Malmo data centre](#), 2nd November 2020.

- John Sisk & Son is nearing completion on a data centre project in Malmo, Sweden. Adopting BIM best practice has been crucial to keep construction on programme given a fast-tracked programme amid the Covid-19 pandemic.

The Multinational Data Center [sic] in Malmo will house and run a vast array of networks and servers for massive data processing and storage. That means state-of-the-art M&E installations and precise attention to the smallest of details for construction and handover are necessary.

The John Sisk & Son team has nearly 40 years of experience in data centre construction and has brought a digital project delivery approach to the Malmo project.

Sisk highlights some significant outcomes:

- The Sisk team-built dashboards that stored live clash trend reports to track progress weekly, resulting in a 50% efficiency increase in the BIM management process compared to traditional, manual methods of construction coordination without the automating power of the cloud.
- The tight integration between BIM 360 Docs, Microsoft Power BI, and Sisk's own "Design Changes Control" dashboards provided the commercial teams with a faster

[Back to top](#)

- way to visualise the cost and/or schedule impacts, reducing the overall take-off by a potential 40%
 - By using BIM 360, the project continued uninterrupted as construction continued in Sweden during the Covid-19 pandemic.
- **(2) Project: [Finland's Hospital Nova uses VR to involve staff in building](#), 28th April 2020.**
Lead Contractor: The Central Finland Health Care District

BIM Tools: Tridify
- Innovative processes have been used in the co-design of Finland's new Hospital Nova using BIM models and involving more than 350 staff.
 - **(3) Project: [NHS Nightingale Hospital, East London – how BIM played its part](#), 5th May 2020.**

Client: Barts Health NHS Trust, Royal Free London NHS Foundation Trust
Lead Contractor: Lead Designer: BDF
BIM Tools: Autodesk Revit
- The UK's newest (see publication date) and largest hospital, based at the ExCel conference centre in London's Docklands, is designed to care for up to 4,000 people affected by Covid-19. The hospital is now in standby mode and will be used should cases in the London area rise again.
 - **(4) Project: [Mace use AI tech on Mayfair project to meet Covid-19 safety challenges](#), 1st October 2020**

- Work was already underway on Lodha's No 1 Grosvenor Square flagship project when the lockdown and then social distancing added to the normal construction challenges.
Client: Lodha; Main contractor: Mace
Balancing the many requirements of a building project – cash flow, cost, quality, and timelines – is always a significant challenge for project leadership. The Covid-19 pandemic made the balancing act even more intense, costing projects valuable time at the start of lockdown and requiring adjustments to ensure the health and safety of all personnel on site as production restarted.
 - **(5) Project: [AI tracks work quality at Norway's Stavanger Hospital](#), 21st June 2020.**

Client: Stavanger University Hospital
BIM Tools: 100% International open standards, compatible with Revit, ArchiCAD, Solibri and others
- Oslo-based BIM developer Imeriso has been given responsibility to monitor work progress in one of the biggest public construction projects in Scandinavia.

Built Environment Research

Latest Policy and Research from:**1) Savills Impacts – The Future of Global Real Estate**

- Market Trends: Savills.com

In-depth research and analysis into property market trends, forecasts from specialist research teams, and market leading commentary to help you make the right property decisions.

More than 10 years on from the global financial crisis (see publication date), Savills explore debt, interest rates and credit cycles. Which real-estate markets were resilient or have since recovered (but may now be vulnerable to a downturn), and which still have prospects for growth? How are tax policies affecting investment? Savills take a look at the prospects for real estate and how changes in the world economy impact it's future.

Impacts: Real estate investment in 2021: global outlook

- Savills examine the global trends and in-demand assets for 2021

After the exceptional challenges brought by Covid-19, the distribution of a vaccine brings new hope for 2021. Sustained economic recovery is now on the horizons, led by advanced economies where vaccines are being introduced first. This should fuel wider real estate investor confidence.

Global GDP growth in 2021 is forecast to be the fastest in 40 years, according to Oxford Economics, albeit only enough to return global GDP to pre-crisis levels. Many advanced economies have take a 'whatever it takes' approach to supporting economies, with ultra-low interest rates and quantitative easing programmes.

[Back to top](#)

These low interest rates will support real estate investment into 2021. Unlike during the global financial crisis, banks today are less geared, while non-bank lenders have expanded significantly. This provides borrowers with greater options in the recovery. Travel restrictions and broader economic uncertainty led to a fall in deal volumes in 2020. In the 12 months to November 2020, global investment volumes were down by 28% compared to the same period in 2019. Not all sectors felt this equally. The industrial and residential sectors saw more modest falls in volumes, gaining market share to capture 21% and 28% of total investment, respectively, as shown in the graph on the next page.

Share of total real estate investment, by year

Source: Savills (2021) *Real estate investment in 2021: global outlook* [online].

The resilience of these sectors, from left to right and include – **Office, Residential, Industrial, Retail and Hotel**, in the face of structural change means that is a trend likely to continue to 2021.

In spite of near-term uncertainty, the long-term appeal of real estate has held for investors, and the number of funds targeting it have continued to rise. As of the beginning of Q4 2020, there are more than 1,000 funds in market – more than double the number in January 2016, according to Preqin. Funds are now targeting almost \$300 billion of investments. This suggests investor momentum moving into 2021.

Other areas covered in this research include **The Green Agenda** (covered later within the UCEM Sustainability Hub), and

SAVILLS Sector investment outlook for 2021

- The Pandemic accelerated a shift to online retail and flexible working patterns. In 2021, logistics is expected to be the major beneficiary, but the challenge for investors will be funding stock.

[Back to top](#)

- Office is forecast to remain the largest sector and the core investment of choice. Emphasis will be placed on lower-risk assets with stable income characteristics in the best locations.
- Residential may attract a growing share of global investment, supported by strong underlying fundamentals and cross-border investors growing and consolidated portfolios.
- Senior housing and healthcare are operational asset classes with long-term income potential. Ageing populations and emphasis on health and wellbeing is expected to support expansion.
- Data centres are a rising alternative sector and offer opportunity for portfolio diversification. Yields are attractive and pent-up demand is likely to fuel growth in 2021, but barriers to entry are high.
- 2020 brought life sciences to the fore. A big increase in capital raising is forecast to spur real estate investment opportunities in a sector resilient to changes in working habits.

2) Joseph Rowntree Foundation (JRF) -

- Inspiring Social Change: The Joseph Rowntree Foundation is an independent social change organisation working to solve UK poverty.

UK Poverty 2020/21

Related topics – Housing; Work; Income and benefits

- This is the 2020/21 edition of the JRF's annual report on the nature and scale of poverty across the UK, and how it affects people struggling to stay afloat.

We are in the midst of the coronavirus storm – a turbulent time when all of us have felt insecurity and instability. But our analysis shows too many of us entered the pandemic already at risk of being cast adrift into poverty, while often lacking secure housing, a reliable income or adequate support. It also shows that those of us already struggling to keep our heads above water have often been hit the hardest. Our response to the pandemic should be measured by how just and compassionate it is to people in poverty, whether they were already experiencing hardship or have been swept into it.

This report highlights early indications of how poverty has changed in our society since the start of the coronavirus outbreak, as well as the situation revealed by the latest poverty data, collected before the outbreak. It examines overall changes to poverty, with sections looking at the impact of work, the social security system and housing. It also benefits from powerful insights from members of our Grassroots Poverty Action Group, who have direct experience of living on a low income.

Recommendations:

- We need as many people to be in good jobs. Unemployment is expected to rise in the coming months, and we need to see further bold action to retrain workers and create good quality new jobs
- We need to improve earnings for low-income working families and ensure more people are in secure, good quality work. Government must support people in the lowest-paid jobs, or people working part-time, to move into higher pay and access sufficient and secure working hours, including bringing forward the Employment Bill.
- We need to strengthen the benefits system. At a minimum, we need the temporary £20 per week increase to Universal Credit and Working Tax Credit to be made permanent, extending this same lifeline to people on legacy benefits such as Jobseeker's Allowance and Employment and Support Allowance.
- We need to increase the amount of low-cost housing available for families on low incomes and increase support for households who have high housing costs.

3) The Smith Institute

- The Smith Institute is a leading independent 'think tank' which promotes progressive policies for a fairer society. They provide a high-level forum for new thinking and debate on public policy and politics. Through research, reports, briefings, monographs, events, lectures, education, and their website, the Institute offers a platform for thought leadership on a wide range of topics.

A National Housing Conversion Fund: buying properties to boost affordable housing supply

September 2020

The Smith Institute's Affordable Housing Commission published a report into the national housing conversion fund.

The report examines two main ways a ring-fenced National Housing Conversion Fund could be achieved. The first is targeting funds to purchase homes on the secondary (existing) market. It examines which housing markets – in broad terms – the investment might be best aimed at, factoring in how it could help improve housing condition and support jobs and growth.

This option could be weighted to support weaker housing markets by providing a floor for the market and helping those struggling and desperately needing to sell. Finding could be made contingent on investing in a property to raise standards. By focusing on low demand housing areas, a higher proportion of the investment would target jobs and growth rather than land costs in high demand places, where the economic rationale is weaker.

The second aspect concerns additional funding for social landlords to purchase homes for sale being built by housebuilders and converting them to social and affordable housing. With sites stalled and the prospect of construction workers losing their jobs, this approach would meet the strategic objective of making more housing affordable, as well as the shorter-term goal of supporting the recovery. It would also ensure that capacity and capabilities within the housebuilding industry is not lost due to the downturn but retained for when a recovery materialises.

The overarching case for a National Housing Conversion Fund rests not only on the urgent need to increase social and affordable

[Back to top](#)

housing and rebalance the housing system, but also as a quick and cost-effective way of supporting the economy as we move forward from – what we hope – is the worst of the pandemic. And, as demonstrated in this report, such a scheme could also improve housing conditions and contribute to the government's strategic ambitions to level up the economy and reduce carbon emissions.

Falling behind: The impact of Universal Credit (UC) on rent arrears for council tenants in London

July 2020

This report was commissioned by Southwark Council, with the support of eleven other London local authority landlords and coordinated by London Councils. The research and report focus on two main questions:

- How has the roll-out of Universal Credit (UC) affected rent payment behaviours among residents in local authority-owned housing across London?
- How are identified changes in behaviour – or the absence of behaviour change – affecting the tenancies of those tenants who are receiving housing cost support under the new arrangements?

This research was commissioned against the backdrop of growing evidence of the impact that UC is having on rent payment behaviour and rent arrears, as well as broader concerns about how it is affecting the financial wellbeing of recipients. Much of the previous research in this field has focused on one or two housing providers. The intention of this research was to understand what the overall impact might be across multiple providers and locations. To achieve that objective the research covered 12 participating London boroughs, who collectively own over 210,000 homes – 13% of council housing in England. 1 Including data from these 12 boroughs also offered a larger sample of cases.

The study examined those making a new claim for the housing element of UC during a three-month period (July-September 2019) in the 12 London boroughs with final rental data running until December 2019. This falls after the roll-out of Universal Credit full service to all parts of London, which was completed by December 2018. It also follows a series of reforms made in 2018, including the abolition of the seven-day waiting period and the introduction of a two-week Housing Benefit (HB) run-on.

The report tells this story of financial stress through analysis of tenant rent accounts. The scale of the costs to social landlords is also apparent in escalating arrears after tenants make an effective UC claim.

By examining this impact and tracing rent behaviour over time, the analysis points towards what kind of reforms might be needed to improve UC to the benefit of both tenants and social landlords which are presented in the report.

[Read the full piece of research, 'Falling behind: The impact of Universal Credit on rent arrears for council tenants in London'.](#)

[Back to top](#)**Consumer Rights in the Private Rented Sector**
July 2020

People who rent from a private landlord are at the sharp end of the housing crisis, but the truth is we have often more rights as consumers when we rent a car, buy a fridge-freezer, or take out a loan than we do as private renters.

This has been reinforced during the coronavirus crisis, with people spending more time at home and many realising just how precarious their housing situation is.

This report sets out a new perspective on how we can improve the private rented market: by recognising the consumer rights we're used to having in other markets, from utilities to financial services, and looking at how we might apply those lessons to the private rented sector.

[Read the full piece of research, 'Consumer Rights in the Private Rented Sector'.](#)**All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission (EPIC)**
January 2020

- This report presents the findings and recommendations of the Enfield Poverty and Inequality Commission. The Commission, chaired by Baroness Tyler of Enfield, was made up of a mix local and national stakeholders and experts and was supported by the Smith Institute.

To undertake a review of poverty and inequality in Enfield and set out recommendations, the Commission:

- Initiated a 'call for evidence' to understand the views of local people and organisations. A feedback account was set up and promoted and comment boxes were placed in Enfield's four hub libraries for member of the public to submit evidence.
- Considered relevant existing datasets across a range of available evidence bases.
- Engaged directly with local people, service providers, community organisations and businesses, through public meetings, focus groups, and one-to-one interviews.
- Considered best practice that has successfully been taken forward in Enfield and elsewhere that may be replicated or adapted for wider use.
- Held four Commission meetings to hear evidence on the three threads with follow up discussions.
- A deliberative 'solutions workshop' at Green Hall Community Centre in Edmonton, inviting organisations and members of the public who had engaged with the Commission to come together and formulate recommendations.

The Commission's work focussed on three inter-connecting themes.

[Back to top](#)

These were:

- **Living:** To what extent does who we are and where we live affect our life chances and the services we can access?
- **Learning:** What barriers prevent local people from accessing opportunities through education and training?
- **Earning:** How can people on low incomes be better supported to secure long-term economic prosperity?

[Read the full piece of research, 'All things being equal: The final report and recommendations of the Enfield Poverty and Inequality Commission'.](#)

Safe as Houses 3: Have government reforms to Universal Credit reduced the rent arrears of Southwark's tenants?

- This report was commissioned by the London Borough of Southwark. The aim of the report is to better understand the impact that Universal Credit (UC) has had on the rent payment behaviour of the borough's own social housing or "council" tenants.

The report focuses on two main questions: first, whether there has been an improvement in rent payment behaviour since reforms to UC were introduced in 2018; and second, to see what the impact of UC has been long after tenants have transitioned onto the new benefit.

[House of Commons Library search](#) on '**construction industry**' identifies 18 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, December 2019**' -

Abstract: Construction industry – employment, new orders, output. [Construction 2025](#), [The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more constructions jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

UK Economy and Property Market Update, May 2021

- Sharp rebound in economy expected to gather pace over coming months (see publication date).

Summary:

The economy is set to grow by somewhere between 5 and 7.5% this year (2021) creating a generally favourable environment for real estate as interest rates remain at rock bottom levels into 2022. Structural challenges will continue to depress some parts of the commercial property market but investment activity elsewhere will gain further momentum. Private housing and infrastructure will lead the acceleration in output growth in the construction sector.

Construction Sector –

The latest ONS construction data shows that output is now picking up smartly with the March number 5.8% higher than February and 6% up on the same month in 2020.

Significantly, the 12 months expectations data shows workloads are anticipated gathering momentum across all sectors although the net balance readings point to private residential leading the way. Updated forecasts from the Construction Products Association (CPA) suggest industry output may grow by close to 13% this year followed by around 5% expansion in 2022. Within this, the CPA are envisaging infrastructure output climbing by almost 30% over 2021 and even the laggardly private commercial sector to post a gain.

Critically, the fear of a race to the bottom in terms of pricing does not appear to be manifesting itself in the results to the RICS Monitor. More than 80% of respondents indicated that they are not receiving tenders/bids below realistically prepared cost estimates. In addition, where there was any evidence of this behaviour, contributors typically suggested the pricing was within 5% of costs.

Alongside this, the RICS survey also sought to gauge the potential hit to productivity from any change in work practices linked to COVID. When this question was asked in the wake of the onset of the pandemic (Q2 2020), the average loss of productivity was viewed at being around 16%. It is evident that the industry has quickly learnt to adapt to the new environment with the latest results putting the loss at just 5% (chart 12).

[Back to top](#)

Chart 12: The hit to productivity as a result of changing work practices in response to COVID is now put on average at 5%

Source: RICS Economics Research: *RICS UK Economy and Property Market Chart Book* (Q4 2020), London: RICS, p11 - Chart 20.

UK Economy and Property Market Chart Book, Q4 2020

- Output is likely to drop again in the last quarter of the year.

UK Residential Market Survey: April 2021

- Strong demand and a lack of new instructions driving prices higher.

- Demand growth increasingly outstripping supply,
- House price inflation accelerates further across the UK,
- Lack of supply also evident across the letting market.

The April 2021 RICS UK Residential Survey results point to buyer demand remaining firm across the market, while the flow of properties being listed for sale has lost impetus of late.

As a result, respondents to the survey frequently highlight this mismatch between supply and demand to be a critical factor in driving up house prices, with growth reportedly accelerating further across all parts of the UK.

In terms of new buyer demand, a headline net balance of +44% of contributors cited a pick-up in enquiries during April (see publication date). This is virtually unchanged from a reading of +43% previously and therefore remains indicative of a solid uptick in buyer demand. What's more, the new buyer enquiries series is

[Back to top](#)

positive, to a greater or lesser degree, across all areas of the UK. Alongside this, newly agreed sales also rose over the month, evidenced by a net balance of +34% of respondents noting an increase (a slight easing on +48% last time). Looking ahead, near term sales expectations remain comfortably positive at the national level, posting a net balance of +23%. With regards to the twelve-month view, contributors anticipate a cooling in sales growth further ahead, with the headline net balance standing at just +12%. When disaggregated, sales expectations for the coming year are significantly stronger than the national average in Northern Ireland, Scotland and London.

The survey's headline measure of house price growth rose again over the month, with a net balance of +75% of respondents noting an increase in prices during April. This is up from a reading of +62% back in March (reported previously within *Knowledge Foundations*) and has now become successively more elevated in each of the last three reports. Furthermore, all UK regions/countries are now seeing a sharp pick-up in house price inflation.

RICS - SPACIOUS 千居 Hong Kong Residential Monitor / Market Survey: April 2021

- Rents stabilize as housing sentiment maintains positive trajectory

- Confidence Index rises to highest level since April 2019,
- Prices seen to have risen, expected to continue to rise over the next year as sales volumes increase,
- Rents stabilize, expected to pick up for the first time in two years.

Hong Kong's housing market recovery continues to gain speed according to responses to the RICS-Spacious Hong Kong Residential Monitor in April 2021. The Confidence Index* (CI), shown in Chart 1, rose to +47 in April (vs +30 in March), a level not reached since April 2019. Robust fundamentals continue to underpin the housing market's strength.

Chart 1: Confidence Index*:

Source: RICS Economics Research: *RICS Hong Kong Residential Monitor – April 2021*, London: RICS, p1 - Chart 1.

[Back to top](#)

* The Confidence Index is a composite measure capturing overall market momentum, encompassing variables on short-term.

Demand from both owner-occupiers and investors is increasing, while demand from residents of mainland China has stabilized to a degree. The increase in demand is also being observed across all three of Hong Kong's regions tracked by this survey (New Territories, Kowloon, Hong Kong Island). Finally, although the supply of properties for sale continues to rise, in net balance terms this appears to be doing so at a slower pace than demand is increasing.

Given these supply-demand dynamics, it is perhaps unsurprising that a majority of respondents noted that home prices increased over the past three months (72% in April, 65% in March).

[Read the latest RICS HK Residential Monitor: April 2021 in full.](#)

Global Commercial Property Monitors, Q1 2021

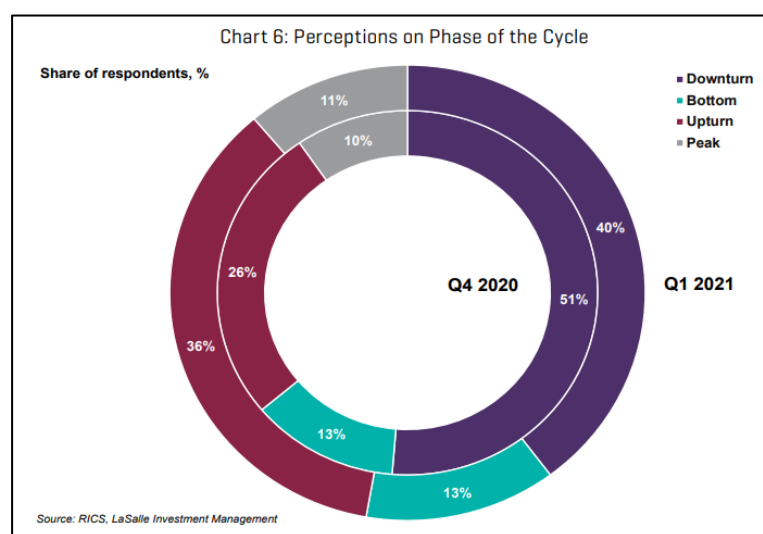

- Sentiment continues to gradually recover but sector divergence remains pronounced.

- Real estate sentiment edged up in Q1, albeit still remaining in negative territory on key metrics,
- Industrials to remain strongest part of market followed by multi-family and data centres,
- Concerns over valuation persist but respondents view real estate edging towards upturn phase of cycle.

Valuation concerns ease a little further

A striking feature of the feedback received in the Q1 Monitor is that the responses to the question about where markets are in the real estate cycle (Chart 6) are consistent with the gradual turnaround in sentiment highlighted previously.

Chart 6: Perceptions on Phase of the Cycle:

Source: RICS Economics Research: *RICS Global Property Monitors, Q1 2021*, London: RICS, p3 - Chart 6

[Back to top](#)

At a global level, 39% of respondents now view the market as being in a downturn phase compared with 51% in the previous quarter. In addition, both periods saw 13% of respondents with the view that the market was at the bottom of cycle. Significantly, the share seeing the market as being in the upturn phase has climbed from just over one-quarter to more than one-third.

Latest Statistics from the Office for National Statistics (ONS)

[UK economy latest](#) – A roundup of the latest data and analysis on the UK economy, business and jobs following Brexit and during the coronavirus (COVID-19) pandemic.

Construction Industry highlights include – Construction output in Great Britain: [March 2021](#), new orders and Construction Output Price Indices, [January to March 2021: March 2021](#)

- Short-term measures of output by the construction industry, contracts awarded for new construction work in Great Britain and a summary of the Construction Output Price Indices (OPIs) in the UK for Quarter 1 (January to March) 2021.

What's covered in the latest bulletin?

- Monthly construction output grew by 5.8% in March 2021 because of growth in both new work (6.7%) and repair and maintenance (4.4%).
- Construction output in March 2021 was 2.4% (£334 million) above the February 2020 pre-pandemic level: new work was 0.5% (£44 million) below this level and repair and maintenance work was 7.7% (£377 million) above.
- Quarterly construction output grew by 2.6% in Quarter 1 (Jan to Mar) 2021 compared with Quarter 4 (Oct to Dec) 2020, this was driven in both new work (2.8%) and repair and maintenance.

e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Research shows that high-performing organisations focus on diversity and inclusion (D&I). In any workplace, it is important to both understand and recognise the benefits that having a D&I workforce provides. It is integral to developing people within an organisation, serving clients as best we can, and playing an important leadership role in communities.

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success. It presents a practical and easy-to-read guide that can help organisations and their leaders engage with and apply this agenda to win the war for talent in real estate and construction.

This book is essential reading for all property leaders and professionals working in the real estate and construction sectors. Readers will gain especially from personal reflections on all aspects of diversity by a broad range of people working in the property industry.

Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online

Bonk C J, and Khoo E R (2014) *Adding some Tec-Variety: 100+ Activities for Motivating and Retaining Learners Online* [e-book]. CreateSpace Independent Publishing Platform, e-ISBN-13: 9781496162724

As this book states, “Motivation is central to all things human” and Online teaching and learning are no different. The authors of this

Studying at a Distance

Talbot C (2010) *Studying at a Distance* [e-book]. Maidenhead: Open University Press, e-ISBN-13: 9780335238057

This essential guide provides practical help and support for those who have not previously studied at a distance and is ideal for students returning to study after a break. It covers fundamental issues such as motivation, goal setting, time management and coping strategies. Additional coverage in this third edition includes: specific information on the use of new technologies in distance learning; detailed coverage of referencing, citation, and plagiarism; description of using mind maps and other techniques for planning and writing essays or reports; support for disabled students, particularly those with dyslexia; and an expanded further resources section.

Their Hot Topic Highlight blog posts will arm you with the information on the hottest topics – ready to tackle an important client meeting or begin revising for your RICS APC final assessment.

This month (**June 2021**) the **Hot Top Highlight – Valuation Duty of Care Caselaw**

In this latest blog article, Property Elite refers to RICS Standards and Guidance: **Risk, liability and insurance in valuation**, 2nd edn., January 2018.

In this week's blog, Property Elite takes a look at caselaw relating to a valuer's duty of care. In future blogs, they will look at other areas of valuation caselaw, such as the margin of acceptable error.

Always remember that claims are a complex area. Legal advice should always be sought if in doubt or in the event of a claim.

This blog is, therefore, essential reading for all candidates pursuing Valuation as a technical competency, irrespective of your pathway.

What is a duty of care?

Valuers owe a duty of care towards their clients, both in contract and in tort (for negligence). They may also owe a duty of care towards third parties, in certain circumstances.

In a claim (for breach of contract or negligence), the Court will ask whether the 'valuation given was one that no reasonable valuer in the actual valuer's position could have given' (**RICS**)

A claim for breach of contract can only be brought by a party to the contract, i.e. the client. However, if the valuer expressly accepts a duty of care (or is assumed to have done so) then they may also be liable to third parties (who were not party to the valuation contract or Terms of Engagement).

What caselaw is relevant?

There is a myriad of caselaw of relevance to valuers. However, in this blog we will take a look at five cases of particular relevance to RICS APC and AssocRICS candidates incl.

- 1) **Smith v Bush (1990)**
- 2) **Harris v Wyre Forest (1989)**

[Back to top](#)

- 3) **Scullion v Bank of Scotland (2011)**
- 4) **Freemont (Denbigh) Ltd v Knight Frank LLP (2014)**
- 5) **Hubbard v Bank of Scotland Plc (2014)**

[Back to top](#)

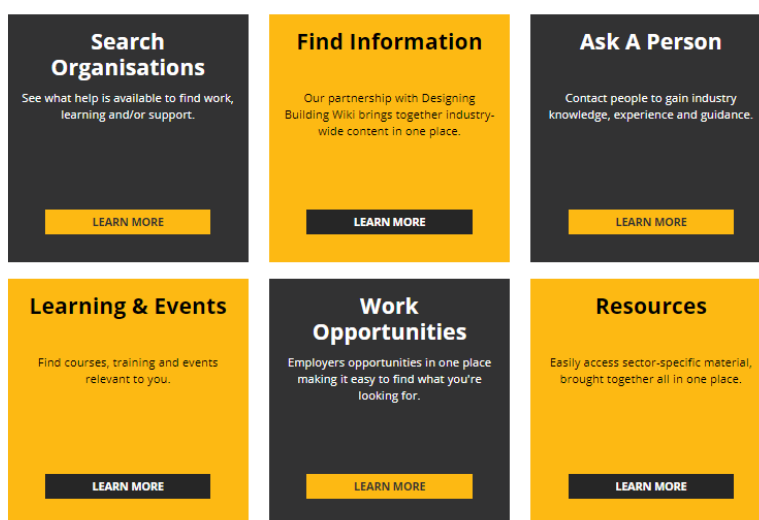

Enabling connections for a competent, diverse, and valued built environment workforce

The aim of 'Building People' was to create a technology platform and collaborative network, that enables connections and seeks to reduce the skills shortages across the Built Environment.

In 2018 UCEM's widening participation ambitions were boosted after acquiring the innovative Built Environment digital network. 'Building People', a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with employers seeking to plug the skills gap via an online platform, is now a subsidiary of UCEM.

People Wiki:

What are you looking for?

© Building People 2021

Building People and Designing Buildings Wiki have launched People Wiki, a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.

The UK needs to build, but there is a shortage of competent and experienced workers, and the workforce we have lacks diversity. Building People joins the dots to help people find employers, opportunities, and resources, and to help employers engage with a more diverse range of talent.

The launch of People Wiki is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities, and needs focused on diversity and inclusion, skills and careers, and social value. This platform is now live and provides users with options to find organisations that can support them with built environment careers, as well as access to information and resources. In September, the platform will expand to include directories that bring together events, courses, and work

vacancies (with an initial prototype focus on the surveying profession).

People Wiki has been created as part of Designing Buildings Wiki and is fully linked to its 10,000 existing articles and easily accessible by its 7.5 million annual users. This collaboration with an established and respected industry knowledge base will help Building People achieve its vision of a built environment that improves social and economic value by being better connected, more diverse and more inclusive.

The Green Agenda

Within the Savills Market Trends – 'Real estate investment in 2021: global outlook' (mentioned earlier within this issue of *Knowledge Foundations*) they covered 'The Green Agenda' –

[Back to top](#)

Despite the challenges of 2020, the rising importance of environmental, social and governance (ESG) credentials for investors has continued to grow.

Across the globe, governments are making 'climate emergency' declaration and commitments to meeting net zero carbon in certain timeframes. To honour these commitments, new investment into green technology, energy and much more has been announced but also an increasing amount of regulation.

Real estate is under the spotlight as the built environment accounts for 40% of carbon emissions across the world. This will present challenges but it's also an opportunity for real estate investors to make a significant difference.

[Read the Market Trends – 'Real estate investment in 2021: global outlook', in full.](#)

The Pandemic Has Taken Cars Off Urban Streets. Will It Last?

- With a sharp drop in auto traffic due to Coronavirus, cities around the globe have closed streets to cars and expanded pedestrian thoroughfares and bikes lanes.

But as life edges back to normal (see publication date), will these initiatives survive, especially if virus-wary citizens shun mass transit?

[Access this article entitled, 'The Pandemic Has Taken Cars Off Urban Streets. Will It Last' in full.](#)

UK sets 'most ambitious' climate target to cut emissions by 78% by 2035

[Image: courtesy Ed Hawkins]

(Climate stripes as shown in this image are sometimes referred to as warming stripes, or climate timelines and are data visualization graphics that use a series of coloured stripes chronologically ordered to visually portray long-term temperature trends.)

The UK government has set the 'world's most ambitious' climate change target into law to slash emissions by 78% by 2035 compared to 1990 levels.

In line with the recommendation from the independent [Climate Change Committee](#), this sixth Carbon Budget limits the volume of greenhouse gases emitted over a 5-year period from 2033 to 2037, taking the UK more than three-quarters of the way to reaching [net zero by 2050](#). For the first time, this Carbon Budget

[Back to top](#)

will incorporate the UK's share of international aviation and shipping emissions.

This comes ahead of prime minister Boris Johnson addressing the opening session of the US Leaders' Summit on Climate, hosted by President Biden on **Earth Day (22 April)**. Johnson will urge countries to raise ambition on [tackling climate change](#) and join the UK in setting stretching targets for reducing emissions by 2030 to align with net zero.

The government is already working towards its commitment to reduce emissions in 2030 by at least 68% through the UK's latest Nationally Determined Contribution. The latest announcement builds on this goal to achieve a 78% reduction by 2035. The new target will become enshrined in law by the end of June 2021.

'Raising the bar on tackling climate change'

Prime minister Boris Johnson said: "We want to continue to raise the bar on tackling climate change, and that's why we're setting the most ambitious target to cut emissions in the world.

"The UK will be home to pioneering businesses, new technologies and green innovation as we make progress to [net zero emissions](#), laying the foundations for decades of economic growth in a way that creates thousands of jobs.

"We want to see world leaders follow our lead and match our ambition in the run up to the crucial **climate summit COP26**, as we will only build back greener and protect our planet if we come together to take action."

'Government must clearly map out how it plans to tackle the carbon emissions'

Ben Harris, UK climate change & sustainability director at Arcadis, and Catherine Greaves, managing director of environment, safety & industry, said: "We welcome the news from the UK Government this morning on the adoption of the 78% reduction in carbon emissions by 2035 on the advice of the Committee on Climate Change.

"If we are to take this new target seriously, Government must clearly map out how it plans to tackle the carbon emissions attributable to the built environment, which account for approximately 40% of UK emissions."

QSAND and the Sustainability Goals

The UN Sustainable Development Agenda, adopted by world leaders in 2015, maps out a 15-year plan to fight inequality, end poverty and tackle climate change challenges. Quantifying Sustainability in the Aftermath of Natural Disasters (QSAND) is a self-assessment tool to promote sustainable approaches and contributing to aid the achievement of several of these 17 goals in disaster affected global communities:

Source: Designing Buildings .co.uk Wiki (2019) 'Forgetting the big picture when considering sustainability' [online], last edited 31 March. Note: "The Sustainable Development Goals icons and colour wheel are free to use" ([UN.org](https://www.un.org/sustainabledevelopment/) 2021)

Note: Use of Wikis as a reference site

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source. It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

- Remember that an encyclopaedia (which include Wikipedia and any other Wiki) can be a good starting point for research, and not an ending point.
- An encyclopaedia can be good for getting a general understanding of subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice, and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

Introducing Copyright: A plain language guide to Copyright in the 21st Century

Computers and the Internet have transformed the way we produce and distribute information and entertainment. And copyright is struggling to keep pace with these changes. This book was written for those who want to learn about copyright in the 21st century. It explains copyright protection and what it means for copyright holders and copyright users. It also introduces readers to contemporary topics: (i) digital rights management, (ii) open licences, (iii) software patents and (iv) copyright protection for works of traditional knowledge.

Hofman J (2009) *Introducing Copyright: A plain language guide to Copyright in the 21st Century* [e-book], Vancouver: The Commonwealth of Learning.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers, and visual artists. By 'copying' the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party.

Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors. **Note:** UCEM holds a **CLA 'Higher Education Photocopying and Scanning Licence'**

[Access the Copyright Licensing Agency website for further information](#)

CLA Title Search tool

The [CLA Title Search tool](#) is an online search tool that lets you quickly find out what you can copy under your organisation's CLA licence. Whether you'd like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance.

Copyright Licensing Agency (2018) *CITE Magazine - A biannual magazine for the CITE Community, Winter 2018, No. 1* [online].

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security**.

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's National Copyright Conference 2021

This national conference was held on 10th May and in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance. This conference provided an opportunity to delve deeper into copyright issues and gain a better understanding of how policy impacts on libraries and the information sector and covered the following:

- The impact of Brexit on the copyright law in the UK.
- Responses to Covid in the provision of access and use of copyright resources.
- The crucial role of the copyright exceptions.
- Familiarised with key issues on the horizon such as Plan S.
- Current legislative, licensing and publishing related landscape and the latest copyright research and how these might impact your day-to-day work.

Sessions covered broad copyright impact for the profession incl.

- **Keynote: Who's afraid of the copyright wolf: research, access, and respect**

Much of the digitisation landscape is dictated by copyright, particularly for 20th century content. For researchers, this can create complex barriers to access to either individual collections item, or aggregated collections data, that are often confusing to navigate. For researchers working in the Digital Humanities, access to materials can dictate project direction, or the questions that can be asked via digital methods. In this talk, *Professor Melissa Terras*: Professor of Digital Cultural Heritage, University of Edinburgh reflected on how copyright has shaped her research projects - and also, how the perceived boundaries of copyright affect the research environment. The fear of copyright affects both researchers and institutions: Terras asks if the framing of forceful copyright restrictions can also be replaced with stressing the contribution institutions make to safeguarding and stewarding collections for ongoing research access.

[Back to top](#)

- **Brexit, orphan works, and your next steps**

Naomi Korn: Naomi Korn Associates analyses the UK Government response to leaving the EU and its position on orphan works. Based on key questions Naomi is answering as part of her part-time Phd research at the University of Edinburgh, Naomi will outline next steps and suggest what you might want to think about doing next.

- **Exceptions to Copyright**

In this talk, ***Dr Jane Secker:** Senior Lecturer in Educational Development, City, University of London*, and ***Chris Morrison:** Copyright and Licensing Manager, University of Kent* spoke about the ways in which educational establishments have addressed copyright issues associated with the shift to online learning. They discussed the importance of educational exceptions as a vital supplement to the use of licensed resources to enable the use of images, printed materials, and audio-visual content to teach online.

- **Open Access and Plan S**

The open access debate of the past two decades has raised issues around long-standing assumptions regarding copyright in scholarly journal articles. This has intensified as funders have looked to using rights as a way to promote greater open access. This talk by ***David Prosser:** Executive Director, RLUK* looked at the current state of the debate through the lens of recent policy from cOAlition S.

- **Bumps in the road: copyright responses to COVID in Higher Education**

Many aspects of our daily lives have been disrupted in some way over the course of the pandemic and copyright services are no exception. For those of us working in higher education institutions the sudden shift to online resource provision has meant that we need to work to adapt and enhance our provision in response to the lack of access to physical materials. At the same time, we need to manage expectations in terms of the availability of online materials and educate both users and staff in a constantly changing environment.

This talk by ***Claire Sewell:** Research Support Librarian for Physical Sciences, Cambridge University*, and ***Kate Faulkner:** Law Faculty Librarian, Cambridge University*, looked at the copyright journey taken by Cambridge University Libraries over the course of the last year. It will highlight how the initial response to the emergency was developed into a successful service, the challenges we faced as a university library with legal deposit responsibilities and the potential legacy of these changes for our copyright service. It will conclude with some of the lessons learnt

[Back to top](#)

and planned next steps to ensure that we build a copyright service useful to all.

- **Share Copies Not COVID: Update on CLA Developments**

James Bennett: *Head of Rights and Licensing, Copyright Licensing Agency* provided an overview of CLA's latest initiatives in response to the pandemic, looking at developments since the 2020 CILIP Copyright Conference, including licence enhancements to help with online teaching in schools and universities, and CLA and PLS's support for the process of REF submission by HEIs.

- **Europeana's licensing framework: a standardised approach to deal with unharmonised copyright frameworks**

Europeana aggregates and displays digital cultural heritage from across Europe and beyond, and as such, is in touch with the diverse copyright challenges faced at the national level by cultural heritage institutions. During this session, **Ariadna Matas:** *Policy Advisor, Europeana Foundation*. will briefly introduce how Europeana showcases and uses digital cultural heritage, its central licensing system, the standardised tools that Europeana relies on, what the coming changes such as the CDSM Directive might bring to challenges that are left to be solved.

- **Brexit and Copyright - what does the future hold?**

In 2020, the UK was in a holding pattern with respect to Brexit. Although it had left the EU, the transition period meant that EU law continued to apply. With the expiry of the transition period on 31 December 2020, copyright stakeholders and policymakers are now experiencing the full implications of Brexit, both in terms of day-to-day practices and the longer-term vision for copyright law in this country. This presentation by **Dr Emily Hudson:** *Reader in Law, King's College London* does not seek to reventilate questions about whether Brexit was desirable. Rather, it asks what the future of copyright might look like. To answer this, it starts by explaining the current legal position in relation to the status of EU instruments and case law in the UK. It then identifies areas where EU harmonisation has been particularly significant and makes some predictions about the likely direction of UK copyright law over the coming years. Finally, it offers some views about the sort of copyright reforms that the UK should consider.

- **The Open University - challenges and opportunities with copyright and licensing**

In this talk **Priya Haria:** *Content, Licencing, and Intellectual Property Assistant, The Open University* will talk about the opportunities and challenges to The Open University in relation copyright and licencing. The effect of Covid19 has led other organisations to consider delivering courses online. Priya will be able to provide a unique perspective in this area because,

[Back to top](#)

The Open University is a worldwide leader in teaching and delivering courses online for a number of years. Priya will also discuss how copyright and licencing opportunities allow an organisation like The Open University to expand their reach in delivering courses.

The Challenges of Remote Working at Present

For those who work remotely all or part of the time already, you or your employer [depending on whether you are self-employed / freelancer or an employee] will have safeguards in place that enable you to operate securely when handling commercially sensitive or others' third-party data. The difference, in March 2020, is that at very short notice, organisations are having to move staff to homeworking often with literally hours' notice as the Government COVID-19 instructions are issued.

There are growing numbers of tips and survival guides online that include: Information Commissioner's Office (ICO) [Data protection and coronavirus: what you need to know.](#)

The challenges of remote working at present and point to consider from a data privacy perspective.

Provided within this article are points to consider from a data privacy perspective that include:

1. **Have a clear statement to all staff** stressing that "The protection of personal data that we hold, and use is important to us and must be handled at all times in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we have to adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instructions that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted." (Tullo 2020)
2. **Set out what use of data**, contact lists, customer documents are being allowed.
3. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using.**
4. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seems sensible at present] in line with experience and how staff report it is working.
5. **Reissue and emphasise your usual security arrangements –** Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household.
6. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed.

[Back to top](#)

7. For the **weekly reviews** – have your Senior Leadership Team note the number of staff using personal devices, any queries, or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
8. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
9. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
10. This is where a nominated Data Protection Officer [DPO] or Data Officer can support the senior team in the messaging to colleagues.
