What's in this month's issue

- **Latest UCEM News**, incl. - UCEM's new master degree to expand skills base and lead sustainability charge.
- **Things you need to know this week** – For-profit registered providers (FRRPs) in England have increased their housing stock by 35 per cent since March 2022.
- **Latest Research** from Savills, The Smith Institute, RICS, CBRE, Joseph Rowntree Foundation, and more.

Happy reading!

Issue 6 – June 2023

Welcome to UCEM's monthly *Knowledge Foundations* newsletter (formally the library e-bulletin), a compendium of news and views, research and resources relating to the educational sector and Built Environment.

The UCEM Library aims to disseminate information, promote current awareness, and share good practices, to assist in the continual professional development of all those working and aspiring to work within the Built Environment/Property and Construction industries.

“The mission of librarians is to improve society through facilitating knowledge creation in their communities”.

(R. David Lankes)

The initial aim of this UCEM Library's current awareness service was to help keep students and staff informed of the education sector and industry-specific news, share current and best practices, highlight the latest research, and identify case studies that will support studying and supplement teaching and learning resources. However, over the years and upon request, the readership has now expanded.

We welcome news and information from readers to include in future editions - please [email us](#).

Supported Online Learning

The readership of *Knowledge Foundations* has expanded (to include Alumni) and is now promoted further afield, with the latest version appearing on the UCEM Website.

UCEM News

UCEM to convene cross industry event on enabling successful built environment apprenticeships

- On Wednesday 17th May 2023, sectoral leaders within the built environment attended an event hosted by UCEM to discuss how to enable successful technical and professional apprenticeships in the sector. The event was supported by the Construction Industry Council (CIC) and the Construction Leadership Council (CLC).

Senior stakeholders from large firms, consultancies and academia joined representatives of organisations such as the Chartered Institute of Building (CIOB), Council of the Heads of Built Environment (CHOB), Department for Education (DfE), Institution of Civil Engineers (ICE) and Royal Institution of Chartered Surveyors (RICS) to identify mutual aspirations to drive improvements and deliver successful apprenticeship outcomes.

UCEM Principal, Ashley Wheaton, said: *“This will be UCEM’s inaugural ‘INSPIRE’ event, a series of occasional themed sessions that will convene influential stakeholders to consider the various challenges facing the built environment sector.”*

Tackling the Climate Crisis – deeper engagement from smaller and specialist universities highlighted in new report

- On Thursday 18th May GuildHE – who represent 60 universities and college in the UK – launched the new report [**Tackling the Climate Crisis**](#) which provides an in-depth insight into how smaller and specialist universities and colleges within the UK are engaging with the issue at an institutional level. The report considers five critical elements of university activity: Leadership and Governance, Teaching, Research and Knowledge Exchange, Community Engagement, and Campus Management.

The report suggests that there has been an acceleration in activities amongst universities and colleges over the last 18 months. Activities to tackle the climate crisis have become further embedded across institutions and at a more strategic level, with more institutions integrating environmental sustainable development in their curriculum, working with their local communities and developing research activities in addition to considering how they make their estate more sustainable.

Open for applications: UCEM new masters degree to expand skills base and lead sustainability charge in built environments

PRESS RELEASE New MSc for Innovation in Sustainable Built Environments to support more development of sustainable business in housing, development, construction and real estate.

UCEM, a university that provides education for the built environment sector globally, has launched a new Masters degree course covering sustainability and environmental management for the construction, real estate and other built environment sectors. In September 2023, the first cohort of students will focus on championing sustainability efforts, improving environmental and business impact at their organisations, and challenging established orthodoxies to ensure the best results.

The new online Masters degree from UCEM – the MSc Innovation in Sustainable Built Environments – will provide built environment professionals with the tools, knowledge and capabilities to develop sustainability professionals who want to diversity and apply their skills in different built environment sectors where they can have a significant impact. The course will equip professionals to lead their organisation's sustainability agenda, challenge assumptions and effect measurable change.

Access the article '[Open for applications: UCEM new masters degree to expand skills base and lead sustainability charge in built environments](#)' in full.

UCEM Article: Practical tips for saving energy costs

- We are in the midst of a cost-of-living crisis which has spread across the globe. Significant increases to the cost of food and energy have outstripped worker's salaries, and spiralling inflation has plunged countless into poverty. In this article, UCEM takes a look at practical ways to save energy that can be actioned without spending too much money.

Further information on COP27 and access to the article in full is available within the 'Sustainability Hub' later in this publication.

Principal Ashley Wheaton appointed Chair of Trustees at Young Citizens

- The appointment further solidifies UCEM's commitment to engaging the next generation with the future sustainability of our planet.

We are delighted with the news that Ashley Wheaton has been appointed as the new Chair of Trustees at charity [Young Citizens](#). This is a testament to his expertise and commitment to promoting education.

Young Citizens has been engaging young people with citizenship since the 1960s. They provide educational resources and training to help young people to become active and engaged in society. Their aim is to equip the next generation with the knowledge, skills and confidence to participate in society and make a positive

Contribution to their communities.

This new partnership opens new prospects for both UCEM and Young Citizens, and we look forward to seeing the positive impact that Ashley will have in this new role.

Other News

Things you need to know this week: For-profit registered providers increase housing stock

- For-profit registered providers in England represent a small share of the affordable homes sector but are growing fast, having increased their housing stock by 35 per cent over the past year (see publication date).

For-profit registered providers (FPRPs) of affordable housing now own more than 28,150 homes in England, having increased their stock by 35 percent since March 2022. Latest research by property consultancy [Savills](#) charting the sector finds the number of such homes has more than doubled since March 2021. Although FPRPs owned just 0.7 per cent of total affordable stock in 2021/2, Savills' survey finds providers are continuing to increase their stock and expect to have almost 37,500 homes by the end of this year (2023). Savills says there were six new registrations over the past year, five of whom are backed by developers wanting to retain greater control over Section 106 homes they are delivering, such as London Square's Square Roots. Shared ownership is the dominant tenure, making up 59 per cent of total FPRP stock. Helen Collins, head of affordable housing consultancy at Savills, says in the report, "As HA [housing association] capacity for development is constrained, the need for investor FPRP capital is high, if the supply of much-needed housing is to be maintained".

Also, this month,

- The pace of growth of the UK's build-to-rent housing sector slowed in the first quarter of this year (2023), according to data released by property body, the British Property Federation. Its latest analysis shows the number of built-to-rent homes in planning, under construction or completed continues to increase year on year, but the pace of growth has slowed from a long term average of 28 per cent year on year, to 9 per cent.

- Shopping centre owner Unibail-Rodamco-Westfield (URW) has sealed a deal to buy out its joint venture partner's 50 per cent stake in part of Croydon town centre including the Centrale & Whitgift shopping centres, paving the way for long stalled regeneration ambitions to be revived. URW and developer Hammerson were joint venture partners in the Croydon Partnership, owner Whitgift and Centrale shopping centres, high street retail, office buildings and multi-storey car parks on a 10 hectare area of the town centre.

- Government-owned regeneration business London and Continental Railways (LCR) has completed the acquisition of a heritage building next to Derby station, as part of plans to regenerate the area and create a gateway to the city centre. The deal to acquire the nineteenth century Midland House was made

[Back to top](#)

possible with a £500,000 loan from Derby City Council.

- Sunderland City Council has appointed build-to-rent provider Placefirst as preferred development partner to deliver 140 homes in the second residential neighbourhood in its Riverside Sunderland masterplan. The new homes in the Farringdon Row neighbourhood are being delivered by a project team including architect IDP, development consultancy Identity Consult and landscape architect Southern Green.

- Housebuilder Weston Homes has completed the acquisition of a 10.36-acre site in Thornwood in Epping, where it plans to develop 62 homes. The deal is subject to planning, with the site having resolution to grant outline planning permission. The development is expected to provide family houses together with landscaping, community orchard and a pocket park.

Case Study: A partnership approach to providing affordable homes

- Brighton and Hove City Council and affordable housing provider the Hyde Group have joined forces to deliver 1,000 affordable homes and their first schemes are nearing completion, the author of this article writes.

Like many cities in the UK, Brighton and Hove in East Sussex is seeing the consequences of high housing prices, inadequate household income levels, shortages of rental and family homes and reduced public funding for affordable housing. Two of those consequences are that Brighton and Hove City Council has around 7,000 households on its joint housing register and also 2,000 households in temporary accommodation.

In an effort to begin to tackle some of these challenges, the council formed a partnership with affordable housing provider the Hyde Group in 2017, which has set itself the target of delivering 1,000 affordable homes across the area. The first two projects in the development pipeline of the partnership, called Homes for Brighton & Hove, are now coming to completion, and take the initiative more than a third in the way towards its delivery target.

Challenges

Changes to national rules and funding models for affordable housing development and rapidly rising build costs resulted in an early change to the structure of the partnership and relieved

[Back to top](#)

Development viability pressures. By moving the Home for Brighton & Hove partnership's structure from a limited liability partnership to a development company, it was able to attract additional funding and could ensure rented homes came directly into council ownership.

The partnership looks to address the needs of local people, with half of new homes being made available for rent from the council to people on the city's joint housing register on social rents. The remaining homes are being made available for shared ownership by Hyde.

The two debut schemes are being delivered on very different sites. One is being developed on a 3.3-hectare site to the east of Coldean Lane, which is steeply sloping, greenfield and on the urban fringe, being close to and visible from the South Downs National Park. The other occupies a constrained infill site in Portslade, which was formerly home to a day centre.

Solutions

At Coldean Lane, 242 one-, two- and three-bedroom apartments are being provided in six blocks, between five and seven storeys high. The environmental impact of development has been minimised in the design, with each of the pavilion buildings following the site's natural contours and being construction using just three brick types to help them integrate with their surroundings.

Some trees have been removed to make way for the development and around 200 new trees are being planted on site. A 1.6-hectare flower-rich chalk grassland is also being planted, which includes open areas for invertebrates, and bird boxes and swift bricks have been incorporated into the apartment buildings. A landscape and ecology management plan details how habitats for badgers, reptiles, bats and other wildlife will be maintained once the homes are complete and occupied.

Feedback from the local community in the project's earliest stages resulted in the partnership increasing the amount of green spaces, footpaths and parking, improving the road layout and reducing the size of buildings and number of homes planned.

At Portslade 104 one-, two- and three-bedroom apartments are being provided in two blocks of between four and seven storeys. Elm trees, hedges and seasonal planting flanking the buildings and their courtyard promote biodiversity, while a steel arch at their entrance references the location's industrial heritage.

Homes on both sites are expected to be around 19 per cent more energy efficient than those built to current building regulations, as a result of a fabric-first, highly insulated and airtight design. Both schemes are designed by HGP Architects and constructed by

[Back to top](#)

contractor PMC Construction. The partnership has identified a pipeline of future sites to continue its progress towards its 1,000-home target.

Review: Medium rise city centre residential development

- The interlocking towers at 28 King Street and 55 Queen Street in the historic core of Salford create a landmark corner block that fits neatly into its historic context, finds the author of this article.

28 King Street and 55 Queen Street are adjoining sites which have been redeveloped to form a cluster of medium rise residential towers, creating an important gateway into Greengate Salford, close to the city's Northern Ring Road.

Greengate is the original historic core of Salford, just over the River Irwell, on the Victoria Bridge from Manchester cathedral. Following several masterplans and regeneration strategies, the area has seen considerable development at scale with some new neighbouring towers of more than 40 storeys. The area is emerging as an inner-city residential district and beginning to take on the character anticipated in those strategies.

As development sites, the block is a modest footprint, on the edge of the major regeneration areas. With the various land ownerships, including some public agencies, delivery no doubt required lengthy negotiations and close working between the developers, their design teams and indeed with Salford City Council's planners. The outcome is commendable. It has demonstrated the importance of having an overall ambition, supporting good designers to interpret and add to the vision and having a process that can deliver certainty quickly.

Contrasting yet complementary

55 Queen Street is the more dominant tower with 115 apartments set over 18 storeys by local developer Salboy. 28 King Street, in contrast, provides a step down in height of 14 and then eight storeys in two blocks which are sandwiched to the rear of 55. It has frontages to both Queen Street and King Street. The architect Ollier Smurthwaite Architects, working for developer Bradley Manor, has worked hard to respect the important four storey historic building which is home to Blueprint Studios, set immediately to the west.

[Back to top](#)

Overall, this is a successful, albeit incredibly intricate, urban block. I haven't looked at the Internal residential and amenity arrangements but getting daylight and sunlight into the homes will have been challenging. From the street the experience is positive, both from a distance and closeup. The appearance of the mixed uses like the gym and the side entrance doors, however, are underwhelming and the faux window tax opening will not be to all tastes.

In consideration of the corner, the architect of 55 Queen Street, Jon Matthews Architects, describes the imposing tower as a 'bookend' and 'totem' to the arrival into Greengate. The well mannered five vertical elements of the façade, with a defined base and double height lid, give a clarity of form reflecting the underlying structure. The light flush pointed brickwork is brilliantly executed here and give great contrast. I did feel that the main entrance should have been below the bolder solid corner, which seems to unite the whole composition, but this is not critical to the overall success.

Advice: Promoting housing for older people

- Councils need to plan for the rapidly growing numbers of older people and the resulting homes and their facilities can help reinvigorate town centres, finds the author of this article.

The requirement for homes suitable – or adaptable – for people as they get older is growing very fast, says professor Les Mayhew, head of global research at the research centre International Longevity Centre UK. "The UK population aged over 65 is set to increase from around 11 million now to 17.2 million by 2040," he says, "Very few currently live in suitable housing that can meet their needs as they get older," Mayhew continues. "The housing policies of both national and local government focuses on first-time buyers but this needs to move to last-time buyers."

As part of the 2022 Levelling Up White Paper the government announced the formation of an older people's taskforce to help expand the number of homes built for older people and the range of options open to them. Professor Julianne Meyer of City, University of London, a specialist in care for older people, was

[Back to top](#)

Appointed the taskforce's chair in April 2023.

"The taskforce will need to look at how local authority plans can make provision for older people part of their overall housing offer," says Mayhew. "Local authorities can use older people's housing to bring new life to town centres or create 15-minute neighbourhoods.

Here are four key ways councils can promote the development of housing for older people:

1. Plan for older people housing

Some councils are beginning to develop policies and targets in their local plans for the provision of older people's housing. Tom Scaife, partner at planning consultancy Knight Frank and head of its senior housing team says, "Central government guidance should set the proportion of new homes which councils should require to meet the needs of the ageing population." He adds, "This could be implemented at a local level in local plans".

2. Work across local authority departments

"Councils need to work across planning, social care and housing departments to develop their strategies for older people housing," says Mayhew. These departments are brought together in unitary authorities but in two-tier areas, social care is a county responsibility and housing and planning are district council responsibilities.

3. Allocate council-owned sites for retirement communities

"Former hospital and school sites work well for new retirement communities", suggests James Lloyd, policy director at ARCO. Retirement communities tend to be between 50 and 250 units so require a large site. "They include a range of social and leisure facilities, so need to be large enough to make the services viable," he says.

4. Integrate the older people's housing into their locality

Tom Randle, senior associate at architect Levitt Bernstein, suggests older people's housing needs to be integrated into their local areas. "They need to be designed so that the services can be used by the wider population," he says.

[World likely to warm beyond key 1.5C limit by 2027](#)

- The world is likely to hit 1.5C of warming within the next five years because of rising carbon emissions.

Researchers say there’s now a 66% chance we will pass the 1.5C global warming threshold between now and 2027. The chances are rising due to emissions from human activities and a likely El Niño weather pattern later this year (2023). If the world passes the limit, scientists stress the breach, while worrying, will likely to be temporary. Hitting the threshold would mean the world is 1.5C warmer than it was during the second half of the 19th Century, before fossil fuel emissions from industrialisation really began to ramp up.

The evolution of building surveying education during COVID-19

- In January and February 2020, as the pandemic was starting to gain momentum and spreading around the globe, universities in the UK were beginning to consider how to react. As a sector, UK higher education is relatively familiar with web-based methods of communication, teaching, and learning.

In fact, the University College of Estate Management (formerly the College of Estate Management) and the traditional home of RICS correspondence courses, operates their business totally online.

A lot of universities operate a Virtual Learning Environment (VLE) which allows them to communicate with their students and provides the opportunity to interact with them in terms of online courses and assessments, and as a depository for learning materials.

This is allowing the students to revisit the materials to embed or reinforce their learning or to catch up if a session was missed. Common VLE’s include Blackboard, WebCT, and Moodle. Their functionality and features are all relatively similar.

Although the physical libraries were closed, universities operate electronic libraries which offer access to a large number of electronic databases, and a growing number of books and journals, ensuring that the students and staff, can continue to access the majority of relevant information for their studies and research.

[Banner artwork highlights construction suicides](#)

- A poignant art installation has been erected in London to mark Mental Health Awareness Week (15 to 21 May).

The 12m-tall banner has been created by [Ironmongery Direct](#) and [ElectricalDirect](#) and will be displayed all week on a [Galliford Try](#) building site in the heart of the West End.

The mural includes 687 high-vis vests, representing the annual number of construction suicides in the UK.

An average of 687 skilled trade workers died by suicide each year between 2019 and 2021, according to the latest government data. This equates to 13 people each week, or almost two a day, on average.

In 2021, tradespeople accounted for 15% of suicides across all industries, which is more than any other occupation. In fact, construction workers are nearly four times as likely to die by suicide than some other sectors.

The high-vis vests were stitched together into one garment by fabric manufacturer J&C Joel.

[Back to top](#)

The display was unveiled alongside IronmongeryDirect and ElectricalDirect's annual **Mental Health in the Trades report**. The survey of 500 UK tradespeople found that more than four in five (84%) experience mental health problems due to work-related issues.

How developers can prepare now for the Building Safety Act series:

How developers can prepare now for the Building Safety Act: Part 1 of 3

The Building Safety Act received Royal Assent on 28 April 2022. With aspect of the new regime unclear, this series of articles looks at what steps developers can take now.

How developers can prepare now for the Building Safety Act: Part 2 of 3

In Part 2, Shoosmiths discuss the dutyholder regime and look at the steps developers can take now to prepare.

How developers can prepare now for the Building Safety Act: Part 3 of 3

In this final part of this series, Shoosmiths take a look at the new gateway regime for higher risk buildings.

Keywords – Real estate, ESG, New How Perspectives, New How,

The future of build-to-rent market Real Estate Podcast series Podcast – Government policy BTR (Build to Rent)

The future of the BTR market from Shoosmiths' Living team:

Podcast series #1 – The future of BTR (Build to Rent)

Issues discussed in this podcast include: Performance of the sector; Rent collection rates; Challenges of lockdown restrictions; How buildings and amenity space will change as a result of the pandemic; and where the market is going.

Podcast series #2 – The future of BTR (Build to Rent)

Issues discussed in this podcast include: Ongoing attractiveness of the sector; Top three things to look for in a BTR scheme; Future challenges for BTR; The role of technology, and BTR housing.

Podcast series #3 – The future of BTR (Build-to-Rent)

In this podcast, the last in this series, issues discussed include: Planning reforms; Permitted development rights; Rise of residential in the high street; Fire Safety; and Rent controls / regulations.

The Pathway to Lifelong Education: Reforming the UK's Skills System

- The UK has a longstanding skills problems which is impacting on economic growth. Adult participation in learning has declined, particularly among part-time students, while fewer people in work are taking up training to reskill or upskill. More

[Back to top](#)

generally, there is a shortfall in vocation and higher technical qualifications.

In this first report, with Ashley Wheaton, Principal, University College of Estate Management acknowledged as one of the contributing experts, the Lifelong Education Commission seeks to recommend how the barriers to adult learning can be removed; what future investment is needed to support this; and what change is needed to ensure the maximum flexibility that will benefit learners and deliver on the promise of a whole system change for lifelong education.

The Report makes a series of recommendations for reform, including:

- A single source of careers advice, to 'professionalise' and regulate careers information, advice and guidance
- Means-tested Maintenance Grants for learners over and above the Lifelong Loan Entitlement, in order to subsidise costs and encourage uptake, particularly among those for whom debt is a barrier
- The abolition of the Equivalent or Lower Qualification (ELQ) rules, to support retraining at higher levels
- Extending the Apprenticeship Levy to cover a wide range of high-quality training, including short modular courses, in order to provide additional flexibility and incentivise employer investment in skills training
- Stronger HE-FE partnerships to provide integrated pathways to higher-level skills; and alignment with industry and online providers to enable better coordination between schools, colleges, universities, and employers.
- Reform of the regulatory framework to simplify the jurisdiction between multiple qualification bodies;
- Learning lessons from Scotland, where 'articulation agreements' offer clear routes between FE and HE allowing students with Higher National Certificates and Diplomas to access the second or third years of degree programmes.

Access the summary and report, 'The Pathway to Lifelong Education: Reforming the UK's Skills System' in full.

Related Links:**Cladding: Panels failed fire tests 13 years before Grenfell -**

Leaked test results suggest the government and construction industry had early evidence of the dangers posed by cladding, 13 years before the Grenfell Tower fire.

Panels, commonly used on buildings in the UK, failed fire tests carried out in 2004. The Inquiry venue at 13 Bishop’s Bridge Road, London, W2 6BU. The results marked “Commercial in confidence,” were circulated within an industry advisory group.

They were recently passed to the BBC (see publication date) and, until now, never made public.

Hundreds of thousands of flat owners are now threatened with large bills because of construction materials which pose a risk in fires.

The 2004 results were among the first from a British test of full-scale building systems, developed in the late 1990s when there were growing concerns in Parliament about the risks of cladding.

The tests were part of research commissioned the then Labour government to determine what standards building systems should have to meet.

Government details fire safety-related changes to planning system

- The government has released details of new requirements in the planning system to bolster fire safety in high-rise residential buildings, in response to the Grenfell Tower Fire.

The changes come in the Ministry for Housing, Communities and Local Government's (MHCLG) plans to introduce '[planning gateway one](#)', which it said would deliver on one of Dame Judith Hackitt's recommendations following her independent review of Building Regulations and fire safety.

The new requirements aim to ensure fire safety matters as they relate to land use planning are incorporated at the planning stage for schemes that involve high-rise residential buildings.

The changes, which come into effect from **1 August 2021** will:

- involve the Health and Safety Executive (HSE) becoming a statutory consultee before permission is granted for development which involves or is likely to involve a high-rise residential building.
- require relevant applications for planning permission to include a fire statement to ensure applicants have considered fire safety issues as they relate to land use planning matters such as layout and access.
- help inform effective decision-making by local planning authorities or the secretary of state so that those decisions reflect and respond to the needs of the local community.

The new requirements will be introduced by making amendments to the Town and Country Planning (Development Management Procedure) (England) Order 2015.

As announced in the Queen's Speech (11 May), the Building Safety Bill is also expected to be introduced this year, which will establish a new building safety regime in England.

GOV.UK, National Statistics - UK House Price Index [Last updated February 2023]

- The UK House Price Index is a National Statistic that shows changes in the value of residential properties in England, Scotland, Wales, and Northern Ireland.

The UK House Price Index (UK HPI) captures changes in the value of residential properties. The UK HPI uses sales data collected on residential housing transactions, whether for cash or with a mortgage.

Properties have been included:

- In England and Wales since January 1995
- In Scotland since January 2004
- In Northern Ireland since January 2005

Data is available at a national and regional level, as well as counties, local authorities, and London boroughs.

The summary report contains:

- Headline statistics
- The economic statement
- Price changes
- Sales volumes
- The property status
- The buyer status for Great Britain (excludes Northern Ireland)
- The funding status for Great Britain (excludes Northern Ireland)
- Housing transactions distributions

Tackling mental health and wellbeing within the construction industry

© MHFA England

The construction industry reports some of the highest levels of workplace mental ill health.

Over the last three years (see publication date) Mental Health First Aid (MHFA) England has been working with Building Mental Health, the Construction Industry Training Board (CITB) and the Lighthouse Club Construction Industry Charity to create a freely available, industry-wide framework and charter to tackle the mental health crisis in the construction industry.

[Find out more about the social value of the programme](#)

Q&A with Harold Samuel Research Prize (HSRP) recipient, Dr Katharine van Someren

Research is a fundamental aspect of university life. It is used to gain a further understanding for assignments and dissertations and by academics to explore topics that will broaden our understanding of society and the world around us. The HSRP is an annual opportunity for those interested in the building environment to submit a research proposal on a topic that could offer sector-changing insights.

What is the relationship between job and financial security and mental health in the construction workplace? UCEM spoke with HSRP recipient Dr Katharine van Someren, about her research on UK construction workplace poverty. You can access [UK construction workplace poverty: the impact of financial and job insecurity on mental health](#) on UCEM's publication page to learn more about Katharine's research.

Access the article '[Q&A Harold Samuel Research Prize \(HSRP\) recipient, Dr Katharine van Someren](#)' in full.

UCEM mental health strategy

UCEM published its first mental health strategy on 10 May 2021.

The strategy is designed to benefit both UCEM students and staff, having been written with input from both stakeholder groups.

[Back to top](#)

At the core of the document is the vision which states: UCEM will take a whole institution approach to develop one community that enables students of all levels along with staff to prioritise mental health and wellbeing.

There are five strategic aims supporting this vision which are:

1. to create a supportive whole university community that promotes positive mental health, and ensures mental health is a key strategic priority.
2. to ensure the UCEM community is informed and aware of the importance of good mental health and works to tackle the stigma surrounding mental health.
3. to ensure appropriate and timely support is provided to those who need it.
4. to develop links with external support services and stakeholders
5. to use data to evaluate and monitor the effectiveness of mental health interventions and inform future strategic development.

For more details, take a look at [UCEM's mental health strategy document](#).

Access the article '[UCEM launches mental health strategy](#)' in full.

Understanding Mental Health in the Built Environment

In May 2020, the CIOB published their report on Understanding Mental Health in the Built Environment. The report, which surveyed people across the globe, presented harrowing statistics of high numbers of workers experiencing extreme levels of stress over a prolonged period, with many people reporting that they had considered taking their own life in 2019.

National Trust planning principles

National Trust (NT), a charity that works to preserve and protect historic places and spaces – for ever for everyone.

The National Trust protect historic houses, gardens, mills, coastline, forests, woods, fens, beaches, farmland, moorland, islands, archaeological remains, nature reserves, villages, and pubs. While they are very passionate about open spaces and historic places, they also work hard in other areas too, including the environment, food, farming, transport, and heritage – to name but a few.

Most of the work they do though is affected by much wider global issues, which is why their interests extend far beyond just bricks and mortar.

National Trust (NT) – “Our planning principles”

The National Trust principles are used to guide them in their decision-making on the way land is developed and managed and include:

1. **Seeking to influence** – The NT seek to influence the planning system at local, regional, and national levels,
2. **Supporting spatial planning** – The NT support spatial planning which takes a holistic approach to its environment and its resources,
3. **Sensible management** – The NT promotes the wise management of the natural environment and built and cultural heritage,
4. **Protecting our environment** – The NT will seek to protect wild and remote landscapes from built development or urbanisation.
5. **Using property management plans** – In managing its land through management plans, the NT will support and help to achieve objectives,
6. **Objecting to proposals, where appropriate** – The NT object to land use or marine-based proposals that have a significant adverse impact on its properties and their settings and context, or in its wider interests.
7. **Using a sustainable construction approach** – When proposing development on their land to meet justified needs, the NT will use a sustainable construction approach. This will include the following:

[Back to top](#)

- Minimising resource use and generation of waste,
- Being energy efficient,
- Minimising or preventing all types of pollution and risk of flooding,
- Safeguarding important wildlife, landscape, and historic interests,
- Respecting local/regional distinctiveness, supporting local sources for goods and services where practical, and
- Encouraging community involvement and access.

The National Trusts' conservation process

The NT have developed the following criteria to ensure online suitable projects proceed:

- Adhere to the policies in the relevant local plan,
- Deliver energy efficiency and reduce carbon dioxide emissions,
- Build in harmony with the local environment, built and natural,
- Involve the local community throughout the process.

[Read the National Trust Land use and planning.](#)

[Access the National Trust website and our cause](#) (including Nature and climate, History and heritage, and Communities).

Foster + Partners Projects

Foster + Partners Projects – one of the most innovative architecture and integrated design practices in the world. Over the past four decades the practice has pioneered a sustainable approach to architecture through a strikingly wide range of work, from urban masterplans, public infrastructure, airports, civil and cultural buildings, offices and workplaces to private houses and product design. By visiting their website, you can gain further information about their current and past work, upcoming projects, and gain access to their-

- Image gallery,

New RIBA Plan of work 2020

RIBA Plan of Work 2020. This blog takes a look at the new RIBA Plan of Work 2020.

What is the RIBA Plan of Work? The Royal Institute of British Architects (RIBA) first published the RIBA Plan of Work.

[Back to top](#)

in 1963. It originally provided a matrix to show the roles of participants in the design and construction processes.

It has since been updated in several editions, most recently in 2020. This has allowed it to adapt to the complexity of modern projects, industry demands and legislative and regulatory requirements.

What changed in 2020? In 2020, key changes were made to reflect the importance of sustainability and Building Information Modelling (BIM) in construction. The Plan of Work now also incorporates issues such as digitisation of the industry, Modern Methods of Construction, ethical issues, the value of aftercare and timing relating to planning applications and procurement.

This has included restructuring and renaming of the work stages from the 2013 Plan of Work:

0 – Strategic definition – no change

1 – Preparation and briefing – brief amended to briefing

2 – Concept design – no change

3 – Spatial coordination – formerly Developed design

4 – Technical design – no change

5 – Manufacturing and construction – formerly Construction

6 – Handover – formerly Handover and close out

7 – Use – formerly in use

Autodesk and CIOB map the digital construction journey

Autodesk and the Chartered Institute of Building (CIOB) have prepared an infographic to help construction businesses visualise their position on the digital journey.

[Access more information, view the infographic and read the article, entitled 'Autodesk and CIOB map the digital construction journey' in full.](#)

[Access further information from CIOB 'Digital Construction'](#)

- Digital technologies are now an integral part of our built environment. The choice is not when or if built assets will use technology, but rather how much will be used.

Building Information Modelling (BIM)

[UK BIM Framework – BIM Standards, Guides and Resources](#) - the overarching approach to implementing BIM in the UK, brought together by UK BIM Alliance, BSI and CDBB. The guidance is structured as indicated below:

Guidance Part 1 and **Guidance Parts A-F** support the implementation of the overall published ISO 19650 series. **Guidance Part 2 and 3** pick up on content specific to ISO 19650-2 and ISO 19650-3 respectively. Additional **guidance** is also available as part of the **UK BIM Framework** to support the transition to ISO 19650 and Government Soft Landings

[Access UK BIM Framework - Resources](#)

[Latest BIMPlus News and Projects](#)

[May 2023] –

- **Projects – Information management in extremis: BAM in Antarctica**, 31 March 2023.

- Ahead of his presentation at Digital Construction Week, Scott McLean of BAM reviews the role of information management in delivering the Antarctic Infrastructure Modernisation Programme (AIMP) for the British Antarctic Survey (BAS).

The AIMP is delivered by the Antarctic Infrastructure Modernisation partnership, which includes construction partner BAM and its team, design consultant Sweco, with Hugh Broughton Architects providing delivery design. Ramboll is acting as technical adviser to BAS, with architect NORR providing concept design and Turner & Townsend providing cost management. The framework is expected to continue into the 2030s.

There are many challenges with constructing in Antarctica. The primary risks are as follows:

[Back to top](#)

- The environmental standards surrounding the pristine environment,
- The location and the logistics of getting both people and equipment to site,
- Ongoing science experience, and
- The challenging weather.

Antarctica is an untouched wilderness that has a very delicate eco-system: as such all who travel there must ensure they do not bring non-native species to Antarctica with them.

In order to construct, BAM has construction seasons between November and May to make the most of the better weather. Equipment and materials are shipped by vessel from the UK. This creates another deadline for deciding and purchasing equipment and materials or they may just miss the boat.

Efficient information management – Efficient information management helps ensure that the project is delivered in a sustainable and environmentally responsible manner. The wharf achieved the first sustainability CEEQUAL award in Antarctica, for sustainable construction projects, and an excellent rating by BREEAM.

The collaboration between task teams, driven by information management, ensures that a structured approach to managing environmental information, meeting environmental performance requirements, ensuring all materials meet the strict environmental requirements, and consistent environmental reporting from site is being met. This enables the project team to take a proactive approach to sustainability, ensuring that the project is delivered in an environmentally responsible way and is sustainable for the lifetime of the asset.

Related BIM+ Projects

- **(1) Project: [John Sisk relies on BIM best practice to deliver Malmo data centre](#), 2nd November 2020.**

- John Sisk & Son is nearing completion on a data centre project in Malmo, Sweden. Adopting BIM best practice has been crucial to keep construction on programme given a fast-tracked programme amid the Covid-19 pandemic.

The John Sisk & Son team has nearly 40 years of experience in data centre construction and has brought a digital project delivery approach to the Malmo project.

Sisk highlights some significant outcomes:

- The Sisk team-built dashboards that stored live clash trend reports to track progress weekly, resulting in a 50% efficiency increase in the BIM management process compared to traditional, manual methods of construction coordination without the automating power of the cloud.
- The tight integration between BIM 360 Docs, Microsoft Power BI, and Sisk's own "Design Changes Control" dashboards provided the commercial teams with a faster way to visualise the cost and/or schedule impacts, reducing the overall take-off by a potential 40%
- By using BIM 360, the project continued uninterrupted as construction continued in Sweden during the Covid-19 pandemic.

[Back to top](#)

- **(2) Project: [Finland's Hospital Nova uses VR to involve staff in building](#), 28th April 2020.**
Lead Contractor: The Central Finland Health Care District
BIM Tools: Tridify

- Innovative processes have been used in the co-design of Finland's new Hospital Nova using BIM models and involving more than 350 staff.
- **(3) Project: [NHS Nightingale Hospital, East London – how BIM played its part](#), 5th May 2020.**
Client: Barts Health NHS Trust, Royal Free London NHS Foundation Trust
Lead Contractor: Lead Designer: BDF
BIM Tools: Autodesk Revit

- The UK's newest (see publication date) and largest hospital, based at the ExCel conference centre in London's Docklands, is designed to care for up to 4,000 people affected by Covid-19. The hospital is now in standby mode and will be used should cases in the London area rise again.
- **(4) Project: [Mace use AI tech on Mayfair project to meet Covid-19 safety challenges](#), 1st October 2020**

- Work was already underway on Lodha's No 1 Grosvenor Square flagship project when the lockdown and then social distancing added to the normal construction challenges.

Client: Lodha; Main contractor: Mace

Balancing the many requirements of a building project – cash flow, cost, quality, and timelines – is always a significant challenge for project leadership. The Covid-19 pandemic made the balancing act even more intense, costing projects valuable time at the start of lockdown and requiring adjustments to ensure the health and safety of all personnel on site as production restarted.
- **(5) Project: [AI tracks work quality at Norway's Stavanger Hospital](#), 21st June 2020.**
Client: Stavanger University Hospital
BIM Tools: 100% International open standards, compatible with Revit, ArchiCAD, Solibri and others

- Oslo-based BIM developer Imeroso has been given responsibility to monitor work progress in one of the biggest public construction projects in Scandinavia.

Property and Construction Statistics

Latest Property and Construction Statistics from RICS:

- Input from RICS Professionals ensure RICS surveys are leading indicators in the real estate industry.

[Latest: Market Surveys - RICS \[May 2023\]](#)

UK Economy and Property Market Update, May 2023

- Recession fears ease but significant challenges persist.

Summary: Economic newsflow remains generally resilient which has led the Bank of England to upgrade its growth forecast. However, concerns over inflation remain undiminished at this point which could yet lead to a further interest rate hike. At the very least, an early reversal of recent monetary tightening seems implausible. Significantly, real estate markets appear a little more settled than previously albeit activity indicators remain relatively subdued.

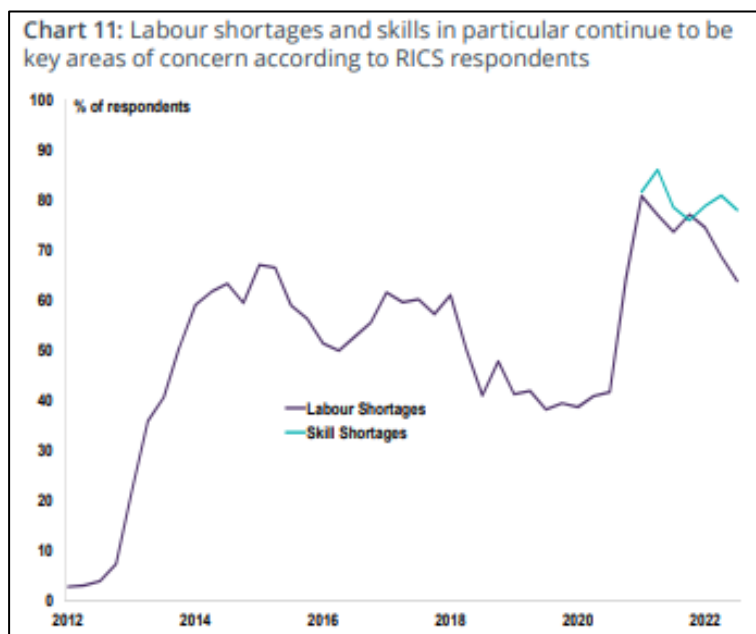

Construction Sector – The latest official data on construction activity points to a gently rising trend in output, despite the macro challenges, with total activity just over 6% above pre-pandemic levels (January 2020). Meanwhile, the *Q1 RICS Construction Monitor* also shows a modest improvement in workloads during the first three months of the year (2023).

Forward looking metrics from the survey are also painting a more upbeat picture compared with the Q4 results.

Meaningful challenges around both material costs as well as labour and skills continue to overhand the industry.

[Back to top](#)

Looking first at material costs, there is some good news with the year-on-year increase slowing to under 9% from a peak that approached 30%. Nevertheless, the direction of travel is still upwards, albeit more modestly. Moreover, the *RICS Monitor* still highlights significant concerns about this issue. At the same time, contributors to the survey remain particularly vexed by the scale of labour shortages in general and more pertinently, the difficulties in hiring skilled labour.

RICS 2023

Source: RICS Economics Research: *RICS UK Economy and Property Market Update* (February 2023), London: RICS, p5 - Chart 10.

Chart 11 shows something in the region of 80% of respondents viewing this as a factor hampering development plans.

[Read the full piece of research 'RICS UK Economy and Property Market Update, February 2023](#)

Also: [UK Economy and Property Market Chart Book, Q4 2020](#)

- Agreed sales rise over the month with expectations modestly positive regarding the near-term outlook

UK Residential Market Survey: [April 2023](#)

- Most indicators recover slightly from recent lows but sales market momentum remains weak

- Feedback on new buyer enquiries and agreed sales remains relatively downbeat,
- National house price indicator still in negative territory although marginally less so than in prior months, and
- Twelve-month sales expectations continue to depict a steadier trend further afield.

The results of the April 2023 *RICS Residential Survey* remain

[Back to top](#)

indicative of a market struggling for momentum, with higher borrowing costs and a cautious economic outlook still the main challenges. Having said that, most of the survey's indicators have edged up at least somewhat from the lows hit toward the end of last year (2022), while twelve-month expectations continue to signal a more stable backdrop coming through further ahead.

Starting with new buyer demand, the headline net balance came in at -37% in April, down from a reading of -30% in each of the last two reports when captured on a seasonally adjusted basis. Even so, the latest return, while being consistent with a renewed drop in buyer enquiries, is not quite as downbeat as the figure of -42% posted back in January. When disaggregated, virtually all parts of the UK recorded either a negative or flat trend in home buyer demand, with the exception of North Ireland (where a marginal rise was reported).

Alongside this, the agreed sales indicator returned a net balance of -19% in April, up modestly from a figure of -30% last month. In fact, this represents the least negative reading since July 2022, albeit the latest result remains subdued on a longer-term historical comparison. Going forward, near-term sales expectations are still in negative territory, but have turned progressively less downcast in each of the last four months (moving from a net balance of -52% in December 2022 to stand at -20% this time around).

Furthermore, on a twelve-month view, expectations are pointing to a largely stable trend in sales activity emerging, registering a net balance reading of +3% (little changed from +1% last month).

Although most sales market metrics have turned somewhat less negative over the past couple of months, the average sales time (from listing to completion) has continued to lengthen. Indeed, respondents report that sales are now taking close to 20 weeks to finalise at the national level, up from nearer to 17 weeks this time last year.

RICS - SPACIOUS 千居 Hong Kong Residential Monitor / Market Survey: April 2023

- Sales market loses momentum from post-Covid bounce

- Headline confidence (sales) index reverts to neutral territory,
- New buyer enquiries indicator still positive albeit less so, and
- Lettings market remains more resilient.

The April 2023 *RICS-Spacious Hong Kong Residential Property Monitor* results show market sentiment cooling somewhat. As highlighted in Chart 1, the headline Confidence Index fell from +34 to -2 between March and April. Feedback from respondents points to the post-Covid recovery losing steam in all the districts of Hong Kong; in Hong Kong Island, the confidence reading slipped from

[Back to top](#)

+18 to +4, in Kowloon from +29 to 0 and in the New Territories from +43 to -5. Meanwhile, the rental market appears to be displaying a greater level of resilience than the sales market.

Chart 1: Confidence Index*:

© RICS 2023

Source: RICS Economics Research: *RICS Hong Kong Residential Monitor – April 2023*, London: RICS, p1 - Chart 1.

* The Confidence Index is a composite measure capturing overall market momentum, encompassing variables on short-term price and sales expectations. The Home Price Perceptions Index measures the perceived monthly change in home prices as reported by survey participants, where March 2015=100. The Rent Perceptions Index measures the perceived monthly change in rents as reported by survey respondents, where March 2019=100.

[Read the latest RICS HK Residential Monitor: April 2023 in full.](#)

- *RICS-Spacious HK Residential Monitor* is a monthly guide to the trends in HK's housing market. The report is available from the [RICS website](#) along with other surveys covering global housing, commercial and land markets, as well as construction industry.

Global Commercial Property Monitor, Q1 2023

- Contrasting fortunes in real estate with much APAC and MEA recording more positive trends.

- Commercial Property Sentiment Index turns less negative at a global level,
- Regional trends are varied however, with MEA continuing to perform relatively strongly,
- China shows significant rebound in key sentiment metrics, and
- Deteriorating credit conditions remain a drag on investor enquiries in more mature markets.

[Back to top](#)

The Global Commercial Property Monitor (GCPM) Q1 2023

The Global Commercial Property Monitor (GCPM) Q1 2023 report reveals a mixed picture of the real estate environment worldwide. Interest rate increases in many countries were balance by a resilient macro environment due to stable labour markets. At a global level, the headline Commercial Property Sentiment Index (CPSI) was slightly improved from Q4 2022, edging up from -15 to -11. This improvement was mostly due to the significant pick-up in the aggregated results for the Asia Pacific region, with China’s CPSI climbing from -44 to -7. Credit conditions remain challenging, reflecting a tighter lending environment, with around 50% of respondents indicating the picture worsened over the period. The report notes that the sector trends reflect structural Changes (i.e., the increased prevalence of working from home and increased online shopping), with the office and retail sectors struggling while the appetite for industrial/logistics space remains robust.

Forward looking indicators on balance

The proportion of respondents who view the real estate market to be in a downturn globally now stands at 53% (compared to 62% in Q4, 2022), as shown in this Chart 6, with a further 15% (compared with 14% in Q4, 2022) perceiving it to be at the bottom of the cycle. **Note:** Comparisons can be made with previous *RICS Global Commercial Property Monitors* and have been covered within previous issues of *Knowledge Foundations*.

Latest Statistics from the Office for National Statistics (ONS)

[UK economy latest](#) – A roundup of the latest data and analysis on the UK economy, business and jobs following Brexit and during the coronavirus (COVID-19) pandemic.

[Construction Industry highlights include – Construction output in Great Britain: March 2023, new orders and Construction Output Price Indices, January to March 2023](#)

- Short-term measures of output by construction industry in March 2023, contracts awarded for new construction work in Great Britain and a summary of the Construction Output Price Indices (OPIs) in the UK for Quarter 1 (Jan to Mar) 2023.

What's covered in the latest bulletin?

- Monthly construction output is estimated to have increased 0.2% in volume terms in March 2023; this came from an increase in new work (0.7%), partially offset by a decrease in repair and maintenance (0.6% fall) on the month.

- At the sector level, four out of the nine sectors saw a rise in March 2023, with the main contributors to the monthly increase seen in infrastructure new work and public other new work, which increased 2.2% (£51 million) and 6.5% (£48 million), respectively.

- Quarterly construction output increased 0.7% in Quarter 1 (Jan to Mar) 2023 compared with Quarter 4 (Oct to Dec) 2022; the increase came solely from a rise in repair and maintenance (4.9%), as new work saw a decrease of 1.9%.

[Read the full statistical bulletin, 'Construction output in Great Britain: March 2023, new orders and Construction Output Price Indices, January to March 2023](#)

Built Environment Research

Latest Policy and Research from:

1) Savills Market Trends – Real estate investment in 2023: macro outlook

- Market Trends: Savills.com, January 2023

No outlook for 2023 can avoid the topic of inflation. Coming into 2023 it was the overarching theme, fuelled first by the Covid pandemic and then the invasion of Ukraine.

On the other hand, there are positive signs. Easing supply chain shortages, falling commodity prices and weaker demand more generally, point to the possibility of inflation coming down rapidly in 2023.

[Back to top](#)

And yet the main concern for the world's major central banks is the pace of wage growth; tight labour markets, fuelled by a combination of strong job creation and a constrained supply of labour, are driving wages up.

Labour markets the pivotal factor for 2023 macroeconomics -

The outlook for 2023 is therefore contingent on developments across labour markets. Central banks are shooting for the Goldilocks Zone, but pitfalls lie either side of that target.

Too much tightening and they risk crashing the economy. Too little tightening and they risk inflation becoming entrenched via the notorious 'wage-price spiral' – necessitating a modern-day 'Volcker moment' that would also crash the economy.

Given the long and variable lags in the impact of rate hikes on economic activity, finding this sweet spot in monetary policy is extremely difficult.

Their messaging reflects this dilemma; central bankers are simultaneously emphasising a "data-dependent" approach and taking it "meeting-by-meeting," while incessantly pushing a higher-for-longer narrative on future interest rates. Clearly the two are incompatible – so expect more volatility across financial markets in 2023.

World economies set for a slow start in 2023 – In the meantime

In the meantime, recent economic data reveals little positive momentum being carried into the new year, while sentiment-based indicators suggest a further deterioration in activity in early 2023.

The global economy is likely to fall into recession, led by Europe and North America, where the cost-of-living crisis is most acute. However, the downturn should be relatively short and shallow – assuming a relatively modest deterioration in labour market outcomes.

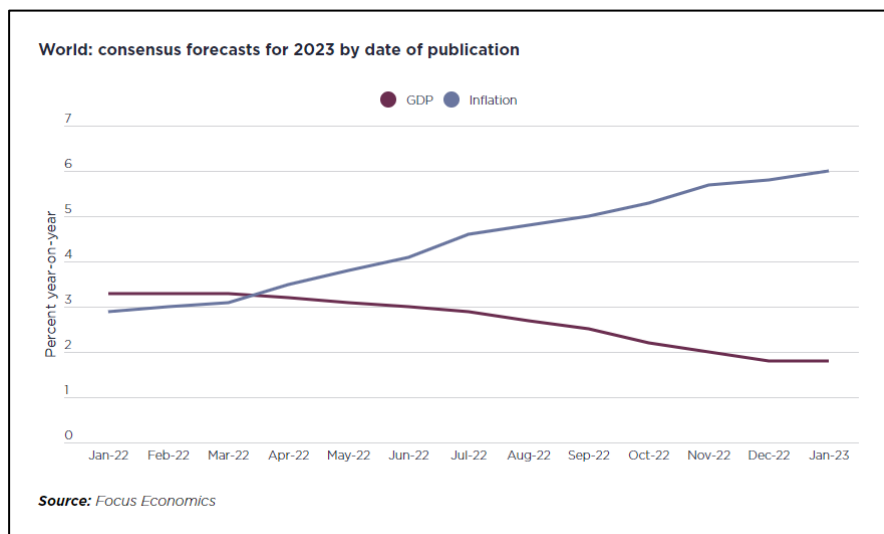

Overall, the global economy is expected to grow by just 1.8% next year (2024), well short of the 3.1% average for the decade leading up to the Covid-19 pandemic.

Fortunately, there are no obvious areas of systemic distress that could turn a recession into a depression. But there are myriad downside risks; not least in the potential spillovers from the rapid tightening of financial conditions over the past 12 months and the risk of policy misjudgements.

In the words of Warren Buffet, "It's only when the tide goes out that you learn who has been swimming naked." Highly leveraged parts of the global economy, such as housing markets, may well fall into this category. Meanwhile the war in Ukraine will continue, and warmer spring weather won't bring a sudden end to Europe's energy crisis.

[Back to top](#)

World: consensus forecasts for 2023 by date of publication

Source: Salmon, O, (2023) *Market Trends: Real estate investment in 2023: macro outlook*, Savills [online]. Available at: www.savills.com/impacts/market-trends/real-estate-investment-in-2023-macro-outlook.html [accessed 10 February 2023]

But there are also reasons for cautious optimism. Inflation has peaked, with interest rates set to follow suit. If inflation follows the path of least resistance, then the central bank pivot, which will support ailing economics, is still in play.

Developments in China are also positive. The authorities have eased zero-Covid rules; if managed correctly, this could prompt a strong domestic recovery and provide some impetus to global growth in the second half of the year.

However, if recent experience tells us anything, it is to expect the unexpected. Any exogenous shocks – relating to geopolitics, climate change, or, indeed, Covid-19 – will continue to wreak havoc on even the most conscientious of economics outlooks.

2) Joseph Rowntree Foundation (JRF) -

- Inspiring Social Change: The Joseph Rowntree Foundation is an independent social change organisation working to solve UK poverty.

UK Poverty 2022: The essential guide to understanding poverty in the UK

Related topics – Housing; Work; Income and benefits

- This is the first issue of the JRF's new-style *UK Poverty* report, which looks comprehensively at trends in poverty across all its characteristics and impacts.

What is the picture of poverty at the start of 2022, coming up to two years after a global pandemic struck? To an extent the picture is unclear: we don't yet have official poverty data covering the pandemic period, and we know that the quality of the very surveys we rely on for this information were affected by the onset of the pandemic.

But many sources make it clear that while some groups have been well supported and face better prospects as we enter 2022 (see publication date), others face deep and persistent poverty. In a way this is much better than might be expected given the economic and social shock the country has been through.

We know poverty at any stage in life can lead to negative impacts and so it is critical to scrutinise the data thoroughly to work out who is worst affected, determine how trends are changing over time and see what future prospects are.

This report gives a clear statement, agreed by JRF's Grassroots Poverty Action Group (GPAC), that we need coordinated commitment, effort and action on the intersecting issues and challenges identified in this report. This can turn back the tide of poverty, and offer security for the many people experiencing hardship across the UK.

3) The Smith Institute

- The Smith Institute is a leading independent 'think tank' which promotes progressive policies for a fairer society. They provide a high-level forum for new thinking and debate on public policy and politics. Through research, reports, briefings, monographs, events, lecturers, education, and their website, the Institute offers a platform for thought leadership on a wide range of topics.

Temporary accommodation at crisis point: Frontline perspectives from London and Greater Manchester
Farrelly, M., and Hackett, P, The Smith Institute (2022)

- This report examines statutory homelessness and temporary accommodation (TA) in London and Greater Manchester. It is a public-policy facing report to shed light on what is currently happening with the supply and demand of TA and to open up a wider discussion around what can be done to improve the situation going forward. It is not intended as an academic or technical comparative analysis of the different boroughs homelessness activities.

The findings and evaluations are based on extensive desk research and one to one interviews with housing officers and other housing professionals, housing providers, investors, politicians, experts, homelessness charities and campaigners. We also hosted two virtual roundtable discussions in the Spring of 2022 on Greater Manchester, chaired by Paul Dennett, Salford City Mayor and Deputy Mayor for Greater Manchester, and on London, chaired by Tom Copley, London Deputy Mayor for Housing and Residential Development.

Where relevant we have highlighted what specific boroughs are doing and have included examples of best practice and new ideas

[Back to top](#)

and approaches. We have laced the report with anonymised quotes from the interviews and made reference to the work of the GLA, London Councils, GMCA and other relevant organisations. We have evaluated the data and opinions and on the basis of what we've offered a series of talking points and policy recommendations.

The concept of a TA system as used in this report combines the boroughs' statutory duties under the Homelessness Reduction Act (2017) with their responsibilities under relevant housing legislation and regulations. We have also referred to the rules and regulations surrounding welfare benefits and housing policy more generally that impacts ON TA, as well as looking at local, city-wide and national plans and strategies. Although not quite a whole-system approach, the report does cover a range of inter-connected demand and supply side issues, including the different challenges the boroughs face preventing homelessness, managing and providing the different types of TA and finding settled, move-on homes.

The report covers the GLA and the 32 Greater London boroughs and the GMCA and its boroughs (Bolton, Bury, City of Manchester, Oldham, Rochdale, Salford, Stockport, Tameside, Trafford, Wigan). The data was drawn mainly from DLUHC, GLA, GMCA and other official statistics, as well as information collated by the boroughs, housing charities and professional bodies.

Pulling at the Roots: A report by the Southwark Council Housing Resident's Working Part on understanding and mitigating the economic and financial impacts of Covid for residents of council housing in Southwark

Southwark Council Housing Residents' Working Party (2021)

The Smith Institute provided support for the Southwark Council Housing Residents' Working Part on understanding and mitigating the economic and financial impacts of Covid for residents of council housing in Southwark.

To get a better understanding the Council helped establish a Council Housing Residents' Working Party (RWP), comprising tenants and homeowners in June 2021. The Working Party was tasked to examine the economic and financial impacts of the COVID pandemic, including paying special attention to who has been worst affected, what support the Borough's council housing residents have had, and what is needed to improve this morning forwards.

The RWP took oral and written evidence from Council officers, housing and debt experts, and representatives from the community and voluntary sector, considered government and Council held data on rent arrears and the impact of Covid; and conducted its own survey of over 1,800 tenants and leaseholders.

8) House of Commons Library, 9) the House of Lords Library and 10) the Parliamentary Office of Science and Technology (POST)

About the House of Commons Library - The House of Commons Library is a research and information service based in the UK Parliament. Their impartial analysis, statistical research and resources help MPs, and their staff scrutinise legislation, develop policy, and support constituents.

Watch this quick video to find out how the House of Commons Library works

Source: UK Parliament (2020) 'How the House of Commons Library works', YouTube [video]. Available at: youtube.com.

As of November 2022, the House of Commons Library updated their website that is now broken down into the following sections or subject areas:

Services that include Research, Resources, Training & Events,

Brexit and UK-EU relations – Research covering key Brexit moments negotiations the EU and its institutions and UK-EU relations after Brexit.

Coronavirus – Research relating to Covid-19 from the Commons Library and other parliamentary research services.

Economy, Business and Transport – Research on the economy, business transport and work and incomes. Also includes Economic Indicators and monthly economics updates.

Home Affairs incl. Research on communities, crime, family & civil law, justice, immigration, security, and culture, media & sport,

Parliament & Elections that include devolution, elections, government, parliament, and local government,

Science, Environment and Technology that include **Energy, Environment, Climate Change, Sciences, Local Data**

Social Policy that include **Education, Families & Social Services, Health, Housing & Planning, and Welfare & Pensions,**

World Affairs that is broken down into Africa, Americas, Asia Pacific, Defence, Europe, Institutions, and Middle East, and more.

As of **May 2023**, the latest House of Commons Library, **Research publications** incl.

1. Research for future Commons business,
2. The UK's constitutional monarchy, and
3. Energy Bill [HL] 2022-23: Overview.

Review House of Commons Library, Research for this week
As of **May 2023** the latest **House of Commons Research:**

[Back to top](#)

Under '**Education**' and within 'Social policy,' the top research briefings incl.

1. Higher Education (Freedom of Speech) Bill: Progress of the Bill,
2. Centre Assessed grades,
3. Autism: Overview of policy and services,
4. Research on the increasing cost of living and inflation,
5. The Special Educational Needs and Disabilities and Alternative Provision Improvement Plan, and
6. Careers guidance in schools, colleges and universities (England).

Under '**Housing and Planning**' and within 'Social policy,' the top research briefings incl.

1. Future of small and medium-sized housebuilders,
2. Energy Bill [HL] 2022-23, parts 7-10: heat networks, smart appliances, load control and energy performance of buildings,
3. Housing Market: Key Economic Indicators,
4. First Homes for first-time buyers (England),
5. The rights of residential and holiday mobile homeowners (England),
6. Research on the increasing cost of living and inflation,
7. The Supported Housing (Regulated Oversight) Bill 2022-23: progress of the Bill, and
8. Planning Policy.

Under '**Energy**,' '**Environment**' and '**Climate change**,' and within 'Science, Environment and Technology' include:

1. Energy Bill [HL] 2022-23: Overview,
2. Energy Bill [HL] 2022-23, parts 4-6: Electricity and gas markets,
3. Energy Bill [HL] 2022-23, parts 7-10: heat networks, smart appliances, load control and energy performance of buildings,
4. Energy Bill [HL] 2022-23, Parts 11 and 12 – Offshore wind, oil and gas,
5. Research on the increasing cost of living and inflation.

[House of Commons Library search](#) on '**construction industry**' identifies 18 key documents, that incl. 'Taxation in the construction industry', 'CITB – Construction Industry Training Board Levy', and '**The construction industry: statistics and policy, Dec. 2019**' -

Abstract: Construction industry – employment, new orders, output. [Construction 2025](#), [The Farmer Review](#) and the [Construction Sector Deal](#) (part of the government's [Industrial Strategy](#)).

Key statistics – In 2018, the construction industry contributed £117 billion to the UK economy, 6% of the total.

Economic output in 2018 was slightly down on 2017, the first fall since 2013.

There are 2.4 million construction industry jobs in the UK in Q2 2019, 6.6% of all jobs. There are more construction jobs now than at any time since 2007, although throughout this period, roughly the same proportion of jobs have been in construction.

The construction industry is unusual because of the high proportion of self-employment in the sector – 36% in Q2 2019, compared to the average for the whole economy of 13%.

New orders to the construction industry were worth £61.7 billion in 2017. This is 13% down in 2017, the first fall since 2011. New housing orders accounted for 35% of all construction orders, commercial orders accounted for 25% and infrastructure orders accounted for 19%.

e-Journal Review

Built Environment Industry Journal titles reviewed by UCEM e-Library

MODUS

MODUS - the RICS magazine that brings you the latest news and views, expert advice and in-depth features spanning the breadth of the surveying profession around the world.

In the latest digital **MODUS (May 2023)**, 'The story of Westminster Abbey's weathervanes' – The gilded bronze weathervanes were a gift from RICS in 1981 and were placed on Henry VII's Lady Chapel. Explore the original designs from the archives in detail.

Subject Terms/Keywords: Building conservation; Heritage and conservation; Projects and people.

Latest articles within **Modus**:

- **RICS celebrating the coronation** – RICE President Ann Gray FRICS offers good wishes to King Charles and Queen Consort Camilla, discusses the Scotland Conference and reminds members to complete the Survey of the Profession.

Subject Terms/Keywords: Building surveying; Learning and development; Planning and development; Quantity surveying and construction; RICS standards and guidance; and Sustainability.

- **Will 3D printed homes lead to a workforce revolution?** – The Danish firm COBOD has designed machinery that can print buildings three storeys high – and it isn't hampered by the construction industry's labour shortages.

[Back to top](#)

Subject Terms/Keywords: Building surveying; Housing; Machinery and business assets; Materials and resources; Residential; and Technology.

- **SuDS: mimicking nature to keep homes safe from flooding** – Sustainable Urban Drainage Systems help property developers meet biodiversity and nutrient neutrality requirements, while mitigating flood risk, on new housing projects.

Subject Terms/Keywords: Environmental management; Environmental surveying; Infrastructure; Infrastructure and services; Land and resources; and Water management.

- **Building the future: the challenges of art provenance** – When records of authenticity and ownership are patchy or even fraudulent, proving where valuable artworks belong becomes a lot tougher.

Subject Terms/Keywords: Data management; Ethical practice; Research; Technology; and Valuation.

- **Sangeeta Prasad FRICS on people-centric placemaking** – *Modus* profiles a career built on prizing meaningful work, collaborating with local communities and prioritising sustainable development.

Subject Terms/Keywords: Corporate real estate; Ethical practice; Housing; Project management; Projects and people; and Residential.

- **Food glorious food: how gardens create communities** – Having the space to grow our own fruit and vegetables doesn't just mean easy access to fresh food, it also helps property developers put a meaningful tick in the ESG box.

Subject Terms/Keywords: Cities and placemaking; Environmental management; Environmental surveying; Facilities management; Land rights; and Residential.

- **Will the New European Bauhaus change the way we build?** – This ambitious initiative, part of the European Green Deal, takes inspiration from the German Bauhaus movement but is focused on form, function and sustainability.

Subject Terms/Keywords: Cities and placemaking; Commercial property; Diversity and inclusion; Planning and development; Projects and people; and Residential.

- **Simmer in the city: how to cool a melting metropolis** – Scorched towns and cities are suffering the heat impacts of climate change. What cooling solutions do we have to upgrade buildings, infrastructure and the public realm?

Subject Terms/Keywords: Building control; Cities and placemaking; Commercial property; Residential; Retrofit; and

[Back to top](#)

Wellbeing.

- Do property price booms hide a looming rent crisis? –

Renters reaching retirement age can become ‘trapped tenants’ – unable to afford rent increases but without the necessary funds to buy their own home.

Subject Terms/Keywords: Ethical practice; Housing; Property finance and investment; Residential; and Residential valuation.

Also: Buildings that elevate cities: Salesforce Transit Center –

After a shaky start with a structural fault, followed by the pandemic keeping passengers at home, the new transport hub is ready for the long-term future of the city.

Subject Terms/Keywords: Cities and placemaking; Commercial property; Infrastructure; Infrastructure and services; and Projects.

and more.

Please note: In addition to *MODUS*, RICS publishes other journals that are free to view online incl.

1. **Construction Journal** - The journal helps **quantity surveyors** and project managers with the technical and professional aspects of their day jobs and keep up to date with developments and practical matters in the profession. It covers topics including contracts, cost management, procurement, construction law and regulations, communications, and project management skills.
2. **Built Environment Journal** (Incl. Building Surveying, Building Conservation, and Building Control) - Coverage keeps practitioners in the disciplines of building surveying, building control, and building conservation up to date on the latest developments, products, standards, and guidance.
3. **Land Journal** - The journal emphasises the crossovers in these practice areas and their global nature, with articles contributed by experts from all over the ..
4. **Property Journal** - The journal contains high-quality technical material in clearly defined sections, as well as some material that crosses professional groups to reach a wider audience.

- *Journal of Urban Regeneration & Renewal,* and
- ***Corporate Real Estate.***

Corporate Real Estate Journal is the essential peer-reviewed, professional journal for corporate real estate executives.

Each quarterly 100-page issue publishes high quality articles and real case studies on new thinking, strategies, and techniques in corporate real estate. It cuts through the deluge of information facing corporate real estate professionals to deliver content, which is authoritative, practical, and relevant by providing a blend of genuine thought-leadership – which expands what can be achieved with corporate real estate – with detailed, actionable advice and 'lessons learned' from industry peers.

[Back to top](#)

In-depth articles and case studies scheduled for the new volume, **Vol 12, Number 3 (2022-2023)** of ***Corporate Real Estate Journal*** incl.

Practice papers

1. The ESG challenge for real estate
2. Creating a smart building strategy
3. Building the future of library and archives Canada: Assessing readiness for transformational projects
4. UniCredit workplace transformation 2.0: Embracing the 'new normal'.
5. Navigating uncertainty: Strategies for effective medical office asset management amid economic headwinds
6. Integration of building science and data science to de-risk an affordable strategy for building decarbonisation
7. The post-pandemic workplace across specialised knowledge in-person (SKIP) organisations
8. The state of ESG investing in Canada's commercial real estate market: Opportunities and risks

Vol 12, Number 2 (2022-2023)**Practice papers**

1. Starting with purpose: How a people-first strategy can support real estate decisions,
2. Using data-driven design to create a flexible and adaptable real estate portfolio while enhancing your employee experience,
3. The role of commercial real estate in shaping our carbon future,
4. The great upgrade: Why human performance metrics will drive the future of the workplace,
5. Designing for an adaptable future,
6. The power of presence: Re-establishing collaboration and innovation amidst a virtual revolution,
7. Developing the return on workplace investment (ROWI) tool.

Other articles from *Corporate Real Estate Journal* (2022-23), Volume 12, Number 1:**Practice papers**

8. Unlocking the next wave of value in corporate real estate,
9. Modern lease monetisations: How to capitalise on market arbitrages to significantly reduce occupancy costs,
10. How technology is advancing capital planning,
11. Aligning experience data to return-to-office investments,
12. The return on investment of tenant engagement,
13. Leveraging technology for strategic workplace decisions,
14. Places to belong: Practical considerations for creating inclusive and impactful places of work,
15. Communities of work: Creating place in workplace.

e-Book Review

Managing Diversity and Inclusion in the Real Estate Sector

Clack A and Gabler J (2019) *Managing diversity and inclusion in the real estate sector* [e-book], Oxon: Routledge. e-ISBN-13: 9780429428975

Managing diversity and inclusion in the real estate sector is the first to place D&I at the centre of successful real estate and construction organisations. It provides guidance to, and most importantly, actions for professionals in the sector who want to make D&I an inherent part of the culture of their organisation. This book has been written to bring the sector up to speed with what D&I is all about and how a D&I strategy can be implemented to secure future success.

Real Estate: The Basics

Forsyth, J. and Wilcox, J. (2022) *Real Estate: The Basics*, Oxon: Routledge. ISBN-13: 9780367725433

Real Estate: The Basics provides an easy-to-read introduction to the core concepts of the industry to students new to the subject or professionals changing direction within the sector. The book encapsulates the key 'need to know' aspects of Real Estate including the 'language' of real estate; its value and contribution to countries' GDP; its primary purpose, whether as an asset or as a resource; valuation concepts; asset classes; basic concepts of land law, and of landlord and tenant law; the increased role and

[Back to top](#)

importance of sustainability and technology; and an overview of the wide range of professionals involved in the industry.

Studying at a Distance

Talbot C (2010) *Studying at a Distance* [e-book]. Maidenhead: Open University Press, e-ISBN-13: 9780335238057

This essential guide provides practical help and support for those who have not previously studied at a distance and is ideal for students returning to study after a break. It covers fundamental issues such as motivation, goal setting, time management and coping strategies. Additional coverage in this edition includes specific information on the use of new technologies in distance learning; detailed coverage of referencing, citation, and plagiarism; description of using mind maps and other techniques for planning and writing essays or reports; support for disabled students, particularly those with dyslexia; and a further resources section.

Benchmarking Library, Information, and Education Services

Roper, L. (2023) 'Benchmarking the impact, quality, and value of an academic online e-Library', in Baker, D., Ellis, L., Williams, C. and Wragg, C. (eds) *Benchmarking Library, Information, And Education Services* [print book], Cambridge MA: Chandos

The book contributes to practical outputs of general benefit to the sector, including customers, clients or stakeholders, offering ideas for how to identify comparative strengths and weakness and improve or enhance present practices regardless of how well institutions currently perform.

Note: In the book chapter I wrote, I look at benchmarking libraries, applying the latest quality research to current working practices and showing how the UCEM library and information services perform against its peers and the benefit this has in supporting the organisation's future strategic planning.

UCEM e-Library Portrait

The aim of the e-Library

The aim of the e-Library is to:

- disseminate information, share good practices, and promote current awareness to assist in underpinning written work,
- add value and depth to our students' study experience, and
- support the continuing professional development of all those working and aspiring to work in the built environment.

© UCEM 2022

Source: UCEM (2022) *Getting started with the e-Library* [video], YouTube. Available at: www.youtube.com/watch?v=iEg8DFUFiY&t=5s [accessed 5 May 2023].

At UCEM, we recognise that in an information-rich age and when everyone is pressed for time, it can be a challenge to find good-quality information when you need it.

Whether you are obtaining a qualification, undertaking CPD or researching a particular field, having access to a well-equipped library is essential.

The UCEM e-Library (accessed through the Virtual Learning Environment - VLE) is a comprehensive and valuable online resource, enabling students to access a wealth of subject-specific and credible information to support them throughout their studies and career development.

What resources are available in the UCEM e-Library?

The e-Library is made up of eleven sections and provides students with around the clock access to online searchable databases from key industry and educational sources, thousands of journals, books, and resources, UCEM's entire collection of study materials and published work and UCEM's dissertation library.

[Back to top](#)

The sections that make up the UCEM e-Library:

© UCEM 2017

Resources available within the UCEM e-Library include Up-to-date information and online searchable databases from –

Key educational sources that include- Taylor and Francis Online, Ingenta Connect, Henry Stewart Publications and HS Talks, vLex | Justis, Westlaw EDGE UK, EBSCO Business Source Premier, Emerald Insight - access to around 2600 e-Book titles and their entire 'Property Management and the Built Environment' collection of journals, and

Industry-specific sources that include- IHS's Construction Information Service, *Estates Gazette* (EG) digital journal and EG Radius, *Property Week*, RICS's BCIS – Building Cost Information Service and ISURV online information service, NEC - New Engineering Contract Academia, BSRIA – Building Services Research and Information Association, and more.

Where to find help - Overwhelmed by the sheer amount of information out there?

Not only do libraries provide us with books to read, but they are valuable tools and resources. The UCEM e-Library is continually striving for improvement and changing to meet the demands of today's technology and ever-expanding volumes of knowledge creation.

The e-Library is here to help make finding up-to-date, credible, and relevant information easier. Access the [2023 e-Library interactive brochure](#) for further information.

Building People

[Enabling connections for a competent, diverse, and valued built environment workforce](#)

© UCEM 2021

The aim of 'Building People' was to create a technology platform and collaborative network, which enables connections and seeks to reduce the skills shortages across the Built Environment. 'Building People,' a social enterprise that aims to connect people traditionally not involved in the Built Environment sector with employers seeking to plug the skills gap via an online platform.

[Back to top](#)

People Wiki:

What are you looking for?

© Building People 2021

The UK needs to build, but there is a shortage of competent and experienced workers, and the workforce we have lacks diversity. Building People joins the dots to help people find employers, opportunities, and resources, and to help employers engage with a more diverse range of talent.

People Wiki (a free, open access knowledge sharing platform for diversity and inclusion, skills and careers, and social value.) is a crucial part of Building People's ambition to create a single platform that brings together a multitude of previously fragmented information, knowledge, resources, opportunities, and needs focused on diversity and inclusion, skills and careers, and social value.

Related Link:

UCEM incubate social enterprise, Building People, becomes a fully-fledged success story

Building People, whose mission is to improve equality, diversity, and inclusion in the built environment, is now an independent entity.

Since its inception in 2018, UCEM has provided the enterprise with office space, founder job security and donations totalling £150,000. This gave Building People the perfect platform to deliver its collaborative 'dot-joining' activity, connecting people to opportunities across the built environment and enabling employers to engage with a more diverse range of talent.

With strong levels of support coming in from across the sector, both parties are in agreement that now is the time for Building People to fledge the nest and become a separate entity.

It is an exciting time for the social enterprise as it announces its three-year plan, which focuses on five key areas:

1. **Profile:** Positioning Building People as the go-to source for equality, diversity and inclusion best practice and activities, and thought leadership in the built environment,
2. **Partnerships:** Delivering maximum joined-up impact through the growth and development of Building People's supply and demand networks,
3. **People:** Enabling equality of opportunity through the provision of a simpler and more supported user experience in a fragmented careers landscape,
4. **Policy:** Aligning with and supporting the achievement and enhancement of relevant national sector policy and activity, and
5. **Planning:** Establishing a secure future of Building People as a sector-backed movement for collaborative change across the built environment.

5 practical tips for saving energy costs

Posted on 15 November 2022

- We are in the midst of a cost-of-living crisis which has spread across the globe. Significant increases to the cost of food and energy have outstripped worker's salaries, and spiralling inflation has plunged countless into poverty. While the tenth day of COP27 focussed on the decarbonising our energy systems, UCEM looked at practical ways to save energy that can be actioned without spending too much money.

1. Avoid leaving appliances on standby - The average UK household spends around £65 a year on appliances that are left on standby. This is the energy consumed by an appliance when it is not in use and not switched off at the socket. You may not think about the devices that have low-level usage when not in use, such as broadband, smart speakers and telephones, but these are the ones that are usually turned on for 24 hours a day and the amount of electricity they consume adds up.. By remembering to switch off devices more often or buying a standby saver, you could be saving yourself electricity you didn't even know you were consuming.

2. Draught-proofing windows and doors - Draught-proofing is one of the most affordable and effective ways to save energy costs. It allows you to keep the warm air in your home by blocking out unwanted gaps that let cold air in – ultimately requiring less energy to heat up your home. By draught-proofing your windows and doors, you could save around £60 a year in a semi-detached house. Similarly, you could also save around £90 a year by draught-proofing an open chimney when not in use. A lot of draught-proofing can be done through simple DIY tasks at home, or professional draught-proofing can cost a bit more but last you longer.

3. Use your thermostat effectively – A large portion of your heating bills are absorbed by heating and hot water costs. By doing something as simple as turning down your central heating by just one degree, you could be saving up to £80 a year. You could also invest in a smart thermometer, which will heat your home more efficiently by only warming the room in use. They can be controlled by your phone and adapt to how long it takes to warm a certain temperature, so it can be set at exactly the right time.

4. Monitor your water usage - Water waste is something we may

[Back to top](#)

not realise is happening in our homes, but they add up and result in a large amount of total energy and water use. A dripping tap can waste more than 5,300 litres of water a year, so it's important to keep an eye on even the smallest amounts of water waster in the homes. By spending one minute less in the shower each day, a family of four could save up to £75 a year on energy and water bills. Similarly, turning off a running tap while you brush your teeth or wash your face can save more than 6 litres of water a minute!

5. Invest in energy saving appliances, like an air fryer – While it's good to buy home appliances based on their energy ratings, it's also good to research alternative types of appliances you can buy. One big change you can make is switching to an air fryer for day-to-day cooking rather than using a gas or electric cooker. Research by Utilita showed that on average they run at £55.91 a year, as opposed to a gas cooker on £121.06 per year and electric cooker on £335.57 per year.

UCEM signs up to CIC's new 'carbon zero' climate action plan

UCEM is one of the institutions which has signed up to the Construction Industry Council's (CIC) new climate action plan.

CIC's Climate Change Panel, chaired by its deputy chairman, Stephen Hodder MBE, led on the initiative, with signatories to the plan agreeing that:

CIC BUILT ENVIRONMENT PROFESSIONS TOGETHER

Carbon Zero: the professional institutions' climate action plan

The signatories to this Action Plan agree that:

- the actions listed are necessary for dealing with the challenge of climate change;
- they will implement those actions appropriate to them as an institution/organisation; and
- they will support the other signatory institutions and organisations in delivering the remaining actions

© CIC 2021

The document, entitled 'Carbon Zero: the professional institutions' climate action plan,' was released last week and coordinates the efforts of built environment institutions in meeting the UK government's 2050 net zero emissions target.

To read the plan, head to the [CIC news story – 'CIC launches a Carbon Zero climate action plan for Professional Institutions'](#).

QSAND and the Sustainability Goals

The UN Sustainable Development Agenda, adopted by world leaders in 2015, maps out a 15-year plan to fight inequality, end poverty and tackle climate change challenges.

Quantifying Sustainability in the Aftermath of Natural Disasters (QSAND) is a self-assessment tool to promote sustainable approaches and contributing to aid the achievement of several of these 17 goals in disaster affected global communities:

Libraries' contribution to SDGs

Agenda Vision: Universal literacy

Goal 3: Good health and wellbeing

Goal 4: Contribution to quality education

Goal 5: Culture

Goals 5, 9, 7: ICT skills and access

Goals 8 & 10: Decent work, economic growth, reducing inequality

Goal 16: Access to information

Note: Information plays a vital role in just about everything we do.

(UN.org 2022)

[Back to top](#)

Note: Use of Wikis as a reference site

Wikipedia and use of other Wikis are increasingly being used by people in the academic community, as an easy source of information about anything and everything. However, citation of Wikipedia may not be considered acceptable, because Wikipedia is not a creditable source. It is important to note that whilst Wikipedia may be one of the Web's most popular reference sites, it is not classed as a credible resource because anyone can be a contributor to the website.

This can be avoided by following two simple rules:

1) Remember that an encyclopaedia (which includes Wikipedia and any other Wiki) can be a good starting point for research and not an ending point.

2) An encyclopaedia can be good for getting a general understanding of a subject before you extend your study of the subject further. But you then must consider the subject in more depth using books, journals articles and other appropriate and credible resources. What you find in these other sources of information will be more detailed, more precise, and more carefully reasoned than the summary you found in an encyclopaedia. The sources you reference/cite in your work will therefore be these more detailed sources you have used.

(Connors State College 2022)

Book Review:

Climate Adaptation: accounts of resilience, self-sufficiency and systems change

- Where is the world really heading, and what can we do about it?

This book takes an unflinching look at climate change, drawing upon the latest data to analyse what the next decades hold in store. With atmospheric CO₂ at unprecedented levels and insufficient action being taken to prevent a rise in temperatures above 2 degrees centigrade, we are not just looking at significant disruption but the possibility of societal collapse. For the first time ever, the magnitude of this challenge is faced head on, with avenues to truly address it presented. Case studies and models from sixteen authors around the world show ways that we can build adaptation and resilience, as well as what 'zero emissions' really mean. The book also provides a platform for those from a range of diverse backgrounds, whose unique experience and knowledge brings vital new perspectives.

To make sure that information is available in the right place and at the right time to support others, the e-Library ensures that the information services comply with data protection and copyright.

Data Protection

With new technologies constantly emerging and us finding ourselves moving further into an ever more digital direction, our personal data, how it is used and who has access to it becomes a growing and global concern for all.

The General Data Protection Regulation (GDPR) was the first legislative change in recent years to address these concerns, with a broad aim to invoke a cultural shift in the way organisations manage personal data.

Further information, advice, and guidance on Data protection, GDPR and more can be found at the Information Commissioner's Office (ICO), the UK's independent authority set up to uphold information rights in the public interest, promoting openness by public bodies and data privacy for individuals.

The Copyright Licensing Agency Ltd (CLA)

The CLA are a licensing body as defined by the Copyright, Designs and Patents Act 1988 c.48 (as amended) ["CDPA"]

The CLA licence organisations to copy and re-use extracts from print and digital publications on behalf of copyright owners – authors, publishers, and visual artists. By 'copying' the CLA means photocopying, scanning and re-use of content from magazines, books, journals, electronic and online publications, as well as press cuttings or documents supplied by a licensed third party.

Having a CLA licence helps to reduce the risk and potential cost of copyright infringement. This requirement applies to any organisation in the business, education, public or charitable sectors. **Note:** UCEM holds a **CLA 'Higher Education Photocopying and Scanning Licence'**

[LATEST: Access the newly upgraded Copyright Licensing Agency \(CLA\) website for further information](#)

CLA Check Permissions tool

The **[CLA Check Permissions tool](#)** is an online search tool that lets you quickly find out what you can copy under your organisation's CLA licence. Whether you'd like to photocopy and distribute an article to colleagues or upload a report to an intranet or VLE, the CLA Title Search simplifies the steps required to ensure compliance.

UCEM is committed to advancing information governance and compliance, ensuring that the services we provide comply with **GDPR, Data Protection, Records Management, Copyright, and Information Security.**

Part of my role as involves keeping abreast of the latest developments and benchmarking the work I do against that of others. I also undertake regular Continuing Professional Development (CPD), and an element of this is attending the CITE Forum attending events and conferences provided through my professional body, CILIP – The Library and Information Association, and others.

CILIP's National Copyright Conference 2023

This national and virtual conference was held on 16th May and in association with Naomi Korn Associates, as well as great speakers and further experts in the field in attendance.

[#CILIPCopy23](#) / [#copyright](#)

[Back to top](#)

The Annual CILIP Copyright Conference provided a unique and important chance to update knowledge about the crucial copyright and licensing related issues and developments. It also provides an invaluable forum for in-depth presentations by UK experts, informed debate and opportunities to ask questions.

This conference provided an opportunity to delve deeper into copyright issues and gain a better understanding of how policy impacts on libraries and the information sector and covered the following:

- **Copyright, ethics and creator's rights,**
- **Government Copyright Policy following Brexit,**
- **International Solutions for Orphan Works and Their Applicability to UK Cultural Heritage Organisations,** and
- **Using the copyright exceptions to share content online.**

Sessions covered broad copyright impact for the profession incl.

- **Keynote: Close Encounters of the Copyright Kind: Locating the law in the everyday lives of creative practitioners**

Dr Smita Kheria, Senior Lecturer in Intellectual Property Law at Edinburgh Law School

In this talk, Smita drew upon empirical insights from her various funded projects that examined how copyright intersects with the everyday lives and practices of a range of creative practitioners (professional writers, illustrators, visual artists, musicians, and performers, as well as arts and humanities researchers and their creative collaborators, and online creative communities). She discussed how the role and value of copyright is perceived and understood by different types of creators and considered the similarities and differences in perspectives across divergent creative practices, while appraising the influence of underlying power dynamics, shifting business models, and evolving technologies. The talk concluded with some thoughts on how an appreciation of creators' perspectives on copyright could assist libraries and information organisations.

- **Navigating the copyright complexities of The British Library's *Unlocking Our Sound Heritage* project**

Matthew Lambert, Head of Copyright, Policy & Assurance, British Library

The British Library's NLHF funded *Unlocking Our Sound Heritage* (UOSH) project is a 5-year project aiming to preserve over 300,000 endangered sound recordings and make as many of them publicly available as possible. The project is now coming to the end of its fifth and final year and so this seems a good time to talk about the copyright complexities and look at the routes taken to navigate them.

[Back to top](#)

This has included:

- Difficulties of assessing copyright at scale and in complex works such as sound recordings with many layers of embedded rights.
- Clearance, both individually and at scale.
- LOML and ERA licenses.
- 'Clearance' of world and traditional music content e.g., seeking consent from community leaders where performers cannot be identified.
- Appropriateness of different license types for different content.
- Developing due diligence processes to research rights holders and manage risk.
- Making content available on site via dedicated terminals where clearance was not possible.

This session also touched on related issues such as:

- Assessing oral histories and managing data protection / sensitivity issues.
- The impact of Brexit and lockdown during the project

- **AI & IP: Where are we and where are we going?**

Ben White, Researcher at the Centre for Intellectual Property and Management, Bournemouth University

In 2014 the UK government was the second country in the world to introduce a copyright exception for text and data mining even though it was limited to non-commercial uses. Since then, European Union has introduced two exceptions permitting differing forms of commercial use.

Despite AI having huge economic importance, the UK is lagging behind many industrialised economies in terms of IP regulation of artificial intelligence. With a retreat from the Intellectual Property Office looking likely over introducing an updated exception for AI, this talk gave an up to date look at where we stand in this crucially important area of our economy.

- **Orphan Works post-Brexit: What next?**

Naomi Korn, Managing Director, Naomi Korn Associates

Orphan works - works that are in copyright but where the rights holders are unknown or cannot be traced - are a global, unsolved problem representing likely billions of items. Orphan works are particularly problematic for libraries and cultural heritage organisations who are the custodians of much orphan works material and can be committed to make them available online. Challenges can include the balancing of legal compliance versus organisational objectives, often resulting in laborious and time resource efforts in trying to locate rights holders.

[Back to top](#)

Following the UK's departure from the EU, the UK is no longer able to benefit from the EU Orphan Works Exception which provided a limited but helpful solution for the online publication of certain orphan works. Whilst the UK's Orphan Works Licensing Scheme (OWLS) remains in place, it has widely been criticised. Drawing on initial research as part of her PhD, Naomi describes and analyses the OWLS as a possible solution for orphan works. Naomi also discussed the range of orphan works international solutions which are available and critically analyse their viability to the UK's library and cultural heritage sector.

- **Can you ever use Copyright Exceptions when sharing copyright materials with a global audience?**

Debbie McDonnell, Intellectual Property Manager, British Council

We are working in an increasingly global setting – whether sharing materials with students in another country or devising digital resources aimed at an international audience. The UK copyright exceptions were updated 9 years ago to make them more suitable for the digital age – but can we use them at all for online activities where the materials will be used in many different countries?

Each country has its own copyright law with its own exceptions, however Debbie McDonnell, IP Manager from the British Council talked us through how exceptions function in a global setting and share some low and high-risk strategies for using copyright materials outside the UK under copyright exceptions or other means.

- **CLA Licensing and Product Innovation**

James Bennett, Head of Rights and Licensing, Copyright Licensing Agency (CLA) provided an update on the Copyright Licensing Agency's latest licensing initiatives.

- **Complicated copyright: What people want to know.**

Margaret Haig, Head of Copyright Operations, Intellectual Property Office (IPO)

Explaining the copyright framework to users and rights holders, as well as the general public and businesses, is one of the roles of the Intellectual Property Office. But with so many possible areas to cover, how do we choose areas on which to provide guidance? What do we include in our presentations? How can we get a wider audience for that guidance? This session will cover some of the trends in the copyright enquiries we receive, the guidance provided by the IPO to different audiences, and the copyright notice service. The session will also invite attendees to set out what copyright subjects would form a useful focus for future guidance.

Further information is available at: CILIP (2023) '[CILIP Copyright Conference 2023 programme](https://www.cilip.org.uk/events/cilip-copyright-conference-2023-programme)'. CILIP.org.uk, Events.

The Challenges of Remote Working at Present

- The challenges of remote working at present and point to consider from a data privacy perspective. Provided within this article are points to consider from a data privacy perspective that include:

1. **Have a clear statement to all staff** stressing that “The protection of personal data that we hold, and use is important to us and must be always handled in a way that is compliant with data protection law and our Data Protection and Privacy policies. While we must adapt to comply with the official guidance, we will adjust our working processes to allow us to deliver our services. These are time limited instructions that will be kept under review. At the end of the period then all data that is held temporarily on personal devices as a direct result of this exceptional times, will be deleted.” (Tullo 2020)
2. **Set out what use of data**, contact lists, customer documents are being allowed.
3. As part of this exceptional response to homeworking **keep a full record of where staff are working from and what equipment they are using.**
4. **State that you have assessed the best way of ensuring homeworking efficiency** and are proposing that personal devices and mobile phones can be used. That you will review this [weekly seems sensible at present] in line with experience and how staff report it is working.
5. **Reissue and emphasize your usual security arrangements –** Virus and password protection, not leaving data visible to others, having a PIN code, or not sharing their device with others in their family or household.
6. **Take care to be aware where data is being stored**, even if temporary so that the security risk is managed and assessed.
7. For the **weekly reviews –** have your Senior Leadership Team note the number of staff using personal devices, any queries, or issues they are finding and demonstrate that you are monitoring the situation and are flexible in closing it down if any specific concerns arise.
8. Choose your collaboration tool of choice and consider recording online meetings and note actions especially where team members are geographically spread out and where broadband speeds and kit may vary in quality.
9. You might also consider having a standard introduction for homeworking staff to explain that they are homeworking and not in the office, so callers understand the position.
10. This is where a nominated Data Protection Officer (DPO) or Data Officer can support the senior team in the messaging to colleagues.

There are growing numbers of tips and survival guides online that include: Information Commissioner’s Office (ICO) [Data protection and coronavirus: what you need to know](#).
